14 CFR Parts 204 and 291

[Docket No. 44036, Notice No. 86-4]

Aviation Proceedings; Limitation on Fitness Determination; Revocation of Operating Authority

AGENCY: Office of the Secretary, Department of Transportation.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department is proposing to adopt a rule that would automatically revoke the authority of carriers who do not begin operations within one year of being found fit or who, having began and then ceased operations, remain dormant for any subsequent one-year period. It would do so by substituting provisions to this effect for the existing 204.8 and 291.15. These sections currently required a new fitness determination for dormant carriers proposing to start operations, but they do not terminate the authority of carriers that choose not to start service at all or that, having started and stopped, choose not to resume.

DATE: Comments on this proposed rule must be received on or before June 26, 1986.

ADDRESS: Comments should be directed to the Documentary Services Division, Docket 44036, Office of the Secretary, Department of Transportation, 400 Seventh Street, SW., Room #107, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Jeffrey B. Gaynes or Patricia T. Szrom, Office of Aviation Operations, Department of Transportation, 400 Seventh Street, SW., Room 6402, Washington, DC 20590. (202) 472-5418 or (202) 755-3812.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this rulemaking action by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions. Communications should identify the regulatory docket number and be submitted in duplicate to the address listed above. Commenters wishing the Department to acknowledge receipt of their comments must submit with those comments a self-addressed stamped postcard on which the following statement is made: Comments on Docket No. 44036. The postcard will be date/time stamped and returned to the commenter. All communications received between the specified opening and closing dates for comments will be considered by the Assistant Secretary For Policy and International Affairs before taking action on any further rulemaking. Also, this proposal may be changed in light of comments received. All comments submitted will be available for examination in the rules docket both before and after the closing date for comments. A report summarizing each substantive public contact with DOT personnel concerned with this rulemaking will be filed in the docket.

Background

Under section 401(r) of the Federal Aviation Act of 1958, as amended, the fitness requirement for those carriers holding a certificate under section 401 is a continuing one. The Department of Transportation has the authority under section 401(r), after notice and hearing, to modify, suspend, or revoke an air carrier's certificate if it is no longer fit, willing, and able to operate, or if it violates any Department reporting requirements to implement the continuing fitness requirement. Similar provisions apply to commuter air carriers and section 418 all-cargo carriers. The FAA and the Department can directly monitor the continuing fitness of carriers that are actually operating in air transportation. Carriers that are not operating, even though they have been certificated or otherwise authorized to provide service for which a fitness finding is needed, pose a special problem of how to review their continuing fitness.

In June 1982, the Civil Aeronautics Board sought to address this problem by amending Parts 204 and 291 of the Board's Economic Regulations.[1]

The new rules, condified as §§ 204.8 and 291.15 of the Regulations, sought to ensure that carriers who had been found fit but who had not operated for two years or more would have their fitness reevaluated before they could begin (or resume) operations.

The Board's action rested on the assumption that when a carrier did not begin service for an extended period following a fitness determination, the carrier's plans that formed the basis of the fitness determination would have greatly changed. The Board thus had "no assurance that the applicant found fit is essentially the same applicant that begins service years later." 45 FR 73068, November 4, 1980. The Board concluded that two years was the longest time that it could reasonably assume that a fitness finding remained valid. Beyond two years, a new fitness evaluation was necessary. New data must be submitted to permit such an evaluation.

In the meantime, though, the carrier would retain its certificate. That is to say, while the carrier could not operate under the certificate until the new fitness review was complete, the certificate itself would not be revoked. The new rules required a fitness reevaluation only when dormant carriers actually planned to begin operations. Thus, nothing in the rules barred dormant certificated carriers without plans to operate from keeping their certificates indefinitely. In short, the rule did not in any way address the intrinsic merits or demerits of certificate dormancy *per se*.

Several factors explain this approach. One important factor was procedural. At the time the new rules were developed, the Board subjected most new certificate applicants to oral evidentiary hearings. These could be complex, lengthy, and burdensome to the applicant, as well as a drain on Board resources. Once an applicant had successfully passed through this process and been certificated, the Board understandably felt that while an extended period of dormancy might cast doubt on a carrier's current fitness to operate, simplified (show cause/non-hearing) procedures were preferred in establishing whether the doubts were justified. The carrier generally should not be subjected to another oral hearing. If the carrier's certificate had been revoked for dormancy and the carrier later reapplied, it would have stood in the guise of a new applicant and been subjected to the rigorous initial certification procedures. The new rules, by leaving the dormant applicant still certificated, provided an acceptable "half-way" approach. By not requiring certification *de novo*, they allowed for much greater administrative flexibility and an easing of the regulatory burden.

They also served the Board's then prevailing regulatory philosophy. Although adopted in 1982, the new rules originated in a Notice of Proposed Rulemaking adopted in October 1980.[2]

---

[1] Regulations ER-1307 and ER-1308, 47 FR 52979 and 52981, November 24, 1982.

[2] 45 FR 73065, November 4, 1980.

This was still at a critical early period of airline deregulation. The focus at that time was still very much on relieving to the extent possible the legacy of 40 years of restricted market entry. The Board did not want to appear to detract from deregulatory principles by placing a threat of revocation over new entrants. Revocation for dormancy would have been seen as arguably inconsistent with this philosophy, especially when viewed in the light of the just described procedural burdens places upon new applicants.

Most important, though, at the time the new rules were developed, the Board's experience under deregulation was still relatively limited. The Board had yet to realize the vast numbers of carriers that would secure authority but then not use it. Nor could the Board appreciate the full impact this would have on its ability to perform the continuing fitness function. Thus, the Board as yet had no concrete basis on which to conclude that the mere fact of dormancy might justify a carrier's loss of authority. In these circumstances, it chose to leave aside the issue of dormancy *per se* and to address dormancy only as it related to the imminent starting of operations.

By 1984, the Board's experience had grown considerably. So had the number of dormant certificate holders. The Board realized it was facing an ever increasing problem of simply keeping abreast of the universe of certificated carriers. Unless it could correct this situation, fulfilment of its 401(r) responsibilities would be jeopardized. Gradually, the Board was coming to realize that dormancy *per se* could be a problem. The Board responded with a compromise approach that sought to meet the growing problem without upsetting the policies that had guided the 1982 rules.

Specifically, the Board canvassed its records for carriers that had been dormat for extended periods—generally one year or more. It then sent the carriers letters by certified mail seeking to learn if the carriers still wished to retain their authority. If a carrier responded affirmatively, no further action was taken. If a carrier responded negatively or failed to respond, the Board issued a show cause order to revoke its authority under section 401(r). If a carrier objected, the tentative decision to revoke was rescinded. Only if a carrier did not object did the Board revoke its authority. Objecting carriers did not have to show immediate plans to operate nor submit new fitness data. In essence, they needed do little more than answer their mail. If they did, they theoretically could remain non-operational in perpetuity.

Thus, the new approach retained the spirit of the 1982 regulations in not attacking dormancy *per se*. At the same time, it succeeded in eliminating the limited segment of dormat certificates in the hands of entities that had become moribund or had lost any remaining interest in commencing air operations. As such, it was helpful in reducing somewhat the scope of the universe that the Board had to monitor under section 401(r) of the Act.

The Board followed the approach in a number of 1984 orders.[3] After sunset, having encountered the same difficulties that had motivated the Board, we continued the approach.[4]

Just as with the Board, though, as our experience has grown, so has our awareness of the problems in fulfilling our section 401(r) mandate. While a useful step, the approach developed by the Board in 1984, and that we have since followed, still does not answer our current concerns. We must go further in the direction that the Board had already begun.

For we have come tentatively to conclude what the Board in 1984 was intuitively beginning to sense: namely, that long dormat certificates present inherent problems, and that keeping them alive on mere request, subject to evaluation only when operations are imminent, presents serious risks incompatible with the performance of our continuing fitness review function.

We recently discussed one aspect of this problem at length. In Order 86–1–11, at 3–4, we said:

> [T]here are important fitness concerns which do not arise from a dormant carrier's imminent operations and which section 204.8 does not address—and was not intended to address. Our principal problem in this area had been that certificates of long-dormant carriers have been, and continue to be, a source for those who seek to avoid our fitness requirements by buying an existing but unused certificate. We had to address this problem in a series of regulatory actions earlier this year. *See* Orders 85–5–45 and 85–2–4. We currently are investigating several other incidents of this nature. The common thread in all these cases has been the central role played by a dormant certificate. While we could, of course, continue to respond in an *ad hoc*, after-the-fact fashion, experience has demonstrated the need for administrative action that limits the potential for harm to the public and makes such future corrective responses unnecessary.

It is precisely such action that we propose to implement by this rulemaking.

But our concerns go beyond the problem of potential trafficking in certificates alluded to above. They go to something far more fundamental. For we now have come to realize that in a universe so full of dormant certificates, we simply cannot rely upon a system that leaves retention of a certificate solely to the discretion of a dormant carrier to advise us of developments affecting its certificate authority. In the CAB's and our own desire to ease the reporting burden on certificated carriers—a policy we intend to maintain—we have left ourselves in a position where we often remain uninformed of even the most fundamental changes affecting dormant carriers during the period of their dormancy. In these circumstances, a period of two years after our initial fitness finding now appears to be too long to permit carriers to begin operations without our taking a fresh look at their fitness.

We now believe, based on our own and the CAB's accumulated experience, that after one year, fitness findings for dormant carriers are essentially no longer valid. We have decided that the best way to deal with our section 401(r) responsibilities is to ensure that authority that is supported by stale fitness findings automatically ceases to exist. The device we are proposing here, automatic revocation for dormancy after one year, will give us a key tool to carry out our section 401(r) responsibilities.

Where a certificate has long been dormant, our very ability to monitor the holder's status is seriously compromised. During an extended period of dormancy, carriers tend to undergo substantial changes in management, financial resources, and even compliance disposition. They often fail to comply with our insurance and reporting requirements. They may move their offices (often without notifying us), enter into receivership, or even cease to exist. Meanwhile, they retain their certificates, a retention which implies to the world that they have continued to be found fit by the U.S. Government. The nature of these changes, of course, is not new. Indeed, some of these changes were cited in the rulemaking establishing §§ 204.8 and 291.15. What *is* new is the unforeseenably high number of carriers who have sought authority but then failed to use it.

As of April 1, 1986, there were 288 carriers holding certificates under section 401 or 418. Of these, 103 were dormant. Only 14 of the 103 were

---

[3] *See, e.g.*, Orders 84–12–101, 84–12–17, and 84–9–16.

[4] *See*, Orders 86–1–11 and 85–3–77.

certificated within the preceding twelve months. Eliminating from the 103 those carriers whose certificates were in the process of revocation under the Board's 1984 approach, and those carriers who had undergone two-year fitness reviews or other recent evaluations, there still remained over 70 dormant carriers that we would need to monitor. With so many carriers, many or all of which are undergoing the types of changes we described, it has become difficult if not impossible for us to say with confidence that a dormant carrier remains fit. At a time of staff shortages and severe budgetary constraints, we simply cannot oversee so broad a universe of dormant authority and be confident that the public is fully protected.

The Rule

To respond to the problems just described, we are proposing to rescind §§ 204.8 and 291.15 and to establish a new rule whereby all air carriers receiving authority for which a fitness determination is required must either begin operations within one year of its receipt, or be deemed no longer fit and have their authority automatically revoked.

Furthermore, carriers who secure authority, begin operations within the year, but then cease operating would have one year from the date they ceased operations to begin again. If they did not resume, their authority would be revoked. If they sought to resume within the year, they could do so only after notice to the Department. Such notice must include information of any substantial changes in operations as well as in the carrier's management, financial position, or compliance disposition, as prescribed by our regulations. The Department would conduct fitness inquiries where appropriate.

Existing carriers, regardless of when they received their last fitness evaluation, would get one year from the effective date of the rule in which to operate, but they must in every instance file a notice and updated fitness information as just described, before they could begin operations.

The procedures for these notice/information requirements would parallel those currently in effect under §§ 204.8 and 291.15, although the advance filing period would be shortened (from 90 days to 45 days) to ease the burden on carriers actively interested in starting or resuming service. Exemptions from even the shorter period could be granted for good cause shown. While we must provide our staff with an adequate opportunity to review the information we receive and to clarify any unresolved questions, we do not intend our rule to prevent carriers whose continuing fitness can be readily established from quickly resuming operations. Thus, for example, if a carrier had a planned structural reorganization that called for a brief system-wide shutdown and rapid resumption of service, such as within a matter of just a few days, we would expect that an exemption from the 45-day advance filing requirement normally would be available to allow for service to resume as the carrier intended.

By "begin operations", we would mean using any authority of the same type for which fitness findings had been made, *i.e.*, authority of a type that would not represent a "substantial change" under our regulations. Thus, if a carrier had been found fit and received a section 401 certificate for scheduled foreign air transportation but was not serving all of its foreign routes, the rule would not call for revocation of the dormant foreign route authority.[5] But if a carrier had been found fit both for charter and for scheduled foreign air transportation and was only using the charter authority, then the scheduled authority would be revoked. Similarly, if a carrier had been found fit for both section 401 passenger operations and section 418 cargo operations but had not operated under the section 401 certificate, then its passenger authority would be revoked.

Furthermore, we intend "begin operations" to mean actually conducting flights.[6] We do not want to encourage carriers to engage in the various activities associated with providing air service, such as advertising, taking reservations, selling, ticketing etc., solely for the purpose of avoiding revocation at a time when they have no genuine plans to fly.

Saying this, we recognize that a certain amount of lead time is essential before a new or long dormant carrier can put its flights in the air. Where good cause is shown, we will be prepared to grant exemptions from this rule to accommodate the needs of carriers seriously endeavoring to inaugurate air service.

We do not expect to be granting such requests frequently or routinely, however. Our experience has shown that of the 89 previously non-operating carriers certificated since the 1978 Airline Deregulation Act that actually began operating and currently hold authority, 69—nearly 80 percent of the total—inaugurated service within one year of certification.[7] Most of the remaining 20 carriers that eventually operated began within the first half of the second year following certification; they almost certainly were advanced enough in their preparations at the twelve-month mark following certification to have made an adequate showing for an exemption from the start-up rule.

We thus see the new rule as having virtually no negative impact on the carriers that are truly interested in entering the marketplace and commencing operations. The carriers who will be affected—and this is precisely our intent—are those carriers who, while having undergone initial and sometimes subsequent fitness determinations, have simply remained dormant and appear destined to do so for the foreseeable future. In light of the difficulties we described above, when we balance the benefits of keeping alive these long dormant certificates against the costs in terms of our ability to fulfill our continuing fitness role, and the potential harm to the public if we fail in that role, we tentatively conclude that a revocation policy is now essential.

In saying this, we do not mean to imply any weakening in our commitment to the liberal entry principles of deregulation. A critical predicate to our tentative conclusions here is the fundamental change that has occurred between DOT and CAB procedures on certification of new entrants. As we noted above, the CAB subjected new entrants to lengthy and burdensome fitness proceedings. The more streamlined procedures of §§ 204.8 and 291.15 were at least a partial response to this.

The Department has followed an altogether different approach. We have eschewed oral hearing procedures except in the most extraordinary circumstances. We have processed virtually all initial fitness applications on a purely paper record and generally without the multiple rounds of exhibits and briefs associated with formal proceedings. The result has been that new applicants are being certificated

---

[5] This does not mean, however, that we might not choose to revoke the authority for other reasons, such as under section 401(g)(3) of the Act.

[6] In this connection, we intend to work closely with the FAA in monitoring the status of previously dormant carriers.

[7] When the CAB adopted §§ 204.8 and 291.15, it naturally had only limited experience on which to base its assessment of the time new carriers normally would need to begin operations. It thus looked to a prominent case, Midway Airlines, which involved an 18 month startup, in concluding that a two year period might be necessary. The experience we have now developed shows that the Midway example was in fact atypical and that a one-year period should be sufficient in nearly all instances to allow time for startup.

quickly and with a minimum of regulatory interference.

The obvious consequence of this simplified approach is that revocation need no longer represent a significant procedural barrier to future entry. A carrier that obtained a fitness determination, failed to operate, and thus lost its authority, could reapply without prejudice. If the authority sought in its new application were comparable to that sought in the old, and if previously submitted materials were still valid, the carrier would have little more to do than what had been required under §§ 204.8 or 291.15. The major distinction would be that until the carrier reapplied, and pending completion of the new certificate process, the carrier would be without a certificate. From a practical standpoint, this should not represent a significant difference to the carrier. In terms of the carrier's ability quickly to enter the marketplace, little will have changed.[8] But it represents a critical difference to the Department, since that is one less dormant certificate we must monitor.

Thus, under the proposed rule, the procompetitive policies of the Act will be preserved. But they will be preserved in a way fully consistent with our duty under the fitness function to protect the traveling and shipping public. This need to balance a liberal entry policy with a heightened vigilance on fitness was at the very heart of the amendments to section 401(r) in the Airline Deregulation Act. What we propose today simply represents an additional mid-course correction, following upon corrective steps already begun by the CAB, and based upon the additional years of deregulation experiance. It is thus no more than a further step designed to achieve the balance that Cngress plainly intended all along.

Executive Order 12291, Regulatory Flexibility Act, and Paperwork Reduction Act of 1980

This proposed action has been reviewed under Executive Order 12291, and it has been determined that this is not a major rule. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographic regions. Furthermore, this proposed rule would not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. These proposed regulations would result in no net change in reporting burden for certificated air carriers. Accordingly, a regulatory impact analysis is not required.

This proposed regulation is significant under the Department's Regulatory Policies and Procedures, dated February 26, 1979, because it involves important Departmental policies. Its economic impact should be minimal and a full regulatory evaluation is not required.

I certify that this rule will not have a significant economic impact on a substantial number of small entities.[9] The ability of such entities to engage in certificate operations essentially will be unaffected by the proposed regulation.

Economic Impact Analysis

Because of the Department's streamlined certification procedures, carriers needing to reapply for certificate authority by virtue of this rule would face filing requirements and procedures closely comparable to those that exist under the Department's current continuing fitness rule. The proposed rule's impact therefore should be minimal and a full regulatory evaluation is not required.

List of Subjects

Air Carriers, Reporting and recordkeeping requirements.

14 CFR Part 291

Administrative practice and procedure, Air carriers, Freight, Reporting and recordkeeping requirements.

Proposed Rule

For these reasons, the Department proposes to amend 14 CFR Chapter II as follows:

PART 204—[AMENDED]

1. The authority citation for Part 204 continues to read as follows:

Authority: Secs. 204, 401, 407, 416, Pub. L. 85-726, as amended, 72 Stat. 743, 754, 766, 92 Stat. 1732; 49 U.S.C. 1324, 1371, 1377, 1389.

2. The existing § 204.8 in Subpart A of 14 CFR Part 204, Data to support fitness determinations, would be rescinded, and a new § 204.8 would be added, to read as follows:

§ 204.8 Revocation for dormancy.

(a) Except as provided in paragraph (b), an air carrier that has not begun initial operations to provide the air transportation for which it was found fit, willing, and able, and for which it was granted authority by the Department or by the Civil Aeronautics Board, within one year of the date of that finding, or that, for any period of one year after the date of such finding, has not provided any air transportation for which that type of finding is required, shall be deemed no longer to continue to be fit to provide such air transportation and, accordingly, its authority to provide such air transportation shall be revoked automatically.

(b) For all air carriers that were the object of fitness findings made by the Department of Transportation before the effective date of this rule, or made by the Civil Aeronautics Board, the one-year periods referred to in paragraph (a) of this section shall each run from the effective date of this rule and not from the date of those fitness findings.

(c) An air carrier found fit by the Department of Transportation after the effective date of this rule and that begins initial operations within one year but then ceases operations, shall not resume operations without first filing all the data required by §204.4 or §204.7, as applicable, at least 45 days before it intends to provide any such air transportation. The Department will entertain requests for exemption from this 45-day advance filing requirement for good cause shown. If there has been no change in data submitted previously in connection with a prior evaluation of the carrier's fitness, the carrier shall file a statement to that effect signed by one of its officers. The carrier may contact the Chief, Special Authorities Division, Office of Aviation Operations, to find out what data are already available to the Department and need not be included in the refiling. A carrier to which this paragraph applies shall not provide any air transportation for which it is required to be found fit, willing, and able until the Department either decides that the carrier continues to meet that

[8] It might be argued that at least one thing will have changed. Under the old rules, during months 13–24, dormant carriers could enter the marketplace with no regulatory involvement whatsoever. Now, they conceivably could have to undergo new—albeit streamlined—fitness evaluations if still dormant in that period. However, as we pointed out, an exemption would be available on proper showing. More important, even under the Board-adopted rules, dormant carriers were not assured they would enjoy a full two years before having to resubmit to a fitness determination. The Board's NPRM stated expressly that "If necessary, the fitness of a carrier could be reassessed before the two year period has elapsed." 48 FR 79268, November 4, 1983.

[9] For purposes of its aviation economic regulations Departmental policy categorizes certificated air carriers operating small aircraft (60 seats or less or 18,000 pounds maximum payload or less) in strictly domestic service as small entities for purposes of the Regulatory Flexibility Act.

requirement, or finds that the carrier is fit, willing, and able to perform such air transportation. During the pendency of the Department's consideration of a data submission under this paragraph, the revocation period set out in paragraph (a) of this section shall be stayed. If the decision or finding by the Department on the issue of the carrier's fitness is favorable, a new one-year revocation period will begin, effective as of the date of the Department's decision or finding.

(d) The provisions of paragraph (c) of this section shall apply to all air carriers that were the object of fitness findings made by the Department before the effective date of this rule or made by the Civil Aeronautics Board, who either are not now operating under the authority for which they were found fit or who are operating under such authority but later cease operations and seek to resume before expiration of the one-year revocation period.

(e) For purposes of this section, the date of a Department decision or finding shall be the service date of the Department's order containing such decision or finding, or, in cases where the Department's decision or finding is made by letter, then the date of such letter.

(f) For purposes of this section, references to operations and to the providing of air transportation shall refer only to the actual performance of flight operations under an operating certificate issued to the carrier by the FAA.

PART 291—[AMENDED]

3. The authority citation for Part 291 continues to read as follows:

Authority: Secs. 101, 102, 204, 401, 407, 408, 416, 418, Pub. L. 85-726, as amended, 72 Stat. 740, 743, 766, 767; 49 U.S.C. 1301, 1302, 1324, 1371, 1377, 1378, 1386, 1388, unless otherwise noted.

4. The existing § 291.15 in Subpart B of 14 CFR Part 291, Domestic Cargo Transportation, would be rescinded, and a new § 291.15 would be added, to read as follows:

§ 291.15 Revocation for dormancy.

(a) Except as provided in paragraph (b), an all-cargo air carrier that has not begun initial operations to provide the air transportation for which it was found fit, willing, and able, and for which it was granted authority by the Department or by the Civil Aeronautics Board, within one year of the date of that finding, or that, for any period of one year from the date of the most recent such findings, has not provided any air transportation for which that type of finding is required, shall be deemed no longer to continue to be fit to provide such air transportation and, accordingly, its authority to provide such air transportation shall revoked automatically.

(b) For all all-cargo air carriers that were the object of fitness findings made by the Department of Transportation before the effective date of this rule, or made by the Civil Aeronautics Board, the one-year periods referred to in paragraph (a) of this section shall each run from the effective date of this rule and not from the date of those fitness findings.

(c) An all-cargo air carrier found fit by the Department of Transportation after the effective date of this rule and that begins initial operations within one year but then ceases operations, shall not resume operations without first filing all the data required by § 291.11 at least 45 days before it intends to provide any such air transportation. The Department will entertain requests for exemption from this 45-day advance filing requirement for good cause shown. If there has been no change in the data submitted previously in connection with a prior evaluation of the carrier's fitness, the carrier shall file a statement to that effect signed by one of its officers. The carrier may contact the Chief, Special Authorities Division, Office of Aviation Operations, to find out what data are already available to the Department and need not be included in the refiling. A carrier to which this paragraph applies shall not provide any air transportation for which it is required to be found fit, willing, and able until the Department either decides that the carrier continues to meet that requirement, or finds that the carrier is fit, willing, and able to perform such air transportation. During the pendency of the Department's consideration of a data submission under this paragraph, the revocation period set out in paragraph (a) of this section shall be stayed. If the decision or finding by the Department on the issue of the carrier's fitness is favorable, a new one-year revocation period will begin, effective as of the date of the Department's decision or finding.

(d) The provisions of paragraph (c) of this section shall apply to all-cargo air carriers that were the object of fitness findings made by the Department before the effective date of this rule or made by the Civil Aeronautics Board, who either are not now operating under the authority for which they were found fit or who are operating under such authority but later cease operations and seek to resume before expiration of the one-year revocation period.

(e) For purposes of this section, the date of a Department decision or finding shall be the service date of the Department's order containing such decision or finding, or, in cases where the Department's decision or finding is made by letter, then the date of such letter.

(f) For purposes of this section, references to operations and to the providing of air transportation shall refer only to the actual performance of flight operations under an operating certificate issued to the carrier by the FAA.

Authority: 49 U.S.C. 1324, 1371, 1377, 1386, 1388, 1389.

Water Pollution Control; National Primary Drinking Water Regulations; Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule, notice of public meeting.

SUMMARY: A one day public meeting will be held to discuss aspects of the National Primary Drinking Water Regulations. The purpose of the meeting is to discuse regulatory issues regarding potential use of point-of-use treatment devices (POU), point-of-entry treatment devices (POE), or bottled water by public water systems to meet the

National Primary Drinking Water Regulations.

EPA proposed criteria and procedures for public water systems using POU, POE, and bottled water to meet proposed volatile synthetic organic chemical maximum contaminant levels (Federal Register of November 13, 1985, Vol. 50, No. 219 on page 46880). The preamble to the proposed rulemaking for the revised primary drinking water standard for fluoride (Federal Register of November 14, 1985, Vol. 50, No. 220 on page 47162) also discussed POU, POE, and bottled water. These notices proposed conditions under which POU and POE might be considered suitable means of compliance. The use of bottled water was rejected as a suitable means of compliance, but could be allowed as an interim means of reducing an "unreasonable risk" to health. The final rule for fluoride (Federal Register of April 2, 1986, Vol. 51, No. 63 on page 11400) did not address the use of decentralized technologies, but deferred this decision to a later date. The Agency has received and is currently considering a number of comments on these aspects of the proposed rules. These are novel concepts in the development of drinking water regulations. Consequently, the Agency has decided to conduct a public meeting to discuss the issues and hear the opinions of interested parties.

The fundamental issues EPA would like to discuss include: (1) Whether POU, POE, and bottled water can be considered best technology generally available (BTGA); (2) whether (a) POU, POE, and bottled water can be considered suitable means of compliance, (b) only POE and POU can be considered suitable means of compliance, (c) only POE can be considered suitable means of compliance, or (d) none of these options can be considered suitable means of compliance, and (3) whether POU and bottled water can be considered as interim means of compliance during a short-term emergency or during the term of a variance or an exemption. Public comments are requested on these issues by June 15, 1986.

Those who are encouraged to attend include: Interested citizens, public health officials, water utility managers, engineers, scientists, bottled water suppliers, public interest groups, equipment manufacturers, consultants, and anyone else interested in the application of POU, POE, or bottled water as methods of compliance with drinking water regulations.

DATE: Thursday, June 5, 1986, from 9:00 am to 4:00 pm

ADDRESS: The meeting will be held at: Environmental Protection Agency, Room 3, North Conference Area, Waterside Mall Level, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mrs. Nancy Dillon, Office of Drinking Water (WH-550D), 401 M Street, SW., Washington, DC 20460. Office location and telephone number: Room EB-55, Waterside Mall, Washington, DC (202) 382-3022.

SUPPLEMENTARY INFORMATION: The meeting will start with a presentation by EPA on the use of POU, POE, and bottled water. Members of the public who wish to make statements or presentations on these issues will be next on the program. The program of presentations will be followed by an informal open discussion of the issues. Any member of the public wishing to attend the public meeting is encouraged to register in advance. Please contact Mrs. Nancy Dillon at the telephone number mentioned above. At that time, please let Mrs. Dillon know if you wish to make a presentation. A paper entitled "Point-of-Use Treatment Devices, Point-of-Entry Treatment Devices, and Bottled Water Issues Related to the Revised National Primary Drinking Water Regulations" which provides a brief explanation of the issues and possible options is also available from Mrs. Dillon at the above address and telephone number.

Dated: May 15, 1986.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

BILLING CODE 6560-50-M

---

40 CFR Part 141

[OW-FRL-3021-3]

National Primary Drinking Water Regulations; Volatile Synthetic Organic Chemicals; Availability and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of information pertaining to a proposed rule; request for comment.

SUMMARY: EPA is making available additional laboratory performance data for analytical methods used to analyze volatile synthetic organic chemicals (VOCs) in drinking water. The Agency proposed Maximum Contaminant Levels (MCLs) for VOCs in the Federal Register of November 13, 1985, 50 FR 46902. The Agency is also requesting comment on the possible approval of other additional methods for analyzing VOCs.

DATE: Comments on these data must be submitted on or before July 11, 1986.

ADDRESS: Send written comments to Comments Clerk, Criteria and Standards Division, Office of Drinking Water (WH-550D), Environmental Protection Agency, 401 M Street, SW., Washington DC 20460. Supporting data are available for inspection during normal business hours at the EPA, Room 55 East Tower, 401 M Street, SW., Washington DC 20460.

FOR FURTHER INFORMATION CONTACT: Joseph A. Cotruvo, Ph.D., Director, Criteria and Standards Division, ODW (WH-550D), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460 (202-382-7575).

SUPPLEMENTARY INFORMATION: In the Federal Register of November 13, 1985, 50 FR 46902, EPA proposed Maximum Contaminant Levels (MCLs) for eight volatile synthetic organic chemicals (VOCs). An MCL for tetrachloroethylene (another VOC) was not proposed at that time as new data relating to the Recommended Maximum Contaminant Level (RMCL) were made available for a 45 day public comment period. EPA proposed approving several analytical methods for use in measuring the MCL for the eight VOCs and tetrachloroethylene.

EPA provided laboratory performance data for seven VOCs in the proposal (table 3, page 46907) to support the proposed laboratory performance requirements and the determination of the MCL. These data were summarized from Water Pollution Performance Evaluation Studies using the 600 series methods (i.e., EPA's wastewater methods for volatile synthetic organic compounds; Methods 601, 602 and 624). EPA did not have performance data at that time from performance evaluation studies for vinyl chloride and 1,1-dichloroethylene. In the proposal, EPA stated that it was conducting additional laboratory performance data-gathering activities for the VOCs. This effort involved the inclusion of performance evaluation samples for all nine VOCs in Water Supply Performance Evaluation Study #17. Laboratories were requested to use the 600 series methods (i.e., EPA's drinking water methods for volatile synthetic organic chemicals; Methods 502.1, 503.1 and 524.1). The summary results of this study for participating EPA and State laboratories are summarized in table 1, and these data (in complete form) are in the public record for this rulemaking.

TABLE 1—PERFORMANCE OF EPA AND STATE LABORATORIES IN WATER SUPPLY PERFORMANCE EVALUATION STUDY #17

Contaminant	T.V.[1] (ug/L)	Mean (ug/l)	Range of reported values	No. of labs	No. of labs outside ±20% T.V.	No. of labs outside ±40% T.V.
Vinyl Chloride	1.88	2.12	0.69 to 5.86	34	10	11
	6.75	5.97	3.55 to 10.5	28	14	9
	14.7	16.6	7.69 to 42.1	37	15	7
1,1-Dichloroethylene	5.88	5.10	0.70 to 13.0	30	10	10
	4.75	6.20	2.05 to 22.2	33	15	8
1,2-Dichloroethane	5.61	5.27	0.99 to 5.99	33	12	6
	5.39	5.39	1.42 to 9.82	37	4	3
1,1,1-Trichloroethane	2.64	2.67	1.59 to 4.55	37	12	7
	200	221	83.9 to 999	37	11	4
Carbon Tetrachloride	2.51	2.48	0.35 to 7.24	37	20	9
	6.69	6.37	4.0 to 10.8	28	15	3
Trichloroethylene	1.74	1.76	0.35 to 3.29	35	10	1
	5.59	5.39	3.4 to 8.19	36	7	2
Benzene	2.76	2.85	1.23 to 5.65	37	11	4
	8.69	8.21	5.3 to 11.3	37	12	5
Tetrachloroethylene	2.18	2.64	0.73 to 24.9	37	10	2
	5.71	5.65	1.09 to 10.3	28	4	1
P-Dichlorobenzene	3.84	3.55	1.3 to 5.63	31	13	4
	779	739	420 to 1160	32	14	2

[1] T.V. = "true value."

A number of public comments were received concerning EPA's proposal for use of the three 500 series methods (Methods 502.1, 503.1 and 524.1) in the monitoring requirements. Several commenters stated that in addition to the 500 series, the three 500 series methods (Methods 601, 602 and 624) should be included as approved analytical methods for use in the monitoring requirements. The commenters noted that many laboratories were already using the 600 series methods, the methods were essentially the same as the 500 series methods, and the 600 series methods had been validated. In addition, it was suggested that quality control (QC) requirements be included in the 500 series methods, similar to the 600 series methods. EPA is considering these comments and requests further public comment on whether to approve the 600 series methods for measuring drinking water contaminants and whether to adopt the QC requirements in the 600 series methods methods to the 500 series methods. EPA has placed in the public record for this rulemaking: (1) The three 600 series methods, (2) their validation studies, and (3) laboratory performance evaluation data from laboratories using these methods. Public comments are requested on all related issues, including the text of these methods, the QC requirements and data establishing laboratory performance.

The complete data are available for inspection during normal business hours at the address given above.

Dated: May 15, 1996.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

Notices

Federal Register
Vol. 51, No. 101
Tuesday, May 27, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Northern Virginia Electric Cooperative, Inc.; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, as amended, the Council on Environmental Quality Regulations (40 CFR Part 1500–1508), and REA's Environmental Policies and Procedures (7 CFR Part 1794), has made a Finding of No Significant Impact (FONSI), with respect to a project proposed by Northern Virginia Electric Cooperative, Inc. (NOVEC) of Manassas, Virginia. The project consists of the construction of a new district office building with associated facilities to be located in Prince William County, Virginia, in the community of Gainesville, approximately 457.3 meters (1,500 feet) southeast of the intersection of State Route 674 and U.S. Highway 29/211.

FOR FURTHER INFORMATION CONTACT: REA's FONSI and Environmental Assessment (EA) may be reviewed at or obtained from the office of Mr. Joseph R. Binder, Director, Northeast Area-Electric, REA, South Agriculture Building, Room 0241, Washington, D.C. 20250, telephone: (202) 382–1420, or at NOVEC's office (Mr. Harry K. Bowman, Manager), P.O. Box 2710, Manassa, Virginia 22110, telephone: (703) 368–9111.

SUPPLEMENTARY INFORMATION: REA has reviewed NOVEC's Borrower's Environmental Report (BER) and has determined that it represents an accurate assessment of the environmental impacts of the proposed project. NOVEC's project consists of an office building, including a parking garage; a vehicle maintenance garage; a warehouse; employee and visitor parking areas; an outside storage yard; a storm water retention pond; and a microwave tower. The total land area to be affected by the proposed construction activity will be 6 hectares (14.77 acres).

REA determined that the proposed project will have no effect on cultural resources; it will have no effect on threatened or endangered species or critical habitat; it will have no effect on prime forestland or rangeland; and it will not be located in a floodplain or wetland area. The proposed project site consist of approximately sixty (60) percent prime farmland soils. However, the site cannot be considered viable as prime farmland because it is zoned for industrial use and economically unavailable for agricultural production. The construction site is bordered by State Route 674 to the south, commercial and industrial development to the east and west, and a railroad track to the north. Such land does not constitute prime farmland under the regulations (7 CFR Part 658) implementing the Farmland Protection Policy Act (7 U.S.C. Part 4201 *et seq.*). No other matters of environmental concern are raised by the project.

Alternatives considered for the proposed office building and associated facilities were no action, expansion of the existing headquarters facility, and alternative sites.

In accordance with REA's 7 CFR Part 1794, NOVEC advertised and requested comments on the environmental aspects of the proposed project. No comments were received. Also, in accordance with REA's 7 CFR Part 1794, NOVEC's BER is serving as REA's EA. REA has made an independent evaluation, based on NOVEC's BER, of the environmental impacts of the proposed project and concurs in the BER's scope and content. REA has concluded that approval to construct the project would not constitute a major Federal action significantly affecting the quality of the human environment. Consequently, an Environmetal Impact Statement is not necessary.

This program is listed in the Catalog of Federal Assistance as 10.850—Rural Electrification Loans and Loan Guarantees. For the reasons set forth in the final rule related Notice to 7 CFR 3015, Subpart V in 50 FR 47034, November 14, 1985, this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consulation with State and local officials.

Dated: May 20 1986.

Harold V. Hunter,

Administrator.

BILLING CODE 3410–15–M

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the committee: Army Science Board.

Dates of meeting: Wednesday–Friday, 11–13 June 1986.

Times of meeting: 0830–1630 hours.

Places: LOGCEN, Ft. Lee, VA.

Agenda: The Army Science Board Ad Hoc Subgroup for TRADOC Operations Research Activity (TORA) (TRADOC Analysis Center (TRAC)) will meet for briefings by analytic agencies. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

Endowment Grant Program; Establishment of Fiscal Year 1986 Deadline Date for Raising Matching Funds Under the Endowment Grant Program

The Secretary establishes July 15, 1987 as the deadline date by which an institution of higher education selected to receive an endowment grant under the Endowment Grant Program Fiscal Year 1986 funding competition must raise its required matching funds.

The Endowment Grant Program is authorized by section 333 of the Higher Education Act of 1965, as amended, 20 U.S.C. 1065a. Under that program, the Secretary awards matching grants to eligible institutions of higher education to enable them to establish or increase endowment funds. In order to receive the proceeds of an endowment grant, the grantee institution must match the Federal grant on a dollar-for-dollar basis. Under § 628.41(b) of the Endowment Grant Program regulations, 34 CFR 628.41(b) the Secretary annually establishes a deadline date by which an institution must raise the required matching funds.

The Department of Education Appropriation Act, 1986, Pub. L. 99–178, provides that the funds appropriated under that Act for the Endowment Grant Program are available for obligation until September 30, 1987. The Secretary, however, has established July 15, 1987 as the deadline date by which an institution selected to receive an endowment grant under the Fiscal Year 1986 funding competition must raise its required matching funds. The July 15 date has proven to be one that allows a reasonable time period for an institution to raise matching funds while also allowing sufficient time for processing of the grants.

Subject to other limitations in the statute, the maximum endowment grant an institution may receive is an amount equal to the amount of matching funds it raises by July 15, 1987.

Available Funds.

The Department of Education Appropriation Act, 1986, appropriated $23,206,000 for the Endowment Grant Program for Fiscal Year 1986. However, the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 99–177, has reduced this amount to $22,210,000.

Further Information.

For further information, contact Dr. Caroline J. Gillin, Director, Division of Institutional Development or Ms. Anne Price-Collins, Chief, Challenge Grant and Endowment Branch, U.S. Department of Education, Room 3042, Regional Office Building 3, 400 Maryland Avenue, SW., Washington, DC 20202. Telephone (202) 732–3335.

(20 U.S.C. 1064–1069c)

Dated: May 21, 1986

William J. Bennett

Secretary of Education

[FR Doc. 86–11794 Filed 5–23–86; 8:45 am]

BILLING CODE 4000-01-M

Working Group of the National Advisory Committee on Accreditation and Institutional Eligibility; Meeting

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of a "working group" of the National Advisory Committee on Accreditation and Institutional Eligibility. The first part of this meeting will be open to the public. After an initial discussion of the items on the agenda and the opportunity for public participation, the meeting will be closed to prevent the premature and possibly unwarranted disclosure of adverse information regarding the practices and procedures of some accrediting agencies. This notice describes the functions of the NACAIE Committee. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of its opportunity to attend and to participate.

DATES: June 12 and 13, 1986.

ADDRESS: U.S. Department of Education, 400 Maryland Avenue, SW. (ROB–3, Room 4082), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: James B. Williams, Special Assistant, Office of the Deputy Assistant Secretary for Higher Education Programs, Office of Postsecondary Education, 400 Maryland Avenue, SW. (Room 3915, ROB–3), Washington, DC 20202 (202/245/9700).

SUPPLEMENTARY INFORMATION: The National Advisory Committee on Accreditation and Institutional Eligibility is authorized by section 1205 of the Higher Education Act, as amended by Pub. L. 98–374 (20 U.S.C. 1145). The Committee advises the Secretary of Education regarding his responsibility to publish a list of nationally recognized accrediting agencies and associations, State agencies recognized for the approval of public postsecondary vocational education, and State agencies recognized for the approval of nurse education.

The Committee also advises the Secretary of Education regarding policy affecting both recognition of accrediting and approval bodies, and institutional eligibility for participation in Federal funding programs. The part of the meeting on June 12 and 13 devoted to the taking of and discussion of testimony will be open to the public.

Agenda Topics

The principal agenda topics, which are based on the Secretary's charge to the Working Group, include:

- What, if anything, should each accrediting agency require as a condition of accreditation of all institutions it accredits in terms of minimum standards irrespective of the institutions' particular mission and purpose?
- What institutional and student output measurements should accrediting agencies use to determine whether institutions are meeting their stated objectives and how best to measure the outputs?
- Should the Criteria for Recognition contain specific requirements related to the "consumer protection" and "truth-in-advertising" practices of an institution in its relationship with its students?
- Whether standards of reciprocity should be established among accrediting agencies for recognizing an institution which has lost or been denied accreditation by another agency?
- Should the Secretary require a recognition criterion to ensure that the Department is notified on a timely basis of an adverse action taken by accrediting agencies against an institution?

The "working group" assumes control of the agenda once the meeting begins, and may consider other matters related to accreditation and institutional eligibility that fall within the Committee's purview.

Advisory Information

The "working group" will meet from 9:30 a.m. to 4:30 p.m. on Thursday, June 12, and from 9:30 a.m. to 3:30 p.m. on Friday, June 13, local time. The "working group" requests written testimony on the issues before it. To be considered by the "working group" all written testimony must be received by June 3, 1986. Requests to testify orally will be considered by the "working group," but only from those persons or groups presenting written testimony. Requests to testify orally must accompany the written testimony, and must be received by June 3.

A record will be made of the proceedings and will be available for

public inspection at the Office of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 3015, FOB–3), Washington, DC between the hours of 10:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Signed at Washington, DC, on May 21, 1986.

C. Ronald Kimberling,

Assistant Secretary for Postsecondary Education.

[FR Doc. 86–11761 Filed 5–23–86; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Notice of Intent to Grant Partially Exclusive Patent License; Corazonix Corp.

Notice is hereby given of an intent to grant to Corazonix Corporation, of Oklahoma City, Oklahoma, a partially exclusive license to practice in the United States the invention described in U.S. Patent No. 4,413,531, entitled "Doppler Flowmeter". The patent is owned by the United States of America, as represented by the Department of Energy (DOE).

The proposed license will be partially exclusive, i.e., limited to the field of use of biomedical applications and subject to a license and other rights retained by the U.S. Government, and will be subject to a negotiated royalty provision. DOE intends to grant the license, upon a final determination in accordance with 35 U.S.C. 209(c), unless within 60 days of this notice the Assistant General Counsel for Patents, Department of Energy, Washington, DC 20585, receives in writing any of the following, together with supporting documents:

(i) A statement from any person setting forth reasons why it would not be in the best interests of the United States to grant the proposed license; or

(ii) An application for a nonexclusive license to the invention in the United States, in which applicant states that he has already brought the invention to practical application or is likely to bring the invention to practical application expeditiously in the field of use of biomedical applications.

The Department will review all written responses to this notice, and will grant the license if, after expiration of the 60-day notice period, and after consideration of written responses to this notice, a determination is made, in accordance with 35 U.S.C. 209(c), that the license grant is in the public interest.

Issued in Washington, DC, on May 16, 1986.

J. Michael Farrell,

General Counsel.

[FR Doc. 86–11757 Filed 5–23–86; 8:45 am]

BILLING CODE 6450-01-M

Office of Energy Research

DOE/NSF Nuclear Science Advisory Committee; Notice of Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee.

Date & Time: June 16, 1986 from 9:00 a.m. to 6:00 p.m., June 17, 1986 from 8:30 a.m. to 12:00 noon.

Place: University of Washington, Administration Building, Room 142 Seattle, WA 98195.

Contact: John R. Erskine, Division of Nuclear Physics, U.S. Department of Energy, Washington, DC 20545, (301) 353–3613.

Purpose of the Committee: To advise the Department of Energy and the National Science Foundation on the scientific priorities within the field of basic nuclear science research.

Tentative Agenda:

June 16

- Budget presentation from DOE and NSF.
- Presentation and discussion of the draft report from the Subcommittee on Facility Construction, which is charged to review proposals for the upgrade of research facilities at the University of Illinois, Lawrence Berkeley Laboratory, Massachusetts Institute of Technology, and Oak Ridge National Laboratory, and to review the scientific capabilities of the planned Relativistic Heavy Ion Collider facility at Brookhaven National Laboratory.
- Public comment.

June 17

- Discussion deliberation, and action on the draft report of the Subcommittee of Facility Construction.

Discussion and possible activation of the proposed NSAC Subcommittee on Nuclear Theory and the NSAC Instrumentation Subcommittee.

- Public comment.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact John Erskine at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 21, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

[FR Doc. 86–11758 Filed 5–23–86; 8:45 am]

BILLING CODE 6450-01-M

Western Area Power Administration

Proposed Post–1989 Allocation of Power; Pick-Sloan Missouri Basin Program-Western Division and Fryingpan-Arkansas Project

AGENCY: Western Area Power Administration, Department of Energy.

ACTION: Proposed allocation of power from the Pick-Sloan Missouri Basin Program-Western Division and Fryingpan-Arkansas project.

SUMMARY: The Post-1989 General Power Marketing and Allocation Criteria (Criteria) for the sale of energy with capacity from the Pick-Sloan Missouri Basin Program-Western Division (P-SMBP-WD) and the Fryingpan-Arkansas Project (Fry-Ark) by the Western Area Power Administration (Western) were published in the Federal Register on January 31, 1986 (51 FR 4012). Within these Criteria was a call for applications for power. Applications for power were accepted at Western's Loveland Area Office (LAO) until the close of business on April 1, 1986. The proposed energy with capacity allocations published herein are the result of these applications.

DATES: Comments must be received in writing no later than the close of business on July 28, 1986. A public comment forum is scheduled for June 10, 1986, in Denver, Colorado.

ADDRESS: Comments should be sent to: Mark N. Silverman, Area Manager, Loveland Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539. (303) 224–7201.

SUPPLEMENTARY INFORMATION:

I. Regulatory Procedural Requirements.
II. Background of the Allocation Procedures.
III. Proposed Post-1989 Power Allocations.
A. Marketable Resources.
B. Salt Lake City Area Office Allocations.
C. Proposed Post-1989 Allocations of Energy with Capacity.
D. Contractual Arrangements.
IV. Action Required by Allottees.

I. Regulatory Procedural Requirements

These allocations are based upon the provisions of the Reclamation Act of 1902, approved June 17, 1902 (ch. 1093, 32 Stat. 388); the Reclamation Project Act of 1939, approved August 4, 1939 (43 U.S.C. 485h(c)); and the Department of Energy Organization Act of 1977, approved August 4, 1977 (42 U.S.C. 7152, 7191); and are more specifically based upon the provisions of the Flood Control Act of 1944, approved December 22, 1944 (58 Stat. 891); the Fryingpan-Arkansas Projects Acts of 1962 and 1974, approved August 16, 1962 (Pub. L. 87-590, 76 Stat. 389), and October 27, 1974 (Pub. L. 93-493, 88 Stat. 1497); and acts amending or supplementing all of the foregoing legislation.

II. Background of the Allocation Procedures

Power is presently marketed by the LAO under three separate marketing plans. These are: The Pick-Sloan Missouri Basin Program power marketing plan, the Fry-Ark marketing plan, and the power marketing plan for the sale of P-SMBP-WD excess capacity (P-SMBP-WD Excess Capacity). Under each plan customers were allocated seasonal Contract Rates of Delivery (CROD). The P-SMBP-WD marketing plan went into effect in 1962. The Fry-Ark marketing plan was published on June 23, 1961 (46 FR 32491), and the P-SMBP-WD Excess Capacity marketing plan was published on August 30, 1982 (47 FR 38187). Of these three marketing plans, only the P-SMBP-WD marketing plan provided for the sale of capacity and energy. The two other marketing plans provided only for the sale of capacity. The energy associated with the marketed capacity was either provided from non-Federal resources or was provided by Federal resources with the provision that the energy was to be returned to the Federal System in the form of pump-back water. Contracts for all three marketing plans expire on the last day of the September billing period in 1989.

The Proposed Post-1989 General Marketing Criteria were published in the Federal Register on August 23, 1985 (48 FR 38279). This publication included an announcement of public information and public comment forums on the Proposed Criteria and a final request for Applicant Profile Data (APD). The APD were required for any applicant to be considered eligible for an allocation of energy with capacity from the P-SMBP-WD and Fry-Ark under the proposed Criteria. Interested parties were initially given until November 15, 1985, to submit this data. The deadline was later extended to December 30, 1985 (48 FR 54880, December 7, 1983). The final Criteria were published January 31, 1986 (51 FR 4012). In the final Criteria two additional areas were added to the original LAO marketing area. These are the Mountain Parks Rural Electric Association service area in Colorado west of the Continental Divide, and that portion of the State of Kansas located in the Arkansas River Basin west of the eastern borders of the counties intersected by the 100th Meridian. Interested parties within these additional areas had until April 1, 1986, to submit APD. The Criteria also required all interested parties to submit a request for the capacity to be associated with their energy allocation by close of business on April 1, 1986.

III. Proposed Post-1989 Power Allocation

The proposed allocations for energy with capacity are based on the principles set forth in the "General Power Marketing and Allocation Criteria" published in the Federal Register on January 31, 1986 (51 FR 4012).

A. Marketable Resources

The LAO markets power generated at 18 powerplants located in Colorado, Wyoming, and Montana. These resources were divided between potential new and existing customers. The marketable resources available seasonally, per group, by operationally integrating these powerplants are:

	Winter		Summer	
	Energy (MWH)	Capacity (MW)	Energy (MWH)	Capacity (MW)
New Customers	75,750	51.9	92,844	58.2
Existing Customers	856,791	586.6	1,061,456	658.3
Totals	932,541	638.5	1,155,300	716.5

B. Salt Lake City Area Office Allocations

Allocations from the Salt Lake City Area (SLCA) Integrated Projects will be allocated by Western's Salt Lake City Area Office (SLCAO) in the near future. Notwithstanding the statement in the final General Power Marketing and Allocation Criteria regarding limitations on energy allocations, the proposed allocations for the P-SMBP-WD and Fry-Ark contained in this Federal Register notice do not consider allocations from the Colorado River Storage Project or the SLCA Integrated Projects. Allocations from all other Federal resources were considered in accordance with the final LAO marketing criteria. The SLCAO will consider these proposed LAO allocations when calculating proposed allocations from the Integrated Projects to customers who may receive energy with capacity allocations from the LAO and SLCAO.

C. Proposed Post-1989 Allocations of Energy with Capacity

With the exception of the Project Use and Existing Special Use loads defined in section VI.C of the Criteria and Warren Air Force Base, whose existing contract will not terminate prior to the effective date of the Criteria, all eligible applicants have been allocated energy with capacity hereunder as defined in section V.C. of the Criteria. The seasonal energy reserved for existing customers was allocated according to the proportion each existing customer's long-term firm CROD, in effect on April 1, 1986, from P-SMBP-WD and Fry-Ark resources, bears to the total of all existing customers' long-term firm CRODs. The seasonal energy reserved for new customers was allocated according to the proportion each new customer's average energy consumption in 1980, 1981, and 1982, bears to the total of all new customer's average energy consumption in the same period. The summer allocation to the Northern Colorado Water Conservancy District was based on the estimated average energy it would have used had it been allowed to operate during the years 1980 through 1982. The estimated energy use figures were based on the actual hydrology for those 3 years. This special treatment recognizes the fact that pumps operated by the Northern Colorado Water Conservancy District create more energy for the LAO to market to all customers.

Capacity was allocated based on the eligible customers; capacity requests. Since there was not enough capacity available to meet all requests from existing customers, those customers who requested less than the system plant factors of 33.4 percent in the winter and 36.7 percent in the summer had their capacity requests limited proportionally.

The proposed individual allocations are:

D. Contractual Arrangements

Western plans to publish the final energy with capacity allocations during the summer of 1986. Allottees will then be sent draft contracts. Executable contracts will be available to all customers in the spring of 1987. Allottees will have 6 months, or until September 30, 1987, to execute these contracts, whichever is later.

IV. Action Required by Allottees

Western will accept comments on these allocations from all interested parties until the close of business on July 28, 1986. A public comment forum is scheduled for June 10, 1986, at 9 a.m., at the Clarion Hotel, 3202 Quebec Street, Denver, Colorado. All comments on these proposed allocations should be directed to: Mr. Mark N. Silverman, Area Manager, Loveland Area Office, Western Area Power Administration, P.O. Box 3706, Loveland, Colorado 80539, (303) 224-7201.

Issued at Golden, Colorado, May 14, 1986.

William H. Clagett,
Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3021-1]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the Federal Register a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman, (202) 382-2740 or FTS 382-2740.

SUPPLEMENTARY INFORMATION:

Office of the Administrator

Title: Nondiscrimination in EPA Assisted Programs: Recordkeeping Requirements and Report Form (EPA ICR No. 0275). (This is a revision of a currently approved collection; there are no changes to the applicable regulation.)

Abstract: EPA reviews all wastewater grant applicants to determine pre-award compliance with laws prohibiting discrimination on the basis of handicap, race, color, national origin, sex, and age.

Respondents: Wastewater grant applicants.

Office of Air

Title: Importation of Nonconforming Motor Vehicles Subject to Federal Air

Pollution Control Regulations (EPA ICR No. 0223). (This is an extension of a currently approved collection without any change.)

Abstract: Importers of motor vehicles must submit documentation of conformity with U.S. air pollution control regulations, including a declaration form to U.S. Customs and the posting of bond for the vehicle. EPA reviews the declaration and either a proof of modification, air pollution control test results, or an exemption claim before releasing the vehicle.

Respondents: Importers of motor vehicles.

Title: NSPS for Metallic Processing Plants (Subpart LL) (EPA ICR No. 0982). (This is an extension of a currently approved collection without any change.)

Abstract: Owners/operators of metallic mineral processing plants must notify EPA of construction, modifications, startups, and other information. If wet scrubbing device(s) are used, they must install, calibrate, and maintain continuous monitoring devices to measure pressure drop and flow rate, maintain weekly records, and submit semiannual reports when the drop and rate differ 30% from the most recent performance test.

Respondents: Owners and operators of metallic mineral processing plants.

Title: Farm Labor Survey—Farm Equipment Use Segment (EPA ICR No. 1299). (This is a new collection.

Abstract: Farmers will respond to questions (contained in an addition to the Farm Labor Survey) about the use(s) of gasoline tractors, diesel tractors, combines, and trucks in farm operations. EPA will use this information to determine the ratio of heavy, medium, and light uses in order to assess the impact of the lead phase-down program on farm machinery.

Respondents: Farmers.

Certain Chemical; Extension of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's extension of a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME–85–31. The new test marketing conditions are described below.

EFFECTIVE DATE: May 19, 1986.

FOR FURTHER INFORMATION CONTACT: Rose Allison, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, RM. E–611E, 401 M St. SW., Washington, DC 20460, (202–382–3391).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufature notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby extends TME–85–31. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the original TME application and extension, and for the time period and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All conditions and restrictions described in the original application and in this notice must be met.

The following additional restrictions apply to TME–85–31. A bill of lading accompanying each shipment must state that the use of the substance is restricted to those approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA.

1. The applicant must maintain records of the quantity of the TME substance produced.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substance.

T–85–31

Date of Receipt: March 19, 1985.

Notice of Receipt: March 29, 1985 (50 FR 12628).

Applicant: Confidential.

Chemical: (G) Functional acrylate type polymer.

Use: (G) Industrial paint ingredient.

Production Volume: 82,000 kilograms.

Number of Customers: Four.

Worker Exposure: Manufacture: dermal, a total of 20 workers, up to 8 hrs/day up to 26 days a year.

Notice of Approval of Test Marketing Exemption: May 7, 1985 (50 FR 19228).

Original Test Marketing Period: Eight months.

Modified Test Marketing Period: Six months.

Commencing on: May 19, 1986.

Risk Assessment: EPA identified no significant health or environmental concerns. Therefore, the test market substance will not present any unreasonable risk of injury to health or the environment.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: May 12, 1986.

Dan R. Clay

Director, Office of Toxic Substances.

BILLING CODE 6560-50-M

[OPTS-61013 FRL-3021-6]

Toxic and Hazardous Substances Control; Availability of Printed Version of TSCA Chemical Substance Inventory

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA is publishing the "TSCA Chemical Substance Inventory: 1985 Edition." This publication includes chemical identities for all substances reported to EPA under the Toxic Substances Control Act (TSCA) as manufactured, imported, or processed for commercial purposes in the United States since 1975.

DATE: The Inventory is now available for purchase from the Government Printing Office.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, D.C. 20460, Toll-Free: (800-424-9065), In Washington, DC: (554-1404), Outside the U.S.A: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: Section 8(b) of the Toxic Substances Control Act requires EPA to identify, compile, keep current and publish a list of chemical substances which are manufactured, imported, or processed for commercial purposes in the United States. EPA compiled this list in accordance with its Inventory Reporting Regulations (40 CFR Part 710), promulgated in 1977, and published a printed version of the Inventory in 1979, supplemented in 1980 and 1982.

EPA has added to the inventory new substances whose commencement of manufacture of import has been reported to the Agency under its Premanufacture Notification Regulations (40 CFR Part 720) and has removed from the Inventory substances which have been shown to be incorrectly reported or listed. The "TSCA Inventory: 1985 Edition," superseding the 1979 edition and all supplements, incorporates these additions to and deletions from the Inventory as of July 1985.

The complete list of chemical identities reported to EPA is maintained by the Agency in its Master Inventory File. However, some of the identities reported to the Agency were claimed as confidential. The printed version of the Inventory contains generic, rather than specific, identities for confidential substances.

The "TSCA Chemical Substance Inventory: 1985 Edition" is organized into five volumes:

(a) Volume I contains Chemical Abstracts Service (CAS) Preferred or Index Names and CAS Registry Numbers for these substances, in CAS Registry Number order, plus appendices of chemical substance definitions and generic names for confidential substances.

(b) Volumes II and III contain a Substance Name Index which lists CAS Preferred Names alphabetically, along with industry-reported or CAS-derived synonyms.

(c) Volume IV, the Molecular Formula Index, lists molecular formulae for most inventory substances.

(d) Volume V contains the UVCB Index (identities for substances of Unknown or Variable composition, Complex reaction products, and Biological materials) as well as indices of substances regulated under sections 4, 5(a) (2), 5(e), 5(f) and 6(a) of TSCA.

The "TSCA Chemical Substance Inventory: 1985 Edition" may be purchased from Superintendent of Documents, Government Printing Office, Washington, DC. 20402 (202-783-3238). The price is $161.00 ($201.25 for foreign sales). When contacting GPO, refer to stock number 055-000-00254-1. Allow 6 weeks for delivery (longer outside the U.S.).

The Inventory will also be available in computer-tape form in June or July of 1986. This version contains 1977 production and site data. For details contact the TSCA Assistance Office at the address or telephone number given under "FOR FURTHER INFORMATION CONTACT."

Dated: May 19, 1986.

Dan R. Clay,

Director, Office of Toxic Substances.

United Bank, S.S.B.; Appointment of Receiver

Notice is hereby given that pursuant to the authority contained in section 406(c)(1)(B) of the National Housing Act, as amended, 12 U.S.C. 1729(c)(1)(B) (1982), the Federal Home Loan Bank Board duly appointed the Federal Savings and Loan Insurance Corporation as sole receiver for United Bank, S.S.B. San Francisco, California on March 27, 1986.

Dated: May 21, 1986.

Jeff Sconyers,

Secretary.

[FR Doc. 86-11801 Filed 5-23-86; 8:45 am]

BILLING CODE 6730-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, D.C. office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-003158.003.

Title: The Port Authority of New York and New Jersey Lease Agreement.

Parties:

The Port Authority of New York and New Jersey

Ecuadorian Line, Inc.

Synopsis: The proposed amendment would modify the agreement to provide for an addition to the premises retaining a mutual right of termination of thirty days.

Agreement No.: 224-003930-002.

Title: Port of New York and New Jersey Terminal Agreement.

Parties:

Port of New York and New Jersey

Universal Maritime Service Corp.

Synopsis: The proposed amendment provides for the reconfiguration of the terminal by the demolition of an existing structure, the construction and installation of improvements and a corresponding adjustment in rental payments. The amendment calls for the adjusted rental to be in effect as of March 1, 1986, with payment to be deferred until after the amendment becomes effective. The parties have requested a shortened review period.

Agreement No.: 213-010942.

Title: Barber Blue Sea/ScanCarriers Agreement.

Parties:

Barber Blue Sea (BBS)

ScanCarriers

General Manager: ScanBarber A/S.

Synopsis: The proposed agreement would permit the parties to coordinate sailings, and cross-charter twelve (12) RO/RO vessels ranging in size from 30,000 DWT to 45,000 DWT for the carriage of cargo covering ports in the United States, Hong Kong, Japan, Macao, Korea, Taiwan, Siberia, U.S.S.R., the People's Republic of China, Thailand, Vietnam, Democratic Kampuchea (Cambodia), Laos, Burma, the Republic of the Philippines, the Republic of Singapore, the Federation of Malaysia, the Sultanate of Brunei, Papua New Guinea, the Republic of Indonesia, Australia, New Zealand, Islands of the South Pacific, Republic of South Africa, Canada, all countries of Central and South America, and the European Continent. The parties have requested a shortened review period.

Agreement No.: 207-010943.

Title: ScanCarriers Agreement.

Parties:

Wilh. Wilhelmsen Limited A/S

The East Asiatic Company Limited A/S

Rederiaktiebolaget Transocean

General Manager: ScanBarber A/S.

Synopsis: The proposed agreement would establish a joint service to be operated by the parties in the trade between U.S. Atlantic and Gulf Ports, and inland U.S. points via such ports, and ports and points in Central and South America, Australia, New Zealand, the Republic of South Africa, the Islands of the South Pacific and (outbound only) the Far East. The service may utilize up to twelve vessels, ranging in size up to 45,000 DWT. The parties have requested a shortened review period.

By order of the Federal Maritime Commission.

Dated: May 21, 1986.

John Robert Ewers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

First of America Bank Corp., Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal cap "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 16, 1986.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First of America Bank Corporation,* Kalamazoo, Michigan; to expand the activities of its subsidiary, First of America Insurance Company, Phoenix, Arizona, and thereby expand its approved credit life and credit disability reinsurance underwriting activity in Michigan to include activities directly related to extensions of credit in Illinois, Indiana, Ohio and Wisconsin. Applicant also proposes to provide open end credit card and lines of credit pursuant to § 225.25(b)(1) of the Board's Regulation Y. The activities related to credit cards and lines of credit will be conducted nationwide except New Hampshire and North Carolina.

Board of Governors of the Federal Reserve System, May 20, 1986.

James McAfee,

Associate Secretary of the Board.

First National Bancshares of Wetumpka, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 16, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *First National Bancshares of Wetumpka, Inc.*, Wetumpka, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Wetumpka, Wetumpka, Alabama.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *F&M Financial Services Corporation*, Menomonee Falls, Wisconsin; to acquire 92 percent of the voting shares of Rural Financial Services, Inc., Dousman, Wisconsin, and thereby indirectly acquire Dousman State Bank, Dousman, Wisconsin, and Mansfield State Bank, Johnson Creek, Wisconsin. Comments on this application must be received not later than June 13, 1986.

2. *Republic Bancorp, Inc.*, Flint, Michigan; to acquire 88.07 percent of the voting shares of Bellaire State Bank, Bellaire, Michigan. Comments on this application must be received by June 12, 1986.

3. *Villa Park Trust & Savings Bank Employees' Stock Ownership Plan*, Villa Park, Illinois; to become a bank holding company by acquiring 30 percent of the voting shares of Edville Bankcorp, Inc., Villa Park, Illinois, and thereby indirectly acquire Villa Park Trust & Savings Bank, Villa Park, Illinois.

C. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *United Community Corporation*, Oklahoma City, Oklahoma; to merge with CitiBancshares, Inc., Muskogee, Oklahoma, and thereby indirectly acquire CitiBank Holding Company, Inc., Muskogee, Oklahoma, and City Bank, Muskogee, Oklahoma.

D. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Bonneville Bancorp Employee Stock Option Plan and Trust*, Provo, Utah; to become a bank holding company by acquiring 35.97 percent of the voting shares of Bonneville Bancorp, Provo, Utah. Comments on this application must be received not later than June 16, 1986.

Board of Governors of the Federal Reserve System, May 20, 1986.

Mellon Bank Corp., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 16, 1986.

A. Federal Reserve Bank of Cleveland (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Mellon Bank Corporation*, Pittsburgh, Pennsylvania; to engage *de novo* through its subsidiary, Mellon Bank Community Development Corporation, Pittsburgh, Pennsylvania, in making equity and debt investments in corporations or projects designed primarily to promote community welfare, such as the economic rehabilitation and development of low and moderate income areas by providing housing, services, or jobs for residents, throughout the market areas serviced by Applicant's banking subsidiaries pursuant to § 225.25(b)(8) of the Board's Regulation Y. These activities will be conducted primarily throughout the states of Pennsylvania, Delaware and Maryland, and will be conducted at Mellon Bank Center, Pittsburgh, Pennsylvania. Comments on this application must be received by June 13, 1986.

B. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Peoples Ban Corporation*, Seattle, Washington; to engage *de novo* through its subsidiary Peoples Discount Brokerage Company, Seattle, Washington, in providing securities brokerage services, and related securities credit activities pursuant to § 225.24(b)(15) of the Board's Regulation Y.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 86F-0188]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of 4-[[4,6-bis(octylthio)-*s*-triazin-2-yl]amino]-2,6-di-*tert*-butylphenol as a stabilizer in articles or components of articles intended to contact food.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6B3922) has been filed by Ciba-Geigy Corp., Three Skyline Dr. Hawthorne, NY 10532, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) and § 177.2600 *Rubber articles intended for repeated use* (21 CFR 177.2600) be amended to expand present uses and to add additional uses of 4-[[4,6-bis(octylthio)-*s*-triazin-2-yl]amino]-2,6-di-*tert*-butylphenol as a stabilizer in articles or components of articles intended to contact food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c), as published in the Federal Register of April 26, 1985 (50 FR 16636).

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Application Announcement for Cooperative Agreements With Statewide Organizations for Development of Comprehensive Primary Health Care Services

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) is announcing that applications are being accepted from qualified Statewide organizations for cooperative agreements to provide assistance in the planning and development of comprehensive primary health care services in areas that lack adequate health manpower or have populations lacking access to primary care services. It is expected that approximately $3 million will be available for these agreements, which will be entered into under the authority of section 333(g) of the Public Health Service Act.

DATE: All applications must be delivered to the contact designated in this announcement or postmarked by July 25, 1986, and received in time for orderly processing.

FOR FURTHER INFORMATION CONTACT: Application kits (Form PHS-5161 with revised facesheet DHHS Form 424) and additional information may be obtained from, and completed applications should be sent to: Chief, Grants Management Branch, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, Room 7A-08, 5600 Fishers Lane, Rockville, Maryland, 20857, (301) 443-1440.

SUPPLEMENTARY INFORMATION: In addition to the Federal responsibilities under the cooperative agreements, the qualifications, expected activities, evaluation criteria, and application procedures for Statewide organizations are delineated in the Notice published in the Federal Register on July 11, 1985 (50 FR 28267).

Other Award Information

All agreements to be established under this notice are subject to the provisions of Executive Order 12372, as implemented by 45 CFR Part 100, which allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available by DHHS (Form PHS-5161 with revised facesheet DHHS Form 424) will contain a listing of States which have chosen to set up such a review

system and will provide a point of contact in the States for that review. At the latest, States should receive applications from grantees at the same time that they are due to the Chief of the Grants Management Branch in the Bureau of Health Care Delivery and Assistance. The comments from the States must be delivered to the Chief of the Grants Management Branch at the aforementioned address, or postmarked by September 23, 1986, and received in time for orderly processing.

The cooperative agreements for development of comprehensive primary health care services are listed as No. 13.130 in the OMB *Catalog of Federal Domestic Assistance*.

Dated: April 16, 1986.

John H. Kelso,

Acting Administrator.

BILLING CODE 4160-15-M

Application Announcement for Grants for Two-Year Programs of Schools of Medicine or Osteopathy

The Bureau of Health Professions, Health Resources and Services Administration, announces that applications for Fiscal Year 1986 Grants for Two-Year Programs of Schools of Medicine or Osteopathy are now being accepted under the authority of section 788(a), of the Public Health Service Act, as amended by Pub. L. 99-129.

Section 788(a) authorizes the award of grants to maintain and improve schools which provide the first or last two years of education leading to the degree of doctor of medicine or osteopathy. Grants provided under this authority to schools that were in existence on September 30, 1965, may be used for construction and purchase of equipment.

To be eligible for a grant under this authority, the applicant must be a public or nonprofit school providing the first or last two years of education leading to the degree of doctor of medicine or osteopathy and be accredited or be operated jointly with a school that is accredited by a recognized body or bodies approved for such purpose by the Secretary of Education.

There is approximately $479,000.00 available in Fiscal Year 1986 to fund this program.

Application materials will be sent only upon request. Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer (D16), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C-22, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-6880.

The deadline for receipt of applications is June 27, 1986. Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline date, or

(2) Postmarked on or before the deadline date, and received in time for submission to the independent review group.

A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Should additional programmatic information be desired, please contact: Multidisciplinary Resources Development Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C-25, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-3626.

This is a new program and is not listed in the Catalog of Federal Domestic Assistance, therefore, no catalog number has been assigned. Applications submitted in response to this announcement that request construction assistance are subject to Intergovernmental Review under provisions of Executive Order 12372, as supplemented by 42 CFR Part 100, Intergovernmental Review of Federal Programs. Applications submitted for program support only are not subject to Intergovernmental Review under these provisions.

Dated: April 16, 1986.

John H. Kelso,

Acting Administrator.

[FR Doc. 86-11781 Filed 5-23-86; 8:45 am]

BILLING CODE 4160-15-M

Low Income Levels for Health Careers Opportunity Program, Financial Assistance for Disadvantaged Health Professions Students and Nursing Special Project Grants

This Notice updates the income levels that are used to define a "low income family" for the support of training for individuals from disadvantaged backgrounds as provided for under section 787, Health Careers Opportunity Program, and the program of Financial Assistance for Disadvantaged Health Professions Students, and section 820, Nursing Special Project Grants of the Public Health Service Act, as amended.

Sections 57.1804(b)(2) and 57.1905(b)(2) of the program regulations (42 CFR Part 57, Subparts S and T) require that the Secretary publish periodically in the Federal Register the low income levels which will be used for Public Health Service grants to institutions which provide training for individuals from disadvantaged backgrounds.

The Health Professions Training Assistance Act of 1985, enacted on October 22, 1985, amended section 787 to include stipends under subsections (a)(2)(F) and (b) to individuals from disadvantaged backgrounds and of exceptional financial need (as defined by regulations issued by the Secretary under section 758), who are students at schools of medicine, osteopathy or dentistry.

The income figures below were taken from low income levels, published by the U.S. Bureau of Census, using an index adopted by a Federal Interagency Committee for use in a variety of Federal Programs, then multiplied by a factor of 1.3 for adaptation to health professions grant programs for which training for individuals from disadvantaged backgrounds is supported. The income figures have been updated to reflect increases in the Consumer Price Index through December 31, 1985.

Size of parents family [1]	Income level [2]
1	$7,200.00
2	9,400.00
3	11,100.00
4	14,200.00
5	16,800.00
6 or more	18,900.00

[1] Includes only dependents listed on Federal income tax forms.

[2] Rounded to $100. Adjusted gross income for calendar year 1985.

Dated: May 15, 1986.

John Kelso,

Acting Administrator.

BILLING CODE 4160-15-M

National Institutes of Health

National Cancer Institute; Biometry and Epidemiology Contract Review Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Biometry and Epidemiology Contract Review Committee, National Cancer Institute, National Institutes of Health, June 19-20, Building 31C, Conference Room 9, 9000 Rockville Pike, Bethesda, Maryland 20892. This meeting will be open to the public on June 19, from 8:30

a.m. to 9:00 a.m. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 19 from 9:00 a.m. to recess and June 20 from 8:30 a.m. to adjournment for the review, discussion and evaluation of individual contract proposals. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meeting and a roster of committee members, upon request.

Dr. Harvey P. Stein, Executive Secretary, Biometry and Epidemiology Contract Review Committee, National Cancer Institute, Westwood Building, Room 804, National Institutes of Health, Bethesda, Maryland 20892 (301/496–7030) will provide program information.

Dated: May 9, 1986.

BILLING CODE 4140–01–M

National Cancer Institute; Clinical Cancer Program Project Review Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Clinical Cancer Program Project Review Committee, National Cancer Institute, National Institutes of Health, July 17–18, 1986, Hyatt Regency, 1 Bethesda Metro Center, Bethesda, Maryland 20814. This meeting will be open to the Public on July 17 from 8:30 a.m. to 9:00 a.m. to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on July 17, from approximately 9:00 a.m. to recess; and on July 18, from 8:30 a.m. to adjournment, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets of commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Robert D. Hammond, Executive Secretary, Clinical Cancer Program Project Review Committee, National Cancer Institute, Westwood Building, Room 822, National Institutes of Health, Bethesda, Maryland 20892 (301/496–7924) will furnish substantive program information.

Dated: May 9, 1986.

BILLING CODE 4140–01–M

National Institute of Diabetes and Digestive and Kidney Diseases; Meeting

Notice is hereby given that a committee of NIH staff, augmented by expert consultants, will meet to conduct an administrative review of the research programs of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) to determine if any of such programs could be more effectively and efficiently managed by other national research institutes. Specifically, the committee will:

(1) Review the current administrative structure of the NIDDK to assure that recent program realignments resulting from the creation of the new National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) has not resulted in inappropriate or ineffective organizational arrangements;

(2) Identify any factors that may be operating within the current organizational structure to reduce the effectiveness of the scientific program;

(3) Determine whether evidence exists to suggest that the growth, development and scientific productivity of any of the scientific programs placed within the present structure of the NIDDK would be enhanced if administered or conducted by some other component of the NIH; and

(4) Assess the degree to which the present administrative framework provides an integrative focus for the existing broad array of scientific programs and suggest any modifications that would improve program performance.

As part of these deliberations, the afternoon of July 1, from 1:00 p.m. to recess, will be devoted to a public briefing in which the committee will receive testimony from interested parties. The meetings will be held in Building 31, Conference Room 8, at the National Institutes of Health, Bethesda, Maryland. Attendance and the number of presentations will be limited to the time and space available. Consequently, all individuals wishing to attend or present statements at these public briefings should notify, in writing, Mr. Edward Lynch, National Institutes of Health, Building 1, Room 228, 9000 Rockville Pike, Bethesda, Maryland 20892, by June 6, 1986.

Those planning to make a presentation must file a one-page summary of their presentation with Mr. Lynch before June 13, 1986. Each speaker will be limited to a maximum of ten minutes. Additional information may be obtained by calling (301) 496–1454.

Dated: May 19, 1986.
Betty J. Beveridge,
BDM Construction Management Officer.

BILLING CODE 4310-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-6663-A2]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(a), will be issued to Ekwok Natives Limited for approximately 1,203.20 acres. The lands involved are in the vicinity of Ekwok, Alaska.

Seward Meridian, Alaska
T. 9 S., R. 50 W. (Surveyed)

A notice of the decision will be published once a week for four (4) consecutive weeks, in the *Anchorage Times*. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271-5960.)

Any party claiming a property interest which is adversely affected by the decision shall have until June 26, 1986, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labay,
Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

Wyoming; Rawlins District Advisory Council Meeting

AGENCY: Bureau of Land Management, Rawlins District Office, Rawlins, Wyoming.

ACTION: Notice of Meeting of the Rawlins District Advisory Council.

SUMMARY: Notice is hereby given in accordance with Pub. L. 94-579 that a meeting of the Rawlins District Advisory Council will be held. This meeting will consist of a field trip to Muddy Creek and adjacent areas.

DATE: June 25, 1986.

ADDRESS: Rawlins District Office, 1300 3rd Street, Rawlins, Wyoming.

FOR FURTHER INFORMATION CONTACT: Gordon Warren, Public Affairs Specialist, or Mike Karbs, Associate District Manager, Rawlins District, Bureau of Land Management, P.O. Box 670, Rawlins, Wyoming 82301 (307) 324-7171.

SUPPLEMENTARY INFORMATION: The field trip will begin at 10:00 a.m. at the Rawlins District Office. The purpose of the field trip is to review the Muddy Creek Watershed Improvement Project and to review the Willows/Sand Dune area. Other items to be discussed during this meeting include.

1. Medicine Bow Resource Area Resource Management Plan;
2. Hunter Access/Operation Respect Program; and
3. Election of Officers.

This meeting/field trip is open to the public; however, interested persons must furnish their own 4-wheel drive transportation and lunch. The Council will convene at the Rawlins District Office at 4:00 p.m. to receive comments. Anyone interested in attending this meeting must notify the District Manager by June 18, 1986. Written statements may also be filed before the meeting for the Board's consideration.

Summary minutes will be available for review within 30 days after the meeting at the Rawlins District Office. Copies of the minutes may be obtained for the cost of duplication.

Michael J. Karbs,
Acting District Manager.

BILLING CODE 4310-22-M

Notice of Realty Action; Exchange of Public and Private Lands in Riverside County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action (CA 18779).

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

San Bernardino Meridian, California

T. 3 S., R. 4 E.,
Sec. 32, NE¼NE¼,
Containing 40 acres of public land.

In exchange for these lands the United States will acquire a like value of land from The Nature Conservancy, located within the following described area:

San Bernardino Meridian, California

T. 4 S., R. 6 E.,
Sec. 11, all.
Sec. 12, W½.
Containing 960 acres of private land.

SUPPLEMENTARY INFORMATION: The purpose of the exchange is to acquire a portion of the non-federal lands within the proposed 13,020 acre preserve for the Coachella Valley fringe-toed lizard. The lizard is federally listed as threatened and State listed as endangered. The Bureau of Land Management's goal is to acquire approximately 6700 acres within the preserve. The acres being acquired do not constitute habitat for the lizard, but provide a sand source requried for the continuing production of active sand dune areas that are critical habitat for the lizard. Other State and Federal agencies will acquire the remaining portions of the preserve. The public interest will be well served by completing this exchange.

Publication of this notice in the Federal Register segregates the public lands from operation of the public land laws and the mining law, except for mineral leasing. The segregative effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

The exchange will be conducted on a value for value basis. Following an appraisal, full equalization of values will be achieved by acreage adjustments or by a payment to the Untied States by The Nature Conservancy of funds in an amount not to exceed 25 percent of the total value of the lands to be transfetred out of Federal ownership.

Land to be transferred from the United States will be subject to the following reservations, terms, and conditions.

1. A right-of-way for ditches and canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945).

2. All the oil, gas, and geothermal steam and associated geothermal resources shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at this BLM Office.

2. A right-of-way for a Federal Aid Highway, Serial No. LA 0152980, under the Act of November 9, 1921. (42 Stat. 216; 23 U.S.C. 18).

4. The patent will be subject to those rights granted by oil and gas lease CA 10758, issued under the Act of February 25, 1920, as amended (41 Stat. 437, 30 U.S.C. 181).

FOR FURTHER INFORMATION CONTACT: John Sullivan, Indio Resource Area (714) 351-6863. Information relating to this exchange, including the environmental assessment and land report, is available for review at the California Desert District Office, 1695 Spruce Street, Riverside, California 92507.

DATE: For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, California Desert District Office, Bureau of Land Management, at the above address. Objections will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

Dated: May 13, 1986.

H.W. Riecken,

Acting District Manager.

BILLING CODE 4310-FB-M

[NM 63431-OK]

Recreation and Public Purposes Sale; Noble County, OK

AGENCY: Bureau of Land Management, Interior.

ACTION: Land classification notice.

SUMMARY: The Tulsa District proposes to dispose of 40.00 acres of public land in Noble County, Oklahoma, to the Otoe-Missouria Tribe for environmental education.

DATE: For a period of 45 days after the date of publication of this Notice in the Federal Register, all persons who wish to submit comments may do so in writing to the District Manager, Bureau of Land Management, 9522-H East 47th Place, Tulsa, Oklahoma 74145. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Hans Sallani, Oklahoma Resource Area Headquarters, 405-231-5491.

The following described land has been examined and is classified as suitable for sale under the Recreation and Public Purposes (R&PP) Act, as amended (43 U.S.C. 869 et seq.), and the Federal Land Policy and Management Act (FLPMA) of 1976 (43 U.S.C. 1781):

T. 23 N., R. 2 E., IM, Oklahoma.
Sec. 12, NE¼NW¼.
Containing 40.00 acres.

Publication of this Notice will segregate the subject land from all appropriations under the public land laws, including locations under the mining laws, but not from application under the mineral leasing laws and the R&PP Act. This segregation will terminate upon issuance of a patent, or 18 months from the date of this Notice, or upon publication of a Notice of Termination.

Jim Sims,

District Manager.

On page 17253, in the second column, the last line should read "Secs. 25 ¹,".

BILLING CODE 1505-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

Proposed Termination of Final Judgment; Bendix Aviation Corp. et al.

Notice is hereby given that Allied Corporation (Allied), as successor to Bendix Aviation Corporation, Hydraulic Brake Company and Bendix-Westinghouse Automotive Air Brake Co. (The Bendix Companies), American Standard Inc., as successor to Westinghouse Air Brake Company, and McGraw-Edison Company, as successor to Wagner Electric Corporation, (the "defendants") have filed with the United States District Court for the Southern District of New York motions to terminate the final judgments in *United States* v. *Bendix Aviation Corporation et al.*, Civil No. 44-294; and the Department of Justice ("Department"), in a stipulation also filed with the Court, has consented to termination of the judgments, but has reserved the right to withdraw its consent for at least seventy (70) days after the publication of this notice. The complaint in this case (filed on December 9, 1947) alleged that defendants had combined and conspired to restrain, and attempted to and did monopolize, trade and commerce in the fields of mechanical, hydraulic and power braking systems. The judgments (entered on December 22, 1994 and October 7, 1953) order defendants to license since-expired patents on certain conditions and enjoin them (1) from entering into anticompetitive agreements with other braking system manufacturers, (2) from inducing or coercing others not to compete in braking systems, and (3) as to Allied, as successor to The Bendix Companies, from entering into any joint venture with other braking system or vehicle manufacturers.

The Department has filed with the Court a memorandum setting forth the reasons why the Department believes that termination of the judgments would serve the public interest. Copies of the complaint and final judgments, defendants' motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the Court in connection with these motions

will be available for inspection in the Legal Procedure Unit of the Antitrust Division, Room 7233, Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone: 202-633-2481), and at the Office of the Clerk of the United States District Court for the Southern District of New York, United States Courthouse, Foley Square, New York, New York 10007. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the final judgments to the Department. Such comments must be received within sixty (60) days, and will be filed with the Court. Comments should be addressed to John J. Hughes, Chief, Middle Atlantic Office, Antitrust Division, Department of Justice, 11400 United States Courthouse, 601 Market Street, Philadelphia, Pennsylvania 19106 (telephone: 215-597-7405).

Dated: May 20, 1986.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

DEPARTMENT OF LABOR

Office of the Secretary

Privacy Act of 1974; Amendment of Systems of Records

AGENCY: Office of the Secretary of Labor.

ACTION: Amendment of Privacy Act systems of records, Office of the Assistant Secretary for Administration and Management.

SUMMARY: The Department of Labor is hereby amending the system of records notice for DOL/OASAM-1, entitled Attendance, Leave, and Payroll File. Specifically, the section on "System Location" is being changed to add that copies of employee time cards may be maintained by office time keepers.

DATE: Persons wishing to comment on this notice may do so by June 26, 1986.

EFFECTIVE DATE: Unless otherwise noticed in the **Federal Register**, this notice shall become effective June 26, 1986.

ADDRESS: Seth D. Zinman, Associate Solicitor, Office of the Solicitor, Division of Legislation and Legal Counsel, U.S. Department of Labor, Room N-2428, 200 Constitution Avenue NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Sofia P. Peters, Counsel for Administrative Legal Services, Office of the Solicitor, Department of Labor, Room N-2428, 200 Constitution Avenue, NW., Washington, DC 20210; Telephone (202) 523-6188.

Amendment of System Location For DOL/OASAM-1

Pursuant to the Privacy Act of 1974, 5 U.S.C. 552a, The Department of Labor hereby amends the **SYSTEM LOCATION** paragraph applicable to a system of records maintained by the Office of the Assistant Secretary for Administration and Management, previously published at 47 FR 30368 (July 13, 1982). The paragraph entitled "system location" is amended by adding paragraph "C" to read as follows:

DOL/OASAM-1

SYSTEM NAME:

Attendance, Leave, and Payroll File.

SYSTEM LOCATION:

* * * * *

C. Copies of time cards may be maintained by office time keepers, as appropriate.

* * * * *

Signed at Washington, DC, this 30th day of April 1986.

William E. Brock,

Secretary of Labor.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATE: Comments on this information collection must be submitted by June 6, 1986.

ADDRESSES: Send comments to Ms. Judy McIntosh, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503; (202-395-6880). In addition, copies of such comments may be sent to Ms. Marianne Dunn, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5464).

FOR FURTHER INFORMATION CONTACT: Ms. Marianne Dunn, National Endowment for the Arts, Administrative Services Division, Room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202-682-5464) from whom copies of the documents are available.

SUPPLEMENTARY INFORMATION: The National Endowment for the Arts requests OMB approval of the Application Guidelines and Supplemental Information Sheets listed below:

Music Professional Training/Music Recording/Centers for New Music Resources.

Purpose: Application for benefits.

Frequency of Collection: One-time.

Respondents: Nonprofit institutions.

Use: Guideline instructions and applications elicit relevant information from nonprofit organizations that apply for funding under specific Program categories. This information is necessary for the accurate, fair and thorough consideration of competing proposals in the peer review process.

Estimated Number of Respondents: 195.

Estimated Hours for Respondents to Provide Information: 8,406.

Murray R. Welsh,

Director, Administrative Services Division, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Meeting on Low-Level Radioactive Waste Policy Amendments Act (LLRWPAA) of 1985

AGENCY: Nuclear Regulatory Commission.

ACTION: Meeting on Low-Level Radioactive Waste Policy Amendments Act [LLRWPAA] of 1985.

SUMMARY: The Nuclear Regulatory Commission (NRC) will hold a meeting on the Low-Level Radioactive Waste Policy Amendments Act of 1985 as part of NRC's continuing effort to foster the implementation of the Act's provisions. The purpose of this meeting will be to discuss with selected State officials NRC responsibilities under the Act, including the approach being taken and progress being made in fulfilling NRC responsibilities. The NRC staff wishes to obtain State views on technical and institutional issues associated with NRC and the State implementation of the LLRWPAA and to determine any additional areas in which the NRC can be of assistance in the development of disposal facilities. The meeting is open to the public. Following the discussions of the NRC and State representatives, members of the public will have the opportunity to ask questions.

DATES: June 24–25, 1986.

FOR FURTHER INFORMATION CONTACT: Donald A. Nussbaumer, Assistant Director for State Agreements Program, Office of State Programs, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone 301–492–7787.

SUPPLEMENTARY INFORMATION:

Preliminary Agenda for Meeting with State Representatives On Low Level Radioactive Waste Policy Amendments Act of 1985, June 24–25, 1986, Holiday Inn, Bethesda, Maryland.

June 24, 1986

Topic

Proposed Speaker

8:30—I. Welcome and Introduction
G. Wayne Kerr, Director, Office of State Programs
8:45—II. Low-Level Waste Management Issues and Perspectives
John Davis, Director Nuclear Material Safety and Safeguards
9:15—III. NRC Roles in Implementing the Low-Level Radioactive Waste Policy Amendments of 1985 [This session will include topics such as approach to dealing with below regulatory concern, emergency access, greater than Class C waste, State certifications, etc.)
Robert Browning, Director, Division of Waste Management and Staff
11:00—IV. NRC's Technical Assistance Programs to States and Compacts [This session will address the letters and FR notice on this subject—FR 3886 Vol. 51, No. 20)

Conduct of the Meeting

Mr. Donald Nussbaumer, Assistant Director, for State Agreements Program, Office of State Programs, U.S. Nuclear Regulatory Commission, will serve as Chairman at the meeting. Mr. Nussbaumer will conduct the meeting in a manner that will facilitate the orderly conduct of business. Seating for the public will be on a first come-first served basis. A transcript of the meeting and written comments will be available for inspection and copying for a fee, at the NRC Public Document Room, 1717 H Street, NW. Washington, DC 20555 on or about August 20, 1986.

Dated at Bethesda, Maryland, this 16th day of May, 1986.

For the United States Nuclear Regulatory Commission.

G. Wayne Kerr,

Director, Office of State Programs.

Self-Regulatory Organizations; Options Clearing Corporation; Order Granting Accelerated Approval to a Proposed Rule Change

The Options Clearing Corporation ("OCC") on March 24, 1986, submitted a proposed rule change to the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"). OCC requested accelerated approval of the proposal. The Commission published notice of the proposal in the Federal Register on April 22, 1986, to solicit public comment.[1] The Commission received four comment letters.[2] While all commenters supported the proposal, one commenter [3] stated that the proposal's additional calculations required of custodian banks would burden their operations significantly and urged OCC to consider other alternatives.[4] This point is discussed below. This Order approves the proposal on an accelerated basis.

The proposal would amend OCC's index option and stock option escrow receipt forms [5] to provide an alternative

[1] Securities Exchange Act Release No. 23128 (April 15, 1986), 51 FR 15065 (April 22, 1986).

[2] Comments were received from the Chicago Board Options Exchange, Inc. ("CBOE"); Walsh, Greenwood & Company; Baker & McKenzie ("Baker") on behalf of State Street Bank and Trust Company ("State Street"); and the Northern Trust Company.

[3] *See* Baker's letter in File No. SR–OCC–86–06.

[4] Baker also advocated several technical changes in the escrow receipt forms. The Commission has referred those changes to OCC for consideration.

[5] *See* Securities Exchange Act Release No. 22234 (August 13, 1985), 50 FR 33443 (August 19, 1985), amending OCC Rule 1801 to permit, on a pilot basis, OCC Clearing Members to deposit with OCC

Continued

formula for calculating the amount of escrow receipts that a custodian bank may have outstanding at any one time. The proposal also would update the stock option escrow receipt form, adopting improved language from the more recently drafted index option escrow receipt form.

I. Description of the Proposal

To place an outer limit on OCC's known financial exposure if a bank issuing escrow receipts for OCC Clearing Members should fail, OCC currently requires OCC-approved escrow banks, when issuing an escrow receipt, to warrant that the total value of collateral, *i.e.*, cash, cash equivalents and securities (at market value), deposited under all outstanding escrow receipts and option guarantee letters, does not exceed 25 percent of the bank's shareholders' equity.[6] Escrow banks agree to this limitation, among others, by executing an OCC Escrow Receipt Form.

OCC's proposal would revise its escrow receipt forms to provide escrow banks an alternative, less restrictive formula for limiting the amount of escrow receipts that they may have outstanding. Specifically, new clause (c)(ii) of the forms would use the escrow-related option's "intrinsic" value, *i.e.*, the "in-the-money' amount, as the formula's basis. Thus, escrow banks could continue to issue escrow receipts until the "in-the-money" value of the escrow-related short options reach 25 percent of shareholders' equity. Banks choosing to use the new formula would be required to calculate daily the percentage of the aggregate "in-the-money" amount of the escrow-related options to shareholders' equity and to provide the results of the calculations to OCC each month.

The proposal also would make several technical revisions in OCC's stock option escrow receipt. Specifically, the proposal expressly recognizes that: (i) An escrow bank can be authorized to act on behalf of a customer's agent (the form currently provides only that the bank is authorized on behalf of the customer); (ii) a short options position covered by an escrow receipt may be assigned in part; and (iii) an escrow bank may issue escrow receipts on securities held in its account at a financial intermediary (*e.g.*, a securities depository). Finally, the amended form would expressly prohibit an escrow bank from asserting any lien or right of offset with respect to securities underlying escrow receipts and would require the bank to notify OCC and other interested parties if any third party asserts a claim against those securities.

II. OCC's Rationale for the Proposal

OCC believes the proposal is consistent with the purposes and requirements of section 17A of the Act because it would increase escrow banks' capacity for issuing stock index option related escrow receipts, thereby facilitating greater institutional participation in the index options markets, while providing reasonable safeguards for OCC's protection. In addition, OCC believes that the proposed changes in the stock option escrow receipt form would update the form consistent with the newer index option escrow receipt form.

OCC states that there is good cause for approving the proposed rule change on an accelerated basis because several financial institutions have exhausted their capacity for issuing escrow receipts under the existing limitation. OCC believes it is in the best interest of the marketplace to allow such institutions to resume issuing escrow receipts.

III. Discussion

The Commission believes that the proposal is consistent with section 17A of the Act and is approving it. As discussed below, the Commission agrees with OCC that the proposal should facilitate greater institutional participation in the index options markets by increasing escrow banks' capacity for issuing escrow receipts, while, at the same time, maintaining OCC's high level of financial protection.

The Commission believes it appropriate for OCC to change the formula limiting the amount of escrow receipts that a custodian bank may have outstanding to help ensure the continuing liquidity of the index options market. OCC notes in its filing, and the Commission acknowledges, that since last summer, many institutional investors with diversified stock portfolios have begun large-scale covered index call writing programs to enhance portfolio returns and to hedge against downward market movements. This increased participation in the index options market by institutional investors has been due, in large part, to the ability of those investors to cover short index options positions with assets underlying escrow receipts. That increased activity, however, has caused some escrow banks to exhaust their capacity for issuing escrow receipts under OCC's present formula. Thus, institutional investors' ability to participate actively in the index options markets has been hampered. The Commission believes that OCC's proposal will facilitate continued active index options market participation by institutional investors.

The Commission also agrees wth OCC that the proposal reflects more accurately OCC's exposure from the escrow receipt program. The Commission recognizes that in the unlikely event of the contemporaneous failure of the investor's OCC member firm and the escrow issuing bank, OCC would be at risk. In that situation, the Commission agrees with OCC that OCC's exposure would be best measured by using the index options' intrinsic value, *i.e.*, the "in-the-money" amount of the options covered by the escrow receipt, rather than the gross value of the deposited collateral. As guarantor of option writers' performance, OCC would be at risk for essentially the "in-the-money" amount in this situation.[7] While the Commission commends OCC's conservative approach to risk management, as illustrated by the initial formula's resulting overcollateralization of short call index options, the Commission also appreciates the need for OCC to modify its systems to reflect changing conditions and experience. This proposal accomplishes that result.[8]

---

escrow receipts, collateralized by any combination of cash, cash equivalents, and exchange-listed or over-the-counter margin stocks, in lieu of OCC margin on short index call option positions carried for customer accounts. Under the terms of the escrow receipt, the customer on whose behalf a Clearing Member makes a deposit authorizes the liquidation of the deposit to the extent necessary to perform the issuing bank's obligations to OCC. The bank must monitor the value of deposited assets and notify OCC if the assets' value falls to less than 30 percent of the number of option contracts covered by the deposit times the aggregate current index value of the underlying index. At that time, OCC may disregard the escrow receipt and require the Clearing Member to deposit OCC margin regarding the short positions previously covered by the escrow receipt. *See also* OCC Rule 610, which governs generally the deposit of underlying securities for margin purposes.

[6] In calculating the value of deposited property, cash equivalents and common stocks are valued at their closing sale prices (if subject to last sale reporting) or closing bid prices (if not subject to last sale reporting) on the day the bank issues an escrow receipt.

[7] *See* Securities Exchange Act Release No. 19400 (February 4, 1983), 48 FR 6219 (Feburary 10, 1983), approving File No. SR–OCC–82–19 for an explanation of OCC's obligations with respect to the issuance, clearance and settlement of index options transactions and the processing and settlement of index options exercises.

[8] The proposal provides escrow banks flexibility. Those banks that are unable or unwilling to modify their automated systems to perform the more complex calculations required by the proposal may stay with the existing formula and lower ceiling on their escrow activity.

The Commission also recognizes that, under the proposal, a volatile market could cause the value of the index options relating to issued receipts (as measured by either formula) (the "position value") to increase well beyond the 25% of shareholders' equity limitation, even if the bank stops issuing escrow receipts consistent with the limitation. Nonetheless, the Commission believes that OCC is adequately protected. The unchanged terms of the escrow receipt require the escrow-issuing bank to monitor closely the value of the escrowed assets and to notify OCC whenever that value falls to less than 105% of the current position value (the "105% provision"). OCC then can disregard the escrow recipt and require the appropriate Clearing Member to deposit OCC margin regarding the previously covered short position. The Comission believes that the operation of the 105% provision should ensure that OCC always will have sufficient collateral to secure its true risk, *i.e.*, the "in-the-money" amount.

OCC's risks from its escrow receipt program are met in other ways. First, state fiduciary and banking law and (when applicable) federal banking regulations operate to protect OCC. These laws [9] generally require custodian banks to segregate customer-owned assets on their books and records. These customer-identified assets are not considered bank assets and should be free from bank creditor claims in a liquidation proceeding.[10] Second, even if the insolvent bank were to commingle assets, OCC, under Article VIII of its By-Laws, either could pledge clearing fund assets for a short-term bank loan or assess *pro rata* Clearing Members' Clearing Fund contributions.

Finally, the Commission appreciates State Street's comments. As noted above, State Street believes that the proposal's additional calculations would burden unnecessarily bank operations. State Street suggests that Clearing Members should be responsible for these calculations. State street further suggests that large custodian banks, *i.e.*, with at least $100 million shareholders' equity, be exempt from any limitation on the amount of outstanding escrow receipts. The Commission, however, believes that only escrow issuing banks can make these calculations. Only the bank can calculate its shareholders' equity and only the bank is aware of the extent of its outstanding escrow receipts. The Commission also believes it appropriate for OCC to limit the amount of escrow receipts that can be issued by any issuing bank in light of OCC's financial risk and its self-regulatory responsibilities under the Act.

On the basis of the foregoing, the Commission finds OCC's proposed amendments to its escrow receipt forms consistent with the Act and, in particular, with section 17A of the Act.[11]

Accordingly, it is therefore ordered, under section 19(b)(2) of the Act, that the proposed amendments (File No. SR-OCC-86-06) be, and hereby are, approved on an accelerated basis.[12]

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: May 18, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22245; File No. SR-OCC-86-6]

Self-Regulatory Organizations; Options Clearing Corp.; Order Granting Accelerated Approval of Proposed Rule Change

On March 19, 1986, the Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission a proposed rule change, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), amending its margin systems to permit margin credits for equity options to offset partially margin requirements for non-equity options ("NEO") positions and NEO margin credits to offset partially margin requirements for equity options.[1] OCC requested in its filing that the Commission approve the proposal on an accelerated basis.[2] This Order approves the proposal.

I. Description

The proposed rule change, for the first time, enables OCC Clearing Members to "cross-over" margin credits between its equity and NEO margin systems. Currently, OCC calculates separately Clearing Members' equity options and NEO margin requirements. Thus, net margin credits generated by one system cannot be offset against margin requirements in the other system. OCC stated in its filing that it has not permitted cross-over credits because its margin systems were not designed to accommodate them. OCC now has redesigned those systems to enable credits from one system to be used to offset margin requirements in the other. OCC, however, will reduce equity option and NEO margin credits by 50% before applying them against the other system's margin requirement.

II. OCC's Rationale

OCC states in its filing that, because its equity-option and NEO margin systems have been separate and their design could not accommodate the application of margin credits in one system against margin requirements in the other, OCC often has held large amounts of unused margin collateral in the form of "excess long value." Because OCC has redesigned its margin systems, it believes that it now can permit Clearing Members to cross-over margin credits. OCC believes that its Clearing Members will benefit substantially from the proposal. Clearing Members' margin collateral requirements will be reduced, thus freeing up assets for more productive purposes. OCC believes it particularly crucial in a bull market that Members use fully the excess long value credits in their accounts. Otherwise, Clearing Members would need to continue to lock-up appreciating assets, increasing the over-collateralization of their margin requirements. While OCC recognizes that market-maker Clearing Members could pledge options through

[10] *See, e.g.*, July 10, 1984, letter from Carroll R. Stoffert, Assistant General Counsel, Federal Deposit Insurance Corporation, to Donald N. Ringsmuth, Assistant General Counsel, Federal Reserve Bank of New York. Although this letter deals with the more complex situation of bank-entry-only U.S. Government Securities in the custodian bank insolvency context, identical principles apply to customer-identified certificated securities.

[11] The Commission also is approving OCC's proposed changes in the stock option escrow receipt form that update the form, consistent with the newer index option escrow receipt form.

[12] OCC has represented that several financial institutions have exhausted their capacity for issuing escrow receipts under the existing limitation. The Commission agrees with OCC that there is good cause for approving the proposed rule change on an accelerated basis. The Commission believes that, with the safeguards contained in the amended forms of escrow receipt, it is in the public interest to allow such institutions to resume issuing escrow receipts as soon as possible.

[1] On March 31, 1986, OCC amended the proposed rule change to incorporate the proposal into its substantially revised NEO margin systems. *See* Securities and Exchange Act Release No. 23107 (April 22, 1986), 51 FR 15627 (April 30, 1986) (approving File No. SR-OCC-85-21).

[2] Notice of the proposed rule change was published on April 8, 1986. *See* Securities and Exchange Act Release No. 23107 (April 8, 1986), 51 FR 12389 (April 28, 1986). No comments were received.

OCC's market-maker pledge program, OCC believes that it is more appropriate to offer all Clearing Members some financial benefit from maintaining excess long value in their OCC margin accounts.

OCC believes that the proposed rule change is consistent with section 17A of the Act in that the proposal ensures the safeguarding of securities and funds which are in the custody or control of OCC or for which it is responsible. OCC stated that the proposed rule change would not reduce OCC's comprehensive safeguarding scheme against financial exposure from Clearing Member default. In fact, OCC represents that the long options positions that comprise "excess long value" offer OCC greater protection in a rising market and present minimal increased risk to OCC in a falling market because, under the proposal, only 50% of any excess long value in one system could be applied against margin requirements in the other system. Moreover, because Clearing Members are encouraged to maintain their long positions in an OCC margin account, OCC's ability to meet its financial obligations in the event of Clearing Member insolvency would be enhanced.

OCC requested that the Commission approve the proposed rule change on an accelerated basis. OCC believes that the proposal is non-controversial and will not expose it to significant increased risk. OCC stated that the only reason it did not implement cross-crediting of excess long value previously was because its systems design could not accommodate it. Now, since OCC has redesigned its systems, it wishes to provide immediate relief to its Clearing Members.

III. Discussion

To approve OCC's proposed rule change, the Commission must determine that the modification to OCC's margin systems is consistent with section 17A of the Act; in particular, whether the proposal will assure the safeguarding of securities and funds which are in the custody or control of OCC or for which it is responsible. For the reasons discussed below, the Commission believes that OCC's proposal is consistent with the Act.

The Commission believes that permitting cross-crediting of excess long value between NEO and equity option positions should pose no greater risk to OCC than does permitting unrelated NEO positions to offset each other or unrelated equity option positions to offset each other. OCC's margin systems always have allowed Clearing Members' excess long value to be credited, at least in part, against their OCC margin obligations within each margin system.[3] In OCC's equity options margin system, Members are able to offset, partially, excess long value in one class of options against short value in other classes. Specifically, if the excess long value for the class is greater than the margin required for the class, the excess long value is reduced by 50% and applied only against any OCC margin requirements for other equity options classes. Similarly, under OCC's revised NEO margin system, OCC credits NEO Clearing Members for the long value in their accounts. Among product groups and class groups that are not part of product groups,[4] any excess long value, *i.e.*, excess OCC margin credit, also is reduced by 50% and applied against the Clearing Member's margin requirements for other NEO classes and product groups. OCC's conservative approach in reducing excess long value provides it with an extra cushion protecting OCC against an unfavorable price change in the long value. OCC reduces the excess long value because unrelated options positions that offset each other cannot necessarily be expected to exhibit similar price changes over a given period.

Moreover, the Commission believes that the proposed degree of reduction is appropriate. As discussed above, OCC's current 50% reduction has protected OCC well against unexpected changes in the value of offsetting positions. The Commission agrees with OCC that it will likewise give adequate protection to OCC when OCC permits cross-crediting of NEO and equity option excess long value.

While each OCC margin system traditionally has allowed some excess long value in one options class to offset margin requirements of another class, both margin systems, as OCC notes above, are separate. Each system is designed to measure and protect OCC against its discrete financial exposure from every Clearing Member's separate equity option and NEO activity. This approach to risk management carries through OCC's safeguarding scheme. For example, OCC's Clearing Funds (the Stock Clearing Fund and the Non-Equity Securities Clearing Fund) are one of OCC's secondary backstops against financial risk. OCC calculates every Clearing Member's required contribution to each Clearing Fund separately on the basis of the Member's equity option and NEO activity, and OCC maintains each Fund separately. In addition, at no time can the Clearing Fund deposits of a solvent "Stock Clearing Member" be charged for the outstanding obligations of a "Non-Equity Securities Clearing Member" or *vice versa*.[5] At first blush, the cross-crediting proposal seems to run counter to OCC's general approach. The Commission, however, is not concerned about this apparent contradiction. The proposal should not compromise the integrity of OCC's safeguarding scheme; OCC will continue to measure separately its financial exposure from equity options and NEO activity and will continue to ensure that each Member is exposed only to a degree of financial exposure from OCC membership consistent with the Member's business, *i.e.*, the amount of its activity.

Finally, the Commission agrees with OCC that cross-credits should economically benefit OCC Members. By allowing OCC Members to apply margin collateral more effectively, cross-crediting should reduce the amount of assets needed for members to secure their OCC margin requirements. In turn, assets that otherwise would be earmarked to satisfy those requirements could be available for more productive use. In fact, those assets could flow into the marketplace, thus increasing its depth and liquidity.

OCC requested that the Commission approve this proposal on an accelerated basis under section 19(b)(2) of the Act. The Commission finds good cause for approving the proposal prior to the thirtieth day after publication of notice of the proposal. The Commission has not received any comments on the proposal and believes that the proposal will benefit Clearing Members substantially in the present bull market by freeing up Member's assets for more productive use.

IV. Conclusion

For the reasons stated above, the Commission finds that the proposed rule change in File No. SR–OCC–86–5 is consistent with the Act. In particular, the Commission finds that the proposed rule change is consistent with Section 17A and the rules and regulations applicable to clearing agencies.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

BILLING CODE 8010-01-M

[Release No. 34-23358; File No. SR-OCC-86-7]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change of Options Clearing Corp.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 24, 1986, the Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change described below. The Commission is publishing this notice to solicit comments on the proposed rule change.

The proposal amends OCC's facilities management rules.[1] These rules had required a Facilities Management Agreement ("Agreement") to provide that the Agreement would not be terminated until OCC was provided with 30 days written notice from both the Managed Clearing Member and the Managing Clearing Member. Under the proposal, the Agreement must provide that it will not be terminated until 30 days after written notice of termination is provided by the terminating party to OCC and, if the terminating party is the Managing Clearing Member, by the terminating party to the Managed Clearing Member.

OCC states in its filing that the proposal should continue to give a Managed Clearing Member advance notice if its Managing Clearing Member is terminating a facilities management arrangement and should provide time for the Managed Clearing Member to make new facilities management arrangements. OCC also states that the proposal would require a Managed Clearing Member to give notice to OCC of termination of an Agreement, but would not require notice to the Managing Firm.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to the file number in the caption above and should be submitted by June 17, 1986.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: May 19, 1986.
Shirley E. Hollis,
Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[License Application No. 02/02-5497]

Hanam Capital Corp. Application for a License to Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company (SBIC) under the provisions of section 301(d) of the Small Business Investment Act of 1958, as amended, (the Act), (15 U.S.C. 661 *et seq.*), has been filed by Hanam Capital Corporation, One Penn Plaza, Suite 3330, New York, New York 10119, with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1986).

The officers, directors and shareholders of the Applicant are as follows:

Name and address	Title or relationship	Percent of ownership
Chang Yul Chang, Apt. 2D K, 5800 Arlington Ave., Riverdale, NY 10471.	Chairman of the Board, President, Manager, Director.	55
Yoshihiko Endo, Apt. 2530, 481 Eighth Avenue, New York, NY 10001.	Vice President, Secretary, Director.	45
Glenn T. Nygreen, 97 Highland Road, Scarsdale, NY 10583.	Director	
Joseph Francis Periconi, 1733 Astor Avenue, Bronx, NY 10469.	Director	

The Applicant, a New York corporation, will begin operations with a capitalization of $1,020,000 and will conduct its operations principally in the State of New York.

As an SBIC licensed to operate under section 301(d) of the Act, the Applicant will provide financial and managerial assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the Applicant under their management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 30 days from the date of publication of this notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, DC 20416.

A copy of this notice shall be published in a newspaper of general circulation in New York, New York.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

The Applicant, a California corporation, will begin operations with $2,500,000 in private capital and conduct its activities principally in the State of California.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management, including profitability and financial soundness in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in the Carmel, California area.

[License No. 06/06-0288]

Wesbanc Ventures, Ltd., Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Wesbanc Ventures, Ltd. (Wesbanc), 2401 Fountainview, Houston, Texas 77057, a Federal Licensee under the Small Business Investment Act of 1958, as amended, has filed an application with the Small Business Administration (SBA) pursuant to § 107.903 of the Regulations governing small business investment companies (13 CFR 107.903 (1986)) for approval of a conflict of interest transaction.

The conflict of interest arises because of a proposed $500,000 financing by Wesbanc of Specter, Inc., 5446 Highway 290 W. #205, Austin, Texas 78735. The financing is in the form of a 6 year, 13 percent subordinated converible debenture, convertible into common stock. The affiliation arises because Mr. Stuart Schube, General Partner of Wesbanc, owns 14.09 percent of the common stock of Specter, Inc. Additionally, Mr. E. H. Batey, a member of the Investment Committee of Wesbanc, is a Director of Specter, Inc., and owns 3.83 percent of the common stock of Specter, Inc. Because of the above, this transaction is subject to the prior written approval of SBA pursuant to Section 107.903 of SBA Regulations.

Notice is hereby given that any interested person may, no later than (15) days from the date of publication of this Notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in the Austin, Texas area.

American Capital, Inc.; Surrender of License

Notice is hereby given that American Capital, Inc., 300 North Kanawha Street, Suite 103, Beckley, West Virginia 25801 has surrendered its license to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (the Act). American Capital, Inc., was licensed by the Small Business Administration on May 9, 1984. Under the authority vested by the Act and pursuant to the Regulations promulgated thereunder, the surrender was accpeted on April 11, 1986, and accordingly, all rights, privileges, and franchises derived therefrom have been terminated.

Minority Business Resource Center Advisory Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1), notice is hereby given of a meeting of the Minority Business Resource Center Advisory Committee to be held July 14, 1986, at 5:30 p.m. at the Cathedral Hill Hotel, Golden Gate Room, 1100 Van Ness Ave., San Francisco, CA. The agenda for the meeting is as follows:

—Potential for Concessions Project

—Review of Financial Assistance Projects

—Pending Maritime Project for the West Coast

—Role of Women-owned Business Enterprises in Transportation-related Activities.

Attendence is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to attend and persons wishing to present oral statements should notify the Minority Business Resource Center not later than the day before the meeting. Information pertaining to the meeting may be obtained from Ms. Josie Grazziadio, Office of Small and Disadvantaged Business Utilization, 400 7th Street, SW, Washington, DC 20590, telephone (202) 426-1902. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on May 20, 1986.

Amparo B. Bouchey,

Director, Office of Small and Disadvantaged Business Utilization.

BILLING CODE 4910-62-M

Federal Aviation Administration

Proposed Advisory Circular 25-XX; Guidance for Installations of Miscellaneous Nonrequired Electrical Equipment

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed Advisory Circular (AC) 25-XX, and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular (AC) pertaining to installations of miscellaneous, nonrequired electrical equipment. This notice is necessary to give all interested persons an opportunity to present their views on the proposed AC.

DATE: Comments must be received on or before August 25, 1986.

ADDRESS: Send all comments on the proposed AC to: Federal Aviation Administration, Attention: Transport Standards Staff, ANM-110, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. Comments may be inspected at the above address between 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jan Thor, Transport Standards Staff, at the address above, telephone (206) 431-2127.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the draft AC may be obtained by contacting the person named above under "FOR FURTHER INFORMATION CONTACT." Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Commenters should identify AC 25-XX and submit comments, in duplicate, to the address specified above. All communications received on or before the closing date for comments will be considered by the Transport Standards Staff before issuing the final AC.

Background

The proposed AC provides guidance for the installation of miscellaneous, nonrequired electrical equipment and components which are primarily located in the passenger cabin. Examples of such equipment and components are video projection systems, cathode ray tube (CRT) entertainment systems, telephones, stereo systems, refreshment

bars, galleys, aerial cameras, logo lights and games. An appendix provides a more detailed galley certification procedure as a result of the increased electrical loads and higher temperatures resulting from such installations. The AC is not intended to cover equipment or components which provide flight information to the flightcrew.

Issued in Seattle, Washington, on May 12, 1986.

Leroy A. Keith, Manager,
Aircraft Certification Division, ANM-100.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-6 (Sub-279)]

Burlington Northern Railroad Company—Abandonment—in Morton, Grant, and Hettinger Counties, ND

The Commission has issued a certificate authorizing the Burlington Northern Railroad Company to abandon its 99.4-mile rail line between Mandan (milepost 0.70) and Mott (milepost 91.13) in Morton, Grant, and Hettinger Counties, ND. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) a financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA". Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

James H. Bayne,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of May 26, 1986.

Open meetings will be held on Tuesday, May 27, 1986, at 2:30 p.m., and Thursday, May 29, 1986, at 3:30 p.m., in Room 1C30. Closed meetings will be held on Wednesday, May 28, 1986, at 2:30 p.m. and Thursday, May 29, 1986, following the 3:30 p.m. open meeting.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at closed meetings.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meetings in closed session.

The subject matter of the open meeting scheduled for Tuesday, May 27, 1986, at 2:30 p.m., will be:

1. Consideration of whether to endorse the Investment Advisers Amendments Act of 1986, which would (i) respond to the U.S. Supreme Court's decision in *Lowe* v. *SEC*, (ii) facilitate sharing of adviser investigation and inspection information with state and federal law enforcement officials, (iii) increase fees for registrants, (iv) grant the Commission explicit statutory authority to prescribe the form of any records of filings required under the Act, and (v) make minor revisions to clarify that advisers exempt from registration by rule are treated on the same terms as those exempt by statute. For further information, please contact Gerald Lins at (202) 272-2099.

2. Consideration of whether to issue an order authorizing: (i) Middle South Energy, Inc. ("MSE"), a public utility subsidiary of Middle South Utilities, Inc. ("MSU"), a registered holding company, under the Public Utility Holding Company Act of 1935, to issue and sell up to $300 million of first mortgage bonds, (ii) the operating utility subsidiaries of MSU to consent to the assignment of the Availability Agreement by MSE as security for the bonds, and (iii) MSU to consent to the assignment of the Capital Funds Agreement by MSE as security for the bonds. The Commission will also consider the comments and request for a hearing in this matter filed by Arkansas Public Service Commission. For further information, please contact William C. Weeden at (202) 272-7063.

3. Consideration of whether to propose for comment: (1) New Rule 14b-2, relating to banks' obligations in connection with forwarding communications to beneficial owners; (2) corresponding and clarifying amendments to Rules 14a-1, 14a-13, 14b-1, 14c-1 and 14c-7; (3) amendments to Rules 14a-13 and 14c-7 that would permit registrants to request from both brokers and banks beneficial owner lists that exclude persons who purchased securities through an employee benefit plan; and (4) amendments to Rules 14a-3 and 14c-2 regarding when and under what conditions registrants are no longer obligated to deliver annual reports or proxy or information statements to security holders. For further information, please contact Sarah A. Miller at (202) 272-2589.

The subject matter of the closed meeting scheduled for Wednesday, May 28, 1986, at 2:30 p.m., will be:

Settlement of administrative proceedings of an enforcement nature.
Institution of administrative proceedings of an enforcement nature.
Report of investigation.

The subject matter of the open meeting scheduled for Thursday, May 29, 1986, at 3:30 p.m., will be:

The Commission will hear oral argument on appeals by Rooney Pace, Inc., a registered broker-dealer, Randolph K. Pace, its president, and the Commission's Division of Enforcement, from an administrative law judge's initial decision. For further information, please contact R. Moshe Simon at (202) 272-7400.

The subject matter of the closed meeting scheduled for Thursday, May 29, 1986, following the 3:30 p.m. open meeting, will be:

Post oral argument discussion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kathryn Natale at (202) 272-3195.

John Wheeler,
Secretary.
May 21, 1986.

Nuclear Regulatory Commission

10 CFR Parts 2, 19, 20, 21, 51, 70, 72, 73, 75 and 150

Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste; Proposed Rule

BEST COPY AVAILABLE

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 2, 19, 20, 21, 51, 70, 72, 73, 75 and 150

Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Waste Policy Act of 1982 (NWPA) requires that monitored retrievable storage facilities (MRS) for spent nuclear fuel and high-level radioactive waste (HLW) be subject to licensing by the Nuclear Regulatory Commission (NRC), if Congress approves their construction. The NRC is proposing to add language to its regulations in 10 CFR Part 72 to provide for licensing the storage of spent nuclear fuel and HLW in an MRS. The Commission intends to have the appropriate regulations to fulfill the requirements of the NWPA in place in a timely manner. The proposed rule would also clarify certain issues that have arisen since Part 72 was made effective on November 28, 1980.

DATE: Comment period expires August 25, 1986.

Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Mail written comments to Secretary, U.S. Nuclear Regulatory Commission, Washington, DC, 20555 ATTN: Docketing and Service Branch. Deliver comments to Room 1121, 1717 H Street NW., Washington, DC between 8:15 a.m. and 5:00 p.m. weekdays. Copies of comments received, the environmental assessment, other referenced NUREGs, and a draft regulatory analysis may be examined at the NRC Public Document Room at 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: William R. Pearson, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 443–7663.

SUPPLEMENTARY INFORMATION:

Background

On November 12, 1980, the NRC published in the Federal Register (45 FR 74693) a final rule, 10 CFR Part 72, "Licensing Requirements for the Storage of Spent Fuel in an Independent Spent Fuel Storage Installation (ISFSI)," covering the storage of spent fuel. The NRC is proposing minor amendments to clarify matters that have arisen since Part 72 was made effective on 11/28/80 and additions to address certain provisions of the Nuclear Waste Policy Act of 1982 (NWPA), as discussed below.

Issued Addressed

1. *Need for the Proposed Rule at this time.* On January 7, 1983 the Nuclear Waste Policy Act of 1982 (NWPA) was signed into law (Pub. L. 97–425). The major purpose of the NWPA was to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel. Title I of the NWPA includes four main subtitles and stipulates requirements to ensure that the following four areas are properly addressed: (A) Repositories for the disposal of high-level radioactive waste and spent nuclear fuel, (B) the Federal interim storage program for spent nuclear fuel, (C) monitored retrievable storage of high-level radioactive waste and spent nuclear fuel, and (D) low-level radioactive waste. The requirements for licensing pertinent to B and C above are contained in this proposed rule.

The NWPA directed the Department of Energy (DOE) to complete a detailed study of the need for and feasibility of, and to submit to Congress by June 1, 1985 a proposal for construction of one or more monitored retrievable storage facilities (MRS). DOE prepared a proposal, which was submitted to the Commission for review and comment prior to submittal to Congress. DOE planned to submit the proposal to Congress in February 1986, but the State of Tennessee obtained a Federal court injunction preventing DOE from submitting the proposal if it contained any reference to siting an MRS in Tennessee. DOE has appealed the injunction to a Circuit Court of Appeals. It is expected that a trial date will be set for late July or early August. Congress will determine whether to authorize construction of an MRS after submittal of the proposal. The role of the MRS is to provide safe and reliable management of spent nuclear fuel and high-level radioactive waste (HLW) pending further processing or disposal. The NWPA specifies that an MRS must be designed to:

a. Accommodate spent nuclear fuel and HLW resulting from civilian nuclear activities;

b. Permit continuous monitoring, management, and maintenance of such spent fuel and waste for the foreseeable future;

c. Provide for the ready retrieval of such spent fuel and waste for further processing or disposal; and

d. Safely store such spent fuel and waste as long as may be necessary by maintaining such facility through appropriate means, including any required replacement of such facility.

If an MRS is authorized by Congress, the installation will be subject to the NRC licensing process under section 141 of the NWPA (42 U.S.C. 10161). Storage of only spent fuel in an MRS could be licensed under 10 CFR Part 72, because in this case an MRS is an ISFSI under DOE control. Currently, Part 72 could not be used to license the storage of high-level radioactive waste (HLW). From a technical stand-point storage of solidified HLW is not significantly different from storage of spent fuel because (1) HLW would be solidified in containers which can be handled and stored in the same manner as spent fuel containers, (2) the HLW form will be at least equivalent to spent fuel as a potential leaching barrier, (3) the heat and radioactivity associated with the HLW package will be equivalent or less than the heat and radioactivity associated with the packaged spent fuel, (4) there is no criticality problem because the special nuclear material content is so low, and (5) no radioactive gases and little radioactive iodine are associated with solidified HLW. Additions to Part 72 are needed to explicitly cover the storage of HLW in a monitored retrievable storage installation. It should be noted that under proposed § 72.1, the MRS rules would not apply unless Congress authorizes contruction of such an installation pursuant to section 141 of the Nuclear Waste Policy Act.

2. *Purpose and Scope of Part 72.* Currently Part 72 is limited in scope to the storage of spent fuel and radioactive material associated with the storage of spent fuel in an independent spent fuel storage installation (ISFSI) specifically designed for this purpose. Part 72 prescribes the regulatory requirements for this activity whether conducted by a nuclear utility, the Department of Energy, or some other entity.

The terms "monitored retrievable storage installation (MRS)" and "high-level radioactive waste (HLW)" would be added to Part 72, in appropriate places, to specifically include a monitored retrievable storage facility, as provided for by section 141 by the NWPA. The scope of this rule is deemed to apply to a monitored retrievable storage installation (MRS) or any other facility that might be proposed by DOE for storage of spent fuel and high-level

BEST COPY AVAILABLE

radioactive waste that is subject to licensing under section 202(3) of the Energy Reorganization Act of 1974. This facility would be used for the storage of spent nuclear fuel or high-level radioactive waste resulting from civilian nuclear activities pending shipment to a HLW repository or other disposal. An MRS would provide a backup option for the handling and storage of spent fuel and high-level radioactive waste if there should be delays in the HLW repository program. The MRS may also serve other functions in the DOE waste management program such as packaging of spent fuel and high-level radioactive waste in preparation for eventual disposal. The NWPA does not contemplate the MRS as a substitute for the repository. The NWPA states that the development of a repository for the disposal of spent nuclear fuel and high-level radioactive waste should proceed regardless of any construction of a MRS. The MRS, if authorized by Congress, will be owned and operated by the Department of Energy.

The existing Part 72 only allows for the storage of spent fuel and other radioactive materials associated with the spent fuel. The proposed Part 72 would include the storage of high-level radioactive waste in an MRS. An environmental assessment has been performed to determine the impact of storing high-level radioactive waste with spent nuclear fuel in an MRS. This assessment, NUREG–1092, "Environmental Assessment for 10 CFR Part 72" "Licensing Requirements for the Independent Storage of Spent Fuel and High-Level Radioactive Waste," concludes that solid high-level radioactive waste is comparable to spent nuclear fuel in its heat generation and in its radioactivity content on a per metric ton basis and that the storage of high-level radioactive waste in an MRS does not significantly affect the environment.

In the proposed rule, DOE has been exempted from certain financial requirements such as providing annual financial reports, creditor information, and financial plans for decommissioning. It is assumed that government agencies will have adequate funds to carry out their statutory responsibilities. Following the precedent in 10 CFR Part 60, DOE has also been exempted from the requirements to submit a license application under oath or affirmation. Instead, DOE would be required to have each application for a license or license amendment signed by the Secretary of Energy or an authorized representative.

A license to receive and possess spent nuclear fuel has always included the authority to transfer the spent fuel to an authorized recipient. In order to make this clear, the term "transfer" has been added to § 72.1, Purpose, of the proposed regulation.

Minor amendments are proposed to clarify Part 72's applicability to the Federal Interim Storage Program, authorized by Subtitle B of the NWPA. Under this program the Department of Energy would provide Federal interim storage for spent nuclear fuel from utilities that the Commission finds are unable to provide adequate storage capacity onsite. Section 136 of the Nuclear Waste Policy Act of 1982 limits the Federal interim storage program to 1900 metric tons of spent nuclear fuel. Section 135 authorizes the Department of Energy to use available storage capacity at one or more facilities owned by the Federal Government on January 7, 1983, the date of enactment of the NWPA, for this purpose and exempts these facilities from licensing. These provisions are reflected in proposed § 72.2(e). However, section 135 does require a Commission determination that DOE's use of available storage capacity at an existing Federally owned facility will adequately protect the public health and safety. As explained in the preamble of the Commission's final rule promulgating "Criteria and Procedures for Determining the Adequacy of Available Spent Nuclear Fuel Storage Capacity," 10 CFR Parts 1 and 53, the "Commission will consider what procedures may be appropriate for making that determination in the event that the Secretary proposes to provide interim Federal storage capacity by that method." 50 FR 5548 at 5550–5551, February 11, 1985.

3. *Licensing Actions:* There is now one facility which has been licensed as an ISFSI under the existing Part 72. This is the General Electric Company, Morris Operations at Morris, Ill. This facility was originally built under a Part 50 Construction Permit authorization as a reprocessing plant. It received an initial license for storage of spent fuel under Part 70 and a subsequent license renewal under Part 72 on May 4, 1982 (Docket 72–1). Under the proposed rule, the Morris facility would still be considered an ISFSI and no changes or additional reviews of its license would be required at this time.

Two Part 50 licensees have submitted applications under Part 72 for the storage of spent fuel at an ISFSI. These applications are from Virginia Power (formerly Virginia Electric and Power Company) for construction of an ISFSI at their Surry power station and from Carolina Power and Light Company at their Robinson site. The proposed rule would not delay or necessitate any additional review of these applications.

4. *MRS—Opportunity for Hearing Prior to the First Receipt of Spent Fuel or High-Level Radioactive Waste (HLW).* Part 72 is a one-stage licensing process that provides for issuance, prior to initiation of construction, of a materials license that authorizes receipt and possession of spent fuel for storage. It does not contain a requirement for a formal finding that construction of an ISFSI has been completed in accordance with the application prior to the initial receipt of spent fuel. NRC inspection and enforcement authorities are relied on to provide assurance that construction is conducted in accordance with the approved design and that licensees and contractors adhere to the approved QA program and related QC procedures. In addition, Part 72 requires an update of the safety analysis report (SAR) every 6 months during the construction period and submittal of the finalized SAR at least 90 days before initial operations. Section 72.34(a) requires that a notice of hearing in accordance with § 2.104 or a notice of proposed action in accordance with §§ 2.105 or 2.1107, as appropriate, be issued in connection with each application for a license under Part 72. In view of the relatively long time period projected for construction of an MRS (presently estimated by DOE to be about four years), circumstances might arise in which it would be prudent from the standpoint of public health and safety to provide further opportunity for public review before the first shipment of spent fuel or HLW is received at an MRS. A new paragraph (c) would be added to § 72.34, Public hearings, to provide that after the final updating and submittal by DOE of the safety analysis report (SAR), as required by § 72.50(a), the Commission may provide a further opportunity for hearing prior to the first receipt of spent fuel or HLW at an MRS if the Commission finds that an apportunity for hearing is required in the public interest. In making this determination the Commission would consider, among other things, whether the MRS has been constructed in conformity with the SAR and whether any significant new information important to the safety of the MRS operations has been revealed since issuance of the license.

Because the MRS will be a new type of facility, the Commission is particularly interested in receiving public comments on the following:

1. The need for the Commission to make a finding before MRS operation that construction conforms to the license application;

2. Provisions for second stage hearing rights to the extent necessary to address specific new issues which could not have been litigated at the first stage and/or new information which has been revealed since issuance of the license; and

3. The format for the hearing, if held.

5. *Cladding Degradation.* Section 72.72, currently requires that the fuel cladding "be protected against degradation and gross rupture." This requirement means that the cladding must be protected against degradation during normal operations and storage which could lead to gross rupture of the fuel rods and could result in the release of significant quantities of fuel material and fission products to the storage environment.

A definition of gross rupture is based on the potential consequences of chemical and radioactive releases and their effect on handling of the fuel rods during loading and unloading operations. If additional filtration, confinement or handling equipment would be required because of the material released via the rupture, then the rupture may be considered excessive.

NUREG–1092 analyzes the impact on storage and handling operations if the cladding is allowed to deteriorate. The assessment shows that for storage of spent fuel the cladding need not be maintained if additional confinement is provided. The main concern is during the handling operations involving the removal of the spent fuel from its storage structure and its transfer to casks for shipment. During these operations, if the spent fuel is not properly confined, unnecessary exposure to radioactive material could occur to the worker. One way this additional exposure could be prevented is by using a canister. The canister could act as a replacement for the cladding. Proposed § 72.92(h)(1) reflects this change.

6. *High-Level Radioactive Waste Definition.* The definition of high-level radioactive waste contained in § 72.3 of the proposed rule is the same as that of the MWPA. This definition allows both liquid and solid material to be designated as high-level radioactive waste. However, under the requirements of proposed § 72.91, only solid high-level radioactive wastes could be accepted in an MRS.

It is anticipated that an MRS would be used for storage of HLW in preparation for shipment to a HLW Repository for disposal. The criteria for the waste package to be emplaced in a HLW Repository specifies that the HLW must be in a solid form and placed in a sealed container (see 10 CFR Part 60, § 60.135(c)).

At this time, there is no reason for the storage of liquid wastes in a MRS because chemical reprocessing of spent fuel is not within the MRS scope, thus no liquid high-level radioactive waste would be generated at the MRS and solidification processes are being developed that would solidify liquid wastes, which exist elsewhere, before transfer to an MRS. If storage of liquid high-level waste is anticipated, new design requirements concerning confinement and monitoring would be required. Thus, the general design criteria in Part 72 would require that only solid high-level radioactive wastes be stored in the MRS.

The Commission recognizes that under the MWPA it may define as HLW other wastes that require permanent isolation. Should other materials be determined to require permanent isolation, a separate rulemaking will be conducted. The technical criteria of the proposed Part 72 are considered adequate to accommodate the receipt and storage of such other solid material that may be defined as HLW.

7. *Siting Limitations.* The NWPA sets forth specific siting limitations for a Federally owned ISFSI and MRS. Section 72.75 of the proposed rule accommodates these requirements. The limitations are derived from paragraphs 114(d), 135(a)(2), and 141(g) of the NWPA.

8. *General Design Criteria.* There were four changes made to the overall requirements of the general design criteria (proposed § 72.92). The first is the requirement to consider tornado missiles on the design of the ISFSI or MRS. The existing Part 72 states that an ISFSI need not be protected from tornado missiles. This was based on the fact that the water in a water basin facility would reduce the impact of any tornado missile onto the spent fuel assemblies. It was also assumed that the water basin would be below grade and therefore tornado missiles could not penetrate the walls of the basin. During the past three years, many alternate designs have been proposed for spent fuel storage which include metal casks, concrete silos, drywells, tunnel types, and air-cooled vaults. Many of these concepts are above grade level or have components or systems exposed to possible tornado missiles. It was therefore decided that the design should take into account tornado missile protection unless it can be shown that the missiles will not have any effect on structures, systems, and components important to safety.

The second change made in proposed § 72.92 concerns maintaining the fuel cladding as a confinement barrier. This subject is discussed in section 5 above.

The third change is related to Section 141(b)(1)(B) of the MWPA which requires that the monitored retrievable storage be designed to permit continuous monitoring, management, and maintenance of the spent fuel and high-level radioactive waste for the foreseeable future. The new paragraphs § 72.92(h) (4) and (5) address this requirement.

The last change is concerned with the requirements for retrievability. Section 141(b)(1)(C) of the NWPA requires that the MRS be designed to provide for the ready retrieval of spent fuel and high-level radioactive waste for further processing or disposal. Not only must the MRS be designed for removal of the spent fuel or high-level radioactive waste, but an ISFSI must meet the same criteria for the stored spent fuel. The spent fuel at an ISFSI must also be retrievable for transport to either the MRS or HLW repository whenever they become available. Paragraph 72.92(l) was added to accommodate this requirement.

9. *Quality Assurance.* The existing Part 72 refers to 10 CFR Part 50, Appendix B for the criteria for a quality assurance program. Rather than continuing this reference to Part 50, Subpart G in the proposed rule incorporates specific quality assurance requirements appropriate for an ISFSI or MRS. Licensees who have an NRC approved Appendix B quality assurance program need only state in the application that this approved program will be applied to the ISFSI.

The phrases "safety-related" and "important to safety" are used interchangeably in existing Part 72 in referring to design and quality assurance criteria for components, systems, and structures. For clarity, the term "important to safety" is defined in § 72.3 and will be used exclusively in the proposed rule.

10. *Emergency Planning.* Currently Section 72.19 references Appendix E to Part 50 for the elements that should be contained in an emergency plan. Rather than continuing this reference to 10 CFR Part 50, Section 72.19 is rewritten to set forth explicit requirements for emergency planning that are appropriate for an ISFSI or MRS.

The NRC has evaluated the consequences of potential accidents involving the storage of spent fuel in

water pools in NUREG–0575, "Generic Environmental Impact Statement on Handling and Storage of Spent Light Water Power Reactor Fuels," August 1979. NUREG–0575 concluded that the largest radioactive release would be caused by a tornado driven utility pole striking a pool and rupturing a 45-foot row of fuel assemblies. The release was calculated to be up to 19,000 curies of krypton-85 and 0.00006 curies of iodine-129. Assuming a ground level release, stable atmosphere conditions, low wind speed, and no building wake (which are conservative meteorological assumptions), doses at an assumed site boundary distance of 275 meters would be 0.057 rem to the skin and 0.029 rem to the thyroid for a person standing on the plume centerline.

The NRC has also published a more recent site-specific analysis in NUREG–0709, "Safety Evaluation Report Related to the Renewal of Material License SNM–1265 for the Receipt, Storage, and Transfer of Spent Fuel Pursuant to 10 CFR Part 72—Morris Operation—General Electric Company—Docket Nos. 70–1308 and 72–1," July 1981. NUREG–0709 considered the most serious accident to be the drop of a fuel storage basket in the water of the storage pool, a drop of up to 7 meters. NUREG–0709 assumed all the fuel rods in four PRW fuel bundles would rupture and that all the plenum gases would be released to the pool water. NUREG–0709 calculated the release to be 6000 curies of krypton-85 and 0.00006 curies of iodine-129. Doses at 150 meters were calculated to be 0.016 rem whole body and 0.0004 rem thyroid.

In connection with a separate ongoing rulemaking related to emergency preparedness for fuel-cycle licenses, the staff reevaluated consequences of potential accidents involving spent fuel storage in dry casks, (NUREG–1140, "A Regulatory Analysis on Emergency Preparedness for Fuel Cycle and Other Radioactive Material Licensees"). The accident assumed for the dry cask storage analysis is the removal of the lid from a cask in which all fuel rods have been damaged. The gaseous activity in the gap between the fuel and the cladding is assumed to be released. Using the same assumptions as in NUREG–0575 (VI, section 4.2.3.2), 10% of the krypton-85 and 1% of the iodine-129 activities are assumed to be present in the gap. The cask is assumed to hold 24 PWR spent fuel assemblies at less than 5% uranium-235 enrichment. The fuel burnup is assumed to be 33,000 megawatt-days per metric ton of uranium. The spent fuel is assumed to have been removed from the reactor core 5 years prior to storage in a cask. Due to heat load design criteria, spent fuel may have to age about 5 years before it can be stored in dry casks. Using these assumptions the activity released from the cask would be about 8,000 curies of krypton-85 and 0.004 curies of iodine-129. Using the same meteorological assumptions as in NUREG–0575, but with a building wake factor for a 5m×5m building, the effective dose equivalent at 100m is estimated to be 0.003 rem and the thyroid dose 0.04 rem. The reevaluation revealed no reason to increase the estimated doses in NUREG–0575 and NUREG–0709 and the staff determined that the release from day cask storage is of a comparable magnitude to that for wet storage.

The above evaluations support the conclusion that special offsite emergency preparedness is not necessary for spent fuel storage because doses calculated to result from potential accidents are far below the protective action guides set forth by the Environmental Protection Agency for implementing protective actions for nuclear incidents. Nevertheless, the Commission believes that it is prudent to maintain a channel of communications with local authorities in case of emergency, even though significant offsite consequences are not expected. The proposed rule would require licensees to notify emergency organizations that might be expected to respond in case of emergency.

A licensee's emergency plan must assure that (1) a capability exists for measuring and assessing the significance of accidental releases of radioactive materials, (2) appropriate emergency equipment and procedures are provided onsite to protect workers against radiation hazards that might be encountered following an accident, (3) notifications are promptly made to offsite response organizations, (4) information on the situation and recommended actions, including recommending that the public be informed as appropriate, are provided to organizations that might be expected to respond in case of an emergency, and (5) necessary recovery actions are taken in a timely manner to return a plant to a safe condition following an accident. ISFSI licensees are currently required to submit emergency plans. In addition, in order to ensure that offsite response organizations expected to respond to an accident have been consulted in the formation of the plan, the licensee would be required to allow such offsite response organization 60 days to comment on the plan and provide these comments to NRC. For reasons set forth previously, storage of high-level radioactive waste (HLW) is not significantly different technically from storage of spent fuel. Since an MRS would store spent fuel and could store HLW, emergency planning required for MRS would be the same as for ISFSI.

11. *Increase of Licensing Period for the MRS.* The license period for an ISFSI will remain at 20 years in this proposed rule. The NWPA specifies that the monitored retrievable storage facility provide for the long-term storage of spent nuclear fuel or high-level radioactive waste. An MRS must be designed to accommodate spent nuclear fuel and high-level radioactive waste from civilian nuclear activities; to permit continuous monitoring, management, and maintenance of such spent fuel and waste; to provide for the ready retrieval of spent fuel and waste for further processing or disposal; and to safely store such material as long as may be necessary through appropriate maintenance or replacement of the installation, if required. It is clearly intended that the MRS be capable of providing the requisite safe storage for a relatively long period of time.

Although Congress did not specify a license term for the MRS option, the Commission believes that the choice of an appropriate license term should be guided by the different purposes and time frames for the MRS provided for the NWPA. Accordingly, the proposed revision specifies a 40-year license term for the storage of spent fuel and high-level radioactive waste in an MRS.

12. *Provision of MRS Information to State Governments and Indian Tribes.*

Sections 141(h) and 117(a) of the NWPA require that the Commission provide timely and complete information regarding determinations or plans made with respect to siting, development, design, licensing, construction, operation, regulation, or decommissioning of an MRS to affected State Governments and Indian tribes. A new subpart J would be added to Part 72 to explicitly set forth procedures to meet this requirement.

13. *Records.* Proposed §§ 72.53 and 72.54 are being updated to conform to current requirements and procedures. Proposed §§ 72.35, 72.51, 72.55, 72.71, 72.133, 72.201, and 72.203 would establish fixed periods for retention of records, which is required by the Paperwork Reduction Act of 1980 and the Office of Management and Budget regulations.

14. *Redesignation of Certain Sections.* Various sections have been redesignated because of new sections

being added and to allow for additional expansion in the future. The sections in existing Part 72 that have been redesignated are identified in the following table.

REDESIGNATION TABLE

Old Section	Redesignated as new section
72.01	72.70
72.02	72.71
72.03	72.73
	72.75
72.04	72.77
72.05	72.79
72.06	72.81

Finding of No Significant Environment Impact

The Commission has determined not to prepare an environmental impact statement for the proposed amendments to 10 CFR Part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste."

NUREG–0575, "Final Generic Environmental Impact Statement on Handling and Storage of Spent Light Water Reactor Fuel," August 1979, was issued in support of the final rule promulgating 10 CFR Part 72, "Licensing Requirements for the Storage of Spent Fuel in an Independent Spent Fuel Storage Installation (ISFSI)," which became effective November 28, 1980. On January 7, 1983 the Nuclear Waste Policy Act of 1982 was signed into law. A major provision of this law is that the Department of Energy (DOE) shall complete a detailed study of the need for and feasibility of, and submit to Congress a proposal for, the construction of one or more monitored retrievable storage facilities (MRS) for high-level radioactive waste and spent nuclear fuel. If Congress approves the construction of an MRS, DOE would be required to obtain a license from the Commission for the facility. The NRC staff has concluded that although existing 10 CFR Part 72 is generally applicable to the design, construction, operation, and decommissioning of MRS, additions are necessary to explicitly cover the licensing of spent nuclear fuel and high-level radioactive waste storage in a MRS. In August 1984, the NRC published an environmental assessment for this proposed revision of Part 72, NUREG–1092, "Environmental Assessment for 10 CFR Part 72, Licensing Requirements for the Independent Storage of Spent Fuel and High-Level Radioactive Waste." NUREG–1092 discusses the major issues of the proposed rule and the potential impact on the environment. The findings of the environmental assessment are "(1) past experience with water pool storage of spent fuel establishes the technology for long-term storage of spent fuel without affecting the health and safety of the public, (2) the proposed rulemaking to include the criteria of 10 CFR Part 72 of storing spent nuclear fuel and high-level radiocative waste does not significantly affect the environment, (3) solid high-level waste is comparable to spent fuel in its heat generation and in its radioactivity content on a per metric ton basis, and (4) knowledge of material degradation mechanisms under dry storage conditions and the ability to institute repairs in a reasonable manner without endangering the health [and safety] of the public shows dry storage technology options do not significantly impact the environment." The assessment concludes that, among other things, there are no significant environmental impacts as a result of promulgation of these proposed revisions of 10 CFR Part 72. NUREG–1092 is available for public inspection at the Commission's Public Document Room 1717 H Street NW., Washington, DC.

Based on the above assessment the Commission concludes that the proposed rulemaking action will not have a significant incremental environmental impact on the quality of the human environment.

Paperwork Reduction Act Statement

This proposed rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). This rule has been submited to the Office of Management and Budget for review and approval of the paperwork requirements.

Regulatory Analysis

The NRC has prepared a draft regulatory analysis on this proposed rule. The analysis examines the benefits and alternatives considered by the NRC. The draft analysis is available for inspection in the NRC Public Document Room, 1717 H Street NW., Washington, DC. Single copies of the analysis may be obtained from W.B. Pearson, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (301–443–7663).

Regulatory Flexibility Act Certification

In accordance with the Regulatory Flexibility Act of 1980, (5 U.S.C. 605(b)), the Commission certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities and that therefore a regulatory flexibility analysis need not be prepared. This proposed rule affects only the licensing and operation of independent spent fuel storage installations and of monitored retrievable storage installations. The owners of these installations, nuclear power plant utilities or DOE, do not fall within the scope of the definition of "small entities" set forth in section 601(3) of the Regulatory Flexibility Act or within the definition of "small business" in section 3 of the Small Business Act, 15 U.S.C. 632, or within the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR Part 121.

List of Subjects in 10 CFR Part 72

Manpower training programs, Nuclear materials, Occupational safety and health, Reporting and recordkeeping requirements, Security measures, Spent fuel.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, 5 U.S.C. 553, and the Nuclear Waste Policy Act of 1982, the NRC is proposing to adopt the following revision to 10 CFR Part 72 and related conforming amendments to 10 CFR Parts 2, 19, 20, 21, 51, 70, 73, 75, and 150.

1. 10 CFR Part 72 is revised to read as follows:

PART 72—LICENSING REQUIREMENTS FOR THE INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL AND HIGH-LEVEL RADIOACTIVE WASTE

Subpart A—General Provisions

Sec.

72.1 Purpose.
72.2 Scope.
72.3 Definitions.
72.4 Communications.
72.5 Interpretations.
72.6 License required; types of licenses.
72.7 Specific exemptions.
72.8 Denial of licensing by Agreement States.
72.9 Information collection requirements: OMB approval.

Sec.
72.10 Employee protection.

Subpart B—License Applications, Form, and Contents

72.11 Filing of applications for specific licenses.
72.12 Elimination of repetition.
72.13 Public inspection of applications.
72.14 Contents of application: General and financial information.
72.15 Contents of application: Technical information.
72.16 Contents of application: Technical specifications.
72.17 Contents of application: Applicants' technical qualifications.
72.18 Decommissioning plan, including financing.
72.19 Emergency plan.
72.20 Environmental report.
72.21 [Reserved]

Subpart C—Issuance and Conditions of Licenses

72.31 Issuance of licenses.
72.32 Duration of license; renewal.
72.33 License conditions.
72.34 Public hearings.
72.35 Changes, tests, and experiments.
72.36 Transfer of licenses.
72.37 Creditor regulations.
72.38 Applications for termination of licenses.
72.39 Application for amendment of license.
72.40 Issuance of amendment.
72.41 Modification, revocation, and suspension of licenses.
72.42 Backfitting.

Subpart D—Records, Reports, Inspections and Enforcement

72.50 Safety analysis report updating.
72.51 Material balance, inventory, and records requirements for stored materials.
72.52 Reports of accidential criticality or loss of special nuclear material.
72.53 Material status reports.
72.54 Nuclear material transfer reports.
72.55 Other records and reports.
72.56 Inspections and tests.
72.57 Violation.

Subpart E—Siting Evaluation Factors

72.70 General considerations.
72.71 Design basis external natural events.
72.73 Design basis external man-induced event.
72.75 Siting limitations.
72.77 Identifying regions around an ISFSI or MRS site.
72.79 Defining potential effects of the ISFSI or MRS on the region.
72.81 Geological and seismological characteristics.
72.83 Criteria for radioactive materials in effluents and direct radiation from an ISFSI or MRS.
72.85 Controlled area of an ISFSI or MRS.
72.87 [Reserved]
72.89 Spent fuel or high-level radioactive waste transportation.

Subpart F—General Design Criteria

72.91 General considerations.
72.92 Overall requirements.
72.93 Criteria for nuclear criticality safety.
72.94 Criteria for radiological protection.
72.95 Criteria for spent fuel, high-level radioactive waste, and other radioactive waste storage and handling.
72.96 Criteria for decommissioning.

Subpart G—Quality Assurance

72.100 Quality assurance requirements.
72.101 Quality assurance organization.
72.103 Quality assurance program.
72.105 Design control.
72.107 Procurement document control.
72.109 Instructions, procedures, and drawings.
72.111 Document control.
72.113 Control of purchased material, equipment, and services.
72.115 Identification and control of materials, parts, and components.
72.117 Control of special processes.
72.119 Licensee inspection.
72.121 Test control.
72.123 Control of measuring and test equipment.
72.125 Handling, storage, and shipping control.
72.127 Inspection, test and operating status.
72.129 Nonconforming materials, parts, or components.
72.131 Corrective action.
72.133 Quality assurance records.
72.135 Audits.

Subpart H—Physical Protection

72.201 Physical security plan.
72.202 Design for physical protection.
72.203 Safeguards contingency plan.
72.204 Changes to physical security and safeguards contingency plans.

Subpart I—Training and Certification of Personnel

72.301 Operator requirements.
72.302 Operator training and certification program.
72.303 Physical requirements.

Subpart J—Provision of MRS Information to State Governments and Indian Tribes

72.310 Provision of MRS information.
72.312 Participation in license reviews.
72.314 Notice to States.
72.316 Representation.

Authority: Secs. 51, 53, 57, 62, 63, 65, 69, 81, 161, 182, 183, 184, 186, 187, 68 Stat. 929, 930, 932, 933, 934, 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2077, 2092, 2093, 2095, 2099, 2111, 2201, 2232, 2233, 2234, 2236, 2237, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688, as amended (42 U.S.C. 2021). Sec. 201, as amended, 202, 206, 88 Stat. 1242, 1243, 1246, as amended (42 U.S.C. 5841, 5842, 5846); Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851); sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332); secs. 131, 132, 133, 135, 137, 141, Pub. L. 97–425, 96 Stat. 2229, 2230, 2232, 2241 (42 U.S.C. 10151, 10152, 10153, 10155, 10157, 10161). Section 72.34 also issued under sec. 189, 68 Stat. 955 (42 U.S.C. 2239); sec. 134 Pub. L. 97–425, 96 Stat. 2230 (42 U.S.C. 10154). Subpart J also issued under secs. 2(2), 2(15), 2(19), 117(a), 141(h), Pub. L. 97–425, 96 Stat. 2202, 2203, 2204, 2222, 2244 (42 U.S.C. 10101, 10137(a), 10161(h)).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 72.8, 72.14, 72.15, 72.17(d), 72.19, 72.33(b)(1), (4), (5), (e), (f), 72.36(a) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 72.10, 72.15, 72.17(d), 72.33(c), (d)(1), (2), (e), 72.201, 72.203, 72.204(a), 72.301 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 72.19(c), 72.33(b)(3), (d)(3), (f), 72.35(b), 72.50–72.52, 72.53(a), 72.54(a), 72.55, 72.56, 72.133, 72.204(b) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

Subpart A—General Provisions

§ 72.1 Purpose.

The regulations in this part establish requirements, procedures, and criteria for the issuance of licenses to receive, transfer, and possess power reactor spent fuel and other radioactive materials associated with the spent fuel storage in an independent spent fuel storage installation (ISFSI) and the terms and conditions under which the Commission will issue such licenses, including a license to the U.S. Department of Energy (DOE) for the provision of not more than 1900 metric tons of spent fuel storage capacity for the Federal interim storage program under Subtitle B—Interim Storage Program of the Nuclear Waste Policy Act of 1982 (NWPA). The regulations in this part also establish requirements, procedures, and criteria for the issuance of licenses to DOE to receive, transfer, package, and possess pwoer reactor spent fuel, high-level radiocative waste, and other radioactive materials associated with the spent fuel and high-level radioactive waste storage, in a monitored retrievable storage installation (MRS) if authorized by Congress pursuant to section 141 of the Nuclear Waste Policy Act of 1982.

§ 72.2 Scope.

(a) Except as provided in § 72.6(b), licenses issued under this part are limited to the receipt, transfer, packaging, and possession of (1) power reactor spent fuel to be stored in a complex that is designed and constructed specifically for storage of power reactor spent fuel aged for at least one year, and other radioactive materials associated with spent fuel storage in an independent spent fuel storage installation (ISFSI); or (2) power reactor spent fuel to be stored in a complex owned by DOE that is designed and constructed specifically for the storage of spent fuel aged for at least one year, high-level radioactive waste that is in a solid form, and other radiocative materials associated with spent fuel or high-level radioactive waste storage. The term "Monitored

Retrievable Storage Installation" or "MRS", as defined § 72.3, is derived from the NWPA and includes any facility that meets this definition.

(b) The regulations in this part pertaining to an independent spent fuel storage installation (ISFSI) apply to all persons in the United States, including persons in Agreement States. The regulations in this part pertaining to a monitored retrievable storage installation (MRS) apply only to DOE.

(c) The requirements of this regulation are applicable, as appropriate, to both wet and dry modes of storage of (1) spent fuel in an independent spent fuel storage installation (ISFSI) and (2) spent fuel and solid high-level radioactive waste in a monitored retrievable storage installation (MRS).

(d) Licenses covering the storage of spent fuel in an existing spent fuel storage installation shall be issued in accordance with the requirements of this part as stated in § 72.31, as applicable.

(e) As provided in section 135 of the Nuclear Waste Policy Act of 1982, Pub. L. 97-425, 96 Stat. 2201 at 2232 (42 U.S.C. 10155) the U.S. Department of Energy is not required to obtain a license under the regulations in this part to use available capacity at one or more facilities owned by the Federal Government on January 7, 1983, including the modification and expansion of any such facilities, for the storage of spent nuclear fuel from civilian nuclear power reactors.

§ 72.3 Definitions.

As used in this part:

"Act" means the Atomic Energy Act of 1954 (68 Stat. 919) including any amendments thereto.

"Affected Indian tribe" means any Indian tribe—(A) within whose reservation boundaries a monitored retrievable storage facility, test and evaluation facility, or a repository for high-level radioactive waste or spent fuel is proposed to be located; (B) whose federally defined possessory or usage rights to other lands outside of the reservation's boundaries arising out of congressionally ratified treaties may be substantially and adversely affected by the locating of such a facility: *Provided*, That the Secretary of the Interior finds, upon the petition of the appropriate governmental officials of the tribe, that such effects are both substantial and adverse to the tribe.

"As low as is reasonably achievable" (ALARA) means as low as is reasonably achievable taking into account the state of technology, and the economics of improvements in relation to (1) benefits to the public health and safety, (2) other societal and socioeconomic considerations, and (3) the utilization of atomic energy in the public interest.

"Atomic energy" means all forms of energy released in the course of nuclear fission or nuclear transformation.

"Byproduct material" means any radioactive material (except special nuclear material) yielded in, or made radioactive by exposure to, the radiation incident to the process of producing or utilizing special nuclear material.

"Commencement of construction" means any clearing of land, excavation, or other substantial action that would adversely affect the natural environment of a site, but does not mean:

(1) Changes desirable for the temporary use of the land for public recreational uses, necessary borings or excavations to determine subsurface materials and foundation conditions, or other preconstruction monitoring to establish background information related to the suitability of the site or to the protection of environmental values;

(2) Construction of environmental monitoring facilities;

(3) Procurement or manufacture of components of the installation; or

(4) Construction of means of access to the site as may be necessary to accomplish the objectives of paragraphs (1) and (2) above.

"Commission" means the Nuclear Regulatory Commission or its duly authorized representatives.

"Confinement systems" means those systems, including ventilation, that act as barriers between areas containing radioactive substances and the environment.

"Controlled area" means that area immediately surrounding an ISFSI or MRS for which the licensee exercises authority over its use and within which ISFSI or MRS operations are performed.

"Decommission" means to remove (as a facility) safely from service and reduce residual radioactivity to a level that permits release of the property for unrestricted use and termination of the license.

"Design bases" means that information that identifies the specific functions to be performed by a structure, system, or component of a facility and the specific values or ranges of values chosen for controlling parameters as reference bounds for design. These values may be restraints derived from generally accepted "state-of-the-art" practices for achieving functional goals or requirements derived from analysis (based on calculation or experiments) of the effects of a postulated event under which a structure, system, or component must meet its functional goals. The values for controlling parameters for external events include: (1) estimates of severe natural events to be used for deriving design bases that will be based on consideration of historical data on the associated parameters, physical data, or analysis of upper limits of the physical processes involved and (2) estimates of severe external man-induced events to be used for deriving design bases that will be based on analysis of human activity in the region taking into account the site characteristics and the risks associated with the event.

"Design capacity" means the quantity of spent fuel or high-level radioactive waste, the maximum burnup of the spent fuel in MWD/MTU, the curie content of the waste, and the total heat generation in BTU per hour that the storage installation is designed to accommodate.

"DOE" means the U.S. Department of Energy or its duly authorized representatives.

"Floodplain" means the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands. Areas subject to a one percent or greater chance of flooding in any given year are included.

"High-level radioactive waste" or "HLW" means (A) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced directly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations; and (B) other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

"Historical data" means a compilation of the available published and unpublished information concerning a particular type of event.

"Independent spent fuel storage installation" or "ISFSI" means a complex designed and constructed for the interim storage of spent nuclear fuel and other radioactive materials associated with spent fuel storage. An ISFSI which is located on the site of another facility may share common utilities and services with such a facility and be physically connected with such other facility and still be considered independent: *Provided*, that such sharing of utilities and services or physical connections does not: (1) Increase the probability or consequences of an accident or malfunction of components, structures, or systems that are important to safety; or (2) reduce the margin of safety as defined in the basis for any technical specification of either facility.

"Indian Tribe" means an Indian tribe as defined in the Indian Self Determination and Education Assistance Act (Public Law 93–638).

"Monitored Retrievable Storage Installation" or "MRS" means a complex designed, constructed, and operated by DOE for the receipt, transfer, handling, packaging, possession, safeguarding, and storage of spent nuclear fuel and high-level radioactive waste resulting from civilian nuclear activities, pending shipment to a HLW respository or other disposal.

"NEPA" means the National Environmental Policy Act of 1969 including any amendments thereto.

"NWPA" means the Nuclear Waste Policy Act of 1982 including any amendments thereto.

"Persons" means (1) any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Nuclear Regulatory Commission or the Department of Energy (DOE), except that the DOE shall be considered a person within the meaning of the regulations in this part to the extent that its facilities and activities are subject to the licensing and related regulatory authority of the Commission pursuant to Section 202 of the Energy Reorganization Act of 1974, as amended (88 Stat. 1244), and sections 131, 132, 133, 135, 137, and 141 of the Nuclear Waste Policy Act of 1982 (96 Stat. 2229, 2230, 2232, 2241); (2) any State; any political subdivision of a State, or any political entity within a State; (3) any foreign government or nation,or any political subdivision of any such government or nation, or other entity; and (4) any legal successor, representative, agent, or agency of the foregoing.

"Population" means the people that may be affected by the change in environmental conditions due to the construction, operation, or decommissioning of an ISFSI or MRS.

"Region" means the geographical area surrounding and including the site, which is large enough to contain (1) all the features related to a phenomenon or to a particular event that could potentially impact the safety of the ISFSI or MRS and (2) all measurable effects of environmental impact, both radiological and nonradiological, that are due to the construction, operation, or decommissioning of an ISFSI or MRS.

"Reservation" means (1) any Indian reservation or dependent Indian community referred to in clause (a) or (b) of section 1151 of title 18, United States Code; or (2) any land selected by an Alaska Native village or regional corporation under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).

"Site" means the real property on which the ISFSI or MRS is located.

"Source material" means (1) uranium or thorium, or any combination thereof, in any physical or chemical form or (2) ores that contain by weight one-twentieth of one percent (0.05%) or more of (i) uranium, (ii) thorium, or (iii) any combination thereof. Source material does not includes special nuclear material.

"Special nuclear material" means (1) plutonium, uranium-233, uranium enriched in the isotope 233 or in the isotope 235, and any other material which the Commission, pursuant to the provisions of section 51 of the Act, determines to be special nuclear material, but does not include source material; or (2) any material artifically enriched by any of the foregoing but does not include source material.

"Spent Nuclear Fuel" or "Spent Fuel" means fuel that has been withdrawn from a nuclear reactor following irradiation, has undergone at least one year decay since being used as a source in a power reactor of energy and has not been separated into its constitutent, elements by reprocessing. Spent fuel includes the special nuclear material, byproduct material, source material, and other radioactive materials associated with fuel assemblies.

"Structures, systems, and components important to safety" mean those features of the ISFSI or MRS whose function is (1) to maintain the conditions required to store spent fuel or high-level radioactive waste safely, (2) to prevent damage to the spent fuel or the high-level radioactive waste container during handling and storage, or (3) to provide reasonable assurance that spent fuel or high-level radioactive waste can be received, handled, packaged, stored, and retrieved without undue risk to the health and safety of the public.

§ 72.4 Communications.

Except where otherwise specified, all communications and reports concerning the regulations in this part and applications filed under them should be addressed to the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Communications, reports, and applications may be delivered in person at the Commission's Offices at 7915 Eastern Avenue, Silver Spring, Maryland, or at 1717 H Street NW., Washington, DC.

§ 72.5 Interpretations.

Except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations in this part by an officer or employee of the Commission, other than a written interpretation by the General Counsel, will be recognized to be binding upon the Commission.

§ 72.6 License required; types of licenses.

(a) Licenses for the receipt, handling, storage, and transfer of spent fuel or high-level radioactive waste are of two types: general and specific. Any general license provided in this part is effective without the filing of applications with the Commission or the issuance of licensing documents to particular persons. Specific licenses are issued to named persons upon applications filed pursuant to regulations in this part.

(b) A general license is hereby issued to receive title to and own spent fuel or high-level radioactive waste without regard to quantity. Notwithstanding any other provision of this chapter, a general licensee under this paragraph is not authorized to acquire, deliver, receive, possess, use, or transfer spent fuel or high-level radioactive waste except as authorized in a specific license.

(c) No person may acquire, receive, or possess (1) spent fuel or radioactive material associated with spent fuel for the purpose of storage in an ISFSI, or (2) spent fuel, high-level radioactive waste, or radioctive material associated with spent fuel or high-level radioactive waste for the purpose of storage in a MRS, except as authorized in a specific license issued by the Commission in accordance with the regulations in this part.

§ 72.7 Specific exemptions.

The Commission may, upon application by any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest.

§ 72.8 Denial of licensing by Agreement States.

Agreement States may not issue licenses covering the storage of spent fuel in an ISFSI or the storage of spent fuel and high-level radioactive waste in a MRS.

§ 72.9 Information collection requirements: OMB approval.

(a) The Nuclear Regulatory Commission has submitted the information collection requirements contained in this part to the Office of Management and Budget (OMB) for approval as required by the Paperwork

Reduction Act of 1980 (44 U.S.C. 3501 et seq.). OMB has approved the information collection requirements contained in this part under control number 3150-0132.

(b) The approved information collection requirements contained in this part appear in §§ 72.11, 72.14 through 72.20, 72.32, 72.33, 72.35 through 72.39, 72.42, 72.50 through 72.58, 72.70, 72.71, 72.73, 72.77, 72.79, 72.81, 72.83, 72.88, 72.91, 72.94, 72.100 through 72.135, 72.201 through 72.204, and 72.302.

§ 72.10 Employee protection.

(a) Discrimination by a Commisson licensee, an applicant for a Commission license, or a contractor or subcontractor of a Commission licensee or applicant against an employee for engaging in certain protected activities is prohibited. Discrimination includes discharge and other actions that relate to compensation, terms, conditions, and privileges of employment. The protected activities are established in section 210 of the Energy Reorganization Act of 1974, as amended, and in general are related to the administration or enforcement of a requirement imposed under the Atomic Energy Act or 1954, as amended or the Energy Reorganization Act.

(1) The protected activities include but are not limited to—

(i) Providing the Commission information about possible violations or requirements imposed under either of the above statutes;

(ii) Requesting the Commission to institute action against his or her employer for the administration or enforcement of these requirements; or

(iii) Testifying in any Commission proceeding.

(2) These activities are protected even if no formal proceeding is actually initiated as a result of the employee assistance or participation.

(3) This section has no application to any employee alleging discrimination prohibited by this section who, acting without direction from his or her employer (or the employer's agent), deliberately causes a violation of any requirement of the Energy Reorganization Act of 1974, as amended, or the Atomic Energy Act of 1954, as amended.

(b) Any employee who believes that he or she has been discharged or otherwise discriminated against by any person for engaging in the protected activities specified in paragraph (a)(1) of this section may seek a remedy for the discharge or discrimination through an administrative proceeding in the Department of Labor. The administrative proceeding must be initiated within 30 days after an alleged violation occurs by filing a complaint alleging the violation with the Department of Labor, Employment Standards Administration, Wage and Hour Division. The Department of Labor may order reinstatement, back pay, and compensatory damages.

(c) A violation of paragraph (a) of this section by a Commission licensee, an applicant for a Commission license, or a contractor or subcontractor of a Commission licensee or applicant, may be grounds for—

(1) Denial, revocation, or suspension of the license.

(2) Imposition of a civil penalty on the licensee or applicant.

(3) Other enforcement action.

(d) Actions taken by an employer, or others, which adversely affect an employee may be predicated upon nondiscriminatory grounds. The prohibition applies when the adverse action occurs because the employee has engaged in protected activities. An employee's engagement in protected activities does not automatically render him or her immune from discharge or discipline for legitimate reasons or from adverse action dictated by nonprohibited considerations.

(e) (1) Each licensee and each applicant shall post Form NRC–3, "Notice to Employees," on its premises. Posting must be at locations sufficient to permit employees protected by this section to observe a copy on the way to or from their place of work. Premises must be posted not later than 30 days after an application is docketed and remain posted while the application is pending before the Commission, during the term of the license, and for 30 days following license termination.

(2) Copies of Form NRC–3 may be obtained by writing to the Regional Administrator of the appropriate U.S. Nuclear Regulatory Commission Regional Office listed in Appendix D, Part 20 of this chapter or the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Subpart B—License Application, Form, and Contents

§ 72.11 Filing of applications for specific licenses.

(a) *Place of filing.* Each application for a license, or amendment thereof, under this part should be filed with the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Applications, communications, reports, and correspondence may also be delivered in person at the Commission's offices at 7915 Eastern Avenue, Silver Spring, Maryland, or at 1717 H Street NW., Washington, DC.

(b) *Oath or affirmation.* Each application for a license of license amendment (including amendments to such applications), except for those filed by DOE, must be executed in an original signed by the applicant or duly authorized officer thereof under oath or affirmation. Each application for a license or license amendment (including amendments to such applications) filed by DOE must be signed by the Secretary of Energy or the Secretary's authorized representative.

(c) *Number of copies of applications.* Each filing of an application for a license or license amendment under this part (including amendments to such applications) must include, in addition to a signed original, 25 copies of each portion of such application, safety analysis report, environmental report, and any amendments. Another 125 copies shall be retained by the applicant for distribution in accordance with instruction from the Director or the Director's designee.

(d) *Fees.* The application, amendment, and renewal fees applicable to a license covering the storage of spent fuel in an ISFSI are those shown in § 170.31 of this chapter.

§ 72.12 Elimination of repetition.

In any application under this part, the applicant may incorporate by reference information contained in previous applications, statements, or reports filed with the Commission: *Provided,* that such references are clear and specific.

§ 72.13 Public inspection of applications.

Applications and documents submitted to the Commission in connection with applications may be made available for public inspection in accordance with provisions of the regulations contained in Part 2 and Part 9 of this chapter.

§ 72.14 Contents of application: General and financial information.

Each application must state:

(a) Full name of applicant;

(b) Address of applicant;

(c) Description of business or occupation of applicant;

(d) If applicant is:

(1) An individual: Citizenship and age;

(2) A partnership: Name, citizenship, and address of each partner and the principal location at which the partnership does business;

(3) A corporation or an unincorporated association:

(i) The State in which it is incorporated or organized and the principal location at which it does business; and

(ii) The names, addresses, and citizenship of its directors and principal officers;

(4) Acting as an agent or representative of another person in filing the application: The identification of the principal and the information required under this paragraph with respect to such principal.

(5) The Department of Energy: The identification of the DOE organization responsible for the construction and operation of the ISFSI or MRS, including a description of any delegations of authority and assignments of responsibilities.

(e) Except when the applicant is the DOE, information sufficient to demonstrate to the Commission the financial qualifications of the applicant to carry out, in accordance with the regulations in the chapter, the activities for which the license is sought. The information must state the place at which the activity is to be performed, the general plan for carrying out the activity, and the period of time for which the license is requested. The information must show that the applicant either possesses the necessary funds, or that the applicant has reasonable assurance of obtaining the necessary funds; or that by a combination of the two, the applicant will have the necessary funds available to cover the following:

(1) Estimated construction costs;

(2) Estimated operating costs over the planned life of the ISFSI complex; and

(3) Estimated shutdown and decommissioning costs, and the necessary financial arrangements to provide reasonable assurance prior to licensing that shutdown, decontamination, and decommissioning will be carried out after the removal of spent fuel from storage.

§ 72.15 Contents of application: Technical information.

Each application for a license under this part must include a Safety Analysis Report describing the proposed ISFSI or MRS for the receipt, handling, packaging, and storage of spent fuel or high-level radioactive waste, including how the ISFSI or MRS will be operated. The minimum information to be included in this report must consist of the following:

(a) A description and safety assessment of the site on which the ISFSI or MRS is to be located, with appropriate attention to the design bases for external events. Such assessment must contain an analysis and evaluation of the major structures, systems, and components of the ISFSI or MRS that bear on the suitability of the site when the ISFSI or MRS is operated at its design capacity. If the proposed ISFSI or MRS is to be located on the site of a nuclear power plant or other licensed facility, the potential interactions between the ISFSI or MRS and such other facility must be evaluated.

(b) A description and discussion of the ISFSI or MRS structures with special attention to design and operating characteristics, unusual or novel design features, and principal safety considerations.

(c) The design of the ISFSI or MRS in sufficient detail to support the findings in § 72.31, including:

(1) The design criteria for the ISFSI or MRS pursuant to Subpart F of this part, with identification and justification for any additions to or departures from the general design criteria;

(2) The design bases and the relation of the design bases to the design criteria;

(3) Information relative to materials of construction, general arrangement, dimensions of principal structures, and description of all structures, systems, and components important to safety, in sufficient detail to support a finding the the ISFSI or MRS will satisfy the design bases with an adequate margin for safety; and

(4) Applicable codes and standards.

(d) An analysis and evaluation of the design and performance of structures, systems, and components important to safety, with the objective of assessing the impact on public health and safety resulting from operation of the ISFSI or MRS and including determination of:

(1) The margins of safety during normal operations and expected operational occurrences during the life of the ISFSI or MRS; and

(2) The adequacy of structures, systems, and components provided for the prevention of accidents and the mitigation of the consequences of accidents, including natural and manmade phenomena and events.

(e) The means for controlling and limiting occupational radiation exposures within the limits given in Part 20 of this chapter, and for meeting the objective of maintaining exposures as low as is reasonably achievable.

(f) The features of ISFSI or MRS design and operating modes to reduce to the extent practicable radioactive waste volumes generated at the installation.

(g) An identification and justification for the selection of those subjects that will be probable license conditions and technical specifications. These subjects must cover the design, construction, preoperational testing, operation, and decommissioning of the ISFSI or MRS.

(h) A plan for the conduct of operations, including the planned managerial and administrative controls system, and the applicant's organization, and program for training of personnel pursuant to Subpart I.

(i) If the proposed ISFSI or MRS incorporates structures, systems, or components important to safety whose functional adequacy or reliability have not been demonstrated by prior use for that purpose or cannot be demonstrated by reference to performance data in related applications or to widely accepted engineering principles—an identification of these structures, systems, or components along with a schedule showing how safety questions will be resolved prior to the initial receipt of spent fuel or high-level radioactive waste for storage at the ISFSI or MRS.

(j) The technical qualifications of the applicant to engage in the proposed activities, as required by § 72.17.

(k) A description of the applicant's plans for coping with emergencies, as required by § 72.19.

(l) A description of the equipment to be installed to maintain control over radioactive materials in gaseous and liquid effluents produced during normal operations and expected operational occurrences. The description must identify the design objectives and the means to be used for keeping levels of radioactive material in effluents to the environment as low as is reasonably achievable and within the exposure limits stated in § 72.83. The description must include:

(1) An estimate of the quantity of each of the principal radio-nuclides expected to be released annually to the environment in liquid and gaseous effluents produced during normal ISFSI or MRS operations; and prior to the first receipt of spent fuel, a second estimate confirming the original estimate, if the expected releases and exposures are significantly different from the original estimate.

(2) A description of the equipment and processes used in radioactive waste systems; and

(3) A general description of the provisions for packaging, storage, and disposal of solid wastes containing radioactive materials resulting from treatment of gaseous and liquid effluents and from other sources.

(m) An analysis of the potential dose or dose commitment to an individual outside the controlled area from accidents or natural phenomena events

that result in the release of radioactive material to the environment or direct radiation from the ISFSI or MRS. The calculations of individual dose or dose commitment must be performed for direct exposure, inhalation, and ingestion occurring as a result of the postulated design basis event.

(n) A description of the quality assurance program that satisfies the requirements of Subpart G to be applied to the design, fabrication, construction, testing, operation, modification, and decommissioning of the structures, systems, and components of the ISFSI or MRS important to safety. The description must identify the structures, systems, and components important to safety. The program must also apply to managerial and administrative controls used to assure safe operation of the ISFSI or MRS.

(o) A description of the detailed security measures for physical protection, including design features and the plans required by Subpart H. For an application from DOE for an ISFSI or MRS, DOE will provide a description of the physical security plan for protection against radiological sabotage as required by Subpart H. An application submitted by DOE for an ISFSI or MRS must include a certification that it will provide at the ISFSI or MRS such safeguards as it requires at comparable surface DOE facilities to promote the common defense and security.

(p) A description of the program covering preoperational testing and initial operations.

(q) A description of the decommissioning plan required under § 72.18.

§ 72.16 Contents of application: Technical specifications.

Each application under this part shall include proposed technical specifications in accordance with the requirements of § 72.33 and a summary statement of the bases and justifications for these technical specifications.

§ 72.17 Contents of application: Applicant's technical qualifications.

Each application under this part must include:

(a) The technical qualifications, including training and experience, of the applicant to engage in the proposed activities.

(b) A description of the personnel training program required under Subpart I.

(c) A description of the applicant's operating organization, delegations of responsibility and authority, and the minimum skills and experience qualifications relevant to the various levels of responsibility and authority.

(d) A commitment by the applicant to have and maintain an adequate complement of trained and certified installation personnel prior to the receipt of spent fuel or high-level radioactive waste for storage.

§ 72.18 Decommissioning plan, including financing.

(a) Each application under this part must include a proposed decommissioning plan that contains sufficient information on proposed practices and procedures for the decontamination of the site and facilities and for disposal of residual radioactive materials after all spent fuel or high-level radioactive waste has been removed, in order to provide reasonable assurance that the decontamination and decommissioning of the ISFSI or MRS at the end of its useful life will provide adequate protection to the health and safety of the public. This plan must identify and discuss those design features of the ISFSI or MRS that facilitate its decontamination and decommissioning at the end of its useful life.

(b) The decommissioning plan must include the financial arrangements made by the applicant to provide reasonable assurance that the planned decontamination and decommissioning of the ISFSI will be carried out. The plan submitted by DOE will not have to provide this discussion of financial arrangements.

§ 72.19 Emergency plan.

An application to store spent fuel in an ISFSI or to store spent fuel and high-level radioactive waste in an MRS must include plans for coping with emergencies.

(a) An emergency plan must include the following:

(1) A brief description of the licensee's facility, site, and area near the site;

(2) Identification of each type of accident for which an emergency response may be needed;

(3) Identification of methods for detecting these accidents in a timely manner;

(4) A brief description of methods and equipment for mitigating the consequences of accidents, including those provided to protect workers onsite against radiation hazards, and a description of the program for maintaining the equipment;

(5) A brief description of the methods and equipment to measure and assess accidental releases of radioactive materials;

(6) A brief description of the responsibilities of licensee personnel should an accident occur, including identification of personnel responsible for promptly notifying offsite response organizations and the NRC;

(7) A brief description of the methods for promptly notifying offsite response organizations and requesting assistance, including medical assistance;

(8) A brief description of the types of information on facility status, radioactive releases, and recommended actions, as appropriate to be given to offsite response organizations and to the NRC;

(9) A brief discription of any special instructions and orientation tours the licensee would offer to fire, police, medical, and other emergency response personnel;

(10) A brief description of the means of restoring the facility to a safe condition after an accident; and

(11) Provisions for conducting onsite quarterly communications checks and biennial drills and for identifying and correcting deficiencies in the plan.

(b) The licensee shall allow the offsite response organizations expected to respond in case of emergency 60 days to comment on the licensee's emergency plan before submitting the plan to NRC for approval. The licensee shall provide any comments that have been received within the 60 days to the NRC with the emergency plan.

(c) For an ISFSI that is located on the site of a nuclear power reactor licensed for operation by the Commission, the emergency plan required by 10 CFR 50.47 shall be deemed to satisfy the requirements of this section.

§ 72.20 Environmental report.

Each application for an ISFSI or MRS license under this part must be accompanied by an Environmental Report which meets the requirements of Subpart A of Part 51 of this chapter.

§ 72.21 [Reserved]

Subpart C—Issuance and Conditions of Licenses

§ 72.31 Issuance of licenses.

(a) Except as provided in paragraph (c) of this section, the Commission will issue a license under this part upon a determination that the application for a license meets the standards and requirements of the Act and the regulations of the Commission, and upon finding that:

(1) The applicant's proposed ISFSI or MRS design complies with Subpart F;

(2) The proposed site complies with the criteria in Subpart E;

(3) If on the site of a nuclear power plant or other licensed activity or facility, the proposed ISFSI would not pose an undue risk to the safe operation of such nuclear power plant or other licensed activity or facility;

(4) The applicant is qualified by reason of training and experience to conduct the operation covered by the regulations in this part;

(5) The applicant proposed operating procedures to protect health and to minimize danger to life or property are adequate;

(6) The applicant for an ISFSI, except for DOE, is financially qualified to engage in the proposed activities in accordance with the regulations in this part;

(7) The applicant's quality assurance plan complies with Subpart G;

(8) The applicant's physical protection provisions comply with Subpart H. DOE has complied with the safeguards and physical security provisions identified in § 72.15(o);

(9) The applicant's personnel training program complies with Subpart I;

(10) The applicant's decommissioning plan and its financing pursuant to § 72.18 provide reasonable assurance that the decontamination and decommissioning of the ISFSI or MRS at the end of its useful life will provide adequate protection to the health and safety of the public;

(11) The applicant's emergency plan complies with § 72.19;

(12) The applicable provisions of Part 170 of this chapter have been satisfied;

(13) There is reasonable assurance that (i) the activities authorized by the license can be conducted without endangering the health and safety of the public and (ii) these activities will be conducted in compliance with the applicable regulations of this chapter; and

(14) The issuance of the license will not be inimical to the common defense and security.

(b) Grounds for denial of a license to store spent fuel in the proposed ISFSI or to store spent fuel and high-level radioactive waste in the proposed MRS may be the commencement of construction prior to a conclusion or finding by the Director of the Office of Nuclear Materials Safety and Safeguards or designee or after a public hearing by the presiding officer, Atomic Safety and Licensing Board, Atomic Safety and Licensing Appeal Board, or the Commission acting as a collegial body, as appropriate, on the basis of information filed and evaluations made pursuant to Subpart A of Part 51 of this chapter or in the case of an MRS on the basis of evaluations made pursuant to section 141(c) of NWPA, and after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of the proposed license with any appropriate conditions to protect environmental values.

(c) For facilities that have been covered under previous licensing actions including the issuance of a construction permit under Part 50 of this chapter, a reevaluation of the site is not required except where new information is discovered which could alter the original site evaluation findings. In this case, the site evaluation factors involved will be reevaluated.

§ 72.22 Duration of license; renewal.

(a) Each license issued under this part must be for a fixed period of time to be specified in the license. The license for an ISFSI must not exceed 20 years from the date of issuance. The license for an MRS must not exceed 40 years from the date of issuance. Licenses for either type of installation may be renewed by the Commission at the expiration of the license period upon application by the licensee.

(b) Applications for renewal of a license should be filed in accordance with the applicable provisions of Subpart B at least two years prior to the expiration of the existing license. Information contained in previous applications, statements, or reports filed with the Commission under the license may be incorporated by reference: *Provided*, that such references are clear and specific.

(c) In any case in which a licensee, not less than two years prior to expiration of its existing license, has filed an application in proper form for renewal of a license, the existing license shall not expire until a final decision concerning the application for renewal has been made by the Commission.

§ 72.23 License conditions.

(a) Each license issued under this part must include license conditions. The license conditions may be derived from the analyses and evaluations included in the Safety Analysis Report and amendments thereto submitted pursuant to § 72.15. License conditions pertain to design, construction and operation. The Commission may also include additional license conditions as it finds appropriate.

(b) Each license issued under this part must be subject to the following conditions, even if they are not explicitly stated therein:

(1) Neither the license nor any right thereunder shall be transferred, assigned, or disposed of in any manner, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of the Atomic Energy Act of 1954, as amended, and give its consent in writing.

(2) The license must be subject to revocation, suspension, modification, or amendment in accordance with the procedures provided by the Atomic Energy Act of 1954, as amended, and Commission regulations.

(3) Upon request of the Commission, the licensee shall, at any time before expiration of the license, submit written statements, signed under oath or affirmation if appropriate, to enable the Commission to determine whether or not the license should be modified, suspended, or revoked.

(4) Prior to the receipt of spent fuel for storage at an ISFSI or the receipt of spent fuel and high-level radioactive waste for storage at an MRS, the licensee shall have in effect an NRC-approved program covering the training and certification of personnel that meets the requirements of Subpart I.

(5) The licensee shall permit the operation of the equipment and controls that are important to safety of the ISFSI or the MRS only by personnel whom the licensee has certified as being adequately trained to perform such operations, or by uncertified personnel who are under the direct visual supervision of a certified individual.

(c) Technical specifications submitted pursuant to § 72.16 must include requirements in the following categories:

(1) *Function and operating limits and monitoring instruments and limiting control settings.* (i) Functional and operating limits for an ISFSI or MRS are limits on fuel or waste handling and storage conditions that are found to be necessary to protect the integrity of the stored fuel or waste container, to protect employees against occupational exposures and to guard against the uncontrolled release of radioactive materials; and (ii) Monitoring instruments and limiting control settings for an ISFSI or MRS are those related to fuel or waste handling and storage conditions having significant safety functions.

(2) *Limiting conditions.* Limiting conditions are the lowest functional capability or performance levels of equipment required for safe operation.

(3) *Surveillance requirements.* Surveillance requirements include: (i) Inspection or monitoring of spent fuel or high-level radioactive waste in storage; (ii) inspection, test and calibration activities to ensure that the necessary integrity of required systems and components is maintained; (iii) confirmation that operation of the ISFSI or MRS is within the required functional and operating limits; and (iv) confirmation that the limiting conditions required for safe storage are met.

(4) *Design features.* Design features include items that would have a significant effect on safety if altered or modified, such as materials of construction and geometric arrangements.

(5) *Administrative controls.* Administrative controls include the organization and management procedures, recordkeeping, review and audit, and reporting necessary to assure that the operations involved in the storage of spent fuel in an ISFSI and the storage of spent fuel and high-level radioactive waste in an MRS are performed in a safe manner.

(d) Each license authorizing the receipt, handling, and storage of spent fuel or high-level radioactive waste under this part must include technical specifications that, in addition to stating the limits on the release of radioactive materials for compliance with limits of Part 20 of this chapter and the "as low as is reasonably achievable" objectives for effluents, require that:

(1) Operating procedures for control of effluents be established and followed, and equipment in the radioactive waste treatment systems be maintained and used, to meet the requirements of § 72.63;

(2) An environmental monitoring program be established to ensure compliance with the technical specifications of effluents; and

(3) An annual report be submitted to the appropriate regional office specified in Appendix D of Part 20 of this chapter, with a copy to the Director, Office of Nuclear Material Safety and Safeguards, within 60 days after January 1 of each year, specifying the quantity of each of the principal radionuclides released to the environment in liquid and in gaseous effluents during the previous 12 months of operation and such other information as may be required by the Commission to estimate maximum potential radiation dose commitment to the public resulting from effluent releases. On the basis of this report and any additional information the Commission may obtain from the licensee or others, the Commission may from time to time require the licensee to take such action as the Commission deems appropriate.

(e) The licensee shall make no change that would decrease the effectiveness of the physical security plan prepared pursuant to § 72.201 without the prior approval of the Commission. A licensee desiring to make such a change shall submit an application for an amendment to the license pursuant to § 72.30. A licensee may make changes to the physical security plan without prior Commission approval, provided that such changes do not decrease the effectiveness of the plan. The licensee shall furnish to the Commission a report containing a description of each change within two months after the change is made, and shall maintain records of changes to the plan made without prior Commission approval for a period of two years from the date of the change.

(f) A licensee shall follow and maintain in effect an emergency plan that is approved by the Commission. The licensee may make changes to the approved plan without Commission approval only if such changes do not decrease the effectiveness of the plan. Within twelve months after any change is made, the licensee shall submit a report containing a description of any changes made in the plan to the appropriate NRC regional office specified in Appendix D to Part 20 of this chapter with a copy to the Director, Office of Nuclear Material Safety and Safeguards. Proposed changes that decrease the effectiveness of the approved emergency plan must not be implemented unless the licensee has received prior approval of such changes from the Commission.

§ 72.34 Public hearings.

(a) In connection with each application for a license or an amendment to a license under this part, the Commission shall issue or cause to be issued a notice of hearing in accordance with § 2.104, or a notice of proposed action in accordance with § 2.105 or 2.1107 of this chapter, as appropriate. Except as provided in paragraph (b) of this section, a hearing may not be held until after 30 days' notice and publication once in the Federal Register.

(b) In the absence of a request for hearing by any person whose interest may be affected, the Commission may issue a license or an amendment to a license without a hearing upon 30 days' notice and publication once in the Federal Register of its intent to do so. The Commission may dispense with the 30 days' notice and publication with respect to an application for an amendment to a license issued under this part upon a determination by the Commission that the amendment does not involve a significant hazards consideration or an unreviewed safety question.

(c) Following final completion and submittal by DOE of the safety analysis report (SAR) for an MRS as required by § 72.50(a), and if the Commission finds that an opportunity for hearing prior to the first receipt of spent fuel or high-level radioactive waste at an MRS is required in the public interest, the Commission will issue a notice of opportunity for hearing. In making the finding that an opportunity for hearing is required in the public interest the Commission will consider, among other things, whether the MRS has been constructed in conformity with the SAR and whether any significant new information important to the safety of the MRS operations has been revealed since issuance of the license.

§ 72.36 Changes, tests, and experiments.

(a) (1) The holder of a license issued under this part may, without prior Commission approval unless the proposed change, test or experiment involves a change in the license conditions incorporated in the license, an unreviewed safety question, significant increase in occupational exposure or a significant unreviewed environmental impact: (i) Make changes in the ISFSI or MRS described in the Safety Analysis Report, (ii) make changes in the procedures described in the Safety Analysis Report, or (iii) conduct tests or experiments not described in the Safety Analysis Report.

(2) A proposed change, test, or experiment shall be deemed to involve an unreviewed safety question (i) if the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the Safety Analysis Report may be increased; (ii) if a possibility for an accident or malfunction of a different type than any evaluated previously in the Safety Analysis Report may be created; or (iii) if the margin of safety as defined in the basis for any technical specification is reduced.

(b) (1) The licensee shall maintain records of changes in the ISFSI or MRS and of changes in procedures made pursuant to this section if these changes constitute changes in the ISFSI or MRS or procedures described in the Safety Analysis Report. The licensee shall also maintain records of tests and experiments carried out pursuant to paragraph (a) of this section. These records must include a written safety

evaluation that provides the bases for the determination that the change, test, or experiment does not involve an unreviewed safety question. The records of changes in the ISFSI or MRS and of changes in procedures and records of tests must be maintained until the Commission terminates the license.

(2) Annually, or at such shorter interval as may be specified in the license, the licensee shall furnish to the appropriate regional office, specified in Appendix D of Part 20 of this chapter, with a copy to the Director, Office of Nuclear Material Safety and Safeguards, a report containing a brief description of changes, tests, and experiments made under paragraph (a) of the section, including a summary of the safety evaluation of each. Any report submitted by a licensee pursuant to this paragraph will be made a part of the public record pertaining to this license.

(c) The holder of a license issued under this part who desires (1) to change the license conditions, (2) to change the ISFSI or MRS or the procedures described in the Safety Analysis Report, or (3) to conduct tests or experiments not described in the Safety Analysis Report that involve an unreviewed safety question, a significant increase in occupational exposure, or significant unreviewed environmental impact, shall submit an application for amendment of the license, pursuant to § 72.39.

§ 72.36 Transfer of licenses.

(a) No license or any right included in a license issued under this part for an ISFSI or MRS shall be transferred, assigned, or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission gives its consent in writing.

(b) (1) An application for transfer of a license must include as much of the information described in §§ 72.14 and 72.17 with respect to the identity and the technical and financial qualifications of the proposed transferee as would be required by those sections if the application were for an initial license. The application must also include a statement of the purposes for which the transfer of the license is requested and the nature of the transaction necessitating or making desirable the transfer of the license.

(2) The Commission may require any person who submits an application for the transfer of a license pursuant to the provisions of this section to file a written consent from the existing licensee, or a certified copy of an order or judgment of a court of competent jurisdiction, attesting to the person's right—subject to the licensing requirements of the Act and these regulations—to possession of the radioactive materials and the storage installation involved.

(c) After appropriate notice to interested persons, including the existing licensee, and observance of such procedures as may be required by the Act or regulations or orders of the Commission, the Commission will approve an application for the transfer of a license, if the Commission determines that:

(1) The proposed transferee is qualified to be the holder of the license; and

(2) Transfer of the license is consistent with applicable provisions of the law, and the regulations and orders issued by the Commission.

§ 72.37 Creditor regulations.

(a) This section does not apply to an ISFSI or MRS constructed and operated by DOE.

(b) Pursuant to section 184 of the Act, the Commission consents, without individual application, to the creation of any mortgage, pledge, or other lien on special nuclear material contained in spent fuel not owned by the United States that is the subject of a license or on any interest in special nuclear material in spent fuel; *Provided:*

(1) That the rights of any creditor so secured may be exercised only in compliance with and subject to the same requirements and restrictions as would apply to the licensee pursuant to the provisions of the license, the Atomic Energy Act of 1954, as amended, and regulations issued by the Commission pursuant to said Act; and

(2) That no creditor to secured may take possession of the spent fuel pursuant to the provisions of this section prior to either the issuance of a license from the Commission authorizing possession or the transfer of the license.

(c) Any creditor so secured may apply for transfer of the license covering spent fuel by filing an application for transfer of the license pursuant to § 72.36(b). The Commission will act upon the application pursuant to § 72.36(c).

(d) Nothing contained in this regulation shall be deemed to affect the means of acquiring, or the priority of, any tax lien or other lien provided by law.

(e) As used in this section, "creditor" includes, without implied limitation, the trustee under any mortgage, pledge, or lien on spent fuel in storage made to secure any creditor; any trustee or receiver of spent fuel appointed by a court of competent jurisdiction in any action brought for the benefit of any creditor secured by such mortgage, pledge, or lien; any purchaser of the spent fuel at the sale thereof upon foreclosure of the mortgage, pledge, or lien or upon exercise of any power of sale contained therein; or any assignee of any such purchaser.

§ 72.38 Applications for termination of licenses.

(a) The licensee shall apply to the Commission for authority to surrender a license voluntarily and to decommission the ISFSI or MRS and dispose of the materials stored therein. The Commission may require information, including information as to proposed procedures for the disposal of radioactive material and decontamination of the site, to determine whether there is reasonable assurance that the decommissioning and disposal will be performed in accordance with the regulations in this chapter and will not be inimical to the common defense and security or to the health and safety of the public.

(b) Upon a finding of reasonable assurance that the decommissioning of the ISFSI or MRS and disposal of the materials stored therein will be performed in accordance with the regulations in this chapter and will provide adequate protection to the health and safety of the public, and after notice to interested persons, the Commission will authorize decommissioning and disposal and terminate the license upon completion of decommissioning procedures in accordance with any conditions specified in the authorization.

§ 72.39 Application for amendment of license.

Whenever a holder of a license desires to amend the license, an application for an amendment shall be filed with the Commission fully describing the changes desired and the reasons for such changes, and following as far as applicable the form prescribed for original applications.

§ 72.40 Issuance of amendment.

In determining whether an amendment to a license will be issued to the applicant, the Commission will be guided by the considerations that govern the issuance of initial licenses.

§ 72.41 Modification, revocation, and suspension of licenses.

(a) The terms and conditions of all licenses are subject to amendment, revision, or modification by reason of amendments to the Atomic Energy Act of 1954, as amended, or by reason of rules, regulations, or orders issued in

accordance with the Act or any amendments thereto.

(b) Any license may be modified, revoked, or suspended in whole or in part for any of the following:

(1) Any material false statement in the application or in any statement of fact required under Section 182 of the Act;

(2) Conditions revealed by the application or statement of fact or any report, record, inspection or other means which would warrant the Commission to refuse to grant a license on an original application;

(3) Failure to operate an ISFSI or MRS in accordance with the terms of the license;

(4) Violation of, or failure to observe, any of the terms and conditions of the act, or of any applicable regulation, license, or order of the Commission.

(c) Upon revocation of a license, the Commission may immediately cause the retaking of possession of all special nuclear material contained in spent fuel held by the licensee. In cases found by the Commission to be of extreme importance to the national defense and security or to the health and safety of the public, the Commission prior to following any of the procedures provided under sections 551–558 of Title 5 of the United States Code, may cause the taking of possession of any special nuclear material contained in spent fuel held by the licensee.

§ 72.42 Backfitting.

(a) The Commission may require the backfitting of an ISFSI or MRS if it finds that such action will provide substantial additional protection to the environment, or occupational or public health and safety. As used in this section "backfiting" means the addition, elimination, or modification of structures, systems, or components of an ISFSI or MRS after the license has been issued.

(b) The Commission may at any time require a holder of a license to submit such information concerning the backfitting or the proposed backfitting of the ISFSI or MRS as it deems appropriate.

Subpart D—Records, Reports, Inspections, and Enforcement

§ 72.50 Safety analysis report updating.

(a) The design, description of planned operations, and other information submitted in the Safety Analysis Report shall be updated by the licensee and submitted to the Commission at least once every six months after issuance of the license during final design and construction, until preoperational teisting is completed, with final completion and submittal to the Commission at least 90 days prior to the planned receipt of spent fuel or high-level radioactive waste. The final submittal must include a final analysis and evaluation of the design and performance of structures, systems, and components that are important to safety taking into account any pertinent information developed since the submittal of the license application. Changes affecting safety margins will require Commission approval prior to the receipt of spent fuel or high-level radio active waste.

(b) After the first receipt of spent fuel or high-level radioactive waste for storage, the Safety Analysis Report must be updated annually and submitted to the Commission by the licensee. This submittal must include the following:

(1) New or revised information relating to applicable site evaluation factors, including the results of environmental monitoring programs.

(2) A description and analysis of changes in the structures, systems, and components of the ISFSI or MRS, with emphasis upon (i) performance requirements, (ii) the bases, with technical justification therefor upon which such requirements have been established, and (iii) evaluations showing that safety functions will be accomplished.

(3) An analysis of the significance of any changes to codes, standards, regulations, or regulatory guides which the licensee has committed to meeting the requirements of which are applicable to the design, construction, or operation of the ISFSI or MRS.

§ 72.51 Material balance, inventory, and records requirements for stored materials.

(a) Each licensee shall keep records showing the receipt, inventory (including location), disposal, acquisition, and transfer of all spent fuel and high-level radioactive waste in storage. The records must include as a minimum the name of shipper of the material to the ISFSI or MRS, the estimated quantity of radioactive material per item (including special nuclear material in spent fuel), item identification and seal number, storage location, onsite movements of each fuel assembly or storage canister, and ultimate disposal. These records for spent fuel at an ISFSI or for spent fuel and high-level radioactive waste at a MRS must be retained for as long as the material is stored and for a period of five years after the material is disposed of or transferred out of the ISFSI or MRS.

(b) Each licensee shall conduct a physical inventory of all spent fuel in storage at intervals not to exceed 12 months unless otherwise directed by the Commission. The licensee shall retain a copy of the current inventory as a record until the Commission terminates the license.

(c) Each licensee shall establish, maintain, and follow written material control and accounting procedures that are sufficient to enable the licensee to account for the spent fuel in storage. The licensee shall retain a copy of the current material control and accounting procedures until the Commission terminates the license.

(d) Records of spent fuel and high-level radioactive waste in storage must be kept in duplicate. The duplicate set of records must be kept at a separate location sufficiently remote from the original records that a single event would not destory both sets of records. Records of spent fuel transferred out of an ISFSI or of spent fuel or high-level radioactive waste transferred out of an MRS must be preserved for a period of five years after the date of transfer.

§ 72.52 Reports of accidental criticality or loss of special nuclear material.

Each licensee shall report immediately to the appropriate NRC regional office specified in Appendix D of Part 20 of this chapter by telephone and telegram or teletype, any case of accidental criticality and any loss of special nuclear material.

§ 72.53 Material status reports.

(a) Except as provided in paragraph (b) of this section, each licensee shall complete and submit to the Commission (on DOE/NRC Form–742, Material Balance Report) material balance reports in accordance with the printed instructions for completing the form. These reports must provide information concerning the special nuclear material contained in the spent fuel possessed, received, transferred, disposed of, or lost by the licensee. Material status reports must be made as of March 31 and September 30 of each year and filed within 30 days after the end of the period covered by the report. The Commission may, when good cause is shown, permit a licensee to submit Material Status Reports at other times.

(b) Any licensee who is required to submit routine material status reports pursuant to § 75.35 of this chapter (pertaining to implementation of the US/IAEA Safeguards Agreement) shall prepare and submit such reports only as provided in that section instead of as provided in paragraph (a) of this section.

§ 72.54 Nuclear material transfer reports.

(a) Except as provided in paragraph (b) of this section, whenever the licensee transfers or receives spent fuel, the licensee shall complete and distribute a Nuclear Material Transaction Report on DOE/NRC Form–741 in accordance with printed instructions for completing the form. Each licensee who receives spent fuel from a foreign source shall complete both the supplier's and receiver's portion of DOE/NRC Form–741, verify the identity of the spent fuel, and indicate the results on the receiver's portion of the form.

(b) Any licensee who is required to submit inventory change reports on DOE/NRC Form–741 pursuant to § 75.34 of this chapter (pertaining to implementation of the US/IAEA Safeguards Agreement) shall prepare and submit such reports only as provided in that section instead of as provided in paragraph (a) of this section.

§ 72.55 Other records and reports.

(a) Each licensee shall maintain any records and make any reports that may be required by the conditions of the license or by the rules, regulations, and orders of the Commission in effectuating the purposes of the Act.

(b) Each licensee, except DOE, shall furnish a copy of its annual financial report, including the certified financial statements, to the Commission.

(c) Records that are required by the regulations in this part or by the license conditions must be maintained for the period specified by the appropriate regulation or license condition. If a retention period is not otherwise specified, the above records must be maintained until the Commission terminates the license.

(d) Any record that must be maintained pursuant to this part may be either the original or a reproduced copy or microform provided that any reproduced copy or microform is duly authenticated by authorized personnel and that the microform is capable of producing a clear and legible copy after storage for the period specified by Commission regulations.

§ 72.56 Inspections and tests.

(a) Each licensee under this part shall permit inspection by duly authorized representatives of the Commission of its records, premises, and activities and of spent fuel or high-level radioactive waste in its possession related to the specific license as may be necessary to effectuate the purposes of the Act, including section 105 of the Act.

(b) Each licensee under this part shall make available to the Commission for inspection, upon reasonable notice, records kept by the licensee pertaining to its receipt, possession, packaging, or transfer of spent fuel or high-level radioactive waste.

(c)(1) Each licensee under this part shall upon request by the Director, Office of Inspection and Enforcement provide rent-free office space for the exclusive use of the Commission inspection personnel. Heat, air conditioning, light, electrical outlets and janitorial services shall be furnished by each licensee. The office must be convenient to and have full access to the installation and provide the ispector both visual and acoustic privacy.

(2) For a site with a single storage installation the space provided shall be adequate to accommodate a full-time inspector, a part-time secretary, and transient NRC personnel and will be generally commensurate with other office facilities at the site. A space of 250 sq. ft., either within the site's office complex or in an office trailer, or other on-site space, is suggested as a guide. For sites containing multiple facilities, additional space may be requested to accommodate additional full-time inspectors. The office space that is provided must be subject to the approval of the Director, Office of Inspection and Enforcement. All furniture, supplies and Commission equipment will be furnished by the Commission.

(3) Each licensee under this part shall afford any NRC resident inspector assigned to that site, or other NRC inspectors identified by the Regional Administrator as likely to inspect the installation, immediate unfettered access, equivalent to access provided regular plant employees, following proper identification and compliance with applicable access control measures for security, radiological protection, and personal safety.

(d) Each licensee shall perform, or permit the Commission to perform, such tests as the Commission deems appropriate or necessary for the administration of the regulations in this part.

(e) A report of the preoperational test acceptance criteria and test results must be submitted to the appropriate regional office specified in Appendix D of Part 20 of this chapter with a copy to the Director, Office of Nuclear Material Safety and Safeguards at least 30 days prior to the receipt of spent fuel or high-level radioactive waste.

§ 72.57 Violation.

An injunction or other court order may be obtained prohibiting any violation of any provision of the Atomic Energy Act of 1954, as amended, or Title II of the Energy Reorganiation Act of 1974, as amended, or any regulation or order issued thereunder. A court order may be obtained for the payment of a civil penalty imposed pursuant to section 234 of the Atomic Energy Act for violation of section 53, 57, 62, 63, 81, or 82 of the Atomic Energy Act, or section 206 of the Energy Reorganization Act of 1974, or any rule, regulation, or order issued thereunder, or any term, condition, or limitation of any license issued thereunder, or for any violation for which a license may be revoked under section 186 of the Atomic Energy Act. Any person who willfully violates any provision of the Atomic Energy Act, or any regulation or order issued thereunder, may be guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both, as provided by law.

Subpart E—Siting Evaluation Factors

§ 72.70 General considerations.

(a) Site characteristics that may directly affect the safety or environmental impact of the ISFSI or MRS must be investigated and assessed.

(b) Proposed sites for the ISFSI or MRS must be examined with respect to the frequency and the severity of external natural and maninduced events that could affect the safe operation of the ISFSI or MRS.

(c) Design basis external events must be determined for each combination of proposed site and proposed ISFSI or MRS design.

(d) Proposed sites with design basis external events for which adequate protection cannot be provided through ISFSI or MRS design shall be deemed unsuitable for the location of the ISFSI or MRS.

(e) Pursuant to Subpart A of Part 51 of this chapter for each proposed site for an ISFSI and pursuant to section 141 of the Nuclear Waste Policy Act of 1982 (96 Stat. 2241, 42 U.S.C. 10161) for each proposed site for an MRS, the potential for radiological and other envirnomental impacts on the region must be evaluated with due consideration of the characteristics of the population, including its distribution, and of the regional environs, including its historical and esthetic values.

(f) The facility must be sited so as to avoid to the extent possible the long-term and short-term adverse impacts associated with the occupancy and modification of floodplains.

§ 72.71 Design basis external natural events.

(a) Natural phenomena that may exist or that can occur in the region of a proposed site must be identified and assessed according to their potential effects on the safe operation of the ISFSI or MRS. The important natural phenomena that affect the ISFSI or MRS design must be identified.

(b) Records of the occurrence and severity of those important natural phenomena must be collected for the region and evaluated for reliability, accuracy, and completeness. The applicant shall retain these records until the license is issued.

(c) Appropriate methods must be adopted for evaluating the design basis external natural events based on the characteristics of the region and the current state of knowledge about such events.

§ 72.73 Design basis external man-induced events.

(a) The region must be examined for both past and present man-made facilities and activities that might endanger the proposed ISFSI or MRS. The important potential man-induced events that affect the ISFSI or MRS design must be indentified.

(b) Information concerning the potential occurrence and severity of such events must be collected and evaluated for reliability, accuracy, and completeness.

(c) Appropriate methods must be adopted for evaluating the design basis external man-induced events, based on the current state of knowledge about such events.

§ 72.75 Siting limitations.

(a) An ISFSI which is owned and operated by DOE must not be located at any Federal or non-federal site within which there is a candidate site for a HLW repository. This limitation shall apply until such time as DOE decides that such candidate site is no longer a candidate site under consideration for development as a HLW repository.

(b) An MRS must not be sited in any state in which there is located any site approved for site characterization for a HLW repository. This limitation shall apply until such time as DOE decides that the candidate site is no longer a candidate site under consideration for development as a repository. This limitation shall continue to apply to any site selected for construction as a repository.

(c) If an MRS is located, or is planned to be located, within 50 miles of the first HLW repository, any Commission decision approving the first HLW repository application must limit the quantity of spent fuel or high-level radioactive waste that may be stored. This limitation shall prohibit the storage of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal, or a quantity of solidified high-level radioactive waste resulting from the reprocessing of such a quantity of spent fuel, in both the repository and the MRS until such time as a second repository is in operation.

§ 72.77 Identifying regions around an ISFSI or MRS site.

(a) The regional extent of external phenomena, man-made or natural, that are used as a basis for the design of the ISFSI or MRS must be defined.

(b) The potenial regional impact due to the construction, operation or decommissioning of the ISFSI or MRS must be identified. The extent of regional impacts must be determined on the basis of potential measurable effects on the population or the environment from ISFSI or MRS activities.

(c) These regions identified pursuant to paragraphs (a) and (b) of this section must be investigated as appropriate with respect to (1) the present and future character and the distribution of populations, (2) consideration of present and projected future uses of land and water within the region, and (3) any special characteristics that may influence the potential consequences of a release of radioactive material during the operational lifetime of the ISFSI or MRS.

§ 72.79 Defining potential effects of the ISFSI or MRS on the region.

(a) The proposed site must be evaluated with respect to the effects on populations in the region resulting from the release of radioactive materials under normal and accident conditions during operation and decommissioning to the ISFSI or MRS; in this evaluation both usual and unusual regional and site characteristics shall be taken into account.

(b) Each site must be evaluated with respect to the effects on the regional environment resulting from construction, operation, and decommissioning for the ISFSI or MRS; in this evaluation both usual and unusual regional and site characteristics must be taken into account.

§ 72.81 Geological and seismological characteristics.

(a) *Massive water basin, air-cooled canyon and vault, and tunnel types of of ISFSI and MRS designs.* (1) East of the Rocky Mountain Front (east of approximately 104° west longitude), except in areas of known seismic activity including but not limited to the regions around New Madrid, Mo., Charleston, S.C., and Attica, N.Y., sites will be acceptable if the results from onsite foundation and geological investigation, literature review, and regional geological reconnaissance show no unstable geological characteristics, soil stability problems, or potential for vibratory ground motion at the site in excess of an appropriate response spectrum anchored at 0.2 g.

(2) West of the Rocky Mountain Front (west of approximately 104° west longitude), and in other areas of known potential seismic activity, seismicity will be evaluated by the techniques of Appendix A of Part 100 of this chapter. Sites that lie within the range of strong near-field ground motion from historical earthquakes on large capable faults should be avoided.

(3) Sites other than bedrock sites must be evaluated for their liquefaction potential or other soil instability due to vibratory ground motion.

(4) Site-specific investigations and laboratory analyses must show that soil conditions are adequate for the proposed foundation loading.

(5) In an evaluation of alternative sites, those which require a minimum of engineered provisions to correct site deficiencies are preferred. Sites with unstable geologic characteristics should be avoided.

(6) The design earthquake (DE) for use in the design of structures must be determined as follow:

(i) For sites that have been evaluated under the criteria of Appendix A of 10 CFR Part 100, the DE must be equivalent to the safe shutdown earthquake (SSE) for a nuclear power plant.

(ii) For those sites that have not been evaluated under the criteria of Appendix A of 10 CFR Part 100, that are east of the Rocky Mountain Front, and that are not in areas of known seismic activity, a standardized DE described by an appropriate response spectrum anchored at 0.25 g may be used. Alternatively, a site-specific DE may be determined by using the criteria and level of investigations required by Appendix A of Part 100 of this chapter.

(iii) Regardless of the results of the investigations anywhere in the continental U.S., the DE must have a value for the horizontal ground motion of no less than 0.10 g with the appropriate response spectrum.

(b) *Other types of ISFSI and MRS designs.* For ISFSI and MRS designs that do not use the massive water basin, air-cooled canyon and vault, or tunnel type design, such as but not limited to canisters, casks, drywells, or silos, a site

specific investigation is required to establish site suitability commensurate with the specific requirements of the proposed ISFSI or MRS. Vault type structures related to these designs, such as but not limited to receiving and handling and lag storage facilities, require seismic evaluations equivalent to those specified in paragraph (a) of this section.

§ 72.83 Criteria for radioactive materials in effluents and direct radiation from an ISFSI or MRS.

(a) During normal operations and anticipated occurences, the annual dose equivalent to any real individual who is located beyond the controlled area must not exceed 25 mrem to the whole body, 75 mrem to the thyroid and 25 mrem to any other organ as a result of exposure to: (1) Planned discharges of radioactive materials, radon and its daughters excepted, to the general environment, (2) direct radiation from ISFSI or MRS operations, and (3) any other radiation from uranium fuel cycle operations within the region.

(b) Operational restrictions must be established to meet as low as is reasonably achievable objectives or radioactive materials in effluents and direct radiation levels associated with ISFSI or MRS operations.

(c) Operational limits must be established for radioactive materials in effluents and direct radiation levels associated with ISFSI or MRS operations to meet the limits given in paragraph (a) of this section.

§ 72.85 Controlled area of an ISFSI or MRS.

(a) For each ISFSI or MRS site, controlled area must be established.

(b) Any individual located on or beyond the nearest boundary of the controlled area shall not receive a dose greater than 5 rem to the whole body or any organ from any design basis accident. The minimum distance from the spent fuel or high-level radioactive waste handling and storage facilities to the nearest boundary of the controlled area shall be at least 100 meters.

(c) The controlled area may be traversed by a highway, railroad or waterway, so long as appropriate and effective arrangements are made to control traffic and to protect the public health and safety.

§ 72.87 [Reserved]

§ 72.89 Spent fuel or high-level radioactive waste transportation.

The proposed ISFSI or MRS must be evaluated with respect to the potential impact on the environment of spent fuel or high-level radioactive waste being transported into the region.

Subpart F—General Design Criteria

§ 72.91 General considerations.

(a) Pursuant to the provisions of § 72.15, an application to store spent fuel in an ISFSI or to store spent fuel or high-level radioactive waste in an MRS must include the design criteria for the proposed storage installation. These design criteria establish the design, fabrication, construction, testing, and performance requirements for structures, systems, and components important to safety as defined in § 72.3. The general design criteria identified in this subpart establish minimum requirements for the design criteria for an ISFSI or MRS. Any omissions in these general design criteria do not relieve the applicant from the requirement of providing the necessary safety features in the design of the ISFSI or MRS.

(b) The MRS must be designed to store either spent fuel or solid high-level radioactive wastes. Liquid high-level radioactive wastes may not be received or stored in an MRS. If the MRS is a water-pool type facility, the solidified waste form shall be such that it will not react or dissolve in the water.

§ 72.92 Overall requirements.

(a) *Quality Standards.* Structures, systems, and components important to safety must be designed, fabricated, erected, and tested to quality standards commensurate with the importance to safety of the function to be performed.

(b) *Protection against environmental conditions and natural phenomena.* (1) Structures, systems, and components important to safety must be designed to accommodate the effects of, and to be compatible with, site characteristics and environmental conditions associated with normal operation, maintenance, and testing of the ISFSI or MRS and to withstand postulated accidents.

(2) Structures, systems, and components important to safety must be designed to withstand the effects of natural phenomena such as earthquakes, tornadoes, lightning, hurricanes, floods, tsunami, and seiches, without impairing their capability to perform safety functions. The design bases for these structures, systems, and components must reflect (i) appropriate consideration of the most severe of the natural phenomena reported for the site and surrounding area, with appropriate margins to take into account the limitations of the data and the period of time in which the data have accumulated, and (ii) appropriate combinations of the effects of normal and accident conditions and the effects of natural phenomena. The ISFSI or MRS should also be designed to prevent massive collapse of building structures or the dropping of heavy objects as a result of building structural failure on to the spent fuel or high-level radioactive waste or on to structures, systems, and components important to safety.

(3) Capability must be provided for determining the intensity of natural phenomena that may occur for comparison with design bases of structures, systems, and components important to safety.

(4) If the ISFSI or MRS is located over an aquifer which is a major water resource, measures must be taken to preclude the transport of radioactive materials to the environment through this potential pathway.

(c) *Protection against fires and explosions.* Structures, systems, and components important to safety must be designed and located so that they can continue to perform their safety functions effectively under credible fire and explosion exposure conditions. Noncombustible and heat-resistant materials must be used wherever practical throughout the ISFSI or MRS, particularly in locations vital to the control of radioactive materials and to the maintenance of safety control functions. Explosion and fire detection, alarm, and suppression systems shall be designed and provided with sufficient capacity and capability to minimize the adverse effects of fires and explosions on structures, systems, and components important to safety. The design of the ISFSI or MRS must include provisions to protect against adverse effects that might result from either the operation or the failure of the fire suppression system.

(d) *Sharing of structures, systems, and components.* Structures, systems, and components important to safety must not be shared between an ISFSI or MRS and other facilities unless it is shown that such sharing will not impair the capability of either facility to perform its safety functions, including the ability to return to a safe condition in the event of an accident.

(e) *Proximity of sites.* An ISFSI or MRS located near other nuclear facilities must be designed and operated to ensure that the cumulative effects of their combined operations will not constitute an unreasonable risk to the health and safety of the public.

(f) *Testing and maintenance of systems and components.* Systems and components that are important to safety

must be designed to permit inspection, maintenance, and testing.

(g) *Emergency capability.* Structures, systems, and components important to safety must be designed for emergencies. The design must provide for accessibility to the equipment of onsite and available offsite emergency facilities and services such as hospitals, fire and police departments, ambulance service, and other emergency agencies.

(h) *Confinement barriers and systems.* (1) The spent fuel cladding must be protected during storage against degradation that leads to gross rupture or the fuel must be otherwise confined such that degradation of the fuel during storage will not pose operational safety problems with respect to its removal from storage. This may be accomplished by canning of consolidated fuel rods or unconsolidated assemblies or other means as appropriate.

(2) For underwater storage of spent fuel or high-level radioactive waste in which the pool water serves as a shield and a confinement medium for radioactive materials, systems designed for maintaining water purity and the pool water level must be designed so that any abnormal operations or failure in those systems from any cause will not cause the water level to fall below safe limits. The design must preclude installations of drains, permanently connected systems, and other features that could, by abnormal operations or failure, cause a significant loss of water. Pool water level equipment must be provided to alarm in a continuously manned location if the water level in the storage pools falls below a predetermined level.

(3) Ventilation and off-gas systems must be provided where necessary to ensure the confinement of airborne radioactive particulate materials during normal or off-normal conditions.

(4) Storage confinement systems must be continuously monitored in a manner such that the licensee will be able to determine when corrective action needs to be taken to maintain safe storage conditions.

(5) The high-level radioactive waste must be packaged in a manner that allows handling and retrievability without the release of radioactive materials to the environment or radiation exposures in excess of Part 20 limits. The package must be designed to confine the high-level radioactive waste for the life of the installation.

(i) *Instrumentation and control systems.* Instrumentation and control systems must be provided to monitor systems that are important to safety over anticipated ranges for normal operation and off-normal operation. Those instruments and control systems that must remain operational under accident conditions must be identified in the Safety Analysis Report.

(j) *Control room or control area.* A control room or control area, if appropriate for the ISFSI or MRS design, must be designed to permit occupancy and actions to be taken to monitor the ISFSI or MRS safety under normal conditions, and to provide safe control of the ISFSI or MRS under off-normal or accident conditions.

(k) *Utility or other services.* (1) Each utility service system must be designed to meet emergency conditions. The design of utility services and distribution systems that are important to safety must include redundant systems to the extent necessary to maintain, with adequate capacity, the ability to perform safety functions assuming a single failure.

(2) Emergency utility services must be designed to permit testing of the functional operability and capacity, including the full operational sequence, of each system for transfer between normal and emergency supply sources; and to permit the operation of associated safety systems.

(3) Provisions must be made so that, in the event of a loss of the primary electric power source or circuit, reliable and timely emergency power will be provided to instruments, utility service systems, the central security alarm station, and operating systems, in amounts sufficient to allow safe storage conditions to be maintained and to permit continued functioning of all systems essential to safe storage.

(4) An ISFSI or MRS which is located on the site of another facility may share common utilities and services with such a facility and be physically connected with the other facility; however, the sharing of utilities and services or the physical connection must not significantly (i) increase the probability or consequences of an accident or malfunction of components, structures, or systems that are important to safety; or (ii) reduce the margin of safety as defined in the basis for any technical specifications of either facility.

(l) *Retrievability.* Storage systems must be designed to allow ready retrieval of spent fuel or high-level radioactive waste for further processing or disposal.

§ 72.33 Criteria for nuclear criticality safety.

(a) *Design for criticality safety.* Spent fuel handling, packaging, transfer, and storage systems must be designed to be maintained subcritical and to prevent a nuclear criticality accident. The design of handling, packaging, transfer, and storage systems must include margins of safety for the nuclear criticality parameters that are commensurate with the uncertainties in the handling, packaging, transfer and storage conditions in the data and methods used in calculations, and in the nature of the immediate environment under accident conditions.

(b) *Methods of criticality control.* The design of an ISFSI or MRS must be based on favorable geometry (spacing), permanently fixed neutron absorbing materials (poisons), or both. In criticality design analyses, credit can be taken for fixed neutron absorbing material present within the storage structure.

§ 72.34 Criteria for radiological protection.

(a) *Exposure control.* Radiation protection systems must be provided for all areas and operations where onsite personnel may be exposed to radiation or airborne radioactive materials. Structures, systems, and components for which operation, maintenance, and required inspections may involve occupational exposure must be designed, fabricated, located, shielded, controlled, and tested so as to control external and internal radiation exposures to personnel. The design must include means to:

(1) Prevent the accumulation of radioactive material in those systems requiring access;

(2) Decontaminate those systems to which access is required;

(3) Control access to areas of potential contamination or high radiation within the ISFSI or MRS;

(4) Measure and control contamination of areas requiring access;

(5) Minimize the time required to perform work in the vicinity of radioactive components; for example, by providing sufficient space for ease of operation and designing equipment for ease of repair and replacement; and

(6) Shield personnel from radiation exposure.

(b) *Radiological alarm systems.* Radiological alarm systems must be provided in accessible work areas as appropriate to warn operating personnel of radiation and airborne radioactivity levels above a given setpoint and of concentration of radioactive material in effluents above control limits. Radiation alarm systems must be designed with provisions for calibration and testing their operability.

(c) *Effluent and direct radiation monitoring.* (1) As appropriate for the handling and storage system, effluent systems must be provided. Means for measuring the amount of radionuclides

in effluents during normal operations and under accident conditions must be provided for these system. A means of measuring the flow of the diluting medium, either air or water, must also be provided.

(2) Areas containing radioactive materials must be provided with systems for measuring the direct radiation levels in and around these areas.

(d) *Effluent control.* The ISFSI or MRS must be designed to provide means to limit to levels as low as is reasonably achievable the release of radioactive materials in effluents during normal operations; and control the release of radioactive materials under accident conditions. Analyses must be make to show that release to the general environment during normal operations and anticipated occurrences will be within the exposure limits given in § 72.83. Analyses of design basis accidents must be made, to show that releases to the general environment will be within the exposure limits given in § 72.85. Systems designed to monitor the release of radioactive materials must have means for calibration and testing their operability.

§ 72.95 Criteria for spent fuel, high-level radioactive waste, and other radioactive waste storage and handling.

(a) *Spent fuel and high-level radioactive waste storage and handling systems.* Spent fuel storage, high-level radioactive waste storage, and other systems that might contain or handle radioactive materials associated with spent fuel or high-level radioactive waste, must be designed to ensure adequate safety under normal and accident conditions. These systems must be designed with (1) a capability to test and monitor components important to safety, (2) suitable shielding for radiation protection under normal and accident conditions, (3) confinement structures and systems, (4) a heat-removal capability having testability and reliability consistent with its importance to safety, and (5) means to minimize the quantity of radioactive wastes generated.

(b) *Waste treatment.* Radioactive waste treatment facilities must be provided. Provisions must be made for the packaging of site-generated low-level wastes in a form suitable for storage onsite awaiting transfer to disposal sites.

§ 72.96 Criteria for decommissioning.

The ISFSI or MRS must be designed for decommissioning. Provisions must be made to facilitate decontamination of structures and equipment, minimize the quantity of radioactive wastes and contaminated equipment, and facilitate the removal of radioactive wastes and contaminated materials at the time the ISFSI or MRS is permanently decommissioned.

Subpart G—Quality Assurance

§ 72.100 Quality assurance requirements.

(a) *Purpose.* This subpart describes quality assurance requirements applying to design, purchase, fabrication, handling, shipping, storing, cleaning, assembly, inspection, testing, operation, maintenance, repair, modification of structures, systems, and components, and decommissioning that are important to safety. As used in this subpart, "quality assurance" comprises all those planned and systematic actions necessary to provide adequate confidence that a structure, system, or component will perform satisfactorily in service. Quality assurance includes quality control, which comprises those quality assurance actions related to control of the physical characteristics and quality of the material or component to predetermined requirements.

(b) *Establishment of program.* Each licensee[1] shall establish, maintain, and execute a quality assurance program satisfying each of the applicable criteria of this subpart, and satisfying any specific provisions which are applicable to the licensee's activities. The licensee shall execute the applicable criteria in a graded approach to an extent that is commensurate with the importance to safety. The quality assurance program must cover the activities identified in § 72.15(n) throughout the life of the licensed activity, from the site selection through decommissioning, prior to termination of the license.

(c) *Approval of Program.* Prior to receipt of spent fuel at the ISFSI or spent fuel and high-level radioactive waste at the MRS each licensee shall obtain Commission approval of its quality assurance program. Each licensee shall file a description of its quality assurance program, including a discussion of which requirements of this subpart are applicable and how they will be satisfied, with the Director, Office of Nuclear Material and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

[1] While the term "licensee" is used in these criteria, the requirements are applicable to whatever design, construction, fabrication, assembly, and testing is accomplished with respect to structures, systems, and components prior to the time a license is issued.

(d) *Previously approved programs.* A Commission-approved quality assurance program which satisfies the applicable criteria of Appendix B to Part 50 of this chapter and which is established, maintained, and executed with regard to an ISFSI will be accepted as satisfying the requirements of paragraph (b) of this section. Prior to first use, the licensee shall notify the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, of its intent to apply its previously approved Appendix B program to ISFSI activities. The licensee shall identify the program by date of submittal to the Commission, docket number, and date of Commission approval.

§ 72.101 Quality assurance organization.

The licensee shall be responsible for the establishment and execution of the quality assurance program. The licensee may delegate to others, such as contractors, agents, or consultants, the work of establishing and executing the quality assurance program, but shall retain responsibility for the program. The licensee shall clearly establish and delineate in writing the authority and duties of persons and organizations performing activities affecting the functions of structures, systems and components which are important to safety. These activities include performing the functions associated with attaining quality objectives and the quality assurance functions. The quality assurance functions are (a) assuring that an appropriate quality assurance program is established and effectively executed and (b) verifying, by procedures such as checking, auditing, and inspection, that activities affecting the functions that are important to safety have been correctly performed. The persons and organizations performing quality assurance functions must have sufficient authority and organizational freedom to identify quality problems; to initiate, recommend, or provide solutions; and to verify implementation of solutions. The persons and organizations performing quality assurance functions shall report to a management level that ensures that the required authority and organizational freedom, including sufficient independence from cost and schedule considerations when these considerations are opposed to safety considerations, are provided. Because of the many variables involved, such as the number of personnel, the type of activity being performed, and the location or locations where activities are performed, the organizational structure

BEST COPY AVAILABLE

for executing the quality assurance program may take various forms provided that the persons and organizations assigned the quality assurance functions have the required authority and organizational freedom. Irrespective of the organizational structure, the individual(s) assigned the responsibility for assuring effective execution of any portion of the quality assurance program at any location where activities subject to this section are being performed must have direct access to the levels of management necessary to perform this function.

§ 72.103 Quality assurance program.

(a) The licensee shall establish, at the earliest practicable time consistent with the schedule for accomplishing the activities, a quality assurance program which complies with the requirements of this section. The licensee shall document the quality assurance program by written procedures or instructions and shall carry out the program in accordance with these procedures throughout the period during which the ISFSI or MRS is licensed. The licensee shall identify the structures, systems, and components to be covered by the quality assurance program, the major organizations participating in the program, and the designated functions of these organizations.

(b) The licensee, through its quality assurance program, shall provide control over activities affecting the quality of the identified structures, systems, and components to an extent commensurate with the importance to safety, and as necessary to ensure conformance to the approved design of each ISFSI or MRS. The licensee shall ensure that activities affecting quality are accomplished under suitably controlled conditions. Controlled conditions include the use of appropriate equipment; suitable environmental conditions for accomplishing the activity, such as adequate cleanliness; and assurance that all prerequisites for the given activity have been satisfied. The licensee shall take into account the need for special controls, processes, test equipment, tools and skills to attain the required quality and the need for verification of quality by inspection and test.

(c) The licensee shall base the requirements and procedures of its quality assurance program on the following considerations concerning the complexity and proposed use of the structures, systems, or components:

(1) The impact of malfunction or failure of the item on safety;

(2) The design and fabrication complexity or uniqueness of the item;

(3) The need for special controls and surveillance over processes and equipment;

(4) The degree to which functional compliance can be demonstrated by inspection or test; and

(5) The quality history and degree of standardization of the item.

(d) The licensee shall provide for indoctrination and training of personnel performing activities affecting quality as necessary to ensure that suitable proficiency is achieved and maintained. The licensee shall review the status and adequacy of the quality assurance program at established intervals. Management of other organizations participating in the quality assurance program shall regularly review the status and adequacy of that part of the quality assurance program which they are executing.

§ 72.105 Design control.

(a) The licensee shall establish measures to ensure that applicable regulatory requirements and the design, as specified in the license for those structures, systems, and components to which this section applies, are correctly translated into specifications, drawings, procedures, and instructions. These measures must include provisions to ensure that appropriate quality standards are specified and included in design documents and that deviations from standards are controlled. Measures must be established for the selection and review for suitability of application of materials, parts, equipment, and processes that are essential to the functions of the structures, systems, and components which are important to safety.

(b) The licensee shall establish measures for the identification and control of design interfaces and for coordination among participating design organizations. These measures must include the establishment of written procedures among participating design organizations for the review, approval, release, distribution, and revision of documents involving design interfaces. The design control measures must provide for verifying or checking the adequacy of design, by methods such as design reviews, alternate or simplified calculational methods, or by a suitable testing program. For the verifying or checking process, the licensee shall designate individuals or groups other than those who were responsible for the original design, but who may be from the same organization. Where a test program is used to verify the adequacy of a specific design feature in lieu of other verifying or checking processes, the licensee shall include suitable qualification testing of a prototype or sample unit under the most adverse design conditions. The licensee shall apply design control measures to items such as the following: criticality physics, radiation, shielding, stress, thermal, hydraulic, and accident analyses; compatibility of materials; accessibility for inservice inspection, maintenance, and repair; features to facilitate decontamination; and delineation of acceptance criteria for inspection tests.

(c) The licensee shall subject design changes, including field changes, to design control measures commensurate with those applied to the original design. Changes in the conditions specified in the license require NRC approval.

§ 72.107 Procurement document control.

The licensee shall establish measures to assure that applicable regulatory requirements, design bases, and other requirements which are necessary to assure adequate quality are included or referenced in the documents for procurement of material, equipment, and services, whether purchased by the licensee or by its contractors or subcontractors. To the extent necessary, the licensee shall require contractors or subcontractors to provide a quality assurance program consistent with the applicable provisions of this part.

§ 72.109 Instructions, procedures, and drawings.

The licensee shall prescribe activities affecting quality by documented instructions, procedures, or drawings of a type appropriate to the circumstances and shall require that these instructions, procedures, and drawings be followed. The instructions, procedures, and drawings must include appropriate quantitative or qualitative acceptance criteria for determining that important activities have been satisfactorily accomplished.

§ 72.111 Document control.

The licensee shall establish measures to control the issuance of documents such as instructions, procedures, and drawings, including changes, which prescribe all activities affecting quality. These measures must assure that documents, including changes, are reviewed for adequacy, approved for release by authorized personnel, and distributed and used at the location where the prescribed activity is performed. These measures must ensure that changes to documents are reviewed and approved.

BEST COPY AVAILABLE

§ 72.113 Control of purchased material, equipment, and services.

(a) The licensee shall establish measures to assure that purchased material, equipment and services, whether purchased directly or through contractors and subcontractors, conform to the procurement documents. These measures must include provisions, as appropriate, for source evaluation and selection, objective evidence of quality furnished by the contractor or subcontractor, inspection at the contractor or subcontractor source, and examination of products upon delivery.

(b) The licensee shall have available documentary evidence that material and equipment conform to the procurement specifications prior to installation or use of the material and equipment. The licensee shall retain or have available this documentary evidence for the life of ISFSI or MRS. The licensee shall ensure that the evidence is sufficient to identify the specific requirements met by the purchased material and equipment.

(c) The licensee or designee shall assess the effectiveness of the control of quality by contractors and subcontractors at intervals consistent with the importance, complexity, and quantity of the product or services.

§ 72.115 Identification and control of materials, parts, and components.

The licensee shall establish measures for the identification and control of materials, parts, and components. These measures must ensure that identification of the item is maintained by heat number, part number, serial number, or other appropriate means, either on the item or on records traceable to the item, as required throughout fabrication, installation, and use of the item. These identification and control measures must be designed to prevent the use of incorrect or defective materials, parts, and components.

§ 72.117 Control of special processes.

The licensee shall establish measures to ensure that special processes, including welding, heat treating, and nondestructive testing, are controlled and accomplished by qualified personnel using qualified procedures in accordance with applicable codes, standards, specifications, criteria, and other special requirements.

§ 72.119 Licensee inspection.

The licensee shall establish and execute a program for inspection of activities affecting quality by or for the organization performing the activity to verify conformance with the documented instructions, procedures, and drawings for accomplishing the activity. The inspection must be performed by individuals other than those who performed the activity being inspected. Examination, measurements, or tests of material or products processed must be performed for each work operation where necessary to assure quality. If direct inspection of processed material or products is not carried out, indirect control by monitoring processing methods, equipment, and personnel must be provided. Both inspection and process monitoring must be provided when quality control is inadequate without both. If mandatory inspection hold points, which require witnessing or inspecting by the licensee's designated representative and beyond which work should not proceed without the consent of its designated representative, are required, the specific hold points must be indicated in appropriate documents.

§ 72.121 Test control.

The licensee shall establish a test program to ensure that all testing required to demonstrate that the structures, systems, and components will perform satisfactorily in service is identified and performed in accordance with written test procedures that incorporate the requirements of this part and the requirements and acceptance limits contained in the ISFSI or MRS license. The test procedures must include provisions for assuring that all prerequisites for the given test are met, that adequate test instrumentation is available and used, and that the test is performed under suitable environmental conditions. The licensee shall document and evaluate the test results to ensure that test requirements have been satisfied.

§ 72.123 Control of measuring and test equipment.

The licensee shall establish measures to ensure that tools, gauges, instruments, and other measuring and testing devices used in activities affecting quality are properly controlled, calibrated, and adjusted at specified time to maintain accuracy within necessary limits.

§ 72.125 Handling, storage, and shipping control.

The licensee shall establish measures to control, in accordance with work and inspection instructions, the handling, storage, shipping, cleaning, and preservation of materials and equipment to prevent damage or deterioration. When necessary for particular products, special protective environments, such as inert gas atmosphere, and specific moisture content and temperature levels must be specified and provided.

§ 72.127 Inspection, test, and operating status.

(a) The licensee shall establish measures to indicate, by the use of marking such as stamps, tags, labels, routing cards, or other suitable means, the status of inspections and tests performed upon individual items of the ISFSI or MRS. These measures must provide for the identification of items which have satisfactorily passed required inspections and tests where necessary to preclude inadvertent bypassing of the inspections and tests.

(b) The licensee shall establish measures to identify the operating status of structures, systems, and components of the ISFSI or MRS, such as tagging valves and switches, to prevent inadvertent operation.

§ 72.129 Nonconforming materials, parts or components.

The licensee shall establish measures to control materials, parts, or components that do not conform to the licensee's requirements in order to prevent their inadvertent use or installation. These measures must include, as appropriate, procedures for identification, documentation, segregation, disposition, and notification to affected organizations. Nonconforming items must be reviewed and accepted, rejected, repaired, or reworked in accordance with documented procedures.

§ 72.131 Corrective action.

The licensee shall establish measures to ensure that conditions adverse to quality, such as failures, malfunctions, deficiencies, deviations, defective material and equipment, and nonconformances, are promptly identified and corrected. In the case of a significant condition adverse to quality, the measures must ensure that the cause of the condition is determined and corrective action is taken to preclude repetition. The identification of the significant condition adverse to quality, the cause of the condition, and the corrective action taken must be documented and reported to appropriate levels of management.

§ 72.133 Quality assurance records.

The licensee shall maintain sufficient written records to furnish evidence of activities affecting quality. The records must include the following: design records, records of use and the results of reviews, inspections, tests, audits, monitoring of work performance, and materials analyses. The records must include closely related data such as qualifications of personnel, procedures,

and equipment. Inspection and test records must, at a minimum, identify the inspector or data recorder, the type of observation, the results, the acceptability, and the action taken in connection with any noted deficiencies. Records must be identifiable and retrievable. Records pertaining to the design, fabrication, erection, testing, maintenance, and use of structures, systems, and components important to safety shall be maintained by or under the control of the licensee until the Commission terminates the license.

§ 72.136 Audits.

The licensee shall carry out a comprehensive system of planned and periodic audits to verify compliance with all aspects of the quality assurance program and to determine the effectiveness of the program. The audits must be performed in accordance with written procedures or checklists by appropriately trained personnel not having direct responsibilities in the areas being audited. Audited results must be documented and reviewed by management having responsibility in the area audited. Follow-up action including re-audit of deficient areas, must be taken where indicated.

Subpart H—Physical Protection

§ 72.201 Physical security plan.

The licensee shall establish a detailed plan for security measures for physical protection. The licensee shall retain a copy of the current plan as a record until the Commission terminates the license for which the procedures were developed and, if any portion of the plan is superseded, retain the superseded material for three years after each change. This plan must consist of two parts. Part I must demonstrate how the applicant plans to comply with the applicable requirements of Part 73 of this chapter during transportation to and from the proposed ISFSI or MRS and must include the design for physical protection and the licensee's safeguards contingency plan and guard training plan. Part II must list tests, inspections, audits, and other means to be used to demonstrate compliance with such requirements.

§ 72.202 Design for physical protection.

The design for physical protection must show the site layout and the design features provided to protect the ISFSI or MRS from sabotage. It must include:

(a) The design criteria for the physical protection of the proposed ISFSI or MRS;

(b) The design bases and the relation of the design bases to the design criteria submitted pursuant to paragraph (a) of this section; and

(c) Information relative to materials of construction, equipment, general arrangement, and proposed quality assurance program sufficient to provide reasonable assurance that the final security system will conform to the design bases for the principal design criteria submitted pursuant to paragraph (a) of this section.

§ 72.203 Safeguards contingency plan.

(a) The requirements of the licensee's safeguards contingency plan for dealing with threats and radiological sabotage must be as defined in § 73.40(b) of this chapter. This plan must include Background, Generic Planning Base, Licensee Planning Base, and Responsibility Matrix, the first, four categories of information relating to nuclear facilities licensed under Part 50 of this chapter. (The fifth category of information, Procedures, does not have to be submitted for approval.)

(b) The licensee shall prepare and maintain safeguards contingency plan procedures in accordance with Appendix C to 10 CFR Part 73 for effecting the actions and decisions contained in the Responsibility Matrix of the licensee's safeguards contingency plan. The licensee shall retain a copy of the current procedures as a record until the Commission terminates the license for which the procedures were developed and, if any portion of the procedures is superseded, retain the superseded material for three years after each change.

§ 72.204 Change to physical security and safeguards contingency plans.

(a) The licensee shall make no change that would decrease the safeguards effectiveness of the physical security plan, guard training plan or the first four categories of information (Background, Generic Planning Base, Licensee Planning Base, and Responsibility Matrix) contained in the licensee safeguards contingency plan without prior approval of the Commission. A licensee desiring to make a change must submit an application for a license amendment pursuant to § 72.30.

(b) The licensee may, without prior Commission approval, make changes to the physical security plan, guard training plan, or the safeguards contingency plan, if the changes do not decrease the safeguards effectiveness of these plans. The licensee shall maintain records of changes to any such plan made without prior approval for a period of two years from the date of the change and shall furnish to the Regional Administrator of the appropriate NRC Regional Office specified in Appendix A of Part 73 of this Chapter, with a copy to the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, a report containing a description of each change within two months after the change is made.

Subpart I—Training and Certification of Personnel

§ 72.301 Operator requirements.

Operation of equipment and controls that have been identified as important to safety in the Safety Analysis Report and in the license must be limited to trained and certified personnel or be under the direct visual supervision of an individual with training and certification in the operation. Supervisory personnel who personally direct the operation of equipment and controls that are important to safety must also be certified in such operations.

§ 72.302 Operator training and certification program.

The applicant for a license under this part shall establish a program for training, proficiency testing, and certification of ISFSI or MRS personnel. This program must be submitted to the Commission for approval with the license application.

§ 72.303 Physical requirements.

The physical condition and the general health of personnel certified for the operation of equipment and controls that are important to safety must not be such as might cause operational errors that could endanger other in-plant personnel or the public health and safety. Any condition that might cause impaired judgment or motor coordination must be considered in the selection of personnel for activities that are important to safety. These conditions need not categorically disqualify a person, if appropriate provisions are made to accommodate such defect.

Subpart J—Provision of MRS Information to State Governments and Indian Tribes

§ 72.310 Provision of MRS information.

(a) The Director, Office of Nuclear Material Safety and Safeguards, or the Director's designee shall provide to the Governor and legislature of any State in which a monitored retrievable storage facility authorized under section 141 of the Nuclear Waste Policy Act of 1982 is or may be located, and to the governing body of any affected Indian tribe, timely and complete information regarding

determinations or plans made by the Commission with respect to siting, development, design, licensing, construction, operation, regulation or decommissioning of such monitored retrievable storage facility.

(b) Notwithstanding paragraph (a) of this section, the Director or the Director's designee is not required to distribute any document to any entity if, with respect to such document, that entity or its counsel is included on a service list prepared pursuant to Part 2 of this chapter.

(c) Copies of all communications by the Director or the Director's designee under this section shall be placed in the Commission's Public Document Room shall be furnished to DOE.

§ 72.312 Participation in license reviews.

State and local governments and affected Indian tribes may participate in license reviews as provided in Subpart G of Part 2 of this chapter.

§ 72.314 Notice to States.

If the Governor and legislature of a State have jointly designated on their behalf a single person or entity to receive notice and information from the Commission under this part, the Commission will provide such notice and information to the jointly designated person or entity instead of the Governor and the legislature separately.

§ 72.316 Representation.

Any person who acts under this subpart as a representative for a State (or for the Governor or legislature thereof) or for an affected Indian tribe shall include in the request or other submission, or at the request of the Commission, a statement of the basis of his or her authority to act in such representative capacity.

Conforming Amendments

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

2. The authority citation for Part 2 is revised to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87-615, 76 Stat. 409 (42 U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552.

Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 933, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91-190, 83 Stat. 835, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871). Sections 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2233, 2239). Section 2.105 also issued under Pub. L. 97-415, 96 Stat. 2073 (42 U.S.C. 2239). Sections 2.200-2.206 also issued under secs. 186, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846). Sections 2.300-2.309 also issued under Pub. L. 97-415, 96 Stat. 2071 (42 U.S.C. 2133). Sections 2.600-2.606 also issued under sec. 102, Pub. L. 91-190, 83 Stat. 853 as amended (42 U.S.C. 4332). Sections 2.700a, 2.719 also issued under 5 U.S.C. 544. Sections 2.754, 2.760, 2.770 also issued under 5 U.S.C. 557. Section 2.764 and Table 1A of Appendix C also issued under sec. 135, 141, Pub. L. 97-425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552. Sections 2.800 and 2.808 also issued under 5 U.S.C. 553. Section 2.809 also issued under 5 U.S.C. 553 and sec. 29, Pub. L. 85-256, 71 Stat. 579, as amended (42 U.S.C. 2039). Appendix A also issued under sec. 6, Pub. L. 91-560, 84 Stat. 1473 (42 U.S.C. 2135).

3. In § 2.764, paragraph (c) is revised to read as follows:

§ 2.764 Immediate effectiveness of initial decision directing issuance or amendment of construction permit or operating license.

* * * * *

(c) An initial decision directing the issuance of an initial license for the construction and operation of an independent spent fuel storage installation (ISFSI) or monitored retrievable storage installation (MRS) under 10 CFR Part 72 of this chapter shall not become effective until review by the Commission has been completed. The Director of Nuclear Material Safety and Safeguards shall not issue an initial license for the construction and operation of an independent spent fuel storage installation (ISFSI) or monitored retrievable storage installation (MRS) under 10 CFR Part 72 of this chapter until expressly authorized to do so by the Commission.

* * * * *

4. In Appendix C, Table 1A, footnote 3 is revised to read as follows:

Appendix C—General Statement of Policy and Procedure for NRC Enforcement Actions

* * * * *

TABLE 1A—BASE CIVIL PENALTIES

* * * * *

3. Large firms engaged in manufacturing or distribution of byproduct, source, or special nuclear material. Includes independent spent fuel installations (ISFSI) and monitored retrievable storage installations (MRS) as applicable under Part 72.

* * * * *

PART 19—NOTICES, INSTRUCTIONS, AND REPORTS TO WORKERS; INSPECTIONS

58. The authority citation for Part 19 is revised to read as follows:

Authority: Secs. 53, 63, 81, 103, 104, 161, 186, 68 Stat. 930, 933, 935, 936, 937, 948, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2073, 2093, 2111, 2133, 2134, 2201, 2236, 2282); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841). Pub. L. 95-601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 19.11(a), (c), (d), and (e) and 19.12 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 19.13 and 19.14(a) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

6. Section 19.2 is revised to read as follows:

§ 19.2 Scope.

The regulations in this part apply to all persons who receive, possess, use, or transfer material licensed by the Nuclear Regulatory Commission pursuant to the regulations in Parts 30 through 35, 40, 60, 61, 70, or 72 of this chapter, including persons licensed to operate a production or utilization facility pursuant to Part 50 of this chapter.

7. In § 19.3, paragraph (d) is revised to read as follows;

§ 19.3 Definitions.

* * * * *

(d) "License" means a license issued under the regulations in Parts 30 through 35, 40, 60, 61, 70, or 72 of this chapter, including licenses to operate a production or utilization facility pursuant to Part 50 of this chapter. "Licensee" means the holder of such a license.

* * * * *

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

8. The authority citation for Part 20 is revised to read as follows:

Authority: Secs. 53, 63, 65, 81, 103, 104, 161, 68 Stat. 930, 933, 935, 936, 937, 948, as amended (42 U.S.C. 2073, 2093, 2095, 2111, 2133, 2134, 2201); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 20.408 also issued under secs. 135, 141, Pub. L. 97-425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161).

For the purposes of sec. 223, 68 Stat. 958, as amended, (42 U.S.C. 2273), §§ 20.101, 20.102, 20.103 (a), (b), and (f), 20.104 (a) and (b), 20.105(b), 20.106(a), 20.201, 20.202(a), 20.205, 20.207, 20.301, 20.303, 20.304, and 20.305 are issued under sec. 161b, 68 Stat. 948, as amended, (42 U.S.C. 2201(b)); and §§ 20.102,

20.201(a), 20.403–20.407, 20.408(b) and 20.409 are issued under sec. 161o, 68 Stat. 950, as amended, [42 U.S.C. 2201(o)].

9. Section 20.2 is revised to read as follows:

§ 20.2 Scope.

The regulations in this part apply to all persons who receive, possess, use, or transfer material licensed pursuant to the regulations in Parts 30 through 35, 40, 60, 61, 70, or 72 of this chapter, including persons licensed to operate a production or utilization facility pursuant to Part 50 of this chapter.

10. In § 20.408, paragraph (a)(5) is revised to read as follows:

§ 20.408 Reports of personnel monitoring on termination of employment or work.

(a) * * *

(5) Possess spent fuel in an independent spent fuel storage installation (ISFSI) or to possess spent fuel or high level radioactive waste in a monitored retrievable storage installation (MRS) pursuant to Part 72 of this chapter; or

* * * * *

PART 21—REPORTING OF DEFECTS AND NONCOMPLIANCE

11. The authority citation for Part 21 is revised to read as follows:

Authority: Sec. 161, 68 Stat. 948, as amended, sec. 234, 83 Stat. 444, as amended, (42 U.S.C. 2201, 2282); secs. 201, as amended, 206, 88 Stat. 1242, as amended, 1246 (42 U.S.C. 5841, 5846).

Sec. 21.2 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 21.8, 21.21(a) and 21.31 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 21.21, 21.41 and 21.51 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

12. Section 21.2 is revised to read as follows:

§ 21.2 Scope.

The regulations in this part apply, except as specifically provided otherwise in Parts 31, 34, 35, 40, 60, 61, 70, or 72 of this chapter, to each individual, partnership, corporation, or other entity licensed pursuant to the regulations in this chapter to possess, use, and/or transfer within the United States source material, byproduct material, special nuclear material, and/or spent fuel and high-level radioactive waste, or to construct, manufacture, possess, own, operate and/or transfer within the United States, any production or utilization facility, or independent spent fuel storage installation (ISFSI) or monitored retrievable storage installation (MRS), and to each director [see § 21.3(f)] and responsible officer [see § 21.3(j)] of such a licensee. The regulations in this part apply also to each individual, corporation, partnership or other entity doing business within the United States, and each director and responsible officer of such organization, that constructs [see § 21.3(c)] a production or utilization facility licensed for manufacture, construction or operation [see § 21.3(h)] pursuant to Part 50 of this chapter, an independent spent fuel storage installation (ISFSI) for the storage of spent fuel licensed pursuant to Part 72 of this chapter or a monitored retrievable storage installation (MRS) for the storage of spent fuel or high-level radioactive waste licensed pursuant to Part 72 of this chapter, or supplies [see § 21.3(l)] basic components [see § 21.3(a)] for a facility or activity licensed, other than for export, under Parts 30, 40, 50, 60, 70, 71, or 72 of this chapter. Nothing in these regulations should be deemed to preclude either an individual or a manufacturer/supplier of a commercial grade item [see § 21.3(a–1)] not subject to the regulations in this part from reporting to the Commission a known or suspected defect or failure to comply and, as authorized by law, the identity of anyone so reporting will be withheld from disclosure.[1]

PART 51—ENVIRONMENTAL PROTECTION REGULATIONS FOR DOMESTIC LICENSING AND RELATED REGULATORY FUNCTIONS

13. The authority citation for Part 51 is revised to read as follows:

Authority: Sec. 161, 68 Stat. 948, as amended (42 U.S.C. 2201); secs. 201, as amended, 202, 88 Stat. 1242, as amended, 1244 (42 U.S.C. 5841, 5842).

Subpart A also issued under National Environmental Policy Act of 1969, secs. 102, 104, 105, 83 Stat. 853–854, as amended (42 U.S.C. 4332, 4334, 4335); and Pub. L. 95–604, Title II, 92 Stat. 3033–3041. Sections 51.20, 51.30, 51.60, 51.61, 51.80, and 51.97 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 51.22 also issued under sec. 274, 73 Stat. 688, as amended by 92 Stat. 3036–3039 (42 U.S.C. 2021).

14. In § 51.20, paragraphs (b)(9) and (b)(10) are revised to read as follows:

§ 51.20 Criteria for and identification of licensing and regulatory actions requiring environmental impact statements.

* * * * *

(b) * * *

(9) Issuance of a license pursuant to Part 72 of this chapter for the storage of spent fuel in an independent spent fuel storage installation (ISFSI) at a site not occupied by a nuclear power reactor, or for the storage of spent fuel or high-level radioactive waste in a monitored retrievable storage installation (MRS).

(10) Issuance of a license amendment authorizing the decommissioning of an independent spent fuel storage installation (ISFSI) or a monitored retrievable storage installation (MRS) pursuant to Part 72 of this chapter.

* * * * *

15. In § 51.30, a new paragraph (c), is added to read as follows:

§ 51.30 Environmental assessment.

* * * * *

(c) An environmental assessment for a proposed action regarding a monitored retrievable storage installation (MRS) will not address the need for the MRS or any alternative to the design criteria for an MRS as set forth in section 141(b)(1) of the Nuclear Waste Policy Act of 1982 (96 Stat. 2242).

16. In § 51.60, paragraphs (a), (b)(1)(iii) and (b)(4) are revised to read as follows:

§ 51.60 Environmental report—Materials licenses.

(a) Each applicant for a license or other form of permission, or an amendment to or renewal of a license or other form of permission issued pursuant to Parts 30, 32, 33, 34, 35, 40, 61, 70 and/or 72 of this chapter, and covered by paragraphs (b)(1)–(b)(6) of this section, shall submit with its application to the Director of Nuclear Material Safety and Safeguards the number of copies, as specified in § 51.66, of a separate document, entitled "Applicant's Environmental Report" or "Supplement to Applicant's Environmental Report," as appropriate. The "Applicant's Environmental Report" shall contain the information specified in § 51.45. If the application is for an amendment to or a renewal of a license or other form of permission for which the applicant has previously submitted an environmental report, the supplement to applicant's environmental report may be limited to incorporating by reference, updating or supplementing the

---

[1] NRC Regional Offices will accept collect telephone calls from individuals who wish to speak to NRC representatives concerning nuclear safety-related problems. The location and telephone numbers (for nights and holidays as well as regular hours) are listed below (by region):

I: Philadelphia, (215) 337–5000.
II: Atlanta, (404) 331–4503.
III: Chicago, (312) 790–5590.
IV: Dallas, (817) 860–8160.
IV: Uranium Recovery Field Office (Denver), (303) 234–7232.
V: San Francisco, (415) 943–3700.

information previously submitted to reflect any significant environmental change, including any significant environmental change resulting from operational experience or a change in operations. If the applicant is the U.S. Department of Energy, the environmental report may be in the form of either an environmental impact statement or an environmental assessment, as appropriate.

(b) * * *

(1) * * *

(iii) Storage of spent fuel in an independent spent fuel storage installation (ISFSI) or the storage of spent fuel or high-level radioactive waste in a monitored retrievable storage installation (MRS) pursuant to Part 72 of this chapter.

* * * * *

(4) Amendment of license to authorize the decommissioning of an independent spent fuel storage installation (ISFSI) or a monitored retrievable storage installation (MRS) pursuant to Part 72 of this chapter.

* * * * *

17. Section 51.61 is revised to read as follows:

§ 51.61 Environmental report—independent spent fuel storage installation (ISFSI) or a monitored retrievable storage installation (MRS) license.

Each applicant for issuance of a license for storage of spent fuel in an independent spent fuel storage installation (ISFSI) or for the storage of spent nuclear fuel and high-level radioactive waste in a monitored retrievable storage installation (MRS) pursuant to Part 72 of this chapter shall submit with its application to the Director of Nuclear Material Safety and Safeguards the number of copies, as specified in § 51.66, of a separate document, entitled "Applicant's Environmental Report—ISFSI License" or "Applicant's Environmental Report—MRS License," as appropriate. If the applicant is the U.S. Department of Energy, the environmental report may be in the form of either an environmental impact statement or an environmental assessment, as appropriate. The environmental report shall contain the information specified in § 51.45 and shall address the siting evaluation factors contained in Subpart E of Part 72 of this chapter. Unless otherwise required by the Commission, in accordance with the generic determination in § 51.23(a) and the provisions in § 51.23(b), no discussion of the environmental impact of the storage of spent fuel at an ISFSI beyond the term of the license or amendment applied for is required in an environmental report submitted by an applicant for a initial license for storage of spent fuel in an ISFSI, or any amendment thereto.

18. In § 51.80, paragraph(b) is revised to read as follows:

§ 51.80 Draft environmental impact [illegible]—Material license.

* * * * *

(b)(1) *Independent spent fuel storage installation (ISFSI).* Unless otherwise determined by the Commission and in accordance with the generic determination in § 51.23(a) and the provisions of § 51.23(b), a draft environmental impact statement on the issuance of an initial license for storage of spent fuel at an independent spent fuel storage installation (ISFSI) or any amendment thereto, will address environmental impacts of spent fuel only for the term of the license or amendment applied for.

(2) *Monitored retrievable storage installation (MRS).* As provided in sections 141(c), (d), and (e) of the Nuclear Waste Policy Act of 1982 (NWPA) (96 Stat. 2242, 2243) a draft environmental impact statement for the construction of a monitored retrievable storage installation (MRS) will not address the need for the MRS or any alternative to the design criteria for an MRS as set forth in section 141(b)(1) of the NWPA (96 Stat. 2242) but may consider alternative facility designs which are consistent with these design criteria.

19. In § 51.97, a new paragraph (b) is added to read as follows:

§ 51.97 Final environmental impact statement—Material license.

* * * * *

(b) *Monitored retrievable storage facility (MRS).* As provided in sections 141(c), (d), and (e) of the Nuclear Waste Policy Act of 1982 (NWPA) (96 Stat. 2242, 2243) a final environmental impact statement for the construction of a monitored retrievable storage installation (MRS) will not address the need for the MRS or any alternative to the design criteria for an MRS as set forth in section 141(b)(1) of the NWPA (96 Stat. 2242) but may consider alternative facility designs which are consistent with these design criteria.

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

20. the authorty citation for Part 70 is revised to read as follows:

Authority: Sections 51, 53, 161, 182, 183, 68 Stat. 929, 930, 948, 953, 954, as amended, sec. 234, 68 Stat. 444, as amended (42 U.S.C. 2071, 2073, 2201, 2232, 2233, 2282); sec. 201, as amended, 202, 204, 206, 88 Stat. 1242, as amended, 1244, 1245, 1246 (42 U.S.C 5841, 5842, 5845, 5846).

Sections 70.1(c) and 70.20a(b) also issued under secs. 135, 141, Pub. L. 97-425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 70.7 also issued under Pub. L. 95-601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 70.21(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 70.31 also issued under sec. 57d, Pub. L. 93-377, 88 Stat. 475 (42 U.S.C. 2077). Sections 70.36 and 70.44 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 70.61 also issued under secs. 186, 187, 68 Stat. 955 (42 U.S.C. 2236, 2237). Section 70.62 also issued under sec. 108, 68 Stat 939, as amended (42 U.S.C. 2138).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 70.3, 70.19(c), 70.21(c), 70.22(a), (b), (d)-(k), 70.24 (a) and (b), 70.32(a)(3), (5) and (6), (d), and (i), 70.36, 70.39 (b) and (c), 70.41(a), 70.42 (a) and (c), 70.56, 70.57(b), (c), and (d), 70.58(a)-(g)(3), and (h)-(j) are issued under sec. 161b, 68 Stat. 948 as amended (42 U.S.C. 2201(b)); §§ 70.7, 70.20a (a) and (d), 70.20b (c) and (e), 70.21(c), 70.24(b), 70.32(a)(6), (c), (d), (e), and (g), 70.38, 70.51(c)-(g), 70.58, 70.57 (b) and (d), 70.58 (a)-(g)(3) and (h)-(j) are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i); and §§ 70.20b (d) and (e), 70.38, 70.51(b) and (i), 70.52, 70.53, 70.54, 70.55, 70.56(g)(4), (k) and (l), 70.59, and 70.60 (b) and (c) are issued under sec. 161o, 68 Stat 950, as amended (42 U.S.C. 2201(o)).

21. In § 70.1, paragraph (c) is revised to read as follows:

§ 70.1 Purpose.

* * * * *

(c) The regulations in Part 72 of this chapter establish requirements, procedures, and criteria for the issuance of licenses to possess (1) spent fuel and other radioactive materials associated with spent fuel storage in an independent spent fuel storage installation (ISFSI), or (2) spent fuel, high-level radioactive waste, and other radioactive materials associated with the storage in a monitored retrievable storage installation (MRS), and the terms and conditions under which the Commission will issue such licenses.

22. In § 70.20a, paragraph (b) is revised to read as follows:

§ 70.20a General license to possess special nuclear material for transport.

* * * * *

(b) Notwithstanding any other provision of this chapter, the general license issued under this section does not authorize any person to conduct any activity that would be authorized by a license issued pursuant to Parts 30 through 35, 40, 50, 72, 110, or other sections of this part.

* * * * *

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

23. The authority citation for Part 73 is revised to read as follows:

Authority: Secs. 53, 161, 68 Stat. 930, 948 as amended, sec. 147, 94 Stat. 780 (42 U.S.C. 2073, 2167, 2201); sec. 201, as amended, 204, 88 Stat. 1242, as amended, 1245 (42 U.S.C. 5841, 5844).

Section 73.1 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Sec. 73.37(f) also issued under sec. 301, Pub. L. 96–295, 94 Stat. 789 (42 U.S.C. 5841 note).

For the purpose of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 73.21, 73.37(g) and 73.55 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 73.20, 73.24, 73.25, 73.26, 73.27, 73.37, 73.40, 73.45, 73.46, 73.50, 73.55, and 73.67 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 73.30(c)(1), 73.36(b)(1), 73.36(b)(3), (h)(6), and (k)(4), 73.37 (a) and (b), 73.37(f), 73.40 (b) and (d), 73.46(g)(6) and (b)(2), 73.50(g)(2), (3)(iii)(B) and (h), 73.55(h)(2), and (4)(iii)(b), 73.70, 73.71 and 73.72 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

24. In § 73.1, paragraph (b)(6) is revised to read as follows:

§ 73.1 Purpose and scope.

* * * * *

(b) * * *

(6) This part prescribes requirements for the physical protection of spent fuel stored in either an independent spent fuel storage installation (ISFSI) or a monitored retrievable storage installation (MRS) licensed under Part 72 of this chapter.

* * * * *

PART 75—SAFEGUARDS ON NUCLEAR MATERIAL—IMPLEMENTATION OF US/IAEA AGREEMENT

25. The authority citation for Part 75 is revised to read as follows:

Authority: Secs. 53, 63, 103, 104, 122, 161, Pub. L. 83–703, 68 Stat. 930, 932, 936, 937, 939, 948; sec. 5, Pub. L. 86–489, 70 Stat. 602; secs. 4, 5, Pub. L. 91–560, 84 Stat. 1472 (42 U.S.C. 2073, 2093, 2133, 2134, 2152, 2201); sec. 201, as amended, Pub. L. 93–438, 88 Stat. 1242 (42 U.S.C. 5841).

Section 75.4 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), the provisions of this part are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

26. In § 75.4 paragraph (k)(4) is revised to read as follows:

§ 75.4 Definitions.

* * * * *

(k) * * *

(4) An independent spent fuel storage installation (ISFSI) or a monitored retrievable storage installation (MRS) as defined in § 72.3 of this chapter; or

* * * * *

PART 150—EXEMPTIONS AND CONTINUED REGULATORY AUTHORITY IN AGREEMENT STATES AND IN OFFSHORE WATERS UNDER SECTION 274

27. The authority citation for Part 150 is revised to read as follows:

Authority: Sec. 161, 68 Stat. 948, as amended, sec. 274, 73 Stat. 688 (42 U.S.C. 2201, 2021); sec. 201, as amended, 88 Stat. 1242, as amended (42 U.S.C. 5841).

Sections 150.3, 150.15, 150.15a, 150.31, 150.32, also issued under secs. 11e(2), 81, 68 Stat. 923, 935, as amended, secs. 83, 84, 92 Stat. 3039, 3039 (42 U.S.C 2014e(2), 2111, 2113, 2114). Section 150.14 also issued under sec. 53, 68 Stat. 930, as amended (42 U.S.C. 2073). Section 150.15 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241, (42 U.S.C. 10155, 10161). Section 150.17a also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 150.30 also issued under sec. 234, 83 Stat. 444 (42 U.S.C. 2282).

For the purpose of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 150.20(b)(2)–(4) and 150.21 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); § 150.14 is issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 150.15–150.19 and 150.20(b)(1) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

28. In § 150.15, paragraph (a)(7) is revised to read as follows:

§ 150.15 Persons not exempt.

(a) * * *

(7) The storage of (i) spent fuel in an independent spent fuel storage installation (ISFSI) or (ii) spent fuel and high level radioactive waste in a monitored retrievable storage installation (MRS) licensed pursuant to Part 72 of this chapter.

Air Carriers Certification and Operations; Carry-on Baggage Program; Notice of Proposed Rulemaking and Public Meeting

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 121

[Docket No. 24998; Ref. Docket No. 24220; NPRM 86-6]

Air Carriers Certification and Operations; Carry-on Baggage Program

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking; notice of public meeting.

SUMMARY: This notice proposes to require Part 121 certificate holders which carry passengers to develop and use an approved carry-on baggage program after [180 days after effective date]. This proposal would also require the certificate holder to verify, before the passenger entry doors are closed in preparation for taxi or pushback, that each article of baggage is properly stowed. This proposed regulation would enhance safety aboard aircraft by ensuring that all baggage brought aboard can be safely stowed. This proposal was prompted by a petition from the Association of Flight Attendants.

DATES: Comments must be received on or before July 28, 1986. The public meeting will be held on July 16, 1986. Requests to be heard should be submitted by July 3, 1986.

ADDRESSES: Comments on the proposal are to be marked "Docket No. 24998" and mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 24998, 800 Independence Avenue, SW., Washington, DC 20591; or deliver comments in duplicate to: Room 916, 800 Independence Avenue, SW., Washington, DC. Comments may be inspected at Room 916 on weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m. The public meeting will be held at the FAA Headquarters Auditorium (3rd Floor), 800 Independence Avenue, SW., Washington, DC 20591.

Requests to be heard during the public meeting should be addressed to Miss Jean Casciano, Safety Regulations Division (APR-200), Office of Program and Regulations Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: For information concerning the proposal, contact: Mr. Roger E. Riviere, Project Development Branch (AFS-240), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 426-8096.

For information concerning the public meeting, contact: Miss Jean Casciano, Safety Regulations Division (APR-200), Office of Program and Regulations Management, 800 Independence Avenue, SW., Washington, DC 20591, Telephone (202) 426-8157.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic effects that might result from adoption of the proposals contained in this notice are invited. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 24998." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. In addition, the FAA plans to hold a public meeting on July 16, 1986, to solicit information or comments from the public concerning the carry-on baggage problem. Comments are specifically invited on the safety issues connected with this subject. The proposals contained in this notice may be changed in light of comments received, either in writing or at the public meeting. All comments submitted will be available for examination in the Rule Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket. In addition, a transcript of the proceedings of the public meeting will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Requests must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Background

On August 31, 1984, Mr. Matthew Finucane, Director of Air Safety, Association of Flight Attendants (AFA), petitioned for a rule change to § 121.589 of the Federal Aviation Regulations (FAR) to limit the amount and size of carry-on baggage on aircraft. According to the petition, no piece of carry-on baggage should exceed the dimensions of 9 inches by 16 inches by 20 inches. These dimensions are generally accepted as the available storage space beneath the typical airline seat. If an airline could demonstrate to the FAA that additional, suitable storage space for carry-on baggage was available on its aircraft, then that airline could allow the boarding of garment bags with a width of less than 3 inches on its aircraft. As justification for such a change, the petitioner states the following regarding carry-on baggage:

(1) It can dislodge in a crash and block exits and strike passengers and crew;

(2) It can dislodge in turbulence and strike passengers and crew;

(3) It can make it impossible to reach emergency equipment when it is crammed into spaces where such equipment is stored;

(4) It can impede evacuation when passengers attempt to carry large items out of an aircraft after impact as they repeatedly have;

(5) It can affect the weight and performance of the aircraft;

(6) It can block access to life vests under passenger seats;

(7) It can cause back and hand injuries to flight attendants who may be rendered unable to assist in safety emergencies;

(8) It can keep flight attendants busy finding stowage places for the baggage when they should be performing other safety duties, or when they should be seated at their stations, where they are most likely to be able to assist in an evacuation; and

(9) It can fuel a cabin fire.

A summary of AFA's petition for rulemaking was published in the Federal Register on September 21, 1984 (49 FR 37109). Numerous comments on AFA's proposals have been submitted to Regulatory Docket No. 24220. The majority of these comments (293) favor a

tightening of the carry-on baggage rule; only 42 comments oppose a reduction of carry-on baggage. People Express opposes the petitioner's proposal because it would impose regulation upon an area best governed by consumer choice and because it would have no impact on the safety of air travel. The Air Transport Association (ATA), representing a number of air carriers which carry the majority of air travelers in the United States, also opposes the petition's proposed changes. ATA states that the AFA petition demonstrates that the major intent is to minimize the flight attendants' monitoring of the amount and placement of carry-on baggage in the cabin. It also states that the AFA's attempt to mask this intent under the cover of improving safety falls far short of the mark. Of the favorable comments on the petition, approximately 69 mention aviation safety as a reason for limiting the size and amount of carry-on baggage permitted aboard air carrier aircraft. The remainder of the public comments on the petition cite inconvenience and discomfort created by those individuals carrying on excessive baggage.

On July 11, 1985, the FAA held a public seminar on the subject of carry-on baggage. Attendees included airline trade organizations, labor organizations, and consumer group representatives. During this seminar, the FAA distributed a "working paper" outlining a possible carry-on baggage rule. This "working paper" was based in large part on the AFA petition. At this seminar, the FAA invited discussion on the carry-on baggage issue generally, as well as on its "working paper." (A transcript of this seminar was placed in Docket No. 24220.)

Shortly after this seminar, the ATA, in conjunction with some member airlines, sent a letter to frequent flyers on the subject of carry-on baggage. The letter did not describe the AFA proposal of the FAA "working paper." However, it did imply that carriage of briefcases and garment bags would be restricted, if not banned. The FAA notes that the letter did not accurately reflect the FAA position.

In response to the ATA letter, several thousand frequent flyers wrote to the FAA and Members of Congress. Approximately 20 percent of these letters support stricter carry-on baggage rules, citing cramped conditions and potential safety hazards caused by excessive carry-on baggage. Another 20 percent oppose stricter rules, citing a need to carry a briefcase and garment bag. Of course, this would still be possible under this proposal since it is most unlikely that any carrier's approved program would not allow for these items. Finally, most of the remaining letters oppose any new carry-on bag restrictions. However, none of those who responded to ATA's letter were made aware of the specifics of AFA's petition or of this proposal. Few, if any, would actually be inconvenienced by the proposed rules since almost all said they carry two or fewer bags. However, the FAA has taken the views of these respondents into account in developing this proposal.

The Current Carry-on Baggage Rule

Section 121.589(a) of the FAR now requires that a certificate holder ensure that carry-on baggage is not brought aboard an aircraft unless it can be properly stowed. All carry-on baggage must be properly stowed prior to take off and landing. Sections 121.589 and 121.285 contain specifics on how carry-on baggage must be stowed.

Despite the requirement of § 121.589(a), the FAA's National Air transportation Inspection Program conducted between March 4 and June 5, 1984, showed that some passengers are carrying excessive amounts of baggage on passenger flights, creating potential safety problems and causing undue confusion in their effort to find stowage space for their baggage. This conclusion was supported by many of the commenters on the AFA petition. This excessive amount of baggage many times exceeds the volume and/or weight capacity of approved baggage storage areas. In many instances, this baggage is not stowed or is not stowed properly. As the volume of baggage has increased, the number of violations of the baggage stowage requirements has increased.

Apparently the current requirements do not provide sufficiently precise standards for air carriers, air carrier personnel, and passengers to ensure that baggage brought onto aircraft can be stowed safely. Therefore, the FAA now proposes to require air carriers to develop specific standards to screen and limit carry-on baggage. The ATA's response to the petition leads the FAA to believe that the air carriers' current practice is primarily to rely on the flight attendants on the aircraft to monitor carry-on baggage carried on board for size and quantity. This practice may distract the flight attendants from their required preflight safety duties and may also place substantial pressure on flight attendants to find stowage space for baggage, even if in unapproved areas. For example, the FAA has received reports of baggage being improperly stowed in lavatories and galleys. Passengers who have gotten excess carry-on baggage on board may be unwilling to allow flight attendants to check it. Flight attendants state in their comments that some flight attendants may hesitate to refuse to stow oversize or excessive carry-on baggage, even though approved stowage space is not available, for fear of retaliation from the airline. Shorter ground time for aircraft may even mean that all baggage will not be stowed prior to taxi. In this event, the flight attendant may not have time to ensure that baggage is stowed properly and will have no effective choice but to stow carry-on baggage wherever space may be found. In all these cases, effective control of carry-on baggage outside the aircraft cabin should minimize the problem and make control aboard the aircraft manageable. Consequently, the FAA is proposing to require air carriers to develop programs to control, outside the aircraft, the baggage that will be permitted to be carried on board.

The FAA believes that this alternative is better than that proposed in AFA's petition for rulemaking, which would have imposed specific, inflexible standards on all airlines' carry-on baggage practices. This proposal would allow each carrier to develop a carry-on baggage program tailored to its peculiar circumstances. The program would have to be reviewed and approved by its principal inspectors. This type of approval is necessary because of the wide variety of aircraft, gate structures, terminal arrangements, and security arrangements that exist throughout the country. In fact, it might vary from airport to airport with each carrier. A carrier would be able to change its program in response to changes in its operations or equipment. This flexibility should encourage carriers to develop innovative ways to safely control carry-on baggage. It should also encourage aircraft manufacturers to develop new means of safely stowing carry-on baggage. Finally, this proposal would eliminate the need for requests for exemption from fixed regulatory standards.

While the agency believes that such programs will limit the number and size of carry-on items brought onto aircraft, it remains critical to the safety of all passengers that an airplane not move from the gate until all baggage is properly stowed. Therefore, the agency is proposing to require that a designated carrier employee verify that all carry-on baggage is properly stowed before the aircraft passenger door is closed in preparation for pushback or taxi. The FAA does not believe that the person should be a required crewmember. This

proposal has been incorporated into the proposed rule; the FAA specifically requests comments regarding it, including the person to fulfill this responsibility.

The AFA petition urged restrictions on carry-on baggage for safety reasons. In addition, this proposal would likely reduce the volume and flow of oversized baggage past security screening points and reduce confusion during the boarding process. Reduced confusion during boarding would ensure that, in the event of an emergency, flight attendants may more readily move to a particular area in the cabin to perform their safety-related duties. Any benefit from increased security, however, would be greatly outweighed by the safety benefits of this proposal.

Discussion of the Proposals

Section 121.589(a)

The FAA proposes to control the size and quantity of carry-on baggage permitted on board an aircraft in accordance with an air carrier's FAA-approved carry-on baggage program that must be instituted on later than [180 days after effective date]. Under the proposal, the duty to inspect baggage to control the size and quantity of carry-on baggage would be primarily the responsibility of the certificate holder; however, it also would be the individual passenger's responsibility to comply with the air carrier's carry-on baggage requirements. Policy guidance to the certificate holders on acceptable carry-on baggage programs and procedures will be made available if this proposed rule is adopted. The FAA anticipates that an air carrier's approved program would encompass at least the following areas of concern:

(a) At least one baggage control point located outside the aircraft (but not located at the passenger security screening point);

(b) Types of aircraft operated by the carrier;

(c) Volume and weight capability of onboard storage;

(d) Consistency with existing FAR;

(e) Ensuring that procedures for handling carry-on baggage that cannot be stowed properly will be included in the approved program;

(f) Method of ensuring that all carry-on baggage will be properly stowed;

(g) Anticipated load factor;

(h) Methods of stowing carry-on baggage in passenger compartment;

(i) Aircraft weight-and-balance assessment of carry-on baggage;

(j) Area of operation, including terminal facilities (This should include charter operations);

(k) Facilities for handling excess carry-on baggage;

(l) Training of crewmembers; and

(m) Training of station personnel.

The FAA anticipates that there may be substantial differences among air carriers' approved programs. Comments are invited on the specific points mentioned above and any additional points which should be included in an approved carry-on baggage program. Each air carrier would be required to develop its program in conjunction with its principal inspectors, who will have final approval authority for such a program. As in other situations, individual programs will be monitored at FAA Headquarters to ensure compliance with agency objectives. A statement of authorization or denial of authorization for use of an approved carry-on baggage program would be included in an air carrier's operations specifications. The specifics of the approved program would either be included in the operations specifications or referenced to the pertinent sections of the carrier's operations manual. Although certificate holders would be required to have an approved program no later than [180 days after the effective date of the amendment], they would be encouraged to begin using approved programs as soon as possible.

Economic Evaluation

The FAA proposes to require Part 121 certificate holders which carry passengers to develop and use an approved carry-on baggage program after [180 days after effective date].

The proposed amendments to § 121.589 specify that no certificate holder may allow the boarding of carry-on baggage on aircraft unless each passenger's baggage has been scanned to control the size and amount carried on board in accordance with an approved carry-on baggage program in its operations specifications.

This proposal is in response to the August 31, 1984, petition submitted by the AFA to change § 121.589 of the FAR to limit the amount and size of carry-on baggage on aircraft. The AFA petition and a recent FAA study of carry-on baggage aboard Part 121 air carriers indicated that the size and volume of carry-on baggage frequently exceeds the stowage capacity in the passenger compartments. The excess baggage cannot be safely stowed, giving rise to a potential safety hazard. The proposal also responds to the large number of public complaints addressing the unsafe stowage of large and heavy items and the clutter created by excess carry-on baggage.

Most affected air carriers will elect to develop FAA-approved carry-on baggage programs prior to the compliance date specified in this notice. This analysis estimates that the total cost of compliance to the 140 affected Part 121 certificate holders with the carry-on baggage program requirements of this notice is $480,000 in 1984 dollars.

The primary benefits of this proposal will be the prevention of fatalities and injuries resulting from improperly stowed items obstructing rapid passenger egress in otherwise survivable impacts and from prevention of improperly stowed items dislodging and striking passengers and crew when abrupt aircraft deceleration or attitudinal changes occur.

Quantification of these benefits is not possible because the safety records of the FAA and the National Transportation Safety Board do not detail the extent to which improperly stowed items have contributed to fatalities and injuries in air carrier accidents.

However, the estimated $480,000 cost of compliance can be fully recovered if only one life valued at $670,000 is saved in an otherwise survivable impact accident as a result of the safe baggage stowage provisions of this proposal. Hence, if one fatality is prevented as a result of this proposal during the 10-year period following implementation of the rule, the benefits of this proposal will be 1.4 times greater than the costs.

The proposal to require an airline employee to verify that baggage is properly stowed prior to movement of the aircraft should not result in any costs for the carriers. Carriers are already required to comply with carry-on baggage regulations. Airline ground employees often board aircraft to count passengers or make announcements.

The FAA has determined that this proposal is not likely to affect international trade, nor is it expected to have a significant economic impact on a substantial number of small entities.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by Government regulations. FAA Order 2100.14, *Regulatory Flexibility Criteria and Guidance* (dated July 15, 1983), prescribes standards for determining whether or not a rule will result in "a significant economic impact on a substantial number of small entities" as required by the RFA.

The small entities affected by the proposal are the small air carriers

regulated under 14 CFR Part 121. FAA Order 2100.14 has established criteria describing what is considered a significant economic impact on a small air carrier and what is considered a substantial number of small air carriers for purposes of complying with the RFA. That order stipulates a size threshold of nine or fewer operating aircraft as the standard for small air carriers. FAA data indicate that as of December 1984, there were 45 passenger air carriers (both scheduled and nonscheduled) subject to Part 121 which operated 9 or fewer aircraft.

Based upon the costing assumptions discussed previously in the economic evaluation, the one-time cost of developing an FAA-approved carry-on baggage program for a small air carrier is approximately $960. Therefore, based on the criteria of FAA Order 2100.14 and as fully discussed in the regulatory evaluation for this rulemaking, this proposal is not expected to have a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis is not required under the terms of the RFA.

Conclusion

Compliance with the proposed rule would involve only a one-time cost on the part of air carriers to develop an FAA-approved carry-on baggage program. Because these proposals, if adopted, are not likely to result in an annual effect on the economy of $100 million or more, or a major increase in costs for consumers; industry; or Federal, State, or local government agencies, it has been determined that these are not major proposals under Executive Order 12291. In addition, the proposals, if adopted, would have little or no impact on trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

Since the proposals concern a matter on which there is a substantial public interest, the FAA has determined that this action is significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, as noted above, the FAA certifies that under the criteria of the Regulatory Flexibility Act, this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities.

A draft regulatory evaluation of the proposals, including a Regulatory Flexibility determination and Trade Impact assessment, has been placed in the regulatory docket. A copy may be obtained by contacting the person identified under "FOR FURTHER INFORMATION CONTACT."

List of Subjects in 14 CFR Part 121

Aviation safety, Safety, Air carriers, Air transportation, Aircraft, Airports, Cargo, Handicapped, Transportation, Common carriers.

The Proposed Rule

Accordingly, the Federal Aviation Administration proposes to amend Part 121 of the Federal Aviation Regulations (14 CFR Part 121) as follows:

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. The authority citation for Part 121 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

2. By amending § 121.589 by redesignating current paragraphs (a) through (e) as (c) through (g), by adding new paragraphs (a) and (b), and by revising redesignated paragraphs (c) and (e) through (g) introductory text to read as follows:

§ 121.589 Carry-on baggage.

(a) After [180 days after effective date], no certificate holder may allow the boarding of carry-on baggage on an aircraft unless each passenger's baggage has been scanned to control the size and amount carried on board in accordance with an approved carry-on baggage program in its operations specifications. In addition, no passenger may board an aircraft if his/her carry-on baggage exceeds the baggage allowance prescribed in the carry-on baggage program in the certificate holder's operations specifications.

(b) No certificate holder may allow all passenger entry doors of an aircraft to be closed in preparation for taxi or pushback unless an employee of the certificate holder, other than a required crewmember, has verified that each article of baggage is stowed in accordance with this section and § 121.285(c).

(c) No certificate holder may allow an aircraft to take off or land unless each article of baggage is stowed—

(1) In a suitable closet or baggage or cargo stowage compartment placarded for its maximum weight and providing proper restraint for all baggage or cargo stowed within, and in a manner that does not hinder the possible use of any emergency equipment; or

(2) As provided in § 121.285(c); or

(3) Under a passenger seat.

* * * * *

(e) Each passenger must comply with instructions given by crewmembers regarding compliance with paragraphs (a), (b), (c), (d), and (g) of this section.

(f) Each passenger seat under which baggage is allowed to be stowed shall be fitted with a means to prevent articles of baggage stowed under it from sliding forward. In addition, each aisle seat shall be fitted with a means to prevent articles of baggage stowed under it from sliding sideward into the aisle under crash impacts severe enough to induce the ultimate inertia forces specified in the emergency landing condition regulations under which the aircraft was type certificated.

(g) In addition to the methods of stowage in paragraph (c) of this section, flexible travel canes carried by blind individuals may be stowed—

Department of Transportation

Federal Aviation Administration

14 CFR Parts 25 and 121

Airworthiness Standards; Independent Power Source for Public Address System in Transport Category Airplanes; Notice of Proposed Rulemaking

DEPARTMENT OF TRANSPORTATION

14 CFR Parts 25 and 121

[Docket No. 24095; Notice No. 86-6]

Airworthiness Standards; Independent Power Source for Public Address System in Transport Category Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to amend the airworthiness standards for transport category airplanes and the operating rules for air carrier and air taxi operators of such airplanes by requiring an independent power source for the public address (PA) system. The requirement would be applicable to airplanes that are required to have a PA system for use in air carrier or air taxi service and that are manufactured after a specified date, regardless of the date of application for type certificate. This proposed amendment is considered necessary in order to ensure PA system availability during emergency conditions.

DATE: Comments must be received on or before November 24, 1986.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-204), Docket No. 24095, 800 Independence Avenue SW., Washington, DC 20591. Comments delivered must be marked: Docket No. 24095. Comments may be inspected in Room 916 weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. In addition, the FAA is maintaining an information docket of comments in the Office of the Regional Counsel (ANM-7), FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. Comments in the information docket may be inspected in the Office of the Regional Counsel weekdays, except Federal holidays, between 7:30 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Robert F. Hall, Regulations Branch (ANM-112), Transport Standards Staff, Aircraft Certification Division, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168; telephone (206) 431-2143.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic impact that might result from adopting the proposals contained in this notice are invited. Substantive comments should be accompanied by cost estimates. Commenters should identify the regulatory docket or notice number and submit comments, in duplicate, to the Rules Docket address specified above. All comments received on or before the closing date for comments will be considered by the Administrator before taking action on this proposed rulemaking. The proposals contained in this notice may be changed in light of comments received. All comments will be available in the Rules Docket, both before and after the closing date for comments, for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 24095." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, DC 20591; or by calling (202) 426-3058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future rulemaking documents should also request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Background

Section 25.1411(a)(2) of Part 25 of the Federal Aviation Regulations (FAR), as amended by Amendment 25-53 (45 FR 41593; June 19, 1980), specifies that, for a required PA system, at least one microphone must be positioned adjacent to a flight attendant seat that is located near each floor level emergency exit. Sections 121.318 and 135.149 of the FAR, in turn, presently require the installation of a PA system on airplanes with a seating capacity of more than 19 passengers when used in air carrier or air taxi service. A functioning PA system is considered essential for initiating and directing emergency evacuations and for providing pre- and post-impact instructions to passengers; however, Parts 25, 121, and 135 currently do not require a specific power source for the PA system.

In special study NTSB-AAS-74-3, "Safety Aspects of Emergency Evacuations from Air Carrier Aircraft," dated November 13, 1974, the National Transportation Safety Board (NTSB) cited emergency conditions associated with both takeoff and landing incidents in which the PA system was inoperative and recommended that the FAA require an independent power source for the PA system. In response to the NTSB recommendation, the FAA proposed a requirement for an independent power source for the PA system in Notice No. 81-1 (46 FR 5487; January 19, 1981), Operations Review Program, Proposal No. 11-7. This proposal, which was one of a number of proposals contained in Notice No. 81-1, would have required a power source for the PA system which is independent of the main power supply for all airplanes required to have a PA system (i.e., those having a seating capacity of more than 19 passengers and used in air carrier or air taxi service). As proposed, the independent power source would have been required for such airplanes currently in service, as well as those in such service in the future.

As discussed in the preamble to Amendment 121-178 (47 FR 33284; August 2, 1982), which was one of a number of amendments resulting from Notice 81-1, a number of commenters supported adoption of the proposed rule because they believed that the availability of the PA system is vital for directing emergency evacuations and providing pre-impact instruction. They also pointed out that situations had occurred where megaphones had been used by flight attendants for directing evacuations because the PA system was not functioning. One commenter did, however, label the proposal "vague and ambiguous" and stated that the proposal could jeopardize the inflight emergency electrical power system load capacity. This commenter also asserted that the proposal could result in a substantial economic burden, presumably due to the cost of retrofit on all affected airplanes. After review, the FAA determined that the cost of the proposal would outweigh the expected safety benefits and withdrew the proposal. However, the FAA stated in the preamble that the proposal would be reviewed to

determine whether it would be cost effective for future production airplanes.

Discussion

Upon further review, the FAA had concluded that it would be cost-effective to require an independent power source for the PA system on airplanes having a seating capacity of more than 19 passengers which are operated in air carrier or air taxi service when they are manufactured on or after a date one year from the effective date of the proposed amendments. The amendments proposed in this notice would not require the retrofit of any airplanes already in service.

The FAA proposes to amend Part 25 to require a power source for a required PA system which is: (1) Independent of engine and auxiliary power unit (APU) operation, the forward motion of the airplane, and all normal means used by the flightcrew for power source disconnection; and (2) capable of powering the PA system for an aggregate time duration of at least 10 minutes, including at least 5 minutes of announcements made by flight and cabin crewmembers. In determining this capability, all loads which may remain powered by the same source when all other power sources become inoperative must be considered. In addition, if the same source is required as an emergency power source for loads which are essential to safety of flight or required during emergency conditions, that source must also be capable of powering the added PA system load for an additional time duration that is appropriate or required for those essential or emergency loads. The proposed rule provides that, in all cases, the PA system load would be considered as that which exists during its standby state, except for an aggregate time duration of at least 5 minutes during announcements.

Power dependent on the forward motion of the airplane, such as that produced by a ram air turbine, would not be acceptable for the PA system because such power would not be available on the ground under normal or emergency conditions. Similarly, power dependent on engine or APU operation would not be acceptable because the engines and APU would not be operable on the ground in many emergency situations. The expression "all normal means used by the flightcrew for power source disconnection" in proposed § 25.1423 means all switches or like devices which are provided for that purpose including, but not necessarily limited to, the generator, APU, and battery switches. In this regard, the deactivation of circuit breakers is not considered to be a normal means for power source disconnection. Additionally, the use of the expression does not propose any requirements pertaining to the disconnection or connection of *loads*, however accomplished. The expression "standby state" in proposed § 25.1423 means that condition during which power for making announcements is supplied are *not* being made.

This proposal would not affect the capability of the flightcrew to disconect the PA system by using its electrical power switch or circuit breaker(s): (1) If there is an electrical fault in that system, to clear smoke and protect the airplane against possible fires; or (2) if all other power sources become inoperative, to conserve the remaining power source's capacity for systems, equipment, and instruments which are powered by the same source and are more essential to safety of flight or of higher priority under emergency conditions. Since undisciplined use of the PA system when all other power sources have become inoperative could result in a hazardous, premature depletion of the capacity of the remaining power source, comments are specifically invited concerning whether operational procedures or flight and cabin crew training programs may be necessary to complement this proposal.

The FAA considers the availability of the PA system for announcements for an aggregate time duration of at least 5 minutes to be reasonable. Commenters are specifically invited to express their opinions in this regard.

The proposed rule would allow innovation in providing an acceptable independent power source; however, as a matter of practicality, the normal airplane battery or another battery would most likely be used as a PA system power source.

The FAA has also considered whether the megaphones presently required by § 121.309(f) could serve as an adequate means of communication in the event the PA system is disabled. Such use of the megaphones by the flightcrew is not considered feasible in view of the workload during emergency conditions, the directionality of megaphone output relative to the flightcrew's forward location and forward-facing position, and the fact that the flight compartment door is normally locked.

Proposed § 25.1423 would apply only to certain airplanes which are operated in air carrier (Part 121) and air taxi (Part 135) service when these airplanes are manufactured after a certain date, regardless of the date of application for type certificate.

The FAA also proposes to amend § 25.1411(a)(2) to clarify that the PA system microphone accessibility requirement is applicable only when a PA system is required by this chapter. This would impose no additional regulatory or economic burden on any person.

Section 121.318 requires airplanes that have a seating capacity of more than 19 passengers and that are used in air carrier service to be equipped with a PA system. Section 135.149 incorporates § 121.318 by reference and thereby imposes the same requirements on air taxi operators. The FAA proposes to amend § 121.318 to require such airplanes, newly manufactured on or after a date one year from the effective date of the proposed amendment, to have independent power sources for their PA systems. The one year compliance period is intended to provide manufacturers with adequate time to design new systems, evaluate their feasibility, conduct necessary qualification tests and procure components. While this process sometimes requires more than one year, a compliance time of one year from the effective date of the proposed rule has been selected due to the relatively minor nature of any electrical system redesign required by the rule, and the substantial enhancement to cabin safety afforded by this simple requirement. Comments are specifically invited regarding the adequacy of the proposed one year compliance period. Such comments should include specific data, if any, regarding lead-time for design, testing and procurement of necessary components together with other impacts, positive or negative, resulting from the one year compliance period. The proposed amendment would not require retroactive installation of an independent power source for airplanes currently in service or for those manufactured within one year of the effective date. For simplification, reference to dates that have already passed would be removed from § 121.318.

Regulatory Evaluation

The FAA proposes to require an independent power source for the public address system (PA) in transport category airplanes that are required to have a PA system for use in air carrier or air taxi service and that are manufactured one year or more after the effective date of the proposed amendment. The intent of this proposal is to ensure PA system availability during emergency conditions. There have been some incidents in which the

PA system has been rendered inoperative either by the flightcrew or by an electrical power source failure, thereby posing a potential danger to passengers.

The cost impact for one of the manufacturers has been estimated at $108,000 over a one-year period. In addition to these one-time costs for redesigning the electrical circuitry of the PA system, this manufacturer will incur an additional production cost per airplane of no more than $50. The total incremental cost over the 1985–1994 period has been estimated at $550 per airplane.

Another manufacturer estimated that no incremental cost would be incurred because its airplane fleet is already in compliance. Although no cost data were received from the third major manufacturer of these airplanes, the FAA expects its costs to be of the same approximate order of magnitude in view of the minor nature of any redesign of electrical systems that would likely be required. If this assumption is correct, the overall cost of the proposal to the industry would be about $210,000 over a one year period. The FAA invites all affected parties to submit data pertaining to the proposal's economic impact.

The FAA is not aware of any injuries or fatalities that were specifically caused by a loss of electrical power to the PA system. Although the extent to which the safety of passengers would be enhanced cannot therefore be quantified, it is worth noting that the proposal would more than pay for itself if it prevented as few as 12 minor injuries or 3 serious injuries over the next 10 years. These estimates are based on values derived by the FAA to represent the economic costs of various types of injury, ranging from $18,700 for a minor one up to $76,000 for a serious one. Such a small number of preventable injuries could easily occur as a result of a failure to adequately inform passengers about evacuation procedures and best methods of egress in a single accident involving a survivable emergency landing.

The FAA has determined that the proposal will not have a significant economic impact on a substantial number of small entities and that the proposal will not affect international trade.

With respect to airplane manufacturers, the FAA has determined that airplane and airplane parts manufacturers are small if they have 75 or fewer employees. The airplane manufacturers subject to the terms of this proposal are all large firms. Only five current U.S. firms have certificated airplanes under Part 25, and the smallest, Gates Lear Jet, has an estimated 6,500 employees. (Million Dollar Directory—1983, Dunn and Bradstreet Inc.)

Since the proposal may add a small amount to the price of new airplanes, there may be an impact on small entities which are operators of airplanes. The FAA has determined that for operators of airplanes for hire, small entities are those which own nine or fewer airplanes. The significant cost thresholds for "operators of airplanes for hire" are $85,070 for scheduled operators with airplanes having 60 or more seats, $47,506 for other scheduled operators and $3,315 for unscheduled operators (1983 values). The cost increase for new airplanes manufactured under the standards of this proposal is expected to be under $550 per airplane. The typical small entity operator of large airplanes would have to buy so many airplanes per year to reach this level of impact, that the operator would cease to be a small entity. There are thousands of small entities who are unscheduled operators, but only a few which operate large airplanes. In this type of entity, the cost increase could seemingly reach a level of significant economic impact because of the low annual cost threshold. However, the overwhelming majority of unscheduled operators are on-demand air taxis, which operate small airplanes that are not subject to the requirements of this proposal.

In view of the above, the FAA finds that compliance with these proposals would not result in a significant economic impact for a substantial number of small entities.

This proposal, if adopted, would have little or no impact on trade opportunities for both U.S. firms doing business overseas and foreign firms doing business in the U.S. The proposal affects the rules for certificating new airplanes. Also, newly manufactured airplanes for the U.S. market, whether made by U.S. or foreign manufacturers, would have to comply with the rule. Any cost of compliance is negligible, however, when compared to the cost of a new airplane.

Conclusion

For the reasons given earlier in the preamble, the FAA has determined that this is not a major regulation as defined in Executive Order 12291. The FAA has also determined that this action is significant as defined in Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, it has been determined under the criteria of the Regulatory Flexibility Act that this regulation, at promulgation, will not have a significant economic impact on a substantial number of small entities.

List of Subjects

14 CFR Part 25

Air transportation, Aircraft, Aviation safety, Safety, Crashworthiness, Emergency evacuation, Public address system.

14 CFR Part 121

Aviation safety, Safety, Air carriers, Air transportation, Aircraft, Airplanes, Airworthiness directives and standards, Transportation, Common carriers, Crashworthiness, Emergency evacuation, Public address system.

The Proposed Amendments

Accordingly, the FAA proposes to amend Parts 25 and 121 of the Federal Aviation Regulations (FAR), 14 CFR Parts 25 and 121, as follows:

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

1. The authority citation for Part 25 continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1424, 1425, 1428, 1429, 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 49 CFR 1.47(a).

2. By amending § 25.1411 by revising the paragraph heading for (a) and paragraph (a)(2) to read as follows:

§ 25.1411 General.

(a) *Accessibility requirements.* * * *

(2) If a public address system is required by the chapter, at least one PA system microphone intended for flight attendant use must be positioned adjacent to a flight attendant seat that is located near each required floor level emergency exit in the passenger compartment and be readily accessible to the seated flight attendant.

* * * * *

3. By adding a new § 25.1423 to read as follows:

§ 25.1423 Public address system.

If a public address system is required by the chapter, it must be powered by a source which is—

(a) Independent of engine operation, auxiliary power unit operation, the forward motion of the airplane, and all normal means used by the flightcrew for power source disconnection; and

(b) Capable of powering the public address system—

(1) For a time duration of at least 10 minutes, including an aggregate time duration of at least 5 minutes of

announcements by flight and cabin crewmembers, considering all other loads which may remain powered by the same source when all other power sources become inoperative; and

(2) For an additional time duration in its standby state that is appropriate or required for any other loads that are powered by the same source and are essential to safety of flight or required during emergency conditions.

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

4. The authority citation for Part 121 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421 through 1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 49 CFR 1.47(a).

5. By amending § 121.318 by revising the introductory text of paragraph (a) and paragraphs (b) (2), (3) and (4), and by adding a new paragraph (b)(5) to read as follows:

§ 121.318 Public address system.

(a) No person may operate an airplane with a seating capacity of more than 19 passengers unless the airplane is equipped with a public address system that:

* * * * *

(b) * * *

(2) It must be accessible for use from at least one normal flight attendant station in the passenger compartment, and each public address system microphone intended for flight attendant use must be positioned adjacent to a flight attendant seat that is located near each required floor level emergency exit in the passenger compartment and be readily accessible to the seated flight attendant;

(3) It must be capable of operation within ten seconds by a flight attendant at those stations in the passenger compartment from which its use is accessible;

(4) Transmission must be audible at all passenger seats, lavatories, and flight attendant seats and work stations; and

(5) For airplanes manufactured on or after (a date one year from the effective date of this amendment), it must meet the requirements of § 25.1423 of Part 25 of this Chapter.

Issued in Seattle, Washington, on May 19, 1986.

Wayne J. Barlow,

Director, Northwest Mountain Region.

DEPARTMENT OF THE TREASURY

Office of Revenue Sharing

31 CFR Part 51

Revenue Sharing Regulations

AGENCY: Office of Revenue Sharing, Treasury.

ACTION: Interim rule.

SUMMARY: The Consolidated Omnibus Budget Reconciliation Act of 1985, Pub. L. 99-272, provides in part for the repeal of the Revenue Sharing Act (31 U.S.C. 6701-24). This rule establishes that data challenges for Entitlement Period 17 must be filed before June 2, 1986.

EFFECTIVE DATE: May 27, 1986.

Comment period: Written comments will be considered if received on or before June 26, 1986.

ADDRESS: Send comments to: Chief Counsel, Office of Revenue Sharing, Treasury Department, Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Richard S. Iasi, Chief Counsel, or Jacqueline L. Jackson, Attorney, Office of Chief Counsel for Revenue Sharing, Department of the Treasury, Washington, DC 20226, Telephone: (202) 634-5182.

SUPPLEMENTARY INFORMATION:

Background

Title XIV of the Consolidated Omnibus Budget Reconciliation Act of 1985, Pub. L. 99-272 (COBRA), repeals the Revenue Sharing Act [31 U.S.C. 6701-6724] effective December 31, 1986 or the adjournment *sine die* of the 99th Congress, whichever is earlier, unless the Revenue Sharing Program is reauthorized before that date. The Act preserves the legal obligations of the Office of Revenue Sharing and recipient governments with respect to funds paid under the Revenue Sharing Program. The current authorization provides for Revenue Sharing payments through fiscal year 1986, which ends September 30, 1986 (Pub. L. 99-180). Section 14001(a)(4) of the Act sets June 2, 1986, as the date by which challenges to the accuracy of the data elements used for Entitlement Period 17 (October 1, 1985—September 30, 1986) must be made by the Director or a recipient government.

Currently, challenges for adjustments due to overpayments or underpayments for an entitlement period for any reason can be made up to one year after the end of the entitlement period. With the absence of new funding authority for the Revenue Sharing Program, this would not be practical or consistent with the authorization in COBRA of administrative funds for only one year of wind-down, i.e., fiscal year 1987. Moreover, the Office of Revenue Sharing already has made every effort to provide recipient governments with the data used for payments. The data for recipient governments were mailed to them for review in September of 1985 and January of 1986. To implement section 14001(c)(4), the interim rule requires challenges for payment adjustments due to data errors, including failure to provide reports to the Bureau of the Census or any other data-related concerns, to be made before June 2, 1986. Challenges for adjustments to allocations or payments for Entitlement Period 17 not related to data used for payments may be made by a recipient government or the Director through September 30, 1987.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (Pub. L. 96-354) requires that regulations with significant economic impact on a substantial number of "small entities" should undergo regulatory flexibility analyses. With respect to the Revenue Sharing Program, small entities are defined as recipient governments with populations below 50,000. The interim rule is not expected to have a significant economic impact on small governmental units. It is hereby certified that this interim rule does not have a significant economic impact on small governmental units.

Executive Order 12291—"Federal Regulation"

The interim rule does not constitute a "major rule" within the meaning of section 1(b) of Executive Order 12291, entitled "Federal Regulation." Therefore, regulatory analysis is not required.

Need for Immediate Guidance

This interim rule is needed to provide immediate guidance to recipient governments. The Treasury Department has less than 60 days to implement the "before June 2, 1986" close of data for the current entitlement period contained in section 14001(a)(4) of COBRA. Accordingly, compliance with the notice of proposed rule-making provisions of 5 U.S.C. 553(b) or the effective date limitations of 5 U.S.C. 553(d) would be impractical and contrary to the public interest.

List of Subjects in 31 CFR Part 51

Accounting, Administrative practice and procedure, Civil rights, Handicapped, Aged, Indians, Revenue Sharing, Reporting and Recordkeeping requirements.

31 CFR Part 51, is, therefore, amended in the manner set forth below.

Dated: April 24, 1986.

Kent A. Peterson,

Acting Director, Office of Revenue Sharing.

PART 51—FINANCIAL ASSISTANCE TO LOCAL GOVERNMENTS

1. The authority citation for part 51 continues to read as follows:

Authority: 31 U.S.C. 6701 to 6724 and Treasury Department Order No. 224, dated January 26, 1973 (38 FR 3342) as amended by Treasury Department Order No. 103-1 dated March 18, 1982.

2. Section 51.26(b) is amended by revising § 51.26(b)(2) to read as follows:

§ 51.26 Reservation of funds; adjustment of entitlements and allocations.

* * * * *

(b) Adjustment to entitlement payments.

* * * * *

(2) Allocations for an entitlement period shall be calculated to reflect the most recent data available in accordance with the time periods specified in section 51.29.

* * * * *

3. Section 51.29 is amended by the addition of a new paragraph (c) to read as follows:

§ 51.29 Notification and adjustment of data factors.

* * * * *

(c) *Special rule for Entitlement Period Seventeen.* Notwithstanding any other provision of this subpart with respect to the time limit for changes to the data, no adjustment based on the data factors used in computing allocations of funds shall be made to increase or decrease an entitlement payment to a recipient government for Entitlement Period Seventeen (October 1, 1985 to September 30, 1986) unless a challenge to the data is made by the Director or the recipient government before June 2, 1986. Demands by a recipient government or the Director for payment adjustments for other reasons may be made up to one year after the end of Entitlement Period Seventeen.

LIST OF PUBLIC LAWS

Last List May 23, 1986

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 4767/Pub. L. 99-316

To deauthorize the project for improvements at Racine Harbor, Wisconsin. (May 21, 1986; 100 Stat. 470; 1 page) Price: $1.00

S.J. Res. 267/Pub. L. 99-318

Designating the week of May 26, 1986, through June 1, 1986, as "Older Americans Melanoma/Skin Cancer Detection and Prevention Week." (May 21, 1986; 100 Stat. 471; 1 page) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily Federal Register as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

Title	Price	Revision Date

Subscription (mailed as issued)	185.00	1986
Individual copies	3.75	1986

* No amendments to this volume were promulgated during the period Apr. 1, 1985 to March 31, 1986. The CFR volume issued as of Apr. 1, 1985, should be retained.

* No amendments to this volume were promulgated during the period Apr. 1, 1984 to March 31, 1985. The CFR volume issued as of Apr. 1, 1984, should be retained.

* No amendments to this volume were promulgated during the period July 1, 1984 to June 30, 1985. The CFR volume issued as of July 1, 1984, should be retained.

* The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

* The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

* Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

VOL 51 ISS 102 MY 28 1986

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium, Fourth Floor, Federal Building, 915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:
Seattle 206-442-0570
Tacoma 206-383-5230
Portland 503-221-2222

SAN FRANCISCO, CA

WHEN: July 24; at 1:30 pm.

WHERE: Room 2007, Federal Building, 450 Golden Gate Avenue, San Francisco, CA.

RESERVATIONS: Call the San Francisco Federal Information Center, 415-556-6600

Title 3—

The President

Proclamation 5490 of May 22, 1986

Prayer for Peace
Memorial Day, 1986

By the President of the United States of America

A Proclamation

Memorial Day is an occasion of special importance to all Americans, because it is a day sacred to the memory of all those Americans who made the supreme sacrifice for the liberties we enjoy. We will never forget or fail to honor these heroes to whom we owe so much. We honor them best when we resolve to cherish and defend the liberties for which they gave their lives. Let us resolve to do all in our power to assure the survival and the success of liberty so that our children and their children for generations to come can live in an America in which freedom's light continues to shine.

The Congress, in establishing Memorial Day, called for it to be a day of tribute to America's fallen, and also a day of national prayer for lasting peace. This Nation has always sought true peace. We seek it still. Our goal is peace in which the highest aspirations of our people, and people everywhere, are secure: peace with freedom, with justice, and with opportunity for human development. This is the permanent peace for which we pray, not only for ourselves but for all generations.

The defense of peace, like the defense of liberty, requires more than lip service. It requires vigilance, military strength, and the willingness to take risks and to make sacrifices. The surest guarantor of both peace and liberty is our unflinching resolve to defend that which has been purchased for us by our fallen heroes.

On Memorial Day, let us pray for peace—not only for ourselves, but for all those who seek freedom and justice.

In recognition of those brave Americans to whom we pay tribute today, the Congress, by joint resolution approved May 11, 1950 (64 Stat. 158), has requested the President to issue a proclamation calling upon the people of the United States to observe each Memorial Day as a day of prayer for permanent peace and designating a period on that day when the people of the United States might unite in prayer.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate Memorial Day, Monday, May 26, 1986, as a day of prayer for permanent peace, and I designate the hour beginning in each locality at 11:00 o'clock in the morning of that day as a time to unite in prayer. I urge the press, radio, television, and all other information media to cooperate in this observance.

I also direct all appropriate Federal officials, and request the Governors of the United States and the Commonwealth of Puerto Rico, and the appropriate officials of all units of government, to direct that the flag be flown at half-staff during this Memorial Day on all buildings, grounds, and naval vessels throughout the United States and in all areas under its jurisdiction and control, and I request the people of the United States to display the flag at half-staff from their homes for the customary forenoon period.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Proclamation 5491 of May 22, 1986

National Birds of Prey Month, 1986

By the President of the United States of America

A Proclamation

The skies of our United States are host to hundreds of species of birds, but among the most awe-inspiring and magnificent are the more than fifty species known collectively as the birds of prey. These include the hawks, the owls, and our national symbol, the bald eagle.

These birds are not only some of the most graceful and impressive flyers, they play a vital role in the ecological balance by maintaining predator-prey relationships so essential to the stability of the natural world.

While nearly all Americans today recognize the beauty and value of these great birds, this recognition was long in coming. As we settled the land and developed our Nation, we were slow to heed what loss of habitat and indiscriminate shooting could do to this priceless resource. Fortunately, however, our knowledge and appreciation of these splendid creatures has deepened, as have our efforts to protect them. We now see the bald eagle nesting populations increasing each year. Once again, the peregrine falcon is a fairly common sight for bird-watchers along our coasts and even in several of our major cities. Motorists along our interstate highways can enjoy the frequent sighting of redtailed hawks resting in trees along the rights of way. Indeed, bird-watching for birds of prey is becoming an economic plus to many local economies.

Thanks to increased public interest and effective conservation law enforcement, illegal shooting of these great birds is on the decline. More and more, our citizens grow to understand the importance of these creatures to the American landscape and to treasure the spirit of strength, freedom, and boldness they represent.

To celebrate the continuing restoration of this magnificent resource, and to remind our citizens of the abiding need for wildlife conservation, the Congress, by Senate Joint Resolution 288, has designated the month of May 1986 as "National Birds of Prey Month" and authorized and requested the President to issue a proclamation in observance of this month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1986 as National Birds of Prey Month. I encourage all Americans to observe this month by participating in appropriate events and activities sponsored by government agencies, individuals, and private associations and organizations throughout the country to promote the appreciation and conservation of America's birds of prey.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Proclamation 5482 of May 23, 1986

National Food Bank Week, 1986

By the President of the United States of America

A Proclamation

In communities all across the United States, food banks have been established to help provide wholesome food for people in need.

These unique institutions are in the best tradition of American voluntarism. They have brought together public agencies, private industry, church groups, various associations, and individual Americans in a concerted drive to meet a basic human need. America's food banks provide immediate, temporary assistance at a neighborhood level to individuals and families who often do not know anywhere else to turn.

Private donors of food have greatly assisted in the maintenance and expansion of these worthwhile programs. Schools and neighborhood groups have contributed thousands of hours of manpower by helping collect and distribute the vast quantity of foodstuffs that food banks handle each year. The food banks themselves are staffed by dedicated citizens who seek nothing for themselves but the satisfaction of knowing that they have served as an invaluable resource to their fellowman. Without the humanitarian and charitable concern of all those involved in this mission, the sense of community and brotherly love that is indispensable to the quality of life in our cities and towns would be undermined.

In recognition of the many contributions of food banks and the selfless Americans who help organize and operate them, the Congress, by House Joint Resolution 234, has designated the week beginning May 18 through May 24, 1986, as "National Food Bank Week" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning May 18 through May 24, 1986, as National Food Bank Week. I call upon all Americans to join in recognizing the accomplishments of these food banks.

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Proclamation 5493 of May 23, 1986

Hands Across America Day, 1986

By the President of the United States of America

A Proclamation

Time and again in American history the people of this great Nation have joined together in demonstrations of concern for the plight of their fellowman. Throughout the world, the people of the United States are known for their tradition of generosity and voluntary service to others. The strength of this tradition, which has been revitalized in the 1980s, lies in a key insight: The well-being of each and every individual in our society is a matter not only of public interest, but of personal responsibility as well. No form of charitable endeavor can truly succeed if it is not grounded in the recognition that the benefits it confers are as important to the giver as they are to the recipient.

On May 25, 1986, millions of Americans will participate in "Hands Across America," a visible symbol of the determination that unites Americans in the fight against hunger and homelessness. By joining together in this way, in cities and towns, along the back roads and mountain highways, from sea to shining sea, the people of this blessed land are reaffirming their willingness to sacrifice so that adequate food and shelter are available to all. This occasion represents an opportunity for all Americans to reflect on the root causes of these persistent problems, and to rededicate ourselves to finding lasting solutions that will allow everyone to live, eat, and work in circumstances befitting their dignity as human beings.

On this day, then, let us join not only our hands but our hearts and our prayers in efforts to ensure that America's God-given abundance is shared with those in need.

The Congress, by Senate Joint Resolution 246, has designated May 25, 1986, as "Hands Across America Day" and has authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim May 25, 1986, as Hands Across America Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Memorandum of May 23, 1986

Western Red Cedar Shakes and Shingles Import Relief Determination

Memorandum for the United States Trade Representative

Pursuant to Section 202(b)(1) of the Trade Act of 1974 (19 U.S.C. 2251(b)(1)), I have determined the action I will take with respect to the report of the United States International Trade Commission (ITC), transmitted to me on March 25, 1986, concerning the results of its investigation of a petition for import relief filed by the Northwest Independent Forest Manufacturers on behalf of the domestic industry producing wood shakes and shingles, provided for in item 200.85 of the Tariff Schedules of the United States.

After considering all relevant aspects of the case, including those set forth in Section 202(c) of the Trade Act of 1974, I have determined that provision of import relief in the form of a tariff for up to 5 years is in the national economic interest. The tariff will apply to all U.S. imports of western red cedar shakes and shingles. The additional duty will be 35 percent ad valorem for the first 30 months of the period, 20 percent ad valorem for months 30 through 54, and 8 percent ad valorem for months 54 through 60. This 5-year relief program should be sufficient to enable the domestic producers of red cedar shakes and shingles to adjust to competition during the relief period.

In conjunction with providing import relief, I hereby direct you to request that the ITC advise me of the probable economic effect on the domestic industry of the termination of import relief after 30 months. This advice is to include a review of the progress and specific efforts being made by the domestic producers of western red cedar shakes and shingles to adjust to import competition. I also direct you to request, on my behalf, advice regarding termination of relief from the Secretaries of Commerce and Labor. The ITC, Commerce, and Labor advice is to be provided to me, through you, 3 months prior to the expiration of the 30-month period. It is my intention to continue relief for the entire 5-year period if general market conditions continue to warrant relief and if the domestic producers have begun to make reasonable progress toward adjustment during the first 30-month period.

As required by Section 203(e)(1) of the Trade Act of 1974, this tariff will be implemented by Presidential Proclamation no later than June 7, 1986, which is the 15th day after the date of this determination.

This determination shall be published in the Federal Register.

Ronald Reagan

Executive Order 12560 of May 24, 1986

Administration of Foreign Relations and Related Functions

By the authority vested in me as President by the Constitution and the statutes of the United States of America, including section 621 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2381), and section 301 of title 3 of the United States Code, and in order to delegate certain functions concerning foreign assistance to the Secretary of State, the Secretary of Defense, and the Director of the International Development Cooperation Agency, it is hereby ordered as follows:

Section 1. Section 1-102(a) of Executive Order No. 12163, as amended, is further amended by deleting paragraph "(6)" and adding the following new paragraphs at the end thereof:

"(6) section 903(b) of the International Security and Development Cooperation Act of 1985 (hereinafter referred to as "ISDCA of 1985");

"(7) section 709 of the ISDCA of 1985, which authority shall be exercised in consultation with the Secretary of State and the Secretary of Defense;

"(8) sections 1205(b) and 1210 of the ISDCA of 1985;"

"(9) section 541 of the Foreign Assistance and Related Programs Appropriations Act, 1986 (as enacted in Public Law 99-190), to be exercised by the Administrator of the Agency for International Development within IDCA;"

"(10) the first proviso under the heading "Population, Development Assistance" contained in Title II of the Foreign Assistance and Related Programs Appropriations Act, 1986 (as enacted in Public Law 99-190), to be exercised by the Administrator of the Agency for International Development within IDCA.".

Sec. 2. Section 1-201(a) of Executive Order No. 12163, as amended, is further amended by deleting paragraphs "(7)", "(22)", "(23)", "(25)", "(26)", and "(27)", renumbering the remaining paragraphs accordingly, and inserting the following new paragraphs at the end thereof:

"(23) sections 462, 464(d)(2), 620E(e), and 660(d) of the Act;

"(24) section 126(b) of the ISDCA of 1985, which shall be exercised in consultation with the Secretary of Defense and the Director of the Arms Control and Disarmament Agency;

"(25) sections 207, 552(b), 611, 612(a), 617(c), 702(c), 703(a), 705 (b) and (c), 708, 722(j), 813(b) and 1006 of the ISDCA of 1985;".

Sec. 3. Section 1-201(a) of Executive Order No. 12163, as amended, is further amended by deleting "481, and 502B," from paragraph (1) and inserting "section 305" in lieu thereof, and inserting the following new paragraphs at the end thereof:

"(26) chapter 8 of part I of the Act, except for section 481(h), which is reserved to the President";

"(27) section 502B of the Act;" and

"(28) sections 527, 528, 537, 543 and 547 of the Foreign Assistance and Related Programs Appropriations Act, 1986 (as enacted in Public Law 99-190).".

Sec. 4. Section 1-201(a)(3) of Executive Order No. 12163, as amended, is further amended to read as follows:

"(3) section 505(a) relating to other provisions which may be required by the President, and sections 505 (d), (e), (f) and (g) of the Act.".

Sec. 5. Section 1–201(a)(22) of Executive Order No. 12163, as redesignated by this Order, is further amended by inserting immediately after "(Public Law 99–525)" the phrase "as amended by section 306 of the Department of Defense Authorization Act, 1986 (Public Law 99–145),".

Sec. 6. Section 1–201(a)(15) of Executive Order No. 12163, as amended, as redesignated by this Order, is further amended by deleting "(other than chapter 4 thereof)".

Sec. 7. Section 1–301 of Executive Order No. 12163, as amended, is further amended by adding the following paragraph at the end thereof:

"(e) Those functions conferred upon the President under section 616 of the ISDCA of 1985.".

Sec. 8. Section 1–301(c) of Executive Order No. 12163, as amended, is further amended to read as follows:

"(c) Those functions under section 634A of the Act, to the extent they relate to notifications to the Congress concerning changes in programs under part II of the Act (except chapters 4, 6, and 8 thereof) and under the Arms Export Control Act, as amended, subject to prior consultation with the Secretary of State.".

Sec. 9. Section 1–701(d) of Executive Order No. 12163, as amended, is further amended by inserting "465(b)" immediately after "303," and by inserting "552(c), 552(e)," immediately after "506(a),".

Sec. 10. Section 1–701(g) of Executive Order No. 12163, as amended, is amended to read as follows:

"(g) Those under sections 130, 131, 504 and 505 of the ISDCA of 1985 and under section 529 of the Foreign Assistance and Related Programs Appropriations Act, 1986.".

Sec. 11. Section 1(d) of Executive Order No. 11958, as amended, is further amended to read as follows:

"(d) Those under Sections 22(a), 29, 30 and 30A of the Act to the Secretary of Defense.".

Sec. 12. Section 1(e) of Executive Order No. 11958, as amended, is further amended to read as follows:

"(e) Those under Section 23 of the Act to the Secretary of Defense, to be exercised in consultation with the Secretary of State and the Secretary of the Treasury, except that the President shall determine any rate of interest to be charged which is less than the market rate of interest.".

Sec. 13. Section 1(f) of Executive Order No. 11958, as amended, is further amended to read as follows:

"(f) Those under Sections 24, 27, and 28 of the Act to the Secretary of Defense. The Secretary of Defense, in implementing the functions delegated to him under Sections 24 and 27, shall consult with the Secretary of State and the Secretary of the Treasury.".

Wednesday, May 28, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL LABOR RELATIONS AUTHORITY

5 CFR Ch. XIV

New York Regional Office; Address Change

AGENCY: Federal Labor Relations Authority (including the General Counsel of the Federal Labor Relations Authority) and Federal Service Impasses Panel.

ACTION: Amendment of rules and regulations.

SUMMARY: This document amends Appendix A, paragraph (d)(2) (49 FR 30065) of the rules and regulations of the Federal Labor Relations Authority (Authority), General Counsel of the Federal Labor Relations Authority (General Counsel), and Federal Service Impasses Panel (Panel), published at 5 CFR Part 2400 *et seq.*, (1985) to establish a new room number and mailing address for the Authority's New York, New York Regional Office. The New York Regional Office street location and telephone numbers have not been changed.

EFFECTIVE DATE: May 16, 1986.

FOR FURTHER INFORMATION CONTACT: David L. Feder, Assistant General Counsel (202) 382-0834.

SUPPLEMENTARY INFORMATION: Effective January 28, 1980, the Authority, General Counsel and Panel published at 45 FR 3482, January 17, 1980, final rules and regulations to govern the processing of cases by the Authority, General Counsel and Panel under Chapter 71 of Title 5 of the United States Code (5 CFR Part 2400 *et seq.* (1985)). These rules and regulations are required by Title VII of the Civil Service Reform Act of 1978 and are set forth in 5 CFR Part 2400 *et seq.* (1985). Appendix A, paragraph (d) of the foregoing rules and regulations sets forth office addresses and telephone numbers of the Regional Directors of the Authority. This amendment sets forth the new room number and mailing address of the New York, New York Regional Office of the Authority. The New York Regional Office street location and telephone numbers have not been changed. Accordingly, in Appendix A to Chapter XIV, paragraph (d)(2) of the Authority, General Counsel, and Panel rules and regulations (5 CFR Part 2400 *et seq.* (1985)) is revised to read as follows:

Appendix A to 5 CFR Ch. XIV—Current Addresses and Geographic Jurisdictions

* * * * *

(d) The Office addresses of Regional Directors of the Authority are as follows:

* * * * *

(2) *New York, New York*—26 Federal Plaza, Room 3700, New York, New York 10278, Telephone: FTS—264-4934 Commercial—(212) 264-4934

* * * * *

(5 U.S.C. 7134)

Dated May 20, 1986.

John C. Miller,

General Counsel, Federal Labor Relations Authority.

BILLING CODE 6727-01-M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 77

[Docket No. 86-050]

Tuberculosis in Cattle; State Designations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document amends the regulations governing the interstate movement of cattle because of tuberculosis by raising the designation of Wisconsin from a modified accredited area to an accredited-free State. It has been determined that Wisconsin meets the criteria for designation as an accredited-free State.

The regulations do not impose restrictions on the interstate movement of cattle not known to be affected with or exposed to tuberculosis from either accredited-free States of modified accredited areas. However, the designation for any given jurisdiction can affect the marketability of cattle from that jurisdiction, since some prospective cattle buyers prefer to buy cattle from accredited-free States.

DATES: Effective date of the interim rule is May 28, 1986. Written comments must be received on or before July 28, 1986.

ADDRESSES: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 86-050. Written comments may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Ralph L. Hoeker, Cattle Diseases Staff, VS, APHIS, USDA, Room 816, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8715.

SUPPLEMENTARY INFORMATION:

Background

The "Tuberculosis in Cattle" regulations (contained in 9 CFR Part 77 and referred to below as the regulations) regulate the interstate movement of cattle because of turberculosis. The requirements of the regulations concerning the interstate movement of cattle not known to be affected with or exposed to tuberculosis are based on whether the cattle are moved from jurisdictions designated as accredited-free States, modified accredited areas, or nonmodified accredited areas. The criteria for determining the status of States (the term State is defined to mean any State, territory, the District of Columbia, or Puerto Rico) or portions of States is contained in the document captioned "Uniform Methods and Rules—Bovine Tuberculosis Eradication," which has been made part of the regulations by incorporation by reference. Generally the status of States or portions of States is determined based on the rate of tuberculosis infection present and the effectiveness of a tuberculosis control and eradication program.

Sections 77.7 and 77.8 of the regulations provide the following with respect to the interstate movement of

cattle not known to the affected with or exposed to tuberculosis:

Section 77.7 Movement from accredited-free States and modified accredited areas.

Cattle not known to be affected with or exposed to tuberculosis, originating in an accredited-free State or a modified accredited area, may be moved interstate without restriction.

Section 77.8 Movement from nonmodified accredited areas.

Cattle not known to be affected with or exposed to tuberculosis, originating in a nonmodified accredited area, shall only be moved interstate if:

(a) Such cattle are accompanied by a certificate stating that such cattle have been classified negative to an official tuberculin test, which was conducted within 30 days prior to the date of movement. All cattle not individually identified by a registration name and number shall be individually identified by a Veterinary Services approved metal eartag or tattoo; or

(b) Such cattle are from an accredited herd and they are accompanied by a certificate showing the cattle to be from such a herd; or

(c) Such cattle are moved interstate directly to slaughter to an establishment operating under the provisions of the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) or to a State inspected slaughtering establishment which has inspection by a State inspector at the time of slaughter.

Prior to the effective date of this document, Wisconsin, among other States, was designated under § 77.5 of the regulations as a modified accredited area. The Deputy Administrator has determined that Wisconsin meets the criteria for designation as an accredited-free State. Therefore, this document amends the regulations by adding Wisconsin to the list of accredited-free States in § 77.4.

As noted above, the regulations do not impose restrictions on the interstate movement of cattle not known to be affected with or exposed to tuberculosis from accredited-free States or modified accredited areas. However, the designation for any given jurisdiction can affect the marketability of cattle from that jurisdiction, since some prospective cattle buyers often prefer to buy cattle from accredited-free States.

Executive Order and Regulatory Flexibility Act

This rule is issued in conformance with Executive Order 12291 and has been determined to be not a major rule. Based on information compiled by the Department, it has been determined that this rule will not have a significant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the status of the State of Wisconsin will not cause a significant effect on marketing patterns and will not have a significant economic impact on those persons affected by this document.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR 3015, Subpart V).

Emergency Action

Dr. John K. Atwell, Deputy Administrator of the Animal and Plant Health Inspection Service for Veterinary Services, has determined that an emergency situation exists which warrants publication of this interim rule without prior opportunity for public comment. It is necessary to change the regulations immediately so that they accurately reflect the current tuberculosis status of Wisconsin and thereby provide prospective cattle buyers with accurate and up-to-date information which may affect the marketability of cattle.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest, and good cause is found for making this interim rule effective less than 30 days after publication of this document in the Federal Register. Comments have been solicited for 60 days after publication of this document. A document discussing comments received and any amendments required will be published in the Federal Register.

List of Subjects in 9 CFR Part 77

Animal diseases, Cattle, Transportation, Tuberculosis.

PART 77—TUBERCULOSIS IN CATTLE

Accordingly, 9 CFR Part 77 is amended as follows:

1. The authority citation for Part 77 continues to read as set forth below:

Authority: 21 U.S.C. 111, 114, 114a, 115–117, 120, 121, 134b, 134f; 7 CFR 2.17, 2.51, and 371.2(d).

§ 77.4 [Amended]

2. In paragraph (b) of § 77.4, "Wisconsin," is added immediately before "Wyoming".

Done at Washington, DC, this 19th day of May 1986.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

9 CFR Part 78

[Docket No. 86-041]

Brucellosis in Cattle; State and Area Classifications

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document amends the regulations governing the interstate movement of cattle because of brucellosis. Prior to the effective date of this document, the entire State of Arizona was designated as Class A. This document amends the regulations to designate those portions of Mohave and Coconino Counties north of the Grand Canyon (also known as the "Arizona Strip") in Arizona, as Class Free. This rule is necessary because it has been determined that the Area consisting of these portions of Mohave and Coconino Counties meets the standards for Class Free Status. The effect of this action is to relieve certain restrictions on the interstate movement of cattle from the Area in Arizona redesignated as Class Free.

DATES: Effective date of the interim rule is May 28, 1986. Written comments must be received on or before July 28, 1986.

ADDRESSES: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, Hyattsville, MD 20782. Comments should state that they are in response to Docket No. 86-041. Written comments may be inspected at Room

728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT:
Dr. Hugh Metcalf, Program Planning Staff, VS, APHIS, USDA, Room 841, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8711.

SUPPLEMENTARY INFORMATION:

Background

The brucellosis regulations (contained in 9 CFR Part 78 and referred to below as the regulations) provide a system for classifying States or portions of States according to the rate of brucella infection present and the general effectiveness of a brucellosis control and eradication program. The classifications are Class Free, Class A, Class B, and Class C. States or Areas which do not meet the minimum standards for Class C are required to be placed under Federal quarantine.

The brucellosis Class Free classification is based on a finding of no known brucellosis in cattle for the period of 12 months preceding classification as Class Free. The Class C classification is for States or Areas with the highest rate of brucellosis, with Classes A and B in between. Restrictions on the movement of cattle are more stringent for movements from Class A States or Areas compared to movements from Free States or Areas, and are more stringent for movements from Class B States or Areas compared to movements from Class A States or Areas, and so on. The restrictions include testing for movement of certain cattle from other than Class Free States or Areas.

The basic standards for the different classifications of States or Areas concern maintenance of: (1) A State or Area-wide accumulated 12 consecutive month herd infection rate not to exceed a stated level; (2) a Market Cattle Identification (MCI) reactor prevalence rate not to exceed a stated rate (this concerns the testing of cattle at auction markets, stockyards, and slaughtering establishments); (3) a surveillance system which includes a testing program for dairy herds and for cattle at slaughtering establishments, and provisions for identifying and monitoring herds at high risk of infection, including herds adjacent to infected herds and herds from which infected animals have been sold or received under approved action plans; and (4) minimum procedural standards for administering the program.

Prior to the effective date of this document, the entire State of Arizona was classified as Class A. Pursuant to a request from State officials of Arizona, this document divides the State into two brucellosis classification areas, a Class Free Area consisting of those portions of Mohave and Coconino Counties north of the Grand Canyon, and a Class A Area consisting of the rest of the State.

In a document published in the Federal Register on December 13, 1982 (47 FR 55636-55656), the Department set forth a basis for dividing States into two brucellosis classification areas. In this connection, the document at 47 FR 55638-55639 provided that:

> Some large States have distinctly different rates of infections in different parts of the State. Two classification areas would enable animals moving between such areas to be controlled, and thereby keep brucellosis from spreading from the areas of high infection rate to areas of low infection.
>
> The individual States will have to control such intrastate movements as the Department does not have such authority. This State control will be provided for in cooperative agreements between each State and the Department. If a State with 2 Areas within its boundaries failed to control movements between those areas the higher classified area would be reclassified to be the same as the lower area.

The division of Arizona into two classification Areas, as explained above, is in compliance with this criteria.

Further, to attain and maintain Class Free status, a State or Area must, among other things, remain free from brucellosis in cattle for the preceding 12-month period and the adjusted MCI reactor prevalence rate for such 12-month period must not exceed one reactor per 2,000 cattle tested (0.050 percent). A review of brucellosis program records establishes that this Area in Arizona meets the criteria for classification as Class Free.

Therefore, this document changes the classification of the Area in Arizona consisting of those portions of Mohave and Coconino Counties located north of the Grand Canyon (also known as the Arizona Strip) from Class A to Class Free. The rest of Arizona remains designated as Class A.

Executive Order and Regulatory Flexibility Act

This rule is issued in conformance with Executive Order 12291 and has been determined to be not a major rule. Based on information complied by the Department, it has been determined that this rule will not have a signficant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For the action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the status of a portion of the State of Arizona reduces certain requirements on the interstate movement of these cattle. Cattle from Certified Brucellosis-Free Herds moving interstate are not affected by the change in status. It has been determined that the change in brucellosis status made by this document will not affect marketing patterns and will not have a significant economic impact on those persons affected by this document.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V).

Emergency Action

Dr. John K. Atwell, Deputy Administrator of the Animal and Plant Health Inspection Service for Veterinary Services, has determined that an emergency situation exists which warrants publication of this interim rule without prior opportunity for public comment. Immediate action is warranted in order to delete unnecessary restrictions on the interstate movement of certain cattle from the portions of Mohave and Coconino Counties north of the Grand Canyon in Arizona.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 533, it is found upon good cause

BEST COPY AVAILABLE

that prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest, and good cause is found for making this interim rule effective less than 30 days after publication of this document in the Federal Register. Comments have been solicited for 60 days after publication of this document. A document discussing comments received and any amendments required will be published in the Federal Register.

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79–76–000 (Texas–6 Addition 8); Order No. 469]

High-Cost Gas Produced From Tight Formations; Texas Order Modifying and Adopting Jurisdictional Agency Recommendation

Issued May 23, 1986.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; Order modifying and adopting recommendation.

SUMMARY: Under section 107(c)(5) of the Natural Gas Policy Act of 1978, the Federal Energy Regulatory Commission designates certain types of natural gas as high-cost gas. High-cost gas is produced under conditions which present extraordinary risks or costs and once designated may receive an incentive price. Under section 107(c)(5), the Commission issued a rule designating natural gas produced from tight formations as high-cost gas. Jurisdictional agencies may submit recommendations of areas for designation as tight formations. Here, the Federal Energy Regulatory Commission modifies and adopts the recommendation of the Railroad Commission of Texas that the Travis Peak Formation, located in Districts 5 and 6 of the State of Texas, be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective June 23, 1986.

FOR FURTHER INFORMATION CONTACT: Frederick W. Peters, (202) 357–9115; or Walter W. Lawson, (202) 357–8737.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On November 2, 1981, the Federal Energy Regulatory Commission (Commission) received a recommendation pursuant to § 271.703 of the Commission's regulations [1] from the Railroad Commission of Texas (Texas) that the Travis Peak Formation [2] underlying 47 counties in Districts 5 and 6 in the northeastern part of the State of Texas, be designated as a tight formation. The recommendation was proposed in a Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation (Director), issued on December 15, 1981.[3] On January 22, 1982, Commission staff informed Texas by letter that the recommendation did not meet the Commission's guidelines for tight formation designation. On September 19, 1983, Texas submitted an amended recommendation. An Amended Notice of Proposed Rulemaking was issued on November 14, 1983.[4]

Background

Under applicable NGPA regulations,[5] it is the Commission's policy to designate as a tight formation any formation recommended by a jurisdictional agency if the Commission finds that substantial evidence in the record shows that the average gas permeability, stabilized pre-stimulation natural gas flow rate, and the pre-stimulation oil flow rate of the formation do not exceed designated limits.

Texas' original recommendation was based on data from 606 gas wells. These data were obtained from operators and public records, but were listed by code number so that specific well identities and locations were not disclosed. Staff analysis revealed that the formation's average permeability and stabilized

[1] 18 CFR 271.703 (1985).

[2] The Travis Peak is the basal formation of the Lower Cretaceous series and is encountered immediately below the last limestone zone of the Sligo-Pettit Formation. It overlies the Jurassic Cotton Valley Group and is composed of lenticular, alternating sandstone and shale beds. Its thickness ranges from 800 to 2500 feet throughout the proposed area; the depth to the top of the formation varies from 3,140 feet to 10,850 feet.

[3] 46 FR 62069 (Dec. 22, 1981). Comments in support of the recommendation were filed by Mitchell Energy Corporation, Champlin Petroleum Company, and Husky Oil Company.

[4] 48 FR 52462 (Nov. 18, 1983). Comments in support of the amended recommendation were filed by Champlin Petroleum Company and Crystal Oil Company. No party requested a hearing, and a hearing was not held.

[5] 18 CFR 271.703(c)(2)(i)(A)–(C) (1985). Incentive pricing under section 107(c)(5) of the NGPA is provided to encourage the exploration for and development of unconventional gas supplies.

BEST COPY AVAILABLE

natural gas flow rate exceeded the permissible levels. With respect to the oil flow rate criterion, Texas' recommendation was not supported by any data. Texas simply noted that as of 1980 there were 183 active oil wells completed in the recommended area.

In its September 1983 amended recommendation, Texas continued to recommend that the entire Travis Peak Formation be designated as a tight formation. However, Texas suggested as an alternative that the top 200 feet of 45 specific gas wells be excluded from the recommended area, as well as all oil wells producing in the area. Texas' alternative recommendation contained no new data and continued to list all wells by code number.[6] Analysis of the alternative recommendation revealed that the formation's average permeability and stabilized natural gas flow rate still exceeded the permissible levels.

On December 13, 1985, Commission staff met with members of the Texas staff to discuss the Travis Peak recommendation. Commission staff learned that the application filed by Texas Oil and Gas Corporation (TXO) contained summary data and that all well identities were coded by TXO for proprietary reasons. Since it was not possible to determine the location of the data wells, neither Texas staff nor the Commission staff could properly analyze TXO's application. However, in order to facilitate Commission consideration of the recommendation, TXO provided Commission staff with additional permeability and flow rate data, referenced by code number, in 1985.

Review of the data submitted by TXO reveals that a large number of high permeability and high flow rate wells are located in two Panola County fields, the Bethany Field and the Carthage Field. Specifically, 31 of 44 data wells in the Bethany Field and 40 of 65 data wells in the Carthage Field exceed either the permeability or flow rate guidelines. These two fields thus represent "sweet spots" within an otherwise tight formation and are proposed to be excluded by Commission staff. Further analysis reveals that 31 other gas wells located throughout the recommended area have very high permeability values or high pre-stimulation flow rates and should be excluded to bring the remaining area within Commission guidelines.[7] Since there are still no specific flow rate data with respect to oil production, staff recommends that all oil wells be excluded from the recommended area.[8]

On December 6, 1985, Commission staff notified Texas of the proposed exclusions. Texas replied by letter of January 7, 1986, that the data analyzed by the Commission staff were never filed with or through Texas. Texas stated that it could not support any designation which would exclude any areas and/or wells from the area originally recommended.

Discussion

Under the tight formation program, as detailed in Order No. 99,[9] tight formation recommendations submitted to the Commission are approved under the Commission's rulemaking authority. The Commission is not limited by the evidence in the record presented to it by the jurisdictional agency and the various commenters, and accordingly is free to request or to develop any additional evidence which it deems necessary in order for it to issue a rule. Based on the supplemental information it has received and analyzed, the Commission finds that it is reasonable and necessary for it to modify Texas' recommendation.

The information submitted by TXO demonstrates that much of the Travis Peak Formation qualifies as a tight formation. Given the Commission's broad rulemaking authority, it would be unreasonable for the Commission to ignore the evidence which it has received simply because that evidence was never made available to Texas. Accordingly, Texas' recommendation must be modified to exclude (1) all oil wells (2) two gas fields in Panola County and (3) 31 other gas wells located throughout the recommended area. The exclusions are specifically described in the § 271.703 (d)(36)(v)(C). As discussed earlier, these exclusions result in an average permeability and natural gas flow rate throughout the remaining recommended area which are within the levels established under section 271.703(d). This action does not preclude Texas from requesting at a future date that some or all of the oil wells should be included in the designated area, if data are presented showing that the oil wells meet the Commission's guidelines.

The Commission Orders

Based on the discussion herein, the Commission adopts the recommendation of the Railroad Commission of Texas that a portion of the Travis Peak Formation, as modified by this order, be designated as a tight formation under section 271.703(d).

This amendment shall become effective June 23, 1986.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Title 18, *Code of Federal Regulations*, is amended as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 271—[AMENDED]

Section 271.703 is amended as follows:

1. The authority citation for Part 271 continues to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432; Administrative Procedure Act, 5 U.S.C. 553.

2. Section 271.703 is amended by adding paragraph (d)(36)(v) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(36) *Travis Peak Formation in Texas.* RM79–76 (Texas–6) and (Texas–6 Addition and Additions II, III, IV and VI).

* * * * *

(v) *Railroad Commission Districts 5 and 6.*—(A) *Delineation of formation.* The Travis Peak Formation is found in northeast Texas and includes all of Railroad Commission Districts 5 and 6 which contains 47 counties. A specified area of Panola County, 31 gas wells located throughout the formation, and

---

[6] Texas also stated that average permeability should be based on a geometric mean rather than an arithmetic average. The issue of geometric v. arithmetic averaging was the subject of a public hearing before the Commission on November 12, 1982, in Docket No. RM79-76-[illegible], *et al.* The geometric mean of a statistically diverse sample containing extremely high and low values will be lower than the arithmetic average of the same sample. The Commission has consistently required that a formation's average permeability be derived by arithmetically averaging representative permeability values.

[7] The 31 gas wells are those wells among the remaining data wells which exceed either the permeability or flow rate guidelines by the greatest magnitude.

[8] Commission guidelines provide that the pre-stimulation oil flow rate of all wells in a tight formation may not exceed 5 barrels of oil per day. Texas' recommendation states that 88 percent of total production from the recommended area on a Btu basis is natural gas, twenty percent of the wells are oil wells, and 11 percent of the wells may produce as much as 5 barrels of oil per day. It is therefore reasonable to conclude that the flow rate of some oil wells may be within permissible levels. Based on the limited information available, however, excluding all oil wells from the recommended area ensures that the guidelines are met.

[9] Docket No. RM79-76, issued August 22, 1980, FERC Statutes and Regulations ¶ 30,162.

all wells that have been designated as oil wells are excluded. These exclusions are described and listed in paragraph (d)(36)(v)(C) of this section.

(B) *Depth.* The top of the Travis Peak Formation is found at a depth of 2,140 feet in Lamar County in the northern area of the east Texas basin and at 10,500 feet in the southern part of the basin in Cherokee County. The formation ranges in thickness from approximately 500 feet in the north to 2,500 feet in the south.

(C) *Areas not covered by the tight formation designation in Docket No. RM79-76-060 (Texas-6 Addition II).*[1]

(1) The following natural gas wells:

Well name	Field	County
G.J. Hall #1	Cyril (TP 7500)	Rusk.

BILLING CODE 6717-01-M

[1] The recommendation of Texas in Docket No. RM79-76-188 (Texas-6 Addition V), concerning the Pinehill, S.E. Field, is rendered moot because the Pinehill Field is included within the area designated as a tight formation by section 271.703(d)(36)(v). Accordingly, Docket No. RM79-76-188 is terminated.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 142

[T.D. 86-106]

Customs Regulations Amendment Relating to Entry Numbers

AGENCY: Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to reflect recent

changes in the assignment and format of entry numbers used by the international trade community in submitting entry documentation for processing by the Customs Service. The public was informed of changes to the entry number procedures by documents published in the Federal Register in 1985. However, the regulations were not amended. After a further review of the matter, it has been determined that the new entry number procedures should be included in the regulations. This amendment is one of the numerous initiatives Customs has undertaken relating to the development of a comprehensive integrated Automated Commercial System. When fully implemented, the changes will ensure entry processing efficiency.

EFFECTIVE DATE: October 1, 1986.

FOR FURTHER INFORMATION CONTACT: Richard J. Bonner, Duty Assessment Division (202–535–4141), U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229.

SUPPLEMENTARY INFORMATION:

Background

Customs has undertaken numerous initiatives relating to the development of a comprehensive integrated Automated Commercial System (ACS). When fully developed, this system will provide an efficient means for accomplishing the current and future entry processing needs of Customs, other government agencies and the international trade community. Currently, many formal entries received by Customs are prepared on computers. More international trade businesses are planning to use computers as part of automating the preparation of import documentation.

To ensure entry processing efficiency for both Customs and entry preparers, changes in the assignment and format of entry type codes and entry number are desirable.

Accordingly, by notice published in the Federal Register on January 13, 1984 (49 FR 1740), Customs proposed new procedures for both entry type codes and entry numbers and invited interested parties to submit comments. Although comments were received on both procedures, Customs published a final rule as T.D. 85–5 in the Federal Register on January 11, 1985 (50 FR 1499), which concerned only the changes to entry type codes. Those comments relating to the entry number proposal were still being analyzed. That analysis has been completed and the final changes to the entry numbers are the subject of T.D. 85–112, published in the Federal Register on July 8, 1985 (50 FR 27818). That document amended Part 142, Customs Regulations, by removing § 142.3a.

However, after further review of the matter, Customs has determined that the new entry number procedures should be included in Part 142, Customs Regulations (19 CFR Part 142), relating to the entry process. Accordingly, this document adds a new § 142.3a, Customs Regulations (19 CFR 142.3a) to reflect these new changes. In addition, the document establishes a new effective date of October 1, 1986, which supercedes the original effective date of October 1, 1985, which appeared in T.D. 85–112. Compliance with the original effective date was waived by Customs in order to allow brokers and importers additional time to implement the new entry number procedures.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

Pursuant to the provisions of section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601, *et seq.*), it is hereby certified that the changes set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Drafting Information

The principal author of this document was Glen E. Vereb, Regulations Control Branch, Office of Regulations and Rulings, Customs Headquarters. However, personnel from other Customs offices participated in its development.

Customs duties and inspection, Imports.

Amendment to the Regulations

PART 142—ENTRY PROCESS

1. The authority citation for Part 142, Customs Regulations (19 CFR Part 142), continues to read as follows:

Authority: 19 U.S.C. 66, 1448, 1484, 1624.

2. Part 142 is amended by adding a new § 142.3a to read as follows:

§ 142.3a Entry numbers.

(a) *Placement on Customs Forms.* The importer or broker shall place an 11 character entry number on the entry and corresponding entry summary documentation. For documentation prepared on data processing equipment, the number shall be printed directly on the form. For manually prepared documentation, the number shall be pre-printed in a machine readable format specified by Customs. The same number shall not be used for more than one entry transaction.

(b) *Format.* The following format, including hyphens, must be used when showing the entry number:

XXX–NNNNNNN–N

XXX represents an entry filer code assigned by Customs, NNNNNNN is a unique number which is assigned by the broker or importer, and N is a check digit computed from the first 10 characters based on a formula provided by Customs.

(1) *Assignment of Entry Filer Code.* Customs will assign a unique 3 character (alphabetic, numeric, or alpha numeric) entry filer code to all licensed brokers filing Customs entries. Customs will assign an entry filer code to certain importers filing Customs entries based on importer entry volume, frequency of entry filing, and other considerations. The broker or importer shall use this assigned code as the beginning three characters of the number for all Customs entries, regardless of where the entries are filed.

(2) *Entry Filer Assigned Number.* For each entry, the broker or importer shall assign a unique 7 digit number. This number shall not be assigned to more than one transaction.

(3) *Check Digit.* The broker or importer is responsible for ensuring that the check digit is computed by data processing equipment.

(c) *Misuse of the Entry Filer Code.* The district director may refuse to allow use of an assigned entry filer code if it is misused by the importer or broker.

(d) *Alternative Procedure.* If an importer does not have an assigned entry filer code, or if the district director, in accordance with paragraph (c) of this section refuses to allow use of an assigned entry filer code, the importer or broker shall obtain forms with a Customs assigned pre-printed machine readable entry number with a computed check digit. These forms will be available for sale by Customs and must be obtained and used before the

merchandise may be released from Customs custody.

Alfred R. De Angelus,
Acting Commissioner of Customs.

Approved May 14, 1986.

Francis A. Keating II,
Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 178

[Docket No. 86F-0177]

Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of 1,1'-[(6-phenyl-1,3,5-triazine-2,4-diyl)diimino]bis-9,10-anthracenedione as a colorant in polyethylene phthalate polymers for food-contact use. This action responds to a petition filed by Ciba-Geigy Corp.

DATES: Effective May 28, 1986; objections by June 27, 1986.

ADDRESSES: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of June 19, 1985 (50 FR 25467), FDA announced that a petition (FAP 5B3864) had been filed by Ciba-Geigy, Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that the food additive regulations be amended to provide for the safe use of 1,1'-[(6-phenyl-1,3,5-triazine-2,4-diyl)diimino]bis-9,10-anthracenedione as a colorant in polyethylene phthalate polymers for food-contact use.

FDA has evaluated the data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an abbreviated environmental assessment under 21 CFR 25.51a(b)(1).

Any person who will be adversely affected by this regulation may at any time on or before June 27, 1986, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 178

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 178 is amended as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

1. The authority citation for 21 CFR Part 178 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 178.3297 is amended in paragraph (e) by alphabetically inserting a new item in the list of substances to read as follows:

§ 178.3297 Colorants for polymers.

* * * * *

(e) * * *

Substances	Limitations
1,1'-[(6-Phenyl-1,3,5-triazine-2,4-diyl)diimino]bis-9,10-anthracenedione (CAS Reg. No. 4118-16-5).	For use at levels not to exceed 0.25 percent by weight of polyethylene phthalate polymers that comply with § 177.1630 of this chapter. The finished articles are to contact food only under conditions of use E, F, and G described in table 2, § 176.170(c) of this chapter, except, when such articles are used with food types III, IV-A, and V, described in table 1, § 176.170(c) of this chapter, the finished articles are to contact food only under conditions of use D, E, F, and G.

BILLING CODE 6560-50-M

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION

25 CFR Part 700

Commission Operations and Relocation Procedures; Final Date for Voluntary Relocation Application; Eligibility

AGENCY: Navajo and Hopi Indian Relocation Commission.

ACTION: Interim final rule with request for comments.

SUMMARY: Pursuant to Pub. L. 93-531, the Navajo and Hopi Indian Relocation Commission submitted a *Report and Plan to Congress* in 1981. That report provided that applications for relocation would be accepted until July 7, 1986. In 1985, the Interior Appropriations Bill (Pub. L. 99-190) contained language establishing July 7, 1985 as the final date for the receipt of applications for voluntary relocation. The Commission published a regulation consistent with the Appropriations Law. That regulation was challenged in court and the Court ordered the Commission to continue to accept applications until July 7, 1986. This rule implements the court order and restates Commission policy as it was prior to the 1985 Appropriations Act.

DATES: Interim rule effective May 28, 1986. Comments must be received on or before June 27, 1986.

ADDRESSES: Comments may be mailed to the Executive Director, Navajo and Hopi Relocation Commission, P.O. Box KK, Flagstaff, Arizona 86002.

FOR FURTHER INFORMATION CONTACT: Sue Crystal (Attorney), Navajo and Hopi Indian Relocation Commission, at (602) 779-2721.

SUPPLEMENTARY INFORMATION: In 1985, pursuant to Congressional directive, the Commission proposed a rule establishing July 7, 1985 as the deadline for the receipt of applications for voluntary relocation. This regulation was challenged in court in the case of Zah v. Navajo and Hopi Indian Relocation Commission (CIV.85-1615, District Court—Phx.). In its order on the Motion for Preliminary Injunction, the Court determined that the Commission should continue to accept applications for relocation benefits until July 7, 1986. The Commission published notices of the application deadline and sent letters to the last-known addresses of anyone of whom the Commission had knowledge who might be subject to relocation. The purpose of this proposed rule is to clarify the existing situation as a result of the Court's order.

The rule provides that in order to be considered for voluntary relocation assistance, individuals must apply by July 7, 1986. To be eligible for benefits, individuals must meet the Commission's eligibility requirements as of July 7, 1986. This means that people must have achieved head-of-household status by that date to qualify for relocation benefits. The Commission has been publishing notices throughout the last year notifying those who might be subject to relocation that they should apply by July 7, 1986.

Provision has been made in § 700.138 for those individuals who are physically residing on land partitioned to the Tribe of which they are not members, but who have not applied for relocation benefits by July 7, 1986. The Commission has deleted the existing § 700.138 and replaced it with a section that delineates the actions that will be taken regarding those families who have not applied for voluntary benefits. Those persons who do not apply by July 7, 1986 will be contacted by the Commission as soon as practicable following July 7, 1986. Consistent with 25 U.S.C., 640d-14(d)(3), the Commission will request that those heads-of-households who are full time residents on land partitioned to a Tribe of which they are not members, who have not applied, choose an available area for relocation and contract with the Commission for relocation. By full time resident, the Commission means individuals who are currently physically residing on land partitioned to the Tribe of which they are not members who have no other place of residence. Relocatees will be offered suitable housing consistent with the Commission's benefit levels and the Commission will purchase improvements that they own on the land partitioned to the Tribe of which they are not members. Individuals will be requested to choose their own relocation site and will have the discretion to select housing from the Commission's housing plans. If an individual identified as physically residing on land partitioned to a Tribe of which they are not a member does not agree to move and fails to make arrangements with the Commission, the Commission will identify the funds necessary for the construction of a relocation house or construct housing for these individuals. At the time that such housing is available or the funds necessary to construct the house have been identified and set aside, the Commission will issue a notice stating the date by which the person will be required to move. If at the end of that 90-day period, the individual still does not agree to move, the Commission will exercise the Referral for Action provision of § 700.139. This section provides that the Commission will send a list of names of those individuals who refuse to move to the Secretary of the Interior and to the U.S. Attorney for the District of Arizona for action as they deem appropriate. The Commission will assure the availability of relocation assistance for those individuals.

The Commission is also by this rule amending § 700.147 by adding a new subsection. This subsection provides that relocation assistance benefits are restricted to those people who meet the head-of-household criteria as of July 7, 1986. This section is added to the eligibility regulations to clarify the cutoff date for the establishment of eligibility. This section is designed to reiterate what is included in § 700.137(b).

The Commission has determined that there is good cause to make this regulation effective immediately. This action is necessitated because of a court action resulting in an order directing the Commission to continue to accept applications until July 7, 1986. It was only recently agreed by the parties to the court action that no further action would be taken in that lawsuit. At the time the court order was issued, all parties of whom the Commission had knowledge were informed of the extension of the deadline by personal letter. Notices were also published in newspapers which served the affected population. Those parties affected have been on notice since February of the extended deadline. Because of the

impending July 7, 1986 deadline, this rule will become effective immediately upon publication. The Commission will receive all public comment after publiction and incorporate any changes prior to the publication of the final rule. The provisions of § 700.138 are consistent with the Commission's existing regulations and do not present any major change from existing rules. Those existing rules have been in effect for a year and the individuals affected have already had time to comment during their publication period in the spring of 1985.

The Commission's policy since its inception has been to accept applications for voluntary relocation until July 7, 1986. It has also been the Commission's policy that such date represents a cutoff for the determination of eligibility. The purpose of this regulation is to clarify any ambiguity which resulted from the regulations which were published in the spring of 1985. It should be stressed that the Commission has published notices and sent letters to individuals designed to notify people of the final date for the receipt of applications for voluntary relocation. This rule is designed to formalize that notice by inclusion in the Federal Register.

The principal author of this final rulemaking is Susan Crystal, Attorney, Navajo and Hopi Relocation Commission.

List of Subjects in 25 CFR Part 700

Administrative practice and procedure, Conflict of interests, Freedom of Information, Grant program—Indians, Indian—claims, Privacy, Real property acquisition, Relocation Assistance.

Accordingly, the Commission amends Part 700 as follows:

PART 700—AMENDMENTS

1. The authority citation for Part 700 continues to read as follows:

Authority: 25 U.S.C. 640d, Pub. L. 93–531, 25 U.S.C. 640d–14, Pub. L. 99–398.

2. Sections 700.137 and 700.138 are revised, and § 700.147(e) is added to read as follows:

§ 700.137 Final date for voluntary relocation application.

(a) In order to be considered for voluntary relocation assistance benefits, an applicant must have filed a completed application form with the Commission by the close of business on July 7, 1986.

(b) To qualify for relocation assistance, individuals must meet the eligibility requirements as of July 7, 1986.

§ 700.138 Persons who have not applied for voluntary relocation by July 7, 1986.

(a) Pursuant to 25 U.S.C. 640d–14 (d)(3) heads-of-household who do not make timely arrangements for relocation by filing an application by July 7, 1986, shall be provided a replacement home by the Commission. To be eligible for benefits (Housing and Moving Expenses), such persons must be, as of July 7, 1986, physically residing full time on land partitioned to a tribe of which they are not members and they must also otherwise meet all other current eligibility criteria.

(b) The Commission shall utilize amounts payable with respect to such households pursuant to 25 U.S.C. 640d–14(b)(2) and 25 U.S.C. 640d–34(a) for the construction or acquisition of a home and related facilities for such households.

(c) Persons identified by the Commission as potentially subject to relocation who have not applied for relocation assistance shall be contacted by the Commission as soon as practicable after July 7, 1986. At such time, the Commission shall—

(1) Request that the head-of-household choose an available area for relocation, and contract with the Commission for relocation; and

(2) Offer the relocatee suitable housing; and

(3) Offer to purchase from the head-of-household the habitation and improvements; and

(4) Offer provisions for the head-of-household and his family to be moved (e.g., moving expenses, etc.)

(d) If a person so identified fails to agree to move after the actions outlined in this section are taken by the Commission and suitable housing is available (or sufficient funds are available to assure the relocation assistance to which the relocatee may be entitled), the Commission will issue a ninety-day notice stating the date by which the person will be required to vacate the area partitioned to the Tribe of which he is not a member.

§ 700.147 [Amended]

* * * * *

(e) Relocation benefits are restricted to those who qualify as heads-of-household as of July 7, 1986.

Ralph A. Watkins, Jr.,

Chairman, Navajo and Hopi Indian Relocation Commission.

BILLING CODE 7535-01-M

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Office of Postsecondary Education

34 CFR Part 208

State Grants for Strengthening the Skills of Teachers and Instruction in Mathematics, Science, Foreign Languages, and Computer Learning and for Increasing the Access of All Students to That Instruction

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing State Grants for Strengthening the Skills of Teachers and Instruction in Mathematics, Science, Foreign Languages, and Computer Learning and for Increasing the Access of All Students to That Instruction under Title II of the Education for Economic Security Act. These final regulations implement technical amendments made to Title II by the National Science, Engineering, and Mathematics Authorization Act of 1986.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Dr. Allen Schmieder, Chief, Mathematics/Science Section, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 2011, FOB–6, Mail Stop 6264), Washington, D.C. 20202. Telephone: (202) 755–0410.

SUPPLEMENTARY INFORMATION:

Background

On October 25, 1985, the Department published, at 50 FR 43542–57 (34 CFR Part 208), final regulations governing State Grants for Strengthening the Skills of Teachers and Instruction in Mathematics, Science, Foreign Languages, and Computer Learning and for Increasing the Access of All Students to That Instruction under Title II of the Education for Economic Security Act, 20 U.S.C. 3961 *et seq.* On November 22, 1985, the President signed into law technical amendments to Title II made by the National Science, Engineering, and Mathematics Authorization Act of 1986, Pub. L. 99–159. The final regulations in this document implement those changes, where necessary.

Effect of Reauthorization

Pub. L. 99–159 extends the authorization for Title II through fiscal year 1988. These regulations, however, do not change the conditions that must be met to receive funds for fiscal years 1987 and 1988. The Secretary believes that this approach facilitates implementation of the program with minimum burden to States. Thus, once a State has submitted its application and assessment of need in accordance with §§ 208.11–208.13, the State need not resubmit those documents in order to receive funds. Of course, if the State makes significant and relevant changes in its Title II programs, it must amend its application in accordance with § 208.12(b) and 34 CFR 76.140–76.141 of the Education Department General Administrative Regulations.

Similarly, the conditions a local educational agency (LEA) must meet to receive funds remain the same. The LEA is not required to resubmit its application or assessment of need. However, to receive a renewal of funds each year, the LEA must submit the information required in § 208.32(b).

Sections Requiring Changes as a Result of Pub. L. 99–159

Section 208.21 Allotment to States.

Paragraph (c) implements that portion of section 223(a) of Pub. L. 99–159 that requires the Secretary to reserve one percent of the funds appropriated under Title II for each fiscal year to carry out the provisions of section 204(c) of Title II concerning children in Indian schools and the Insular Areas.

Section 208.23 Allotment to the Insular Areas.

Paragraph (a)(1) implements section 223(b) of Pub. L. 99–159. According to that section, from the one percent reserved to carry out the provisions of section 204(c) of Title II, the Secretary must allot not less than one-half of that amount for programs for children in elementary and secondary schools operated for Indian children by the Department of the Interior. The Secretary must allot the remaining amount among the Insular Areas. Although this language is slightly different, there is no substantive change from the previous provision in Title II. Moreover, under the new provision, the Secretary may still allot one-half of the amount reserved for section 204(c) for Indian schools and one-half for the Insular Areas, as he did for fiscal year 1985 funds.

Section 208.24 Allotment to the Bureau of Indian Affairs.

Paragraph (a) references § 208.21(c), added as a result of Pub. L. 99–159.

Section 208.32 LEA application and renewal.

Paragraph (a)(3) implements section 224(b)(3) of Pub. L. 99–159, which authorizes an LEA to conduct training programs. Title II, as originally enacted, authorized only inservice training and retraining.

Section 208.34 Allocation of funds.

Paragraph (a)(1) implements section 224(c) of Pub. L. 99–159, which gives a State educational agency (SEA) the option of calculating "relative enrollments," for the purpose of allocating funds to LEAs, on the basis of the total number of children enrolled in public schools and the number of children enrolled in either (1) all private nonprofit schools or (2) private nonprofit schools desiring that their children and teachers participate in Title II projects. Paragraph (a)(1) also incorporates the language in section 224(c) of Pub. L. 99–159 reiterating the responsibility of LEAs to contact, on an annual basis, appropriate private school officials to determine whether they desire that their children and teachers participate in Title II projects.

Section 208.35 Use of funds by LEAs.

Section 208.35 implements a number of changes made by Pub. L. 99–159. First, paragraphs (a), (b) (1) and (2)(i), and (c)(1)(i) implement sections 224(a), 224(b)(1), and 228(1) of Pub. L. 99–150 and indicate that training, inservice training, and retraining are all authorized activities for LEAs under Title II. Second, paragraphs (b)(1) and (2)(i) implement section 228(2) of Pub. L. 99–159, which indicates that an LEA may request a waiver under section 210(c) of Title II if the LEA does not need all or a portion of its Title II funds to meet its needs for training, inservice training, and retraining in mathematics and science. Essentially, these changes in paragraph (b) incorporate statutory changes that affirm the interpretation previously articulated in this section of the regulations. Finally, the changes in paragraphs (c)(1) (i) and (ii) conform paragraph (c) to changes made to section 206(b)(1)(B) of Title II by section 224(b)(1) of Pub. L. 99–159.

Section 208.42 Use of funds by SAHEs.

Paragraph (a)(1) implements section 225(c)(2) of Pub. L. 99–159, which authorizes State agencies for higher education (SAHEs) to conduct cooperative programs in computer learning as well as in mathematics, science, and critical foreign languages.

Section 208.43 Use of funds by IHEs.

Section 208.43 implements section 225 (a) and (b) of Pub. L. 99–159, which authorizes institutions of higher education (IHEs) to provide retraining and inservice training in foreign languages as well as in mathematics, science, and computer learning.

Section 208.61 Participation of children and teachers in private schools.

Paragraph (d) implements section 228A of Pub. L. 99–159, which clarifies that only children and teachers in private elementary and secondary schools which are nonprofit may participate in Title II projects.

Waiver of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Department of Education to publish regulations in proposed form and to offer interested parties the opportunity to comment on the proposed regulations. Because these regulations merely incorporate changes made by statute, however, public comment could have no effect. Therefore, publication of this document as a proposed rule for public comment has been determined to be unnecessary under 5 U.S.C. 553(b)(B).

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. These amendments merely conform the existing regulations to new statutory requirements. The scope of the changes is limited and will not have a significant economic impact on the entities affected by the regulations.

Paperwork Reduction Act of 1980

These amendments do not contain any information collection requirements under the provisions of the Paperwork Reduction Act of 1980.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

The Department has determined the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 208

Colleges and universities, Education, Education of disadvantaged, Elementary and secondary education, Foreign languages, Grant programs—education, Private schools, Reporting and recordkeeping requirements, Science and technology, Teachers, Training program, Vocational education.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations. Unless otherwise noted, the citations refer to sections of the Education for Economic Security Act.

(Catalog of Federal Domestic Assistance No. 84.164, State Grants for Strengthening the Skills of Teachers and Instruction in Mathematics, Science, Foreign Languages, and Computer Learning and for Increasing the Access of All Students to That Instruction)

Dated: May 21, 1986.

William J. Bennett,

Secretary of Education.

PART 208—STATE GRANTS FOR STRENGTHENING THE SKILLS OF TEACHERS AND INSTRUCTION IN MATHEMATICS, SCIENCE, FOREIGN LANGUAGES, AND COMPUTER LEARNING AND FOR INCREASING THE ACCESS OF ALL STUDENTS TO THAT INSTRUCTION

The Secretary amends Part 208 of Title 34 of the Code of Federal Regulations as follows:

1. The authority citation for Part 208 is revised to read as follows:

Authority: 20 U.S.C. 3801–3871, 3878, unless otherwise noted.

2. Section 208.21 is amended by adding a new paragraph (c) to read as follows:

§ 208.21 Allotment to States.

* * * * *

(c) The Secretary reserves one (1) percent of the funds appropriated under Title II for each fiscal year to carry out the provisions of section 294(c) of Title II.

(20 U.S.C. 3864(a), 3865)

3. Section 208.23 is amended by revising paragraph (a)(1) and the citation of authority to read as follows:

§ 208.23 Allotment to the Insular Areas.

(a)(1) From the amount available under § 208.21(c), the Secretary allots the amount remaining after implementing § 208.24 among Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands according to their respective needs for assistance under Title II.

* * * * *

(20 U.S.C. 3864(a)(2)(B), (c))

4. Section 208.24 is amended by revising paragraph (a) and the citation of authority to read as follows:

§ 208.24 Allotment to the Bureau of Indian Affairs.

(a) From the amount available under § 208.21(c), the Secretary allots not less than one-half of that amount to the Bureau of Indian Affairs for programs under this part for children in elementary and secondary schools operated for Indian children by the U.S. Department of the Interior.

* * * * *

(20 U.S.C. 3864(a)(2)(B), (c))

5. Section 208.32 is amended by revising paragraph (a)(3) to read as follows:

§ 208.32 LEA application and renewal.

(a) * * *

(3) An assurance that programs of training, inservice training, and retraining will take into account the need for greater access to and participation in mathematics, science, and computer learning programs and careers for students from historically underrepresented and underserved populations.

* * * * *

6. Section 208.34 is amended by revising paragraph (a)(1) to read as follows:

§ 208.34 Allocation of funds.

(a) * * *

(1)(i) Fifty (50) percent of the funds must be distributed according to the relative enrollments in public and private nonprofit schools within the school districts of the LEAs. Relative enrollments may be calculated, at the option of the SEA, on the basis of the total number of children enrolled in public schools and—

(A) Private nonprofit schools; or

(B) Private nonprofit schools desiring that their children and teachers participate in Title II programs or projects.

(ii) Nothing in paragraph (a)(1)(i) of this section diminishes the responsibility of an LEA to contact, on an annual basis, appropriate officials of private nonprofit schools within its school district to determine whether those officials desire that their children and teachers participate in Title II programs or projects.

* * * * *

7. Section 208.35 is revised to read as follows:

§ 208.35 Use of funds by LEAs.

(a) Except as provided in paragraphs (b) and (c) of this section, an LEA shall use the funds it receives under § 208.34(a) for the expansion and improvement of training, inservice training, and retraining in the fields of mathematics and science of teachers and other appropriate school personnel, including vocational education teachers who use mathematics and science in teaching vocational education courses.

(b)(1) If an LEA determines that it does not need all or a portion of the funds it receives under this part to meet the needs identified in its assessment of need for training, inservice training, and retraining specified in paragraph (a) of this section, the LEA may request the SEA to waive to the extent necessary the provisions in paragraph (a) of this section in order that LEA may use funds not needed under paragraph (a) of this section for programs under paragraph (c) of this section.

(2)(i) If the SEA determines that the LEA does not need all or a portion of the funds the LEA receives under this part to meet the needs identified in the LEA's assessment of need for the training, inservice training, and retraining specified in paragraph (a) of this section, the SEA shall grant the LEA's request for a waiver.

(ii) In granting a waiver, the SEA shall ensure that the LEA will meet the requirements for the equitable participation of children and teachers in private schools in accordance with section 211 of Title II and 34 CFR 76.651–76.662.

(c)(1) Except as provided in paragraph (c)(2) of this section, if an LEA receives a waiver under paragraph (b) of this section, the LEA shall use funds not needed under paragraph (a) of this section for—

(i) Training, inservice training, and retraining in the fields of—

(A) Computer learning; and

(B) Foreign languages;

(ii) Acquisition of instructional materials and equipment related to mathematics and science instruction.

(2) Of the funds an LEA receives under § 208.34(a), an LEA may not use more then—

(i) Thirty (30) percent for the purchase of computers and computer-related instructional equipment; and

(ii) Fifteen (15) percent to strengthen instruction in foreign languages.

(d) An LEA may carry out the training and instruction under this section—

(1) Through agreements with public agencies, private industry, IHEs, and nonprofit organizations; and

(2) In conjunction with one or more LEAs within the State, with the SEA, or with both LEAs and the SEA.

(20 U.S.C. 3866 (b), (c), 3870(c), 3871)

8. Section 208.42 is amended by revising paragraph (a)(1) to read as follows:

§ 208.42 Use of funds by SAHEs.

(a)(1) Subject to the requirement in paragraph (a)(2) of this section, a SAHE shall use not less than twenty (20) percent of the funds made available for higher education programs under § 208.21(b)(2) for cooperative programs among IHEs, LEAs, SEAs, private industry, and nonprofit organizations for the development and dissemination of projects designed to improve student understanding and performance in science, mathematics, computer learning, and critical foreign languages.

* * * * *

9. Section 208.43 is revised to read as follows:

§ 208.43 Use of funds by IHEs.

(a) Subject to the requirement in paragraph (b) of this section, an IHE shall use the funds awarded under § 208.41(a) for—

(1) Establishing traineeship programs for new teachers who will specialize in teaching mathematics and science at the secondary school level;

(2) Retraining secondary school teachers, who specialize in disciplines other than the teaching of mathematics, science, foreign languages, or computer learning, to specialize in the teaching of mathematics science, foreign languages, or computer learning, including provision of stipends for participation in institutes authorized under Title I of the EESA; and

(3) Inservice training for elementary, secondary, and vocational school teachers and training for other appropriate school personnel to improve their teaching skills in the fields of mathematics, science, foreign languages, and computer learning, including stipends for participation in institutes authorized under Title I of the EESA.

(b) To receive funds for programs under paragraphs (a) (2) and (3) of this section, an IHE shall enter into an agreement with an LEA, or a consortium of LEAs, to provide inservice training and retraining for elementary and secondary school teachers in public and private schools in the LEA or LEAs.

(c) Each IHE receiving funds under § 208.41(a) shall assure that programs of training, retraining, and inservice training will take into account the need for greater access to and participation in mathematics, science, foreign languages, and computer learning and careers for—

(1) Students from historically underrepresented and underserved populations; and

(2) Gifted and talented students.

(20 U.S.C. 3867(b))

10. Section 208.61 is amended by adding a new paragraph (d) to read as follows:

§ 208.61 Participation of children and teachers in private schools.

* * * * *

(d) *Nonprofit status.* In accordance with section 711 of Title II, the regulations in this part only apply to children and teachers in private nonprofit elementary and secondary schools.

* * * * *

BILLING CODE 4000-01-M

---

34 CFR Parts 230 and 231

Asbestos Detection and Control: Local and State Educational Agencies; Removal of Obsolete Provisions

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary removes obsolete regulations from the Code of Federal Regulations (CFR). When Congress enacted the Asbestos School Hazard Abatement Act of 1984, authorizing an asbestos program in the Environmental Protection Agency, it allowed the authorization for the Department of Education asbestos program to lapse. This effectively terminated the Department of Education program and the implementing regulations in 34 CFR Parts 230 and 231 are no longer needed.

EFFECTIVE DATE: May 28, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. David G. Phillips, Division of Impact Aid, Department of Education, 400 Maryland Avenue SW., Washington, DC 20202-6272. Telephone: (202) 245-1975.

SUPPLEMENTARY INFORMATION: The Asbestos School Hazards Detection and Control Act of 1980 (Pub. L. 96-270, 20 U.S.C. 3601-3611) authorized asbestos programs in the Department of Education through fiscal year (FY) 1982. That authorization was extended through FY 1984 by section 528(6) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35). When the Congress enacted the Asbestos School Hazard Abatement Act of 1984, authorizing a similar asbestos program in the Environmental Protection Agency, it allowed the authorization for the Department of Education program to lapse. This effectively terminated the Department of Education program and the implementing regulations in 34 CFR Parts 230 and 231 are no longer needed.

Waiver of Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, the publication of this document as a proposed rule for public comment is unnecessary under 5 U.S.C. 553(b)(B) because it is without substantive effect and concerns only the removal of obsolete regulations from the CFR.

List of Subjects

34 CFR Part 230

Asbestos, Grant programs-education, Grant programs-health, Hazardous substances, Loan programs-education, Loan programs-health, Reporting and recordkeeping requirements, Schools.

34 CFR Part 231

Asbestos, Grant programs-education, Grant programs-health, Hazardous substances, Reporting and recordkeeping requirements, Schools.

(Catalog of Federal Domestic Assistance No. does not apply)

Dated: May 21, 1986.

The Secretary amends Title 34 of the Code of Federal Regulations by moving Parts 230 and 231.

PART 200—ASBESTOS DETECTION AND CONTROL: LOCAL EDUCATIONAL AGENCIES [REMOVED]

1. 36 CFR Part 200 is removed.

PART 201—ASBESTOS DETECTION AND STATE PLAN: STATE EDUCATIONAL AGENCIES [REMOVED]

2. 36 CFR Part 201 is removed.

[FR Doc. 86-11709 Filed 5-27-86; 8:45 am]
BILLING CODE 6820-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 162

[OPP-180186; FRL 3021-8]

Advocacy of Pesticide Uses Which Do Not Appear on Registered Pesticide Labels; Amendment to the Statement of Policy

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of amendment to policy.

SUMMARY: This notice amends a policy statement published in the Federal Register on October 22, 1981 (46 FR 51745) (October 1981 policy) and affects persons who distribute, sell, offer for sale, hold for sale, ship, deliver for shipment, or receive and (having so received) deliver or offer to deliver any antimicrobial pesticide. If any such person makes any claims for an antimicrobial pesticide product, targeted against microbial human pathogens, which differ from those made in conjunction with that product's registration, the EPA will regard that person as having violated section 12(a)(1)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), even when such claims are for uses allowed by FIFRA section 2(ee).

DATE: This policy is effective June 27, 1986.

FOR FURTHER INFORMATION CONTACT:
Daniel A. Helfgott (enforcement information), Office of Compliance Monitoring (EN-342), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, (202-382-7807).
D. Jean Jenkins (technical information), Registration Division (TS-767C), Office of Pesticide Programs, 401 M St., SW., Washington, D.C. 20460.
Office location and telephone number: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, Virginia, (703-557-7443).

SUPPLEMENTARY INFORMATION:

I. Policy

FIFRA section 12(a)(1)(B) states that it is unlawful for a person who distributes, sells, offers for sale, holds for sale, ships, delivers for shipment, or receives and (having so received) delivers or offers to deliver a registered pesticide, to make any claims for that product which differ substantially from those claims made in conjunction with that product's registration. The term "claims" includes, but is not limited to, claims appearing in advertising, literature, letters, or other documents, as well as oral statements.

Under section 2(ee) of FIFRA it is not a misuse to:

1. Apply a pesticide at any dosage, concentration, or frequency less than that specified on the labeling.
2. Apply a pesticide against any target pest not specified on the labeling if the application is to the crop, animal, or site specified on the labeling (unless the label states that the pesticide may be used only against pests specified on the label).
3. Employ any method of application not prohibited by the labeling.

In the October 1981 policy, EPA stated its policy that, since a FIFRA section 2(ee) use is not a misuse, any claim made regarding FIFRA section 2(ee) uses would not be treated as a violation of FIFRA section 12(a)(1)(B) unless the registered pesticide's labeling specifically prohibits that use.

EPA has reconsidered its policy on FIFRA section 12(a)(1)(B) with respect to certain claims made for uses not on the labeling. This notice informs the public that a person with financial interest in the use of an antimicrobial pesticide product, targeted against human pathogens, may not make any claims for the product which differ from those on the product's approved labeling. This policy does not affect the applicability of the October 1981 policy to any pesticides other than those specified in this notice.

The Agency believes that efficacy claims for antimicrobial products that are not supported by efficacy data submitted in conjunction with that pesticide's registration may foster a false sense of security among health care professionals relying on that product. Additionally, since the presence of the target microorganism cannot be readily discerned by users, the users cannot easily judge for themselves the effectiveness of that product (see 40 CFR 162.183). Therefore, claims made for antimicrobial products which substantially differ from those made in conjunction with registration could pose a serious public health threat.

Since pesticides intended for use against microorganisms are now excluded from the October 1981 policy, the Agency will take appropriate enforcement action, pursuant to FIFRA, against any person who distributes, sells, offers for sale, holds for sale, ships, delivers for shipment, or receives and (having so received) delivers or offers to deliver any antimicrobial pesticide if any claims made for it as part of its distribution or sale, substantially differ from those made in conjunction with its registration. Additionally, any person who recommends a FIFRA section 2(ee) use for an antimicrobial pesticide remains liable for possible civil damages arising out of his own negligence.

II. Background

EPA is currently concerned about unwarranted claims for antimicrobial pesticides used against human pathogens, especially against hepatitis-B virus (HBV), the causative agent of serum hepatitis, and human T-lymphotropic virus type III/lymphadenopathy-associated virus (HTLV-III/LAV), the apparent etiologic agent for acquired immune deficiency syndrome (AIDS). Most of the inquiries EPA has received concerning control of HBV and HTLV-III/LAV pertain to sterilizer and disinfectant products. Sterilizers are antimicrobial products ". . . intended to destroy viruses and all living bacteria, fungi and their spores, on inanimate surfaces" (40 CFR 162.3(ff)(2)(i)(D)). Sterilization is an absolute term and denotes killing of all microorganisms, including the most resistant spore forms, against which these products are tested. Disinfectants are antimicrobial products ". . . intended to destroy or irreversibly inactivate infectious or other undesirable bacteria, pathogenic fungi, or viruses on surfaces or inanimate objects" (40 CFR 162.3 (ff)(2)(i)(A)). In contrast to sterilizers, disinfectants are intended for effectiveness only against representative groups of vegetative bacteria and pathogenic fungi, and against specifically tested viruses. Some antimicrobial products are registered with label directions allowing use as a sterilizer if one treatment regimen is used (e.g., immersion for 10 hours) or as a disinfectant if a less stringent regimen is used (e.g., immersion for 10 minutes).

FIFRA section 3(c)(5)(A) states that the Administrator shall register a pesticide if he determines that ". . . its composition is such as to warrant the proposed claims for it." In addition, 40 CFR 158.160(b)(1), published in the Federal Register of November 13, 1985

(50 FR 40765), states that efficacy data are required to support all claims ". . . to control pest microorganisms that pose a threat to human health and whose presence cannot be readily observed by the user, including but not limited to, microorganisms infectious to man in any area of the inanimate environment." EPA requires the following data prior to registering a product with a virucidal label claim: (1) Demonstrated recovery of the infective form of the particular virus dried on an inanimate surface, and (2) availability and use of suitable assay methods to demonstrate absence of the dried virus after treatment of the surface with the antimicrobial product (Pesticide Assessment Guidelines, Subdivision G—Product Performance, Section 91–30 (d)(5), National Technical Information Service Order Number PB 83–153924).

To register a product with a label claim that the product can be used as a sterilizer, EPA requires data showing that the product is sporicidal. (Pesticide Assessment Guidelines, as above, Section 91–30(a)(1).) Since spores are the most resistant form of microorganism, no additional data are needed to support virucidal claims for products that are already registered as sterilizers. While HBV is a relatively well understood human pathogen, there are only limited experimental data concerning viral recovery and inactivation by disinfectants on hard surfaces. This is due to lack of a suitable assay method for determining whether the infective virus remains on hard surfaces after disinfection. To determine this, the experimenter must attempt to grow the virus in a host system.

The only known nonhuman host system is the chimpanzee, and chimpanzees are practically unavailable for such experiments. In 1983 the Centers for Disease Control (CDC) published findings of a clinical study in which five chimpanzees were injected with dried HBV-infected plasma treated with each of five different germicides (J. Clinical Microbiology, 18(3): 535–538, 1983). Though the chimpanzees did not show evidence of HBV infection after 9 months, these data are too limited to be conclusive. Therefore, the data are inadequate to demonstrate that disinfection provides adequate control against HBV contamination when sterilization may be the only effective control measure. This discrepancy in control procedures [i.e. disinfection rather than sterilization] could result in failure to reduce HBV contamination, thereby increasing public health risks.

The only known routes of transmission for AIDS virus, which was isolated and identified in 1984, are through sexual contact, blood products, or from mother to newborn. Transmission of AIDS via casual contact has not been demonstrated (New England Journal of Medicine, 314(6):344–349, 1986). Recently, data have become available which indicate that HTLV–III/LAV may be recovered after drying on inanimate surfaces for extended periods (Journal of the American Medical Association, 25A:1887–1891, 1986). These findings advance the possibility that the virus may be transmitted via such surfaces. Given the insidious and fatal nature of AIDS, hospitals and other health-care facilities are seeking guidance on the effectiveness of antimicrobial chemicals in controlling the spread of HTLV–III/LAV. Researchers at both CDC (J. Infectious Diseases, 152(2):400–403, 1985) and the Pasteur Institute (Lancet, 2:899–901, 1984) have conducted studies demonstrating that certain chemicals effectively kill HTLV–III/LAV in liquid suspensions. The CDC issued a report to advise interested parties of their recommendations for preventing transmission of HTLV–III/LAV in the workplace (Morbidity and Mortality Weekly Report: 34(45):681–685, November 15, 1985). The report emphasizes that the recommendations for preventing transmission of AIDS are directed towards people who may be exposed to blood or body fluids from persons who may be infected with HTLV–III/LAV. The report provides certain broad recommendations for sterilizing or disinfecting inanimate surfaces or objects that have been in contact with blood or other body fluids of an AIDS patient.

If HTLV–III/LAV can be recovered from inanimate surfaces, it appears that an acceptable protocol can be developed to test the efficacy of antimicrobial products (Journal of Immunological Methods 76:171-183, 1985). However, since no acceptable protocol has been developed, and no data submitted, no claims have been accepted against AIDS virus for any product.

III. Summary

Given the available evidence and methodology concerning these viruses, EPA lacks sufficient basis to approve HBV or HTLV–III/LAV virucidal claims for any disinfectant product. This situation may change as research on the AIDS and HBV viruses continues and registrants develop acceptable protocols to demonstrate virus isolation and disinfectant product efficacy.

EPA will allow registrants to make HBV and HTLV–III/LAV virucidal claims for sterilizer products when used in accordance with label directions for the sterilization procedure, and when approved in connection with the specific product registration.

40 CFR Part 180

[PP 6F3335/R840; FRL–3019–6]

Pesticide Tolerance for Diclofop-Methyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for the combined residues of the herbicide diclofop-methyl and its metabolites in or on the raw agricultural commodity pea seeds (dry). This regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the American Hoechst Corp.

EFFECTIVE DATE: Effective on May 28, 1986.

ADDRESS: Written objections, identified by the document control number [PP 6F3335/R840], may be submitted to: Hearing Clerk (A–110), Environmental Protection Agency, room 3708, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: Richard Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Environmental Protection Agency 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 237, CM No. 2, 1921 Jefferson Davis Highway Arlington, VA. (703–557–1830).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of February 19, 1986 (51 FR 6034), which announced that American Hoechst Corp., Agricultural Division, Rte. 202–206, North Somerville, NJ 08876, had filed pesticide petition 6F3335 to EPA proposing to amend 40 CFR 180.395 by establishing a tolerance for the combined residues of the herbicide diclofop-methyl (methyl 2-[4-(2,4-dichlorophenoxy)phenoxy]propanoate) and its metabolites 2-[4-(2,4-dichlorophenoxy)phenoxy]propanoic acid and 2-[4-(2,4-dichloro-5-hydroxyphenoxy)phenoxy]propanoic

acid, each expressed as diclofop-methyl, in or on the commodity pea seeds (dry) at 0.1 part per million (ppm).

No comments were received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data considered in support of the tolerance include a rat oral median lethal dose (LD_{50}) study with an LD_{50} of 557 to 580 milligrams per kilogram (mg/kg); a dominant lethal mutagenicity study, negative at 100 mg/kg/day (highest level tested); a microsnuclevs mutagenicity study, negative at 100 mg/kg/day (highest level tested); an Ames test, negative at 5.0 mg/plate (highest level tested); a mutagenicity study with *Schizosaccharomyces pombe*, negative; a gene conversion study in *Saccharomyces cerevisiae*, negative; and unscheduled DNA synthesis study, negative; a rat teratology study with a teratogentic no-observed-effect level (NOEL) of 100 ppm (highest dose tested) (equivalent to 5.0 mg/kg of body weight (bwt); a rabbit teratology study with a teratogenetic NOEL of 3 mg/kg/day (highest dose tested) and a NOEL for fetotoxicity of 3.0 mg/kg/day; a 3-generation rat reproduction study with NOEL of 30.0 ppm (1.5 mg/kg of bwt); a 2-year rat feeding/oncogenicity study with a NOEL of 20 ppm (1.0 mg/kg of bwt) (highest level tested) and no oncogenic effects under the conditions of the study; a 2-year mouse feeding/oncogenicity study with a systemic NOEL of 2 ppm, (0.3 mg/kg of bwt) and a significant increase in liver neoplasms in males at the highest dose tested, 20 ppm (3.0 mg/kg/day); and a 15-month dog feeding study with a NOEL of 8 ppm (0.2 mg/kg of bwt).

The Agency has evaluated dietary exposure to diclofo-pmethyl residues for the commodity proposed. Assuming that 100 percent of the pea crop will have residues at the tolerance level (0.1 ppm), using a multi-stage model the "worst case" incremental dietary oncogenic risk is calculated to be 1 incidence in 100,000 (10^{-5}). Actual risk will be less, since not all of the dry pea crop will be treated, and those crops treated and sold will have residues less than 0.1 ppm (the level of detection).

Based on the NOEL of 0.3 mg/kg in the chronic mouse-feeding study and a 100-fold safety factor, the acceptable daily intake (ADI) has been set at 0.003 mg/kg/day with a maximum permissible intake (MPI) of 0.18 mg/day for a 60-kg person. This tolerance and previously established tolerances result in a theoretical maximum residue concentration (TMRC) of 0.01815 mg/day in a 1.5-kg diet and use 10.04 percent of the ADI.

The pesticide is considered useful for the purpose for which the tolerance is sought. The metabolism of the pesticide is adequately understood and an adequate analytical method, gas chromatography using an electron capture detector, is available for enforcement purposes. There is no expectation of secondary residues in meat, milk, poultry, and eggs. There are no regulatory actions pending against the continued registration of the pesticide. Based on the information cited above, the Agency has determined that the establishment of the tolerance will protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: May 15, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended as follows:

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.385 is amended by adding and alphabetically inserting the commodity pea seeds (dry), to read as follows:

§ 180.385 Diclofop-methyl; tolerances for residues.

* * * * *

Commodities	Parts per million
* * * * *	
Pea seeds (dry)	0.1
* * * * *

[SW-FRL-3022-2]

Hazardous Waste Management System; Final Codification Rule

AGENCY: Environmental Protection Agency.

ACTION: Final rule; correction.

SUMMARY: The Office of Solid Waste is making a technical correction to the Final Codification rule (FR Doc. 85-13094) that amended EPA's existing hazardous waste regulations to reflect those statutory provisions that have immediate or short-term effects on the regulated community. This correction removes the designation of "reserved" from the paragraph of the regulation under which bulk hazardous and containerized liquid wastes are prohibited from disposal in a landfill, and reinserts language requiring the use of the Paint Filter Liquids Test to determine whether free liquids are present in a waste that will be landfilled."

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hazardous Waste Hotline, Office of Solid Waste (WH-563), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (800) 424-9346 (382-3000 in Washington, D.C.). For specific information on this amendment, contact Paul Cassidy, Office of Solid Waste (WH-565E), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 382-4662.

SUPPLEMENTARY INFORMATION: In the Federal Register published on July 15, 1985 (FR Doc. 85-13094), at page 28750, § 265.314(d) was inadvertently reserved. This section was originally promulgated on April 30, 1985 (FR Doc. 85-10278), and stated that the Paint Filter Liquids Test is to be used to determine the absence

or presence of free liquids in either a bulk or a containerized waste. The reserving of paragraph (d), which presents the Paint Filter Liquids Test requirement, was unintentional and is now being corrected. The Paint Filter Liquids Test has been in effect continuously since June 14, 1985, and remains in effect.

The amendatory language in paragraph 50 on page 28750 of the Federal Register is correced by removing the reference to paragraph (d). Paragraph (d) of § 265.314 remains as added at page 18374 in the Federal Register published on April 30, 1985, (FR Doc. 85–10278).

Dated: May 13, 1986.

J.W. McGraw,

Acting Assistant Administrator.

Accordingly, in the Federal Register of July 15, 1985, (FR Doc. 85–13094), on page 28750, second column, paragraph 50, is corrected by changing the comma after the word "respectively" to a period, and by removing the words "and paragraph (d) is reserved."

For the convenience of the user, the text of § 265.314(d) is reprinted as follows:

§ 265.314 Special requirements for bulk and containerized liquids.

* * * * *

(d) To demonstrate the absence or presence of free liquids in either a containerized or a bulk waste, the following test must be used: Method 9095 (Paint Filter Liquids Test) as described in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods." [EPA Publication No. SW–846].

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 435

[BERC–106–F]

Medicaid Program—Mental Retardation; Definition of "Persons With Related Conditions"

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This rule amends a definition in Medicaid regulations concerning intermediate care facilities for the mentally retarded (ICF/MR) and persons with related conditions. The definition of "persons with related conditions" contained in our regulations was tied to the definition of developmental disability included in the Developmental Disabilities Assistance and Bill of Rights Act (DDABRA) as amended in 1978. The DDABRA, as amended, however, also included the mentally ill within the definition of developmental disability. The prior cross-reference in our regulations to the DDABRA definition resulted in confusion about the kind of care covered by the ICF/MR benefit. To avoid misunderstandings in the future, this rule establishes an independent Medicaid definition of persons with conditions related to mental retardation.

EFFECTIVE DATE: June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas Hoyer, (301) 594–0445.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1904 of the Social Security Act (Act) authorizes optional Medicaid coverage for services in intermediate care facilities (ICFs). ICFs are facilities that provide health-related care to individuals who do not need the degree of care commonly provided in hospitals or skilled nursing facilities, but who do require care and services, above the level of room and board, which can only be made available to them through institutional facilities. Section 1905(d) of the Act indicates that the term "intermediate care facility services" may include services in a public institution for the mentally retarded or "persons with related conditions" (ICF/MR). This statutory provision is reflected in current regulations at 42 CFR 435.1009 and 440.150.

Initial Medicaid regulations published in 1974 defined "persons with related conditions" by using a cross-reference to the definition of developmental disability in the Developmental Disabilities Services and Facilities Construction Act (DDSFC), Pub. L. 91–517, enacted on October 30, 1970 (changed to the Developmental Disabilities Assistance and Bill of Rights Act in 1975, (DDABRA)). That definition of developmental disability used specific diagnoses to limit its scope to impairments closely related to mental retardation. The definition read ". . . a disability attributable to mental retardation, cerebral palsy, epilepsy, or another neurological condition of an individual found by the Secretary to be closely related to mental retardation or to require treatment similar to that required for mentally retarded individuals, whose disability originates before such individual attains age 18, which has continued or can be expected to continue indefinitely, and which constitutes a substantial handicap to such individual."

Since 1970, the DDABRA definition of developmental disability has been amended twice. In 1975, Pub. L. 94–103 amended the definition to:

(1) Add autism to the list of specific conditions; dyslexia resulting from a disability otherwise specified in the definition was also added;

(2) Expand the reference to "other neurological conditions" to cover any conditions closely related to mental retardation by virtue of a similar impairment or a requirement for similar treatment; and

(3) Relate "substantial handicap" to the ability to function normally in society.

On October 1, 1978, an amendment to DDABRA, Pub. L. 95–602 revised the definition of developmental disability even further to read as follows:

"The term 'developmental disability' means a severe, chronic disability of a person which—

(1) Is attributable to a mental or physical impairment or combination of mental and physical impairments;

(2) Is manifested before the person attains age 22;

(3) Is likely to continue indefinitely;

(4) Results in substantial functional limitations in three or more of the following areas of major life activity:

(a) Self-care.

(b) Receptive and expressive language.

(c) Learning.

(d) Mobility.

(e) Self-direction.

(f) Capacity for independent living.

(g) Economic self-sufficiency.

(5) Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated."

This last amendment changed the focus of the definition from a categorical to a functional one. Thus, the definition no longer listed specific diagnoses that previously had been used to limit the definition to those impairments closely resembling mental retardation, but included any person with a mental or physical impairment that limits the person's functional ability in certain activities. Furthermore, the age by which a condition must manifest itself was changed from 18 to 22.

In 1974, Medicaid regulations were promulgated to implement the ICF/MR benefit under Medicaid. The DDABRA (then, DDSFCA) definition of "developmental disability" was adopted

for the Medicaid definition of "persons with related conditions" because it seemed to be an appropriate and convenient means of defining the term. However, when all existing Medicaid regulations were recodified, effective October 1, 1978, as part of the Department's initiative to rewrite regulations in a clear, concise, easily understandable format, the cross-reference to DDABRA inadvertently included the words "as amended" after the phrase "Pub. L. 91-517 enacted on 10/30/70".

The 1978 regulations intended to make "no substantive change" to prior Medicaid regulations. However, the cross-reference to the DDABRA arguably produced the unintended result of incorporating into Medicaid regulations the revision to the definition of the developmentally disabled created by the 1978 amendments to the DDABRA. This arguably resulted in an unintended substantive policy change in the recodified regulations that, in effect, appeared to broaden the Medicaid ICF/MR benefit to include coverage of facilities serving persons with mental or physical impairments that limit functional ability in certain activities.

Coverage of care provided in facilities for the mentally ill is addressed under the Medicaid statute at section 1905(a)(14) and 1905(a)(16) of the Social Security Act. These provisions, respectively, allow Medicaid coverage "for individuals 65 years of age or over in an institution for tuberculosis or mental disease" and "for individuals under 21 years of age" in psychiatric facilities. In the paragraph following section 1905(a)(16), with the exception of individuals under 21 in psychiatric facilities, the statute clearly excludes Medicaid coverage for "any individual who has not attained 65 years of age and who is a patient in an institution for tuberculosis or mental disease." Therefore, the statute limits Medicaid coverage of inpatient psychiatric care to individuals within specified age groups in specified inpatient settings. Since these restrictions do not apply to ICFs/MR, it follows that Medicaid was not intended to include institutions for mental diseases as ICFs/MR. This conclusion is reinforced by the language in section 1905(c), which specifically excludes services in an institution for mental diseases or mental defects from the definition of intermediate care facility services. Furthermore, the definition of intermediate care facility services for the mentally retarded in section 1905(d) of the Act does not include services in an institution for mental diseases.

The DDABRA definition, as amended by Pub. L. 95-602, caused confusion about the kind of care covered under the ICF/MR benefit. Therefore, HCFA proposed amendments to 42 CFR 435.1009 (48 FR 7589, February 23, 1983) to set forth a new definition of "persons with related conditions". This definition combines many of the features of the 1975 developmental disability definition in the DDABRA with elements of the 1978 definition. In addition, this definition of "related conditions" was designed to:

(1) Be consistent with statutory provisions of the Medicaid program;

(2) Be independent of the DDABRA definition of developmental disability;

(3) Delineate specific diagnoses that for this purpose, we consider related to mental retardation; and

(4) Exclude mental illness.

Comments received on our February 1983 proposal and our responses to those comments are discussed in section III of this document.

II. Provisions of the Final Rules

These final regulations change our proposed language for the Medicaid definition of "persons with related conditions" by excluding autism and changing the word "or" to "and" in the description of a disability attributable to "any other condition" (§ 435.1009(a)(2) and paragraph (1)(b) below). An explanation of these changes is provided later in this preamble. Thus "persons with related conditions" is defined as persons who have a severe, chronic disability that meets all of the following conditions:

(1) The disability is attributable to—

(a) Cerebral palsy, epilepsy, or

(b) Any other condition, other than mental illness, found to be closely related to mental retardation because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of mentally retarded persons, and requires treatment or services similar to those required for these persons.

(2) It is manifested before the person reaches age 22.

(3) It is likely to continue indefinitely.

(4) It results in substantial functional limitations in three or more of the following areas of major life activity:

(a) Self-care.

(b) Understanding and use of language.

(c) Learning.

(d) Mobility.

(e) Self-direction.

(f) Capacity for independent living.

This definition combines some of the specific diagnoses from the 1975 amendments (cerebral palsy and epilepsy) with the requirement for functional limitations and other provisions contained in the 1978 amendment to the DDABRA. The new definition delineates diagnoses that are considered closely related to mental retardation, while indicating that these conditions must be severe enough to limit the individual's ability to function normally. By combining the major provisions of the two previous definitions, we avoid the vagueness and excessively broad scope of the 1978 approach and also provide a basis for distinguishing among individuals in the diagnostic categories in terms of functional disability.

This definition encompasses individuals with severe physical impairments associated with disorders such as spina bifida and muscular dystrophy, or those with multiple handicaps such as deaf-blindness or severe learning disabilities. Under this definition, individuals who are dually handicapped, that is, individuals who are mentally retarded or have a related condition and who are also mentally ill, and meet the other criteria in the definition, may be appropriately cared for in an ICF/MR. Finally, the provision on substantial functional impairments in three or more major life activities will facilitate application of the definition by reinforcing the concept that individuals with "related conditions" are chronically and substantially disabled by those conditions that have a significant impact on their ability to function normally in society.

III. Public Comments

Our proposed rule published on February 23, 1983 sought comments on the detailed provisions of the new definition. Approximately 60 comments were received from Members of Congress, State agencies, professional organizations, Medicaid providers and other interested individuals. The majority of comments received voiced opposition to the proposed regulations on the basis that the mentally ill should not be excluded from the definition. The remaining comments supported the proposed definition and requested clarifications of specific aspects of the regulation. All comments were considered in drafting this final regulation.

1. General Comments

Comment: Many respondents questioned the reason for the delay in correcting the error that resulted in the use of the current DDABRA definition of developmental disability under Medicaid.

Response: The potential for misunderstanding in this area was not immediately evident at the time, given the clear language in the statute concerning funding for institutions for mental diseases. Once the effect of the 1978 amendment to the DDABRA definition was assessed, HCFA began drafting a technical revision to correct the error. Upon consideration, we determined that a new definition of "persons with related conditions" was needed specifically for the Medicaid program and that public comment on such a definition was appropriate. Prior to publishing the proposed definition, HCFA met with representatives from the Administration on Developmental Disabilities and the National Institute for Mental Health to obtain advice on a Medicaid definition of "related conditions" and its relationship to Medicaid benefits for the mentally ill and programs under the aegis of the DDABRA. Careful consideration of the advice from these sources delayed issuance of the proposed regulation and the solicitation of public comment.

Comment: Two commenters indicated that the discussion in the preamble of the proposed rule did not adequately justify the reason for the new definition.

Response: We disagree and believe that sufficient justification for the definition was provided in the preamble of the NPRM. However, we have supplied additional explanation and discussion in this preamble.

Comment: A hospital program director stated that because 5 years have passed since the DDABRA definition of developmental disability changed, HCFA has set a precedent for covering the mentally ill under the ICF/MR provision and cannot exclude them now.

Response: As detailed earlier in this preamble under the background discussion, the Medicaid statute places specific limits on coverage of care of the mentally ill to specified age groups and certain institutions. The Department cannot override the statutory restrictions when issuing program regulations; thus, HCFA's action or inaction cannot change that authority. HCFA is issuing the new definition of "persons with related conditions" to avoid future misunderstandings.

Comment: Two commenters indicated that 30 days was an insufficient amount of time to research the effect of the proposed definition. Another respondent requested that the comment period be extended 60 days.

Response: Commenters had 30 days after publication of our proposal to submit their comments. We do not agree that additional time for extensive research was needed because, as we fully explained, these regulations reflect statutory intent. Additionally, States are currently implementing this provision.

Comment: One Congressman asked that we delay final action regarding the proposed definition until a policy and economic analysis can be conducted.

Response: A policy and economic analysis is conducted on all proposed regulations as required by section 1(b) of Executive Order 12291 and 5 U.S.C. 605(b). The results of the analysis were presented in the NPRM, and we believe additional analysis is not required.

2. Programmatic Effects of the Definition

Comment: The majority of commenters opposed the proposed regulations on the grounds that they will exclude mentally ill individuals from the definition of "persons with related conditions". They believe that this will result in the elimination of Medicaid coverage for children and adolescents who are emotionally disturbed or have other psychiatric conditions. One particular State had many respondents, including Members of Congress who were concerned that they would be unable to place or serve numerous children with chronic emotional/psychiatric disorders and that a significant amount of Federal funds would be lost upon adoption of the proposed definition.

Response: These comments reflect confusion about the settings for the services which Medicaid covers and the purpose of this rule. The term being defined, "persons with related conditions", is part of the Medicaid provision for intermediate care facility services for the mentally retarded and persons with related conditions (ICFs/MR) in section 1905(d) of the Act. As discussed earlier, coverage for inpatient psychiatric care for individuals under 21 is provided for under a separate provision. For this reason, we proposed to clarify this definition of "persons with related conditions" to prevent any confusion.

Comment: Two representatives from a private non-profit provider of residential and other services to mentally retarded and emotionally disturbed persons commented that emotionally disturbed individuals have substantial limitations in major life activities and benefit from training and habilitation programs. They added that these individuals are not in need of hospital or skilled nursing care, but rather ICF/MR services.

Response: We agree that emotionally disabled persons can benefit from individually developed care plans but do not support the contention that emotionally disturbed individuals, who may have average or above average intelligence, generally should be placed in facilities which are designed for mentally retarded persons. Emotionally disturbed individuals who need institutionalization are usually best treated in a licensed psychiatric facility at the level of care (i.e. hospital, SNF or ICF) appropriate to their illness, rather than in a facility designed primarily for the care of mentally retarded persons. Also it is clear from the statutory limitations on funding of services in institutions for mental diseases, that Congress did not intend that services provided in those institutions be funded under the ICF/MR coverage provision.

Comment: Two respondents stated that the proposed definition discriminates against the mentally ill as a class while including individuals with cerebral palsy, epilepsy, autism, spina bifida, muscular dystrophy, deaf-blindness and severe learning disabilities.

Response: We do not believe that the proposed definition is discriminatory. Rather, as mentioned earlier, the Department cannot override statutory limitations. We think that this definition accurately implements statutory provisions (such as the definition of intermediate care facility services for the mentally retarded in section 1905(d) of the Act) and encourages treatment in appropriate settings. We chose to list two specific conditions as examples of "related conditions". It is important to note that this provision is applicable only to the definition of "intermediate care facility services for the mentally retarded or persons with related conditions" also defined in 42 CFR 435.1009 and 440.150(c). And, as discussed earlier, ICF/MR services may not include treatment of individuals who have a condition of mental illness only.

Comment: One official from a State human services department asserted that the proposed definition would reduce the number of individuals eligible to receive home and community-based services since they have already included the emotionally disturbed individuals being served by their ICFs/MR under a home and community-based waiver. Therefore, the commenter asserts that we are violating the intent of section 2176 of Pub. L. 97-35 (the Omnibus Budget Reconciliation Act of 1981).

Response: Section 2176 enacted section 1915(c) of the Act. The intent of Section 2176 is to offer home and community-based services as an alternative to nursing home care which otherwise would have been reimbursed under the State Medicaid Plan. The new

definition of "persons with related conditions" will not interfere with a State's option to seek approval of a waiver to provide home and community-based services for the mentally retarded or persons with related conditions, or the mentally ill if they otherwise would have required ICF or SNF level of care and the Medicaid program properly would have paid for that care. Regulations implementing Section 1915(c) are set forth in 42 CFR Part 441, Subpart G.

Comment: Several respondents questioned the effect of the new definition on an individual who has been determined to be mentally ill and has a "related condition" such as cerebral palsy.

Response: This question concerns the status of dually handicapped persons and the purpose of the regulations. Individuals who are mentally retarded or have a "related condition," as indicated in the definition, and are also mentally ill, may be appropriately served in an ICF/MR when it is determined, in individual cases, that care provided in a psychiatric facility is unnecessary or inappropriate. However, as discussed earlier, a facility designed primarily to serve mentally ill persons is not appropriately classified as a Medicaid ICF/MR.

Comment: One commenter questioned the effect of the definition on the ICF/MR service population. Specifically, the commenter questioned whether the definition would expand Medicaid ICF/MR coverage to a category of individuals neither intellectually nor behaviorally impaired but who need similar services.

Response: Although our initial intent was to avoid excluding any category of individuals that might appropriately be cared for in ICFs/MR, this commenter has indicated some confusion may result from this part of the definition and thus we have changed the wording in 42 CFR 435.1009(a)(2). We believe that all conditions which would be appropriate for ICFs/MR will be covered in the revised language. Section 435.1009(a)(2) now reads as follows: ". . . Any other condition, other than mental illness, found to be closely related to mental retardation because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of mentally retarded persons, and requires treatment or services similar to those required for these persons."

3. Financial and Administrative Effects of the Definition

Comment: Two respondents concluded that the proposed definition would result in increased costs to Medicaid because many emotionally disturbed children and adolescents would be placed in psychiatric hospitals which are more restrictive and expensive than ICFs/MR.

Response: The Medicaid inpatient benefit for children with chronic emotional/psychiatric disorders is specified in current regulations at 42 CFR Part 441, Subpart D. Since this optional benefit may be provided in various levels of psychiatric facilities accredited by the Joint Commission on Accreditation of Hospitals (JCAH), costs need not be increased.

Comment: Two commenters questioned whether HCFA has considered the financial impact of changing the definition on States which are planning to or have already implemented the 1978 definition.

Response: Based on information obtained through HCFA regional offices, only one State changed its Medicaid program to adopt the 1978 definition. As discussed in response to the previous comment, this definition of "persons with related conditions" will facilitate more appropriate placement of individuals in need of inpatient services.

Comment: One State cited the lack of a HCFA definition for mental retardation and the possible conflict with various States using different professionally developed definitions. One commenter stated that most professionally developed definitions of mental retardation require the presence of significant impairments in both intellectual functioning and adaptive behavior and suggested that HCFA's definition of persons with related conditions should be consistent with this requirement.

Response: We are reviewing the state-of-the-art in the field of developmental disabilities in relation to defining mental retardation. If we find that it is warranted, we will publish such a proposed definition for comment in a notice of proposed rulemaking. For purposes of defining "persons with related conditions", we believe that the requirement of a significant impairment in both intellectual functioning and adaptive behavior would be too restrictive because the related condition may not affect the individual's intellectual ability.

Comment: Two commenters questioned how HCFA will ensure compliance with the new definition generally, and also under approved Medicaid waivers for home and community-based services.

Response: Although the administration of all aspects of a State's Medicaid plan is the responsibility of the State's Medicaid agency, enforcement of this definition is the responsibility of each State's survey agency in the first instance. The survey agency is responsible for determining whether the facilities under its purview are appropriately certified. Once the facility is correctly certified, on-going reviews are conducted by the State's Medicaid agency to ascertain medical and treatment needs for the disabled individuals being served by these facilities.

In addition, as changes in the statutes, regulations, policies or procedures occur, each HCFA regional office is given specific instruction by HCFA central office for monitoring State implementation of such changes. These instructions are transmitted on an annual basis through State Assessment Target Review Guides. In this instance once the final regulation is issued, monitoring State implementation of the new definition will become part of the target areas for review of the State assessment process. With regard to Medicaid waivers for home and community-based services (under section 1915(c) of the Act), HCFA regional offices have special instructions for monitoring States' implementation and proper operation of home and community-based services programs through the annual State assessment process.

4. Provisions of the New Definition

Comment: The National Mental Health Association stated that it is a serious regression to emphasize specific diagnoses over functional limitations. They believe this practice is contrary to good judgment and ignores the findings of the House Conference Report (No. 95-1780) recommendations which preceded the 1978 DDABRA amendments.

Response: The House Conference Report addressed the disability amendments, not the Medicaid program; however, the new definition incorporates those functional limitations contained in the current DDABRA definition that are appropriate for the Medicaid program. The two specific diagnoses merely present examples of conditions which we believe are similar to mental retardation.

Comment: One respondent suggested that inserting "mental or physical" *before* the first "other" at the beginning of the sentence, would strengthen the meaning of the regulation text at 42 CFR 435.1009(a)(2) which reads ". . . Any other condition, other than mental illness, found to be closely related to mental retardation . . . ."

Response: We do not agree and have not adopted this suggestion. We do not believe that this addition would strengthen the statement but rather would create additional confusion. The reason for the exclusion of mental illness from this definition is the statutory restriction related to payment for services in institutions for mental diseases. There is no comparable restriction relating to other types of illnesses.

Comment: One hospital program director asserted that including individuals with autism, which is categorized as a mental illness, directly conflicts with the decision to exclude other mental illnesses from the definition.

Response: We had planned to continue to include autism as a related condition because it has been specifically identified in the developmental disability definition since the 1975 amendments. Since it is classified as a mental illness, however, we have deleted this specific diagnosis from the final regulations. Despite this approach, many autistic individuals are functionally retarded and may require the services provided by an ICF/MR to treat them. These individuals may continue to be cared for in this setting since such care is appropriate for them.

Comment: The National Mental Health Association indicated that economic self-sufficiency should be included as a criterion because it is a substantial functional limitation and should be one of the factors in determining those individuals who may need and should be eligible for care in ICFs/MR.

Response: Although both programs are geared toward providing services which assist an individual in reaching the maximum level of functioning, the Medicaid definition of persons with related conditions is applicable only to the services provided by an ICF/MR whereas the DDABRA and its definition of developmental disabilities is applicable to a host of other categories of service such as education, vocational rehabilitation, and alternative community living arrangements, in which economic sufficiency is generally an integral part of the service system. Based on the need for which an ICF/MR is designed (health-related care in an institutional setting), we do not believe economic self-sufficiency is an appropriate criterion for defining ICF/MR services. Moreover, all Medicaid recipients have, by definition, economic difficulties that make them unable to meet their medical costs without assistance.

IV. Impact Analysis

We have determined that this final rule does not meet the criteria for a major rule as defined by section 1(b) of Executive Order 12291. That is, this rule would not have an annual effect on the economy of $100 million or more; or result in a major increase in costs or prices for consumers, government agencies, industry, or a geographic region; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

This final rule corrects a regulation drafting error which unintentionally appeared to cross-reference the 1978 DDABRA definition of developmental disability for use in defining persons with related conditions. The new definition of this term reflects in regulations the policies States now generally follow in connection with ICF/MR benefits. The rule will, therefore, have little, if any, fiscal impact on program operations and does not meet the criteria for a major rule under Executive Order 12291.

For these reasons, the Secretary also certifies, pursuant to section 605(b) of title 5, United States Code, enacted by the Regulatory Flexibility Act (Pub. L. 96-354) that the regulations will not have a significant economic impact on a substantial number of small entities.

Recordkeeping and Reporting Requirements

This final rule does not contain information collection requirements. Therefore, a review by the Office of Management and Budget (OMB) as specified under section 3504(h) of the Paperwork Reduction Act of 1980 is not necessary.

List of Subjects in 42 CFR Part 435

Aid to families with dependent children, Grant programs—health, Medicaid, Supplemental Security Income (SSI).

PART 435—ELIGIBILITY IN THE STATES, DISTRICT OF COLUMBIA AND THE NORTHERN MARIANA ISLANDS

42 CFR Part 435 is amended as set forth below:

The authority citation for Part 435 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

Section 435.1009 is amended by revising the definition of "Persons with related conditions" to read as follows:

§ 435.1009 Definitions relating to institutional status.

* * * * *

"Persons with related conditions" means individuals who have a severe, chronic disability that meets all of the following conditions:

(a) It is attributable to—

(1) Cerebral palsy or epilepsy; or

(2) Any other condition, other than mental illness, found to be closely related to mental retardation because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of mentally retarded persons, and requires treatment or services similar to those required for these persons.

(b) It is manifested before the person reaches age 22.

(c) It is likely to continue indefinitely.

(d) It results in substantial functional limitations in three or more of the following areas of major life activity:

(1) Self-care.

(2) Understanding and use of language.

(3) Learning.

(4) Mobility.

(5) Self-direction.

(6) Capacity for independent living.

BILLING CODE 4120-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

Final Flood Elevation Determinations; California et al.

AGENCY: Federal Emergency Management Agency

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are determined for the communities listed below.

The base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or

show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: John L. Matticks, Acting Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the Federal Register for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 USC 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The modified base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. Any appeals of the proposed base flood elevations which were received have been resolved by the Agency.

BILLING CODE 6718-03-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

[Docket No. 60590-6090]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule.

SUMMARY: The Secretary of Commerce (Secretary) has determined that an emergency exists in the groundfish fisheries in the Gulf of Alaska, because (1) the best available biological and socioeconomic information indicates that the current optimum yields (OYs) for five species need modification and (2) Pacific ocean perch (POP), and "other rockfish" are fully utilized by U.S. fish processors, preventing allocations for bycatch under existing rules. The Secretary, therefore, (1) amends the currently incorrect OYs, including the OY for the "other species" category as required by formula under the fishery management plan, and (2) establishes prohibited species catch (PSC) limits for "other rockfish" and POP in joint venture and foreign fisheries and also for sablefish in foreign fisheries. The amended OYs are necessary to prevent biological and socioeconomic harm, which could otherwise occur if harvests were to occur at the current OY levels. The PSC limits are necessary to minimize the incidental catch of species fully utilized by U.S. fish processors and to avoid underutilization of large amounts of target groundfish species that would otherwise occur if joint venture or foreign fisheries were prohibited. These actions are intended as conservation measures that respond to the best available biological and socioeconomic information on the status of the groundfish fishery, while providing for full development and utilization of the existing Gulf of Alaska groundfish resources.

DATES: In § 611.92, paragraphs (b)(2), (c)(2)(i)(A) and (D), (c)(2)(ii)(A), (B) and (C), (e)(3)(ii), and (f)(2)(i) are suspended from May 22, 1986 until August 20, 1986. In § 611.92, new paragraphs (b)(5), (c)(2)(i)(F), (G), and (H), (c)(2)(ii)(D), (E), and (F), and (i) are added; in § 672.20(a) Table 1 is revised and a new paragraph

BEST COPY AVAILABLE

(a)(4) is added; and a new § 672.21 is added, to be effective from May 22, 1986, until August 20, 1986.

ADDRESS: The environmental assessment prepared for this emergency rule may be obtained from Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Biologist, NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION:

Background

Adjustments in Optimum Yields

The domestic and foreign groundfish fishery in the fishery conservation zone (3–200 miles offshore) of the Gulf of Alaska is managed under the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). The FMP was developed by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations appearing at 50 CFR 611.93 and Part 672.

Regulations implementing the FMP establish OYs for each groundfish category and apportion them among domestic annual processing (DAP), joint venture processing (JVP), reserves, and total allowable level of foreign fishing (TALFF). Under § 611.93(c)(1) and § 672.20, initial apportionments of the OYs specified for the groundfish species listed in § 672.20, Table 1, are published by the Secretary by January 1 of each year. The Secretary published interim initial apportionments for the 1986 fishing year (51 FR 958, January 9, 1986) with a request for public comments; no comments were received.

The interim initial apportionments were based on outdated 1985 OYs, some of which conflict with the most recent best available information. The Council, at its December 10–14, 1985, meeting, recommended that OYs for certain species—pollock, Pacific cod, flounder, POP, and sablefish—be adjusted. The Council made these recommendations after considering reports from the Gulf of Alaska Plan Team (Team), the Council's Scientific and Statistical Committee (SSC) and Advisory Panel, and testimony from the public. However, under the FMP, OYs can only be changed by an amendment to the FMP. Based on the following information and rationale, the Secretary is amending the OYs of certain groundfish species, listed below in Table I, by emergency interim rule. Both the new OYs and the current 1985 OYs are included in Table I for comparison.

Apportionments of these OYs that were recommended by the Council at its December meeting have been approved by the Secretary and are provided at § 672.20(a), Table 1. Biological information considered by the Council when it recommended adjustments to OYs is summarized from the environmental assessment prepared for this emergency interim rule as follows:

Pollock—The pollock biomass in the Western/Central Regulatory Area of the Gulf of Alaska is projected to decline to about 439,000 metric tons (mt) for 1986, well below the recommended threshold level (the level below which strong year classes will not be produced) of 600,000 to 700,000 mt. This projection is based on results of the 1985 hydroacoustic survey in Shelikof Strait, which suggests that abundance has declined from a high of 2,770,000 mt in 1981 to 700,000 mt in 1985. The 1985 biomass is a 62 percent decline from the 1984 biomass estimate of 1,848,000 mt. Contradicting the projection, however, is the trend in catch per unit of effort experienced by the 1985 joint venture fishery and the results of the 1984 triennial bottom trawl survey. This survey indicated a biomass of 1.2 million mt, consisting of age 3 fish and older. Thus, the difference between the 1985 hydroacoustic survey and the 1984 bottom trawl survey is 500,000 mt. No ready explanation exists to account for this large difference, although the hydroacoustic survey is known not to detect about 7–14 percent of the fish within two fathoms of the bottom. If the 1984 biomass estimate is more nearly correct, then hydroacoustic surveys underestimate biomass.

The Council's SSC recommended that the OY should be set at 100,000 mt. The Council accepted the SSC's recommendations and adopted a 1986 OY in the Western/Central area of 100,000 mt (Table I). The OY in the Eastern area of 16,000 mt is unchanged.

TABLE I.—CURRENT (1985) AND NEW (1986) OPTIMUM YIELDS (METRIC TONS) FOR POLLOCK, PACIFIC COD, FLOUNDER, PACIFIC OCEAN PERCH, SABLEFISH, AND "OTHER" SPECIES IN THE REGULATION AREAS AND DISTRICTS OF THE GULF OF ALASKA

Species	Area/district	Current	New
Pollock	Western/Central	305,000	100,000
	Eastern	16,850	16,850
Pacific cod	Western	19,590	25,951
	Central	23,543	39,648
	Eastern	9,900	12,999
Flounder	Western	10,400	5,200
	Central	14,700	5,000
	Eastern	8,400	4,030
Pacific ocean perch	Western	1,302	1,316
	Central	3,906	1,511
	Eastern	675	675
Sablefish	Western	1,670	2,850
	Central	3,060	5,150
	West Yakutat	1,080	2,560
	East Yakutat	850-1,135	1,104
	S.E. Outside	470-1,436	2,346
Other species	Gulf-wide	22,460	12,186

Pacific cod—The acceptable biological catch (ABC) is estimated to be 136,600 mt in all areas. In previous years, the OY has been set lower than the ABC to prevent excessive incidental catches of Pacific halibut. The Council recommended a 1986 OY to 75,950 mt distributed among the regulatory areas in proportion to the biomass in each area as follows: Western—25,951 mt, Central—39,049 mt, and Eastern—12,000 mt.

Flounder—The ABC is estimated to be equal to the maximum sustained yield (MSY) of 141,000 mt, because the stocks are in good condition due to high biomass and relatively low exploitation rates. In previous years, the OY has been set at 50 percent of the ABC to prevent excessive incidental catches of Pacific halibut. For 1986, the Council again recommended that the 1986 OY be substantially reduced to control the incidental catch of Pacific halibut. The Council recommended a 1986 OY of 14,380 mt distributed among the regulatory areas in proportion to the biomass in each area as follows: Western—5,300 mt, Central—5,000 mt, and Eastern—4,030 mt.

Pacific ocean perch—The condition of POP *(Sebastes alutus)* remains depressed. To protect this species, the Team recommended that the 1986 ABC for the Pacific ocean perch complex, which is composed of five species, be set equal to the ABC for *S. alutus* only, or 8,500 mt Gulf-wide, to be apportioned among the management areas according to biomas distribution. In order to promote rebuilding, however, the Council recommended a 1986 OY of 3,702 mt Gulf-wide. It recommended an OY in the Western area of 1,316 mt, which is a minor change from the current OY of 1,302 mt. However, it recommended a 1986 OY in the Central area of 1,511 mt, which is a substantial reduction from the current OY of 3,906 mt. It recommended no changes in the OY in the Eastern area, which is currently 675 mt.

Sablefish—The Team estimated the sablefish ABC to be 18,800 mt, which is the midpoint between the low end (12,820 mt for 1982–1985) and the high end (25,000 mt) of the ABC range. The biomass in the Gulf of Alaska is estimated to be 537,000 mt. A large portion of this biomass is attributed to a large 1980 or 1981 year class. The Council recommended a Gulf-wide 1986 OY of 15,000 mt be distributed among the management areas as follows: Western—2,850 mt, Central—6,150 mt, West Yakutat—2,560 mt; East Yakutat—1,104 mt; and Southeast Outside—2,346 mt. This new OY is a substantial increase over the current 1985 Gulf-wide OY of 8,890 mt, reflecting a significant

BEST COPY AVAILABLE

improvement in the condition of sablefish stocks.

Other species—FMP procedures specify that OYs for this group be set at 5 percent of the sum of OYs established for the designated species categories. On the basis of the sum of the 1986 OYs recommended by the Council, the 1986 OY for "other species" would be 12,186 mt.

Findings of the Secretary

The Secretary has reviewed the biological data pertaining to the above species and has determined that the potential adverse effects on the biological condition of some stocks and the negative economic effects of underutilizing other stocks constitute an emergency within the meaning of section 305(e) of the Magnuson Act. Therefore, the Secretary, by this emergency rule, is adjusting the OYs for these species. The Secretary's specific findings for each species follow:

Pollock—the status of pollock stocks indicates that fishing at the current OY level of 305,000 mt in the Western/Central Regulatory Area, which is three times higher than the recommended 1986 OY, could harm the pollock stocks and possibly result in overfishing. Overfishing is considered to be the level of fishing mortality that jeopardizes the capacity of a stock to recover to a level at which it can produce maximum biological yield or economic value on a long-term basis under prevailing environmental conditions (see Guidelines for Fishery Management Plans, 48 FR 7402, February 18, 1983).

Pacific cod—The status of Pacific cod indicates that substantial amounts of fish are available for harvest. If fishermen were constrained by the current OY of 60,000 mt instead of the recommended 1986 OY of 75,000 mt, they could suffer unnecessary economic harm. At 1985 prices of $163 to $454 per metric ton paid to fishermen for Pacific cod, the difference of 15,000 mt could mean a loss of gross revenue of between $2,445,000 and $6,810,000, assuming independent price effects.

Flounders—Although the condition of flounders is good, fishing at the current OY of 33,500 mt instead of the recommended 1986 OY of 14,550 mt could result in unacceptable bycatchs of juvenile and adult Pacific halibut. Since Pacific halibut are of great commercial importance to the domestic hook-and-line industry, unacceptable economic harm could result to this industry. The recommended 1986 OY for flounders represents the projected potential harvest by domestic fishermen based on NMFS industry surveys and public testimony. Therefore, domestic fishermen ought not to be adversely affected even though the 1986 OY is reduced 57 percent from its 1985 level.

Pacific ocean perch—The condition of POP *(S. alutus)* remains depressed. Fishing at the current OY of 5,206 mt for the species complex instead of 2,827 mt in the Western and Central Regulatory Areas would jeopardize the rebuilding of POP stocks intended by the Council. The OY in the Eastern area of 875 mt is unchanged.

Sablefish—The condition of sablefish indicates that substantially increased amounts are available for harvest in 1986. If fishermen were constrained by the current OY of 8,890 mt instead of the new OY of 15,000 mt, they would suffer unnecessary economic harm. Under Amendment 14 to the FMP (50 FR 43193, October 24, 1985), the sablefish OYs are allocated to certain legal gear types, as follows: hook-and-line gear—55 percent in the Western and Central areas, 95 percent in the Eastern area; trawl gear—20 percent in the Western and Central areas, 5 percent in the Eastern areas; and pot gear—25 percent in the Western and Central areas, none in the Eastern area. Allocations for all areas based on the current OYs (the percent for the gear times the OY for the area) would be as follows: hook-and-line gear—6,638 mt; trawl gear—1,159 mt; and pot gear—1,183 mt. Allocations for all areas based on the new OY amounts recommended by the Council (Table I) are as follows: hook-and-line gear—10,650 mt; trawl gear—2,100 mt; and pot gear—2,250 mt. Hence, the differences between the current and new OY allocations for hook-and-line gear, trawl gear, and pot gear are 4,012 mt, 941 mt, and 1,067 mt, respectively. At 1985 prices of $1,278 per metric ton paid to fishermen for sablefish, the gross revenue that could be foregone by gear type could be as follows, assuming independent price effects: hook-and-line gear—$5,127,336; trawl gear—$1,202,598; and pot gear—$1,363,635.

Prohibited Species Catch Limits

The Secretary has determined that three species will be fully utilized by U.S. fish processors in 1986: sablefish, POP, and "other rockfish", as defined in § 672.2. His determination is based on (1) a NMFS-conducted survey of the U.S. fishing industry's intent to harvest and process these species, and (2) comments received by the Council at its December 1985 meeting. Hence, the DAP specification for each of these species is equal to its OY.

Under the Magnuson Act sections 201(d)(2) and 204(b)(6)(B)(ii), species harvested by U.S. fishermen that will be fully utilized by domestic processors may not be allocated for harvest in joint venture or foreign fisheries. Any taking of these species that would exceed their OYs would be inconsistent with the provisions of the FMP, which provide only that total fishing mortality of any groundfish species must not exceed the specified OY for any species category. Hence, no joint venture or foreign fishery could be allowed without accounting for the bycatch mortality of these species.

Mortality of these species as a result of being caught during joint venture operations could be accounted for without this emergency rule, because the Secretary could count any catches of these species againt DAP. A U.S. vessel engaged in joint ventures may still deliver its catch of sablefish, POP, and "other rockfish" for sale as DAP unless the OY for these species has been reached. As a practical matter, such vessels are not likely to return to port to make these deliveries. They would just discard their catches at sea. These discards would still be counted against DAP, with no profit accruing to fishermen who land their catches in U.S. ports and who could otherwise have targeted on them. This emergency rule will allow POP and "other rockfish" to be discarded at sea after being delivered to, and sorted on, foreign processors; they will then be counted against the PSC limit, not the OY. Under § 611.11, catches of a prohibited species must be sorted promptly and returned to the sea with a minimum of injury, regardless of condition, after recording and allowing for sampling by an observer. U.S. vessels, however, are encouraged to land their catches of POP or "other rockfish" when practicable to minimize wastage that would otherwise occur when these fish are discarded at sea.

Foreign catches of any species for which DAP is equal to the OY, however, cannot be counted against DAP and, thus, no foreign fishery in the Gulf of Alaska could be allowed without an amendment to the FMP or an emergency rule that would also authorize treating these species as prohibited species under § 611.11. Establishing PSC limits by this emergency rule means that such species, when taken as bycatch in the foreign fisheries, can be treated as prohibited species under § 611.11 as discussed above.

The Secretary, through this emergency rule, is establishing PSC limits for POP and "other rockfish" that apply to joint venture fisheries; he also is establishing PSC limits for sablefish, POP, and "other rockfish" that apply to foreign fisheries (Table II). He is doing so on the basis of data pertaining to (1) bycatches of POP

and "other rockfish" by joint venture operations in 1985 and (2) bycatches of sablefish, POP, and "other rockfish" by the Japanese hook-and-line fleet during February through April 1986 when it was targeting on Pacific cod. He has also considered the best available information on the status of these species, and the need to promote an orderly fishery by providing adequate PSC amounts of these species.

TABLE 2.—ACCEPTABLE BIOLOGICAL CATCHES (ABCs), OPTIMUM YIELDS (OYs), AND PROHIBITED SPECIES CATCH (PSC) LIMITS IN THE JOINT VENTURE (JVP) AND FOREIGN (TALFF) FISHERIES FOR SABLEFISH, PACIFIC OCEAN PERCH, AND "OTHER ROCKFISH" IN THE WESTERN AND CENTRAL REGULATORY AREAS OF THE GULF OF ALASKA (FIGURES ARE IN METRIC TONS).

	ABC	OY	PSC	
			JVP	TALFF
Sablefish:				
Western	2,000	2,000	N/A	30
Central	6,150	6,150	N/A	0
Pacific Ocean Perch:				
Western	2,000	1,216	200	10
Central	3,380	1,516	35	15
Other Rockfish:				
Gulf-wide	(1)	4,800	50	3

[1] Unknown.

The Secretary has determined that these PSCs, when added to the OYs of sablefish, POP, and other rockfish, will not result in overfishing of these species. These PSC levels will promote an orderly joint venture fishery without imposing a burden on domestic fishermen. They will allow vessels of Japan to harvest their Pacific cod allocations as long as their incidental catch of species that are fully utilized by the U.S. industry remains below the PSC limit.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary to respond to an emergency situation and that it is consistent with the Magnuson Act and other applicable law. The new OYs implemented by this rule are based on the best available information that takes into account the biomasses determined by 1985 trawl and hydroacoustic surveys. Pollock stocks could be overfished and the Council's intended rebuilding of POP stocks could be jeopardized should fishing be allowed to proceed to the 1985 OY level. Establishing PSCs by this action will prevent overfishing while avoiding the disruption in foreign fishing and wastage of groundfish that would otherwise occur.

The Assistant Administrator also finds that beginning and ending the foreign hook-and-line fishery as early as possible in 1986 is desirable because fewer sablefish, POP, and "other rockfish" are caught early in the year. It will constrain joint venture fisheries to bycatches only of POP and rockfish, thus allowing U.S. fishermen delivering to U.S. fish processors to fully utilize OYs for these species.

The Assistant Administrator finds that promulgation of this rule on an emergency basis for the reasons given below make it impracticable and contrary to the public interest to provide notice and a prior opportunity for public comment, or to delay the effective date of this rule for 30 days, as required by section 553 (b) and (d) of the Administrative Procedure Act. Early implementation of the rule is desirable, because it conveys a benefit to the fishing industry which has a need to base its planning operations on the best available information. Immediate issuance of this emergency rule is needed to avoid disruption of Japanese hook-and-line fisheries for Pacific cod that traditionally occur early in the year when low incidental catches of sablefish, POP, and "other rockfish" are experienced. The Assistant Administrator recognizes that the public has had opportunity to comment on the OY changes at the Council's December 1985 meeting when this subject was discussed during public hearings. Foreign nations may find that a lengthy delay in their directed fishing operations would cause them to forego all fishing in the Gulf of Alaska for the remainder of 1986, which would jeopardize joint venture agreements. Such a delay could also jeopardize purchasing agreements by foreign nations to buy U.S.-processed products if foreign nations ceased fishing operations. Severe socioeconomic harm could be incurred by both the domestic and foreign fishing industries by providing a prior comment period or a delayed effectiveness period.

The Regional Director prepared an environmental assessment (EA) for this action and concluded that no significant impact on the human environment will result from its implementation. The OY adjustments are based on the best available information on the status of the stocks. The PSC limits are based on recent catch rates experienced by joint venture and foreign fisheries and on reevaluations of ABCs for each species. Copies of the EA are available at the address above.

This emergency rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that order. This rule is being reported to the Director of the Office of Management and Budget, with an explanation of why following the procedures of that order is not possible.

The Assistant Administrator has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of the State of Alaska. This determination has been submitted for review by Alaska's Office of Management and Budget under section 307 of the Coastal Zone Management Act.

The Regulatory Flexibility Act does not apply to this rule because, as an emergency rule, it was not required to be promulgated as a proposed rule and the rule is issued without opportunity for prior public comment. Since notice and opportunity for comment are not required to be given under section 553 of the Administrative Procedure Act, and since no other law requires that notice and opportunity for comment be given for this rule, under sections 603(a) and 604(a) of the Regulatory Flexibility Act no initial or final regulatory flexibility analysis has to be or will be prepared.

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

List of Subjects in 50 CFR Parts 611 and 672

Fisheries, Reporting and recordkeeping requirements.

Dated: May 22, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set out in the preamble, Parts 611 and 672 are amended as follows:

PART 611—[AMENDED]

1. The authority citation for Part 611 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In 611.92, paragraphs (b)(2); (c)(2)(i)(A) and (D); (c)(2)(ii)(A), (B) and (C); (e)(3)(ii); and (f)(2)(i) are suspended from May 22, 1986, until August 20, 1986. New paragraphs (b)(5); (c)(2)(i)(F), (G), and (H); (c)(2)(ii)(D), (E), and (F); and (i) are added, effective from May 22, 1986 until August 20, 1986, to read as follows:

§ 611.92 Gulf of Alaska groundfish fishery.

* * * * *

(b) * * *

(5) "Target species" are the species that are commercially important and are

generally targeted on by the foreign groundfish fishery. They include pollock, Pacific cod, flounders, Pacific ocean perch, other rockfish, sablefish, Atka mackerel, squid, and thornyhead rockfish. Sufficient data on each species or species group exist for it to be managed separately from the others. Records of the catch of each target species or species group must be kept. Pacific ocean perch, "other rockfish", and sablefish are prohibited to foreign vessels, and must be treated in accordance with § 611.11 and paragraph (i) of this section.

(c) * * *

(2) * * *

(i) * * *

(F) When a nation's foreign fishing vessels using hook-and-line gear have taken their applicable share of a prohibited species provided for by paragraph (i) of this section for sablefish, Pacific ocean perch, or other rockfish, or their allocation of Pacific cod is reached, fishing by that nation is prohibited in that regulatory area.

(G) When foreign fishing vessels of a nation have caught the amount of the allocation of that nation for any groundfish species or species group in any regulatory area, fishing for groundfish using other than hook-and-line gear in that regulatory area by vessels of that nation is prohibited, even if allocations of other species for that nation in the regulatory area have not been reached or the nation has not received a notice issued under § 611.13(c) prohibiting fishing by vessels of that nation in that regulatory area.

(H) When the area allocation of any groundfish species or species group other than Pacific cod is reached, unless the fishery is closed under other provisions of this section, any subsequent catch of that species in that area by vessels fishing with hook-and-line gear will be considered catch of a prohibited species and treated in accordance with the provisions of § 611.11. Catches of those species or species groups in the target and "other species" categories that become prohibited species must be recorded and reported as required by § 611.9.

(ii) * * *

(D) TALFF for any groundfish species, species group, or category in a regulatory area or district: the Secretary will issue a notice prohibiting through December 31 fishing using trawl gear for groundfish in that regulatory area or district, except that if the TALFF for Pacific cod in a regulatory area or district will be reached, the Secretary will prohibit fishing for groundfish in that regulatory area or district by all vessels subject to this section.

(E) The allocation of a nation for any groundfish species, species group, or species category in a regulatory area or district: the Secretary will issue a notice prohibiting through December 31 in that regulatory area of district, fishing using trawl gear for groundfish by vessels of that nation and retention of that species, species group, or species category by vessels of that nation using hook-and-line gear. However, if a national allocation for Pacific cod in a regulatory area of district will be reached, the Secretary will prohibit fishing for groundfish in that regulatory area or district by all vessels of that nation through December 31.

(F) The prohibited species share of a nation for sablefish, Pacific ocean perch, or rockfish in a regulatory area: the Secretary will issue a notice prohibiting through December 31 further fishing by vessels of that nation in that regulatory area.

(i) Prohibited species catch limits. When during any fishing year the hook-and-line vessels of a nation have taken incidentally that nation's current share of the PSC for sablefish, Pacific ocean perch, or other rockfish in a regulatory area as determined from § 672.21 of this chapter, the entire regulatory area will be closed to hook-and-line fishing by vessels of that nation for the remainder of the fishing year.

PART 672—[AMENDED]

3. The authority citation for Part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In Part 672, in the table of contents, a new section is added, to read as follows:

* * * * *

Sec.

672.21 Catch limitations.

* * * * *

5. In § 672.20, Table 1 at paragraph (a) is amended and paragraph (a)(4) is added, to read as follows:

§ 672.20 Optimum yield.

(a) * * *

50 CFR Part 641

[Docket No. 51191-6067]

Reef Fish Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues this final rule to amend the implementing regulations for the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). Persons fishing from headboats were exempted from the minimum size limit and incidental catch allowance for red snapper until May 8, 1986. This rule extends the exemption period one year until May 8, 1987, and makes minor word changes in the effort limitations section. The intent of the rule is to provide additional time to conduct survival studies for undersized red snapper and to evaluate the economics of these measures.

EFFECTIVE DATES: Section 641.23(b)(2) is effective from May 8, 1986, through May 8, 1987. Section 641.25 is effective May 8, 1986.

ADDRESS: A copy of the combined final regulatory flexibility analysis/regulatory impact review for the regulation implementing the FMP may be obtained from Donald W. Geagan, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813-893-3722.

SUPPLEMENTARY INFORMATION: The FMP was approved June 3, 1984 and implemented on October 9, 1984 (49 FR 39553). The implementing rule contained an exemption from the minimum size limit and incidental catch allowance for undersized red snapper for persons fishing from headboats until May 8, 1986. Proposed rules to extend the headboat exemption were published on February 18, 1986 (51 FR 5748). Comments on the proposed rule were invited through March 20, 1986. A complete discussion of the reasons for the extension of the minimum size limit for the headboat fishery is found in the proposed rule and is not repeated here.

Twelve written responses were received during the comment period. Three of these responses, one from a headboat business and one from the Texas Parks and Wildlife Department, fully supported the one year extension of the exemption. The Gulf of Mexico Fishery Management Council (Council), originator of the FMP, requested an additional 6-month deferral to the proposed one year deferral (until November 8, 1987) because of a time-lag in obtaining data needed to update reef fish stock assessments.

Nine responses objected to extending the deferral for headboats and came from charter boat operators, private boat recreational fishermen, the Galveston Chapter of Gulf Coast Conservation Association, the Florida Marine Fisheries Commission, a commercial dealer, and a fish trap manufacturing company. Two common remarks woven into all of the objections were that any continuation of the deferral for headboats was unfair to the other sectors of the fishery that are currently regulated by the size limit and incidental catch allowance for red snapper, and the reliance of headboats on catches of small red snapper is evidence that this sector is perpetrating extensive damage to an already overfished resource.

The 18-month exemption for headboats was initially authorized because of the number of small red snapper taken and the lack of data that would allow specification of economic impacts on the headboats sector of the fishery, coupled with the uncertainty of the survival of the undersized fish that would have to be released by headboat passengers. Other sectors of the fishery were not exempted from the size limit because they had greater flexibility in shifting effort to areas where larger fish were available, or because their fishing activities were conducted in shallower waters where survival rates of released undersized fish were expected to be reasonably high.

When the regulations for the FMP were implemented there was a limited amount of evidence that an acceptable number of hooked and released red snapper would survive, but most data was indirect evidence based upon mark-recapture studies. During the 18-month period of deferral (October 1984–April 1986) additional studies were conducted by NMFS to try to determine survival rates of fish hooked at various depths and released at the surface. Results to date have not been conclusive as to the survival rates for undersize (less than 12 inches fork length) red snapper in waters greater than 100 feet in depth, although data to indicate reduced survival with increasing depth. Unaccounted factors could further lower these survival rates. Analyses by NMFS indicates that to increase yield per recruit (the intent of the size limit) survival must equal or exceed 60 percent if natural mortality (M)=0.35, or 50 percent if M=0.25.

One commenter suggested that for commercial boats the catch "limit" for undersized red snapper be prorated on a daily basis rather than a per trip basis, since many small fish are killed by the high speed of retrieval from deep waters. This would result in a reduced

waste or small fish as the boats fish up to two weeks per trip. The incidental catch allowance was instituted to discourage fishing in areas heavily populated by small fish and should not be viewed as a "limit" to be achieved. Hopefully, fishermen catching large numbers of undersized fish would shift their effort to areas populated by larger fish. At any rate, modifying the incidental catch allowance is outside the scope of the proposed rule and is an issue more appropriately addressed by the Council during the FMP amendment process.

The proposed rule to extend the deferral for headboats was initially prepared in response to a June 18, 1985 request by the Council. The Council request indicated that they were in the process of amending the FMP, and rather than preparing a separate amendment addressing size limits, chose to incorporate this issue in the general FMP amendment that would cover a number of other issues. The general FMP amendment schedule is dependent upon the availability of new stock assessment data, and data from the survival studies to evaluate changes in yield per recruit. These data could lead to a respecification of the size limit or the institution of size limits that vary geographically in accordance with size distribution of red snapper. Since the stock assessments are 6 months behind schedule, the Council has requested an additional 6 months extension of the headboat exemption so that the size limit issue can be addressed in the general FMP amendment.

NOAA believes that the proposed 12-month extension will be adequate time for the remaining field and laboratory research and data analysis to be completed in, and therefore does not agree that an 18-month extension is required. Based on the above, the Secretary therefore extends the size limit exemption to the headboat fishery for 12 more months.

Also, the text in § 641.25 is revised to clarify that the limitation of 200 traps applies to those traps actually assigned to a vessel.

Classification

The Assistant Administrator for Fisheries, NOAA, has previously determined that the FMP and implementing regulations, of which this final rule is to be a part, is consistent with the national standards and other provisions of the Magnuson Act and other applicable law (49 FR 39548, October 9, 1984).

It was previously determined, on the basis of a regulatory impact review (RIR) and regulatory flexibility analysis (RFA) that rules to implement the FMP are not major under Executive Order 12291. The RIR and RFA were summarized in the preamble to the final rule for the FMP (see 49 FR 39548) and are not repeated here. This is an extension of the time period for a measure in the final rule and, therefore, a supplemental RIR has not been prepared.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities because the rule simply extends an existing deferral for headboats from size limit restrictions in the implementing regulations. The rule will lessen impacts on the headboat fleet for a specified period of time.

Because this is a continuation of a substantive rule which relieves a restriction, the 30-day delayed effectiveness provisions of the Administrative Procedure Act do not apply.

This rule does not contain a collection of information requirement for the purposes of the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 641

Fisheries, Fishing.

Dated: May 22, 1986.

[redacted] J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

PART 641—[AMENDED]

For reasons set forth in the preamble, 50 CFR Part 641 is amended as follows:

1. The authority citation for Part 641 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 641.23, paragraph (b)(2) is revised to read as follows:

§ 641.23 Size and incidental catch restrictions.

* * * * *

(b) * * *

(2) Persons fishing from headboats in the FCZ are exempt from the minimum size limit and incidental catch limit for red snapper until May 8, 1987.

* * * * *

3. Section 641.25 is revised to read as follows:

§ 641.25 Effort limitations.

The maximum number of fish traps that may be assigned to a vessel in the FCZ is 200.

50 CFR Part 642

[Docket No. 21021-316]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NOAA issues this final rule implementing a technical amendment to the regulations for the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FMP). This rule deletes any remaining language applicable to the terminated requirement for observers aboard purse seine vessels.

EFFECTIVE DATE: May 28, 1986.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813-893-3722.

SUPPLEMENTARY INFORMATION: NOAA published a final rule February 4, 1983 (48 FR 5270), to implement the FMP. The final rule at § 642.24(b) required observers to be aboard vessels using purse seines to fish for Spanish and king mackerel. The FMP authorized this observer requirement for a three year period which ended February 3, 1986. The observer requirement was removed from the regulations by a technical amendment (51 FR 12857, April 16, 1986), by removing § 642.24(b) and renumbering § 642.24(c) as a new paragraph (b).

Through an oversight, the technical amendment did not delete all reference to the requirement for observers in the renumbered paragraph (b). Therefore, NOAA amends the rule to remove all remaining language concerning observers from the renumbered paragraph (b).

Other Matters

This action is taken under the authority of 50 CFR Part 642 and is taken in compliance with Executive Order 12291.

List of Subjects in 50 CFR Part 642

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: May 21, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

PART 642—[AMENDED]

For the reasons set forth in the preamble, 50 CFR Part 642 is amended as follows:

1. The authority citation for Part 642 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 642.24 is amended by revising paragraph (b) to read as follows:

§ 642.24 Vessel, gear, and equipment limitations.

* * * * *

(b) *Purse seine catch allowance.* A vessel with a purse seine aboard during a king or Spanish mackerel purse seine closure effected in accordance with § 642.22(a) will be considered to have been fishing for king or Spanish mackerel in violation of the closure when such vessel possesses or lands king or Spanish mackerel in excess of one percent or ten percent, respectively, by weight or number (whichever allows the lesser amount of king or Spanish mackerel) of all fish aboard or landed. King or Spanish mackerel in quantities less than one percent or ten percent are subject to the prohibition on sale provided for under § 642.22(a).

50 CFR Part 649

[Docket No. 60336-6086]

American Lobster Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues this final rule implementing Amendment 1 (amendment) to the Fishery Management Plan for the American Lobster Fishery (FMP). These regulations implement the amendment by: (1) Instituting a uniform lobster fishing gear marking system for the offshore lobster fishery; (2) providing the Regional Director the authority to grant research exemptions from any lobster FMP regulations and/or establish closed areas for research purposes; and (3) distinguishing red crab fishing gear, operating deeper than 200 fathoms, from gear capable of taking lobster. The intended effect is to promote fishing efficiency by reducing the incidence of gear conflicts and ensuring that red crab gear is not unnecessarily included in measures intended for the lobster fishery.

EFFECTIVE DATE: June 27, 1986.

ADDRESS: Copies of the amendment, the environmental assessment, and the regulatory impact analysis are available from Mr. Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway, Saugus, MA 01906.

FOR FURTHER INFORMATION CONTACT: Carol J. Kilbride, Resource Policy Analyst, 617–231–3600, ext. 331; or Kathi L. Rodrigues, Resource Management Specialist, 617–281–3600, ext. 324.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the American Lobster Fishery was prepared by the New England Fishery Management Council (Council). Amendment 1 to the FMP was partially approved by the Administrator of NOAA on May 8, 1986. The approved portions of the amendment: (1) Establish a uniform and identifiable gear marking system that will afford mobile gear operators a chance to avoid fixed lobster gear; (2) provide authority to the Regional Director to allow exemptions from the regulations and to close areas for the purpose of conducting research that will be beneficial to the lobster resource; and (3) clarify that red crab fishing gear, operating deeper than 200 fathoms, is gear not capable of taking lobster, and therefore not subject to the lobster regulations.

The need for a gear marking system arises from the increase in utilization of fishery resources by different gear types which, in turn, increases competition and congestion on fishing grounds and results in a greater incidence of gear conflicts. Gear conflicts are costly in terms of lost fishing gear and fishing time.

The minimum marking standards contained within the amendment consist of the following: (1) The westernmost end of a lobster trawl must be marked by an 8 inch (or larger) standard tetrahedral corner radar reflector and a single flag or pennant; (2) the easternmost end of a trawl must be marked by an 8 inch (or larger) standard tetrahedral corner radar reflector only. In addition, lobster trawls are limited to a length of 1.5 miles.

The amendment provides authority to the Regional Director, upon the recommendation of the New England Fishery Management Council, to allow exemptions from any provisions of the regulations and to close areas to fishing in order to conduct research beneficial to the lobster resource. Closures are to be implemented through a regulatory amendment. If the area to be closed is within the jurisdiction of the Mid-Atlantic Fishery Management Council, then this Council must concur with the recommendation of the New England Fishery Management Council in order for the closure to occur.

The amendment also draws a distinction between red crab fishing gear which is operated deeper than 200 fathoms, and gear capable of taking lobsters. All available evidence indicates that the red crab fishery is devoid of any lobster bycatch and operates in an area where there is no mobile gear. Therefore, it should not be subject to the regulations of the FMP. Such restrictions would preclude the operation of an economically viable red crab fishery.

The Acting Regional Director has disapproved that portion of the amendment which proposed to exempt certain trap gear from the venting requirement of the lobster regulations because that proposal was not necessary and appropriate for the conservation and management of the lobster resource, and it was inconsistent with National Standards. The disapproved provision exempted trap gear capable of taking lobster from the venting requirement of the regulations, if such gear is: (1) Fished in an area south of Barnegat Light, NJ, and shoreward of the 30 fathom contour; (2) fished in an unbaited condition; and (3) subject to a maximum bycatch of one hundred pounds of lobster per trip.

The intended effect of this provision is to exempt fish trap fishermen, who fish principally for black sea bass, from the trap venting requirement because a certain portion of marketable fish escape through the vent. However, this provision of the amendment, as written and submitted by the Council, has the unintended effect of creating a geographical area where all traps fished, including lobster traps, would be exempt from the venting requirement.

One of the principal deficiencies of this provision is that it is not based on a substantial weight of evidence to conclude, in accordance with Section 303 of the Magnuson Act, that it is necessary and appropriate for the conservation and management of the lobster resource. Evidence to support the one hundred pound bycatch trip allowance is deficient. At this level of bycatch, a directed fishery for lobsters could develop. While the Council states that the impact on the lobster resource as a whole is minimal, it has failed to examine the impact on the local lobster fishery within the exempted area.

The exemption also raises issues with respect to National Standard 6 because it does not provide for any variations or contingencies either in the overall lobster fishery, or those discreet lobster populations that may reside within the bounds of the exempted area. For example, an increase in the lobster resource could result in a much higher juvenile mortality than was contemplated in the amendment.

The exemption provision is inconsistent with Executive Order 12291 and National Standard 7 since it fails to provide any ability to enforce its terms to any meaningful and practical degree. There are no means to identify those individuals who are seeking the advantage of the exemption, nor to constrain individuals to fish only in the exempted area. As written, the provision would allow anyone to set unlimited traps in the area specified and land up to one hundred pounds of lobster per fishing trip. The benefits of this provision are ostensibly minimal and the costs of enforcing it are substantial.

Proposed regulations to implement the amendment were published on March 10, 1986 (51 FR 8220). The public comment period ended on April 18, 1986. One written comment was received.

Response to Public Comments

Written comments were received from the New England Fishery Management Council. The Council pointed out an error in § 649.21(b)(4)(ii) of the proposed rule, which describes the Georges Bank gear marking area. NOAA acknowledges this error and has made the necessary correction to the final rule.

Additionally, the Council raised a concern regarding the language of § 649.22 in the proposed rule, in which the authority to close areas in the Mid-Atlantic is based solely on a recommendation from the Mid-Atlantic Fishery Management Council. Because the New England Fishery Management Council is the lead council for lobster management, NOAA has revised the final rule to address the Council's concern and provide it a lead role in recommending closures to the Regional Director. However, if the closure is within the Mid-Atlantic Council's area of jurisdiction, then that Council must concur with the recommendation of the New England Council before any action may be taken by the Regional Director.

Changes to the Proposed Regulations

Section 649.7, Prohibitions, has been revised for consistency with Amendment 1 and the existing regulations. In paragraph (a)(6), the word "identified" has been added between "not" and "marked" for consistency with the amendment. The phrases "fishing for" and "or from" have been added to paragraph (b)(2) for consistency with other sections of the existing regulations, and now reads "To use any vessel for taking, catching, harvesting, *fishing for,* or landing of any American lobster in, *or from,* the FCZ . . . .". Without the phrase, "fishing for", it could be argued that a vessel is in violation of the regulation only if it is successful in the context of the definition of taking, catching, and harvesting. This is inconsistent with § 649.4 which requires a vessel to have a permit to fish for lobsters, even if such fishing, by definition, does not result in the taking or retaining of the lobster. The phrase "or from" has been added to this same paragraph for consistency with the existing sections of the regulations, and to clarify that it is a violation to offload in State waters lobsters that were illegally taken in the fishery conservation zone (FCZ).

Several revisions have been made to § 649.21 in the final regulations. Paragraph (b)(2) has been revised to clarify the dimensions of the radar reflectors and to indicate that they must be made of metal. In paragraph (b)(4), the areas of applicability have been entitled "gear areas" (for example, Mid-Atlantic Gear Area) to avoid confusion with other geographical definitions. In addition, references to depth contours have been deleted; instead the final regulations require that gear be marked, if set at depths equal to or greater than the respective depth contour.

In the proposed regulations, § 649.21(b)(4)(ii) incorrectly described the gear marking area for Georges Bank as all the waters of the FCZ south of 42°20′ N. latitude and east of 70°00′ W. longitude and seaward of the 25 fathom depth contour. It should have read "all the waters of the FCZ south if 42°20′ N. latitude and east of 70°00′ W. longitude or the outer boundary of the territorial sea, whichever lies further east." The final regulations have been corrected.

Also, the Mid-Atlantic Gear Area, at § 649.21(b)(4)(iv) has been revised to include a southern boundary. Otherwise, it could be interpreted that the gear marking requirement is applicable in the area south of the geographic jurisdiction of the Mid-Atlantic Fishery Management Council, which is not the intent of the amendment.

Lastly, because the trap vent exemption proposed in the amendment was disapproved, the regulatory language contained in § 649.21(c) regarding the exemption has not been included in the final regulations.

As a result of the comment received from the New England Fishery Management Council, § 649.22 has been revised to provide that Council the lead role to recommend area closures. However, the final rule also provides that if an area to be closed is within the jurisdiction of the Mid-Atlantic Council, that Council must concur with the recommendation of the New England Council before action may be taken by the Regional Director.

Classification

The Administrator of NOAA determined that the approved portions of the amendment are necessary and appropriate for the conservation and management of the lobster resource, and are consistent with the Magnuson Act and other applicable law.

The Council prepared an environmental assessment for this amendment and concluded that there will be no significant impact on the environment as a result of this rule. A copy of the environmental assessment may be obtained from the Council at the address given above.

The Administrator of NOAA determined that the proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. A summary was published at 51 FR 8220.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities (summary published at 51 FR 8220). As a result, a regulatory flexibility analysis was not prepared.

This rule does not contain a collection of information requirement for the purposes of the Paperwork Reduction Act.

The Council determined that this rule will be implemented in a manner that is consistent, to the maximum extent practicable, with the approved coastal zone management programs of Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island, Delaware, Maryland, New Jersey, and North Carolina. This determination has been submitted for review by the responsible State agencies under Section 307 of the Coastal Zone Management Act. The State agencies agreed with this determinination, except for Maine, Maryland, and North Carolina which failed to comment within the statutory time period.

List of Subjects in 50 CFR Part 649

Fisheries, Reporting and recordkeeping requirements.

Dated: May 22, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

PART 649—[AMENDED]

For the reasons set out in the preamble, 50 CFR Part 649 is proposed to be amended as follows:

1. The authority citation for 50 CFR Part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

§§ 649.21 and 649.22 [Amended]

2. The Table of Contents is amended by revising the title of § 649.21 to read "Gear identification, marking, and escape vent requirement.", and adding a new section title that reads "§ 649.22 Exemption and area closure.".

3. Section 649.1 is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 649.1 Purpose and scope.

* * * Red crab fishing gear which is fished deeper than 200 fathoms is gear not capable of taking lobsters, and is not subject to the provisions of these regulations.

4. Section 649.7 is amended by revising paragraphs (a) introductory text, (a)(6), and (b) (2) to read as follows:

§ 649.7 Prohibitions.

(a) It is unlawful for any person issued a permit under § 649.4, or for any person fishing in the FCZ—

* * * * *

(6) To possess, deploy, haul, harvest lobster from, or carry aboard a vessel any gear not identified, marked and vented in accordance with the requirements specified in § 649.21;

* * * * *

(b) * * *

(2) To use any vessel for taking, catching, harvesting, fishing for, or landing of any American lobster in, or from, the FCZ unless the vessel or operator has a valid permit issued under this part, and the permit is aboard the vessel;

* * * * *

5. Section 649.21 is revised to read as follows:

§ 649.21 Gear identification, marking, and escape vent requirements.

(a) *Identification.* All lobster gear deployed in the FCZ or possessed by a person whose vessel is permitted for fishing in the FCZ, and not permanently attached to the vessel, must be legibly and indelibly marked with one of the following codes of identification:

(1) The vessel's Federal fishery permit number; and/or

(2) Whatever positive identification marking is required by the vessel's homeport State.

(b) *Marking.* In the areas of the FCZ described in paragraph (b)(4) below, lobster pot trawls are to be marked as follows:

(1) Lobster pot trawls of three or less pots must be marked with a single buoy.

(2) Lobster pot trawls consisting of more than three pots must have a radar reflector and a single flag or pennant on the westernmost end (marking the half compass circle from magnetic south through west to and including north), while the easternmost end (marking the half compass circle from magnetic north through east to and including south) of a lobster trawl must be marked with a radar reflector only. Standard tetrahedral corner radar reflectors (see Figure 1) of at least 8 inches (both in height and width and made from metal) must be employed.

(3) No lobster pot trawl shall exceed 1.5 miles in length as measured from buoy to buoy.

(4) Gear marking requirements apply in the following areas:

(i) *Gulf of Maine Gear Area.* All waters of the FCZ north of 42°20' N. latitude seaward of a line drawn 12 miles from the baseline of the territorial sea;

(ii) *Georges Bank Gear Area.* All waters of the FCZ south of 42°20' N. latitude and east of 70°00' W. longitude or the outer boundary of the territorial sea, whichever lies further east;

(iii) *Southern New England Gear Area.* All waters of the FCZ west of 70°00' W. longitude, east of 71°30' W. longitude at a depth greater than 25 fathoms; and

(iv) *Mid-Atlantic Gear Area.* All waters of the FCZ, west of 71°30' W. longitude and north of 36°33' N. latitude at a depth greater than 40 fathoms.

(c) *Escape Vents.* All lobster traps deployed in the FCZ or possessed by a person whose vessel is permitted for fishing in the FCZ must be constructed to include one of the following escape vents in the parlor section of the trap. The vent must be located in such a manner that it would not be blocked or obstructed by any portion of the trap, associated gear, or the sea floor in normal use.

(1) A rectangular portal with an unobstructed opening not less than 1¾ inches (44.5 mm) by six inches (152.5 mm);

(2) Two circular portals with unobstructed openings not less than 2¼ inches (57.2 mm) in diameter; or

(3) Any other vent certified by the Regional Director to release a substantial number of lobsters under 3¼₃₂ inches carapace length from the trap.

(d) *Enforcement action.* Unidentified, unmarked, unvented, or improperly vented lobster traps will be seized and disposed of in accordance with the provisions of 50 CFR Part 219.

6. A new § 649.22 is added to read as follows:

§ 649.22 Exemption and area closure.

(a) *Exemption.* (1) Upon the recommendation of the New England Fishery Management Council, the Regional Director may exempt any person or vessel from the requirements of this part for the conduct of research of education beneficial to the lobster resource or lobster fishery.

(2) The Regional Director may not grant such exemption unless he determines that the purpose, design and administration of the exemption is consistent with the objectives of the American Lobster Fishery Management Plan, the provisions of the Magnuson Act and other applicable law, and that granting the exemption will not—

(i) Have a detrimental effect on the lobster resource and fishery; or

(ii) Create significant enforcement problems.

(3) Each vessel participating in any exempt activity is subject to all provisions of this part except those necessarily relating to the purpose and nature of the exemption. The exemption will be specified in a letter issued by the Regional Director to each vessel participating in the exempted activity. This letter must be carried aboard the vessel seeking the benefit of such exemption.

(b) *Area closure.* (1) Upon the recommendation of the New England Fishery Management Council, the Regional Director may close an area of the FCZ to fishing, through a regulatory amendment, for the conduct of scientific research provided that such closure will not—

(i) Increase gear conflicts; or

(ii) Interfere significantly with common fishing practices.

(2) If the area to be closed is within the jurisdiction of the Mid-Atlantic Fishery Management Council, then that Council must concur with the recommendation of the New England Fishery Management Council before the Regional Director may close the area.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 51, No. 102
Wednesday, May 28, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 29

Tobacco Inspection; Grade Standards for Flue-cured Tobacco

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rulemaking.

SUMMARY: The Agricultural Marketing Service proposes to amend the Official Standard Grades for Flue-Cured Tobacco, U.S. Types 11–14 and Foreign Type 92, to more accurately describe tobacco as it presently appears at the marketplace. This proposal would: (1) Add definitions to provide adequate descriptions that are significant to the industry; (2) add grades which will more accurately describe whitish-lemon colored and scorched tobacco; and (3) delete certain grades determined to be no longer necessary. These amendments are based on the Department's continuous review and evaluation and in response to recommendations by an Ad Hoc Committee appointed by the Senate Agriculture Committee.

DATE: Comments are due on or before June 12, 1986.

ADDRESS: Send comments to the Director, Tobacco Division, Agricultural Marketing Service (AMS), United States Department of Agriculture (USDA), Room 502 Annex Building, Washington, DC 20250. Comments will be available for public inspection at this location during regular business hours.

FOR FURTHER INFORMATION CONTACT: Director, Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, DC 20250, telephone (202) 447–2567.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department proposes to amend the regulations governing the Official Standard Grades for Flue-Cured Tobacco, U.S. Types 11–14 and Foreign Type 92, pursuant to the authority contained in the Tobacco Inspection Act of 1935, as amended (49 Stat. 731; 7 U.S.C. 511 *et seq.*).

The standards for flue-cured tobacco were last revised in 1984. During the past two marketing seasons, a recurring need has arisen for some changes which would more accurately describe the tobacco. In addition, the Senate appointed Ad Hoc Committee has submitted recommendations that the standards include adequate descriptions that are significant to the industry and distinguish between papery body and regular body in the P (Primings) and X (Lugs), and C (Cutters) stalk positions.

This proposal would add definitions to describe "papery" as a thin-bodied silken tobacco usually associated with whitish-lemon color and "excessively scorched" as a lot containing over 50 percent or unripe scorched tobacco.

In 1985, the standards were revised to develop grades X4L and C4L to describe a whitish-yellow (L) color produced during wet growing seasons. Since then, more third quality Lugs and fifth quality Cutters in whitish-lemon color has been appearing at the marketplace in significantly increased volume. This proposal would establish grades X3L and C3L to properly describe these two qualities of whitish-lemon colored tobacco. In addition, the maturity would be changed to unripe and the leaf structure changed to firm.

Current standards provide that if a lot contains 20 to 100 percent of unripe scorched tobacco it shall be designated by the color symbol "KM" and graded accordingly. This extreme range in the allowable amount of scorched tobacco has been a major contributing factor to confusion within the industry and difficulty in blending these grades in processing plants. These factors also appear to have an unwarranted adverse effect on the prices of tobacco. Grades C4KK, B3KK, B4KK, B5KK and I5KK would be established to distinguish lots containing over 50 percent of unripe scorched tobacco.

Grades C5KM, H3L, H5L and H6I would be deleted. In recent years tobacco characteristic of these grades has appeared in insufficient volume to justify retention of these grades.

Finally, editorial changes would be made in the citation of authority.

These proposed rules have been reviewed under USDA procedures established to implement Executive Order 12291 and Department Regulation 1512–1 and have been determined to be "nonmajor" because they do not meet any of the criteria established for major rules under the Executive Order. Initial review of the regulations contained in 7 CFR Part 29 for need, currentness, clarity, and effectiveness has been completed.

Additionally, in conformance with the provisions of Public Law 96–354, the Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business of this proposed rule. A number of firms which are affected by these proposed regulations do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. The Administrator, Agricultural Marketing Service, has determined that these actions will have no significant economic impact upon all entities, small or large, and will not substantially affect the normal movement of the commodity in the marketplace.

Lionel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, has determined that an emergency situation exists which warrants less than a 30-day comment period on this proposal. The shorter comment period is necessary to provide sufficient lead time to train inspection personnel on the revisions in the grade standards and to allow the Commodity Credit Corporation to establish and annouce the flue-cured price supports by grade prior to the opening of the 1986 marketing season. Therefore, a 15-day comment period will be provided on this proposal.

All persons who desire to submit written data, views, or arguments for consideration in conection with this proposal may file them with the Director, Tobacco Division, Agricultural Marketing Service, Room 502 Annex Building, United States Department of Agriculture, Washington, DC 20250 not later than June 12, 1986.

List of Subjects in 7 CFR Part 29

Tobacco.

PART 29—[AMENDED]

It is proposed that the regulations at 7 CFR Part 29, Subpart C, be amended as follows:

PART 29—[AMENDED]

1. The authority citation for 7 CFR Part 29, Subpart C, "Official Standard Grades for Flue-Cured Tobacco (U.S. Types 11, 12, 13, 14, and Foreign Type (2)" is revised to as follows:

Authority: Sections 29.1001, to 29.1225 are issued under sec. 14, 49 Stat. 734, as amended (7 U.S.C. 511m); sec. 213, 97 Stat. 1149 (7 U.S.C. 511r).

§ 29.1008 [Amended]

2. Section 29.1008 is amended to add to the end thereof the words "KK-excessively scorched".

§§ 29.1016—29.1047 [Redesignated as §§ 27.1017—29.1048]

3. Current §§ 29.1016 through 29.1047 are redesignated as §§ 29.1017 through 29.1048, respectively.

4. A new § 29.1016 is added to read as follows:

§ 29.1016 Excessively scorched.

As applied to flue-cured tobacco, the combination symbol "KK" when used as the third factor of a grademark denotes that a lot contains over 50 percent of unripe scorched tobacco.

§§ 29.1048—29.1063 [Redesignated as §§ 29.1050—29.1065]

5. Current §§ 29.1048 through 29.1063 are redesignated as §§ 29.1050 through 29.1065, resectively.

6. A new § 29.1048 is added to read as follows:

§ 29.1048 Papery.

A term used to describe thin-bodied, oilless tobacco usually associated with whitish-lemon color.

§ 29.1122 [Amended]

7. Section 29.1122 is amended to add to the end thereof the sentence "Any lot of unripe tobacco in the C, or B groups which is under 20 percent greenish or green but which contains 50 percent or more of scorched tobacco shall be classified as excessively scorched and designated by the combination symbol "KK."

§ 29.1162 [Amended]

8. Section 29.1162 is amended to add 4 new grades following the grade "B6KM—Poor Quality Variegated Mixed Leaf" to read as follows:

B3KK Good Quality Excessively Scorched Leaf
Unripe, close leaf structure, heavy, heavy, normal width, 16 inches (40.6 cm) or over in length. Uniformity, 80 percent; injury tolerance, 15 percent.

B4KK Fair Quality Excessively Scorched Leaf
Unripe, close leaf structure, heavy, normal width. Uniformity, 70 percent; injury tolerance 20 percent, of which not over 5 percent may be waste.

B5KK Low Quality Excessively Scorched Leaf
Unripe, tight leaf structure, heavy, narrow. Uniformity, 70 percent; injury tolerance 30 percent, of which not over 10 percent may be waste.

B6KK Poor Quality Excessively Scorched Leaf
Unripe, tight leaf structure, heavy, stringy. Uniformity, 70 percent; injury tolerance 40 percent, of which not over 20 percent may be waste.

§ 29.1163 [Amended]

9. Section 29.1163 is amended to remove the 4 grades "H3L–Good Quality Lemon Smoking Leaf", "H4L–Fair Quality Lemon Smoking Leaf", "H5L–Low Quality Lemon Smoking Leaf", and "H6L–Poor Quality Lemon Smoking Leaf"

§ 29.1164 [Amended]

10. Section 29.1164 is amended in the paragraph under the heading "C4LL–Fair Quality Whitish-Lemon Cutters" to remove the words "Ripe, open leaf structure, thin" and add in the place thereof the words "Unripe, firm leaf structure, thin (papery)".

11. Section 29.1164 is further amended to add a new grade following the grade "C4LL-Fair Quality Whitish-Lemon Cutters" to read as follows:

C5LL Low Quality Whitish-Lemon Cutters
Unripe, firm leaf structure, thin (papery), lean in oil, normal width, 16 inches (40.6 cm) or over in length. Uniformity, 70 percent; injury tolerance 30 percent, of which not over 10 percent may be waste.

12. Section 29.1164 is further amended to remove the grade "C3KM-Good Quality Variegated Mixed Cutters"

13. Section 29.1164 is further amended to add a new grade following the grade "C4KM-Fair Quality Variegated Mixed Cutters" to read as follows:

C4KK Fair Quality Excessively Scorched Cutters
Unripe, close leaf structure, medium body, normal width, 16 inches (40.6 cm) or over in length. Uniformity, 70 percent; injury tolerance 20 pecent, of which not over 5 percent may be waste.

§ 29.1165 [Amended]

14. Section 29.1165 is amended to add a new grade following the grade "X5L-Low Quality Lemon Lugs" to read as follows:

X3LL Good Quality Whitish-Lemon Lugs
Unripe, firm leaf structure, thin (papery), lean in oil. Uniformity, 70 percent; injury tolerance 40 percent, of which not over 20 percent may be waste.

15. Section 29.1165 is further amended in the paragraph under the heading "X4LL—Fair Quality Whitish-Lemon Lugs" to remove the words, "Ripe, open leaf structure, thin" and add in the place thereof the words "Unripe, firm leaf structure, thin (paperly)".

§ 29.1181 [Amended]

16. Section 29.1181 is amended as follows:

(a) Change the heading "14 Grades of Smoking Leaf to read as follows: "10 Grades of Smoking Leaf" and removing the first column of entry reading "H3L, H4L, H5L and H6L".

(b) Change the heading "6 Grades of Variegated Mixed" to read as follows: "7 Grades of Variegated Mixed" and removing the entry "C3KM" from the second column.

(c) Change the heading "2 Grades of Whitish-Lemon" to read as follows: "4 Grades of Whitish-Lemon" and add the new grades "X3LL" above grade "X4LL" and "C5LL" below grade "C4LL".

(d) Following the table "6 Grades of Variegated Red or Scorched" add a new table for the category of excessively scorched grades to read as follows:

5 Grades of Excessively Scorched	
B3KK	
B4KK	C4KK
B5KK	
B6KK	

§ 29.1225 [Amended]

17. Section 29.1225 is amended under the heading *"Combination Symbols"*, by changing the symbol "FR" to read "FF", and adding the words "KK"—Excessively scorched" at the end thereof.

Dated: May 22, 1986.

James C. Hendley,
Administrator.

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1478

Special Indemnity Programs; Special Disaster Payments for the 1983–1985 Crops of Rice, Upland Cotton, Feed Grains, and Wheat

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule, extension of comment period.

SUMMARY: A proposed rule was published in the Federal Register on Tuesday, May 20, 1986, at 51 FR 18552. The comment period for the proposed rule originally was limited to ten days because an Order of the District Court

for the Southern District of Iowa required that a final rule be made effective on or before June 2, 1986. The ten-day period included only five working days. On the Government's motion, the Court has extended the deadline for filing of a final rule to June 9, 1986. Accordingly, the comment period is hereby extended to June 2, 1986, in order to give the public more time to comment on the proposed rule.

DATES: Comments on the proposed rule must be received on or before June 2, 1986, in order to be assured of consideration.

ADDRESSES: Send comments on this proposed rule to Director, Emergency Operations and Livestock Programs Division, ASCS, Department of Agriculture P.O. Box 2415, Washington, DC 20013. All written submissions made pursuant to this rule will be available for further inspection in Room 4095 South Building, USDA, between the hours of 8:15 AM and 4:45 PM, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jerry W. Newcomb, Director, Emergency Operations and Livestock Programs Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, P.O. Box 2415, Washington, DC 20013. Telephone (202) 447–5621.

Signed at Washington, DC on May 23, 1986.

Milton J. Hertz,

Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc. 86–12075 Filed 5–23–86; 4:59 pm]

BILLING CODE 3410–05–M

Rural Electrification Administration

7 CFR Part 1772

REA Bulletin 345–28, REA Specification for Seven Wire Galvanized Steel Strand, PE–37

AGENCY: Rural Electrification Administration, Department of Agriculture.

ACTION: Proposed Rule.

SUMMARY: The Rural Electrification Administration (REA) proposes to amend 7 CFR 1772.97, Incorporation by Reference of Telephone Standards and Specifications, by incorporating by reference revised REA Bulletin 345–28, REA Specification for Seven Wire Galvanized Steel Strand, by adopting, with a minor modification by REA, ASTM A475–78, an industry standard for seven wire galvanized steel strand. Concurrently, REA proposes to withdraw REA's PE–37, a proprietary REA standard addressing the same product.

The American Society for Testing and Materials (ASTM) is a scientific and technical organization formed for the development of standards on characteristics and performance of materials, products, systems and services. ASTM is the world's largest single source of voluntary consensus standards. An ASTM standard represents a common viewpoint of those parties concerned with its provisions, namely, producers, users, and general interest groups. It is intended to aid industry, government agencies, and the general public.

This proposed action will have very little impact on the manufacturers of strand. It would not affect the current designs or manufacturing techniques of strand. Such action would also be the most effective method of assuring current state of the art technology for strand to benefit REA telephone borrowers.

DATE: Public comments must be received by REA no later than July 28, 1986.

ADDRESS: Submit written comments to M. Wilson Magruder, Director, Telecommunications Staff Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: M. Wilson Magruder, Director, Telecommunications Staff Division, Rural Electrification Administration, Washington, DC 20250, telephone (202) 382–8663. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from the above office.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to amend 7 CFR 1772.97, Incorporation by Reference of Telephone Standards and Specifications, by incorporating by reference revised REA Bulletin 345–28 (previous issue dated January 22, 1963), REA Specification for Seven Wire Galvanized Steel Strand.

REA will request approval for Incorporation by Reference from the Director of the Federal Register. This proposed action has been reviewed in accordance with Executive Order 12291, Federal Regulation. The action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; (3) result in significant adverse effects on competition, employment, investment or productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets and therefore has been determined to be "not major". This action does not fall within the scope of the Regulatory Flexibility Act. REA has concluded that promulgation of this rule would not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 (42 U.S.C. 432 *et seq.* (1976)) and, therefore, does not require an environmental impact statement or an environmental assessment. This regulation contains no information or record keeping requirement which requires approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 *et seq.*). This program is listed in the Catalog of Federal Domestic Assistance under No. 10.851, Rural Telephone Loans and Loan Guarantees and 10.852, Rural Telephone Bank Loans. For the reasons set forth in the Final Rule related Notice to 7 CFR Part 3015, Subpart V (50 FR 47034, November 14, 1985), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Copies of the document are available upon request from the address indicated above. Interested persons are invited to submit comments on this action. Written comments must be sent to the address stated above. All written submissions made pursuant to this action will be made available for public inspection during regular business hours at the above address.

Copies of ASTM A475–78 will be available for a nominal fee from the American Society for Testing and Materials, 1916 Race street, Philadelphia, PA 19103.

Background

REA has issued a series of publications entitled "bulletins" which serve to implement the policy, procedures and requirements for administering its loan and loan guarantee programs and the security instruments which provide for and secure REA financing. In the bulletin series REA issues standards and specifications for the construction of telephone facilities financed with REA loan funds. REA is proposing to revise Bulletin 345–28, the REA Specification for Seven Wire Galvanized Steel Strand by adopting, with major modification by

REA, the American Society for Testing and Materials standard for seven wire galvanized steel strand, ASTM A475-78, to replace REA's Specification PE-37 for the same product. The PE-37 designation is an arbitrary set of letters and numbers assigned by REA to identify telephone materials and equipment specifications. PE-37 would be withdrawn with this action.

It is REA policy to use the standards, rules and regulations of such engineering and standard groups as ASTM, the American National Standards Institute (ANSI), and the various national engineering societies, and such references as the National Electrical Safety Code (NESC), and the National Electrical Code (NEC), to the greatest extent practical as determined by REA. REA is also guided by OMB Circular No. A-119, Federal Participation in the Development and Use of Voluntary Standards in its activities. When there are no national standards, or where REA determines that existing national standards are not satisfactory for REA purposes, REA prepares the standards for materials and equipment as necessary.

REA has determined that the ASTM Standard for galvanized steel strand, with a minor modification, is satisfactory for REA purposes. The modification is an additional marking requirement that all coils and reels of strand having Class B and Class C coatings shall be marked with a stripe of deep colored paint about 3 inches wide and 6 inches long as indicated below:

Class of coating	Color of paint
B	Green.
C	Orange.

This marking shall be applied to the exposed convolutions of strand in the eye of coils and located near the midpoint on the outside layer of strand on reels.

The proposed action would have very little impact on the manufacturers of strand since it would require no changes in the current designs or manufacturing techniques of strand. The REA telephone borrowers will benefit from assurance of current state of the art technology for strand.

List of Subjects in 7 CFR Part 1772

Loan programs—communications, Telecommunications, Telephone.

PART 1772—[AMENDED]

In view of the above, REA is proposing to amend 7 CFR Part 1772 by incorporating by reference revised REA Bulletin 345-38.

1. The authority cited for Part 1772 is revised to read as follows:

Authority: 7 U.S.C. 901 *et seq.*, 7 U.S.C. 1921 et seq.

2. The table in § 1772.97 would be amended by adding the entry 345-38 to read as follows:

§ 1772.97 Incorporation by Reference of Telephone Standards and Specifications.

* * * * *

345-38...REA Specification for Seven Wire Galvanized Steel Strand.

* * * * *

Dated: May 21, 1986.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to amend 7 CFR 1772.97, Incorporation by Reference of Telephone standards and Specifications, by incorporating by reference revised REA Bulletin 345-47 (previous issue dated April 1, 1966), REA Specification for Seven Wire Aluminum-Clad Steel Strand. REA Will request approval for Incorporation by Reference from the Director of the Federal Register. This proposed action has been reviewed in accordance with Executive Order 12291, Federal Regulation. The action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; (3) result in significant adverse effects on competition, employment, investment or productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets and therefore has been determined to be "not major". This action does not fall within the scope of the Regulatory Flexibility Act. REA has concluded that promulgation of this rule would not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 (42 U.S.C. 432 *et seq.*, (1976)), and therefore, does not require an environmental impact statement or an environmental assessment. This regulation contains no information or record keeping requirement which

requires approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 *et seq.*). This program is listed in the Catalog of Federal Domestic Assistance under No. 10.851, Rural Telephone Loans and Loan Guarantees and 10.852, Rural Telephone Bank Loans. For the reasons set forth in the Final Rule related Notice to 7 CFR Part 3015, Subpart V (50 FR 47034, November 14, 1985), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Copies of the document are available upon request from the address indicated above. Interested persons are invited to submit comments on this action. Written comments must be sent to the address stated above. All written submissions made pursuant to this action will be made available for public inspection during regular business hours at the above address.

Copies of ASTM B415–69 will be available for a normal fee from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.

Background

REA has issued a series of publications entitled "bulletins" which serve to implement the policy, procedures and requirements for administering its loan and loan guarantee programs and the security instruments which provide and secure REA financing. In the bulletin series REA issues standards and specifications for the construction of telephone facilities financed with REA loan funds. REA is proposing to revise Bulletin 345–47, the REA Specification for Seven Wire Aluminum-Clad Steel Strand by adopting, with minor modification by REA, the American Society for Testing and Materials standard for seven wire aluminum-clad steel strand, ASTM B415–69, to replace REA's Specification PE–49 for the same product. The PE–49 designation is an arbitrary set of letters and numbers assigned by REA to identify telephone materials and equipment specifications. PE–49 would be withdrawn with this action.

It is REA policy to use the standards, rules and regulations of such engineering and standard groups as ASTM, the American National Standards Institute (ANSI), and the various national engineering societies, and such references as the National Electrical Safety Codes (NESC), and the National Electrical Code (NEC), to the greatest extent practical as determined by REA. REA is also guided by OMB Circular No. A–119, Federal Participation in the Development and Use of Voluntary Standards in its activities. When there are no national standards, or where REA determines that existing national standards are not satisfactory for REA purposes, REA prepares the standards for materials and equipment as necessary.

REA has determined that the ASTM Standard for aluminum-clad steel strand, with a minor modification, is satisfactory for REA purposes. The modification is an additional marking requirement that all coils and reels of strand manufactured under this standard be marked with a stripe of deep red colored paint about 3 inches wide and 6 inches long. This marking would be applied to the exposed convolutions of strand in the eye of coils and located near the midpoint on the outside layer of strand on reels.

This proposed action would have very little impact on the manufacturers of strand since it would require no changes in the current designs or manufacturing techniques of strand. The REA telephone borrowers will benefit from assurance of current state of the art technology for strand.

List of Subjects in 7 CFR Part 1772

Loan programs—communications, Telecommunications, Telephone.

PART 1772—[AMENDED]

In view of the above, REA is proposing to amend 7 CFR Part 1772 by incorporating by reference revised REA Bulletin 345–47.

1. The authority cited for Part 1772 is revised to read as follows:

Authority: 7 U.S.C. 901 et seq., 7 U.S.C. 1921 et seq.

2. The table in § 1772.97 would be amended by adding the entry 345–47 to read as follows:

§ 1772.97 Incorporation by Reference of Telephone Standards and Specifications.

* * * * *

345–47...REA Specification for Seven Wire Aluminum-Clad Steel Strand.

* * * * *

Dated: May 21, 1986.

Harold V. Hunter,

Administrator.

BILLING CODE 3410–15–M

Farmers Home Administration

7 CFR Part 1944

Section 502 Rural Housing Loan Policies, Procedures, and Authorizations

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule: correction.

SUMMARY: The Farmers Home Administration (FmHA's) corrects a proposed rule published April 22, 1986 (51 FR 15010). In the revision to FmHA's regulation regarding section 502 rural housing loans (Subpart A of Part 1944), the word "associate" should read "associated" in the introductory text of § 1944.10(a)(2), the word "excession" should read "excess of" in § 1944.10(a)(2)(ii), and the word "will" which was inadvertently omitted from the revision should be inserted between the phrases "and each" and "be considered" in the revision of § 1944.10(c). Additionally, the wording between "the Bureau of the Census" and "and the following" is deleted and replaced by "any special population census conducted by the Bureau of the Census" in the revision of § 1944.10(d). The intent of this action is to correct errors and to restore the language that had been originally selected for this proposed rule.

FOR FURTHER INFORMATION CONTACT: Frank Colon, Chief, Home Ownership Branch, Room 5342, Telephone (202) 382–1482 or Nancy Monesson, Room 5334, Telephone (202) 382–1474, at the following address: Single Family Housing Processing Division, Farmers Home Administration, USDA, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250.

SUPPLEMENTARY INFORMATION: The following correction are made in FR Doc. 86–8867 appearing on pages 15010 to 15012 in the issue of April 22, 1986.

PART 1944—HOUSING

1. The authority citation for Part 1944 continues to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70

Subpart A—Section 502 Rural Housing Loan Policies, Procedures, and Authorizations

2. The introductory text of paragraph (a)(2), paragraph (a)(2)(ii), paragraph (c) and the introductory text of paragraph

(d) of § 1944.19 are correctly revised to read as follows:

§ 1944.19 Rural area designation.

(a) * * *

(2) Any town, village, city, or place, including the immediately adjacent densely settled area, which is not part of or associated with an urban area and which:

* * * * *

(ii) Has a population is excess of 10,000 but not in in excess of 20,000, and

* * * * *

(c) Two or more towns, villages, cities, and places may have contiguous boundaries, and each will be considered seperately if they are not otherwise associated with each other, and their densely populated areas are not contiguous, as determined after consideration of paragraphs (a) and (b) of this section.

(d) Population count in any area will be taken from the decennial U.S. Census of Population, national population updates published by the Bureau of the Census, any special population census conducted by the Bureau of the Census, and the following:

* * * * *

Dated: May 5, 1986.

Vance L. Clark,

Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

DEPARTMENT OF ENERGY

10 CFR Part 810

Unclassified Activities in Foreign Atomic Energy Programs

AGENCY: Department of Energy.

ACTION: Proposed rule.

SUMMARY: The Department of Energy (DOE) proposes to revise its regulations 10 CFR Part 810 concerning unclassified assistance in foreign atomic energy activities. The primary aims of the proposed revision are to clarify, simplify, and reduce uncertainties about which activities are generally authorized and which require specific authorization. The present regulations would be substantially altered in language and structure but much of the substantive content is retained. In regard to general authorization, the proposed regulations first describe activities generally authorized for all countries and then activities generally authorized except for certain designated countries. The present list of countries to which certain general authorizations do not apply would be reduced by eliminating a number of non-nuclear-weapon states which have become parties to the Treaty on the Non-Proliferation of Nuclear Weapon (*NPT*) since the last revision of February 4, 1983 and certain general authorizations would be withdrawn for a number of countries which have been added to the list for foreign policy reasons. Another proposed change expands the general authorization for helping to prevent or correct a radiological emergency, which currently is limited to a radiological emergency in an operating nuclear power plant. Another proposed change narrows the general authorization for participating in international meetings which would proscribe participation that assists in production reactors or the four sensitive areas of enrichment, reprocessing, plutonium fuel fabrication, and heavy water production. Other significant new features include a proposed definition for "Public information," proposed reporting requirements on specifically authorized activities, and notice that DOE may make public a decision granting an authorization unless the applicant shows that disclosure will cause substantial harm to its competitive position. DOE is soliciting public comments on the proposed revision within 45 days. Following consideration of submitted views, DOE intends to publish a revised Part 810 Final Rule as promptly as possible.

DATES: Comments are requested and must be received no later than July 14, 1986.

Comments on information collections must be submitted on or before June 9, 1986.

ADDRESSES: Written comments (six copies when possible) should be sent to: Mr. A. Bryan Siebert, Director, Office of International Security Affairs, DP-33, U.S. Department of Energy, Washington, DC 20585: telephone (202) 252-2100.

Comments concerning information collections should be submitted to the person listed below: Mr. Vartkes Broussalian, Department of Energy Desk Officer, Office of Management and Budget (OIRA), Room 3001, NEOB, Washington, DC 20530, Telephone: (202) 395-7313.

FOR FURTHER INFORMATION CONTACT:

Mr. John M. Rooney, Chief, Operations Branch, Office of International Security Affairs, DP-332.1, U.S. Department of Energy, Telephone (202) 252-2129

Mr. Robert Newton, Acting Assistant General Counsel, Office of the General Counsel, GC-31, U.S. Department of Energy, Telephone (202) 252-6975

For information collections in the proposed rule, contact: Mr. Howard H. Raiken, Director, Management Systems Analysis Division (MA-213), U.S. Department of Energy, Washington, DC 20585, Telephone: (202) 252-0363.

SUPPLEMENTARY INFORMATION:

1. Background

10 CFR Part 810 implements section 57b(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2077), as amended by section 305 of the Nuclear Non-Proliferation Act of 1978 (NNPA) (42 U.S.C. 2155) and section 309 of the NNPA (42 U.S.C. 2157). These sections require that U.S. persons who engage directly or indirectly in production of special nuclear material outside the United States be authorized to do so by the Secretary of Energy. The Secretary has issued general authorizations for certain activities, but other activities require specific authorization. All requests to the Secretary for specific authorization to engage directly or indirectly in the production of special nuclear material outside the United States are handled in accordance with the procedures required by Section 302 of the NNPA and agreed to by the Departments of Energy, State, Commerce and Defense, the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission. These implementing procedures were published in the Federal Register May 16, 1994, under the title "Procedures Established Pursuant to the Nuclear Non-Proliferation Act of 1978" (49 FR 20780).

2. Regulatory Changes

The major proposed changes to Part 810 are summarized below:

A. Proposed § 810.2 Scope. Examples of persons, locations, and activities to which the regulation apply are explained in greater detail.

B. Proposed § 810.3 Definitions. DOE proposes to delete the definitions for "Commission," "Department," "Nuclear material," "Retransfer," and "Secretary." Proposed definitions are added for "General authorization," "Public information," "Production reactor," "Special nuclear material," and "Specific authorization." Minor and nonsubstantive changes in wording are proposed in the definitions of "Act," "Classified information," "Nuclear reactor," "Person," "Sensitive nuclear technology," and "Source material."

C. Proposed § 810.5 Interpretations. DOE proposes to recodify the current procedure which allows members of the public to request an opinion from the Department by transferring the

procedure from § 810.11 [Additional information] to this proposed section.

D. The present regulations combine both generally authorized and specifically authorized activities in one section. The revision separates them into two different sections: Proposed § 810.7 concerns "Generally authorized activities" and proposed § 810.8 treats "Activities requiring specific authorization."

In proposed § 810.7, the general authorization to assist in nuclear power plant emergencies is expanded to cover any current or imminent radiological emergency posing a significant danger to public health or safety, provided the Department of Energy is notified in advance. The general authorization for participating in exchange programs approved by the Department of State is conditioned to require consultation with the Department of Energy. The general authorization for participation in international meetings is narrowed to participation in a manner that does not provide assistance in production reactors, enrichment, reprocessing, fabrication of nuclear fuel containing plutonium, or production of heavy water. The list of countries for which certain general authorizations do not apply (contained in the new § 810.8) is reduced by eliminating a number of nonnuclear-weapon states now party to the NPT. Participation approved by a U.S. Government agency in IAEA programs, and activities by IAEA employees whose employment was approved by the U.S. Government are explicitly stated to be generally authorized.

E. Proposed § 810.8 Activities requiring specific authorization. This section requires specific authorization for engaging directly or indirectly in the production of special nuclear material for the listed countries. For unlisted countries, specific authorization is required only for certain kinds of activities.

F. Proposed § 810.9 Restrictions on general and specific authorizations. A provision is added barring assistance when a person knows or has reason to know that the activity is intended to assist in a nuclear explosives program.

G. Proposed § 810.10 Grant of specific authorization. This section provides notice that a decision granting specific authorization may be publicly disclosed unless the recipient shows that disclosure will cause substantial harm to its competitive position.

H. Proposed § 810.12 Information required in an application for specific authorization. The applicant is now required to designate any "proprietary information" in an application.

I. Proposed § 810.13 Reports. Reporting requirements are added for some activities and eliminated for others. Reports will be required on all specifically authorized activities. Instead of listing generally authorized activities which require reports and those which do not, the revision lists only those which do.

3. Statutory Requirements

Pursuant to section 57b. of the Atomic Energy Act as amended by the NNPA, with the concurrence of the Department of State and after consultations with the Departments of Commerce and Defense, the Arms Control and Disarmament Agency, and the Nuclear Regulatory Commission, the Secretary of Energy has determined that to authorize this proposed revision of 10 CFR Part 810 will not be inimical to the interest of the United States.

4. Savings Clause

Except for actions taken by DOE pursuant to proposed § 810.11, this proposed revision shall not affect specific authorizations granted under the present regulations or generally authorized activities under the present regulations for which the contracts, purchase orders, or licensing arrangements are already in effect on the date of publication of this proposed rule. However, persons engaging in activities generally authorized under the present regulations but requiring specific authorization when the proposed revision takes effect are required to notify DOE.

5. Rulemaking Requirements

Section 501(a)(1) of the DOE Organization Act (Pub. L. 95–91) provides that the provisions of subchapter II of chapter 5 of title 5, United States Code (Administrative Procedure Act, "APA") shall apply in accordance with their terms to any rule or regulation issued pursuant to authority vested by law in, or transferred or delegated to, the Secretary of Energy. Section 553(a)(1) of the APA provides an exemption to the normal notice and comment procedures or rules involving a foreign affairs function of the United States.

Because Part 810 deals with nuclear-related exports and activities that assist in the production of special nuclear material abroad, this revision involves the foreign affairs functions of the United States. Therefore, the exemption of section 553(a)(1) applies and notice and comment are not required. Nevertheless, DOE is providing interested persons 45 days in which to submit comments on this proposed rule.

Because notice and comment is not required for this rule, this rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* as provided in section 601(2). This rule is also not subject to the requirements of Executive Order 12291 [46 FR 13193, February 19, 1981], because it relates to a foreign affairs function of the United States. See section 1(a)(2).

6. Paperwork Reduction Act

DOE plans to request the Office of Management and Budget (OMB) to review and approve the information collections in this proposed rule. Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), DOE will consider comments on information collections in this proposed rule that affect the public.

7. Public Comment Procedures

The period for submission of comments will close on July 14, 1986. All interested persons who desire to submit written comments or suggestions for consideration should submit them to the address indicated in the "ADDRESSES" section of the preamble. Six copies should be submitted.

Any information or data submitted considered to be confidential must be so identified in writing. DOE reserves the right to determine the confidential status of such information or data and to treat it according to the determination.

All comments received, except those determined to be confidential, will be available for public inspection in the DOE Reading Room, Room 1E–190, James Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

List of Subjects in 10 CFR Part 810

Foreign relations, Nuclear energy, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, Part 810 of Title 10 of the Code of Federal Regulations is proposed to be revised as set forth below.

Issued at Washington, DC May 16, 1986.

D. Ofte,

Acting, Assistant Secretary for Defense Programs.

It is proposed to revise 10 CFR Part 810 to read as follows:

PART 810—ASSISTANCE TO FOREIGN ATOMIC ENERGY ACTIVITIES

Sec.
810.1 Purpose.
810.2 Scope.
810.3 Definitions.
810.4 Communications.
810.5 Interpretations.
810.6 Authorization requirement.
810.7 Generally authorized activities.
810.8 Activities requiring specific authorization.
810.9 Restrictions on general and specific authorization.
810.10 Grant of specific authorization.
810.11 Revocation, suspension or modification of authorization.
810.12 Information required in an application for specific authorization.
810.13 Reports.
810.14 Additional information.
810.15 Violations.
810.16 Effective date.

Authority: Sections 57, 127, 128, 129, 161, and 223, Atomic Energy Act of 1954, as amended by the Nuclear Non-Proliferation Act of 1978, Pub. L. 95–242, 88 Stat. 932, 948, 950, 958, 92 Stat. 126, 136, 137, 138 (42 U.S.C. 2077, 2156, 2157, 2158, 2201, 2273); Sec. 104, of the Energy Reorganization Act of 1974, Pub. L. 93–438; Sec. 301, Department of Energy Organization Act, Pub. L. 95–91 (41 U.S.C. 7101).

§ 810.1 Purpose.

These regulations implement section 57b of the Atomic Energy Act. Their purpose is to:

(a) Indicate activities which have been generally authorized by the Secretary of Energy and thus require no further authorization;

(b) Indicate activities which require specific authorization by the Secretary and explain how to request authorization; and

(c) Explain reporting requirements for various activities.

§ 810.2 Scope.

10 CFR Part 810 applies to all persons subject to the jurisdiction of the United States who engage in activities that may reasonably be expected to assist directly or indirectly in the production of special nuclear material outside the United States; its scope includes assistance provided either in the United States or abroad under the direction, supervision, responsibility or control of such persons (licensees, contractors or subsidiaries, for example). The scope of Part 810 includes, but is not limited to, assistance for nuclear reactors and other nuclear fuel cycle facilities for the following: Fluoride or nitrate conversion; isotope separation (enrichment); the chemical, physical or metallurgical processing, fabricating, or alloying of special nuclear material; production of heavy water, zirconium (hafnium-free or low-hafnium), nuclear-grade graphite, or reactor-grade beryllium; production of reactor-grade uranium dioxide from yellowcake; and certain uranium milling activities.

§ 810.3 Definitions.

As used in this part:

"Agreement for cooperation" means an agreement with another nation or group nations concluded under Section 123 of the Atomic Energy Act.

"Atomic Energy Act" means the Atomic Energy Act of 1954, as amended.

"Classified information" means National Security Information classified under Executive Order 12356 or any superseding order, or Restricted Data classified under the Atomic Energy Act.

"General authorization" means an authorization granted by the Secretary of Energy under section 57b(2) of the Atomic Energy Act to provide certain assistance to foreign atomic energy activites and which is effective without a specific request to the Secretary or the issuance of an authorization to a particular person.

"IAEA" means the International Atomic Energy Agency.

"NNPA" means the Nuclear Non-Proliferation Act of 1978.

"NPT" means the Treaty on the Non-Proliferation of Nuclear Weapons.

"Nuclear reactor" means an apparatus, other than nuclear explosive device, designed or used to sustain nuclear fission in self-supporting chain reaction.

"Person means: (1) Any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, government agency other than the Department of Energy, state or political entity within a state; and (2) any authorized representative of the foregoing.

"Production reactor" means a nuclear reactor specially designed or used to produce special nuclear material through the irradiation of source material or special nuclear material.

"Public information" means information available to any U.S. person in such places as public libraries, public reading rooms, public document rooms, public archives, or public data banks, or information generally available in university courses, before it is transmitted to a foreign recipient. It is information which is available without regard to its intrinsic value at a cost no greater than its approximate publication and dissemintion cost. It includes information contained in an application filed with the U.S. Patent Office and eligible for foreign filing under 35 U.S.C. 184 or which has been made available under 5 U.S.C. 552, the Freedom of Information Act, or which has been made available internationally without restriction on its further dissemination. Public information does not include any embellishment, enhancement, explanation or interpretation of such information, or information subject to sections 147 and 148 of the Atomic Energy Act.

"Restricted Data" means all data concerning: (1) Design, manufacture or utilization of atomic weapons; (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142 of the Atomic Energy Act.

"Sensitive nuclear technology" means any information (including information incorporated in a production or utilization facility or important component part thereof) which is not public information and which is important to the design, construction, fabrication, operation or maintenance of a uranium enrichment or nuclear fuel reprocessing facility, or a facility for the production of heavy water, but shall not include Restricted Data controlled pursuant to Chapter 12 of the Atomic Energy Act. The information may take a tangible form such as a model, prototype, blueprint, or operation manual or an intangible form such as technical services.

"Source Material" means: (1) Uranium or thorium, other than special nuclear material or (2) ores which contain by weight 0.05 percent or more of uranium or thorium, or any combination of these.

"Special nuclear material" means: (1) Plutonium, (2) uranium–233, or (3) uranium enriched above 0.711 percent by weight in the isotope uranium-235.

"Specific authorization" means an authorization granted by the Secretary of Energy under section 57b(2) of the Atomic Energy Act to a person to provide specified assistance to a foreign atomic energy activity in response to an application filed under 10 CFR Part 810.

"United States", when used in a geographical sense, includes all territories and possessions of the United States.

§ 810.4 Communications.

All communications concerning these regulations should be addressed to:

U.S. Department of Energy, Washington, DC 20585
Attention: Director, Division of Politico-Military Security Affairs, DP–232, Office of International Security Affairs, Telephone: (202) 252–2112

Communications also may be delivered to the Department's headquarters at 1000 Independence Avenue, SW., Washington, DC All clearly marked proprietary information will be given the maximum protection allowed by law.

§ 810.6 Interpretations.

A person may request the advice of the Division of Politico-Military Security Affairs on whether a proposed activity is generally authorized under § 810.7 or requires specific authorization under § 810.8 and 810.9; however, unless authorized by the Secretary of Energy in writing, no interpretation of these regulations other than a written interpretation by the General Counsel is binding upon the Department.

§ 810.8 Authorization requirement.

Section 57b of the Atomic Energy Act provides that:

It shall be unlawful for any person to directly or indirectly engage in the production of any special nuclear material outside of the United States except: (1) As specifically authorized under an agreement for cooperation made pursuant to section 123, including a specific authorization in a subsequent arrangement under section 131 of this Act, or (2) upon authorization by the Secretary of Energy after a determination that such activity will not be inimical to the interest of the United States: *Provided*, That any such determination by the Secretary of Energy shall be made only with the concurrence of the Department of State and after consultation with the Arms Control and Disarmament Agency, the Nuclear Regulatory Commission, the Department of Commerce, and the Department of Defense.

§ 810.7 Generally authorized activities.

In accordance with section 57(b)(2) of the Atomic Energy Act, the Secretary of Energy has determined that the following activities are generally authorized, provided no sensitive nuclear technology is transferred:

(a) Furnishing public information is defined in Section 810.3;

(b) Furnishing information or assistance to prevent or correct a current or imminent radiological emergency posing a significant danger to public health and safety, provided the Department of Energy is notified in advance;

(c) Implementing the Agreement between the United States of America and the International Atomic Energy Agency for the Application of Safeguards in the United States;

(d) Participation in exchange programs approved by the Department of State in consultation with the Department of Energy;

(e) Participation approved by a U.S. Government agency in IAEA programs and activities by IAEA employees whose employment was approved by the U.S. Government;

(f) Participation in international meetings sponsored by educational, scientific, technical or other institutions in a manner that does not provide assistance in the activities described in Section 810.8(b)(1) through (4); or

(g) Furnishing assistance that: (1) Does not involve any of the countries listed in section 810.8(a) and (2) does not involve production reactors, enrichment, reprocessing, fabrication of nuclear fuel containing plutonium, or production of heavy water, as described in section 810.8(b)(1) through (4).

§ 810.8 Activities requiring specific authorization.

Unless generally authorized by § 810.7, a person requires specific authorization by the Secretary of Energy before:

(a) Engaging directly or indirectly in the production of special nuclear material in any of the countries listed below:

Afghanistan	Laos
Albania	Latvia
Algeria	Libya
Andorra	Lithuania
Angola	Mauritania
Argentina	Monaco
Bahrain	Mongolian People's Democratic Republic
Brazil	Mozambique
Bulgaria	Nicaragua
Burma	Niger
Chile	Oman
China	Pakistan
China, People's Republic of	Poland
Comoros	Qatar
Cuba	Romania
Czechoslovakia	St. Christopher and Nevis
Djibouti	Saudi Arabia
Estonia	South Africa
German Democratic Republic (and East Berlin)	Soviet Union
Guyana	Syria
Hungary	Tanzania
India	United Arab Emirates
Iran	Vanuatu
Iraq	Vietnam
Israel	Yemen Arab Republic
Kampuchea	Yemen, People's Democratic Republic of
Korea, People's Democratic Republic of	Zambia
Kuwait	Zimbabwe

Countries may be removed from or added to this list by amendments published in the Federal Register;

(b) Engaging in or providing assistance in any of the following activities with respect to any foreign country.

(1) Designing production reactors or facilities for the separation of isotopes of source or special nuclear material, chemical processing of irradiated special nuclear material, the fabrication of nuclear fuel containing plutonium, or the production of heavy water;

(2) Constructing, fabricating, operating, or maintaining such reactors or facilities;

(3) Designing, constructing, fabricating, operating, or maintaining equipment or components especially designed, modified, or adapted for use in such reactors or facilities;

(4) Training in design, construction, fabrication, operation or maintenance of such reactors or facilities, equipment, or components; or

(5) Participating in an international meeting in a manner that assists in any of the activities listed in paragraphs (b)(1) through (b)(4) of this section.

§ 810.9 Restriction on general and specific authorization.

A general or specific authorization granted by the Secretary of Energy under these regulations:

(a) Is limited to activities involving only unclassified information and does not permit furnishing Restricted Data or other classified information;

(b) Does not relieve a person from complying with relevant laws or the regulations of other Government agencies applicable to exports;

(c) Does not authorize a person to engage in any activity when the person knows or has reason to know that the activity is intended to provide assistance in designing, developing, fabricating or testing a nuclear explosive device.

§ 810.10 Grant of specific authorization.

(a) Any person proposing to provide assistance for which Section 810.8 indicates specific authorization is required may apply for the authorization to the U.S. Department of Energy, Washington, DC 20585, Attention: Director, Division of Politico-Military Security Affairs, DP–332, Office of International Security Affairs.

(b) The Secretary of Energy will approve an application for specific authorization if he determines, with the concurrence of the Department of State and after consultation with the Arms Control and Disarmament Agency, the Nuclear Regulatory Commission, the Department of Commerce, and the Department of Defense, that the activity will not be inimical to the interest of the United States. In making this determination, the Secretary will take into account:

(1) Whether the United States has an agreement for nuclear cooperation with the nation or group of nations involved;

(2) Whether the country involved is a party to the NPT, or a country for which the Treaty for the Prohibition of Nuclear

Weapons in Latin America (Treaty of Tlatelolco) is in force;

(3) Whether the country involved has entered into an agreement with the IAEA for the application of safeguards on all its peaceful nuclear activities;

(4) Whether the country involved, if it has not entered into such an agreement, has agreed to accept IAEA safeguards when applicable to the proposed activity;

(5) Other nonproliferation controls or conditions applicable to the proposed activity;

(6) The relative significance of the proposed activity;

(7) The availability of comparable assistance from other sources;

(8) Any other factors that may bear upon the political, economic, or security interests of the United States, including U.S. obligations under international agreements or treaties.

(c) If the proposed assistance involves the export of "Sensitive nuclear technology" as defined in Section 810.3, the requirements of section 127 and 128 of the Atomic Energy Act and of any applicable U.S. international commitments must also be met.

(d) Thirty days after the Secretary's grant of a specific authorization, a copy of the Secretary's determination may be provided to any person requesting it from the Department, unless the applicant submits information showing that public disclosure will cause substantial harm to its competitive position. This provision does not affect any other authority provided by law for the Department not to disclose information.

§ 810.11 Revocation, suspension, and modification of authorization.

The Secretary may revoke, suspend, or modify a general or specific authorization:

(a) For any material false statement in an application for specific authorization or in any additional information submitted in its support;

(b) For failing to provide a report or for any material false statement in a report submitted pursuant to § 810.13;

(c) If any authorized assistance is subsequently determined to be inimical to the interest of the United states or otherwise no longer meets the legal criteria for approval; or

(d) Pursuant to section 129 of the Atomic Energy Act.

§ 810.12 Information required in an application for specific authorization.

Each application shall contain:

(a) The name, address, and citizenship of the applicant, and complete disclosure of all real parties in interest; if the applicant is a corporation or other legal entity, where it is incorporated or organized, the location of its principal office, and the degree of any control or ownership by any foreign person or entity;

(b) A complete description of the proposed activity, including its approximate monetary value, the name and location of any facility or project involved, the name and address of the person or legal entity for which the activity is to be performed, and a detailed description of any specific project to which the activity relates;

(c) Any information the applicant may wish to provide concerning the factors listed in § 810.10 (b); and

(d) Designation of any information considered priorietary whose public disclosure would cause substantial harm to the competitive position of the applicant.

§ 810.13 Reports.

(a) Any person who has received a specific authorization shall within 30 days after beginning the authorized activity provide to the Department of Energy a report containing the following information:

(1) The name, address, and citizenship of the person submitting the report;

(2) The name, address, and citizenship of the person or entity for which the activity is being performed;

(3) A description of the activity, the date it began, its location, status, and anticipated date of completion; and

(4) A copy of the Department of Energy's letter authorizing the activity.

(b) Any person, within 30 days after beginning any generally authorized activity under § 810.7(b) or (g), shall provide to the Department of Energy:

(1) The name, address, and citizenship of the person submitting the report;

(2) The name, address, and citizenship of the person or entity for which the activity is being performed; and

(3) A description of the activity, the date it began, its location, status, and anticipated date of completion.

(c) All reports should be sent to:

U.S. Department of Energy, Washington, DC 20585

Attention: Director, Division of Politico-Military Security Affairs, DP-332, Office of International Security Affairs

§ 810.14 Additional information.

The Department of Energy may at any time require a person engaging in any generally or specifically authorized activity to submit additional information.

§ 810.15 Violations.

(a) The Atomic Energy Act provides that:

(1) Permanent or temporary injunctions or restraining orders may be granted to prevent any person from violating any provision of the Atomic Energy Act or its implementing regulations.

(2) Any person convicted of violating or conspiring or attempting to violate any provision of section 57 of the Atomic Energy Act may be fined up to $10,000 or imprisoned up to 10 years, or both. If the offense is committed with intent to injure the United States or to aid any foreign nation, the penalty could be up to life imprisonment and a $20,000 fine.

(b) Title 18 of the United States Code, section 1001, provides that persons convicted or willfully falsifying, concealing, or covering up a material fact or making false, fictitious or fradulent statements or representations may be fined up to $10,000 or imprisoned up to five years, or both.

§ 810.16 Effective date.

These regulations are effective upon publication as final rule, 1986. Except for any action taken by DOE pursuant to § 810.11, this revision shall not affect: (a) The validity or terms of any specific authorization granted under the regulations previously in effect, or (b) generally authorized activities for which contracts, orders or licensing arrangements were in place prior to [date of publication as final rule].

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL-3022-6]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed rulemaking.

SUMMARY: USEPA proposes to approve a revision to the Illinois State Implementation Plan (SIP) for ozone. The revision, if finally approved, would provide an extended compliance schedule for American Can Corporation's (American Can) Hoopeston facility which is located in Hoopeston, Illinois. This SIP revision would allow American Can additional time to reformulate the coatings used in

manufacturing cans. This action is taken in response to a May 6, 1985, request from the State of Illinois.

DATES: Comments on this revision and on the proposed USEPA action must be received by June 27, 1986.

ADDRESSES: Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886–6031, before visiting the Region V office.).

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible).

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan (312) 886–6031.

SUPPLEMENTARY INFORMATION: On May 6, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a proposed revision to its ozone SIP for American Can's Hoopeston facility located in Hoopeston, Illinois. This SIP revision is in the form of a January 24, 1985, Opinion and Order of the Illinois Pollution Control Board (IPCB), PCB 84–106. It grants American Can a compliance date extension for VOC control requirements from October 1, 1984, until December 31, 1987, and provides a legally enforceable compliance program. The variance is intended to provide American Can with additional time to comply through development of low solvent technology. However, if American Can cannot develop such technology by the extended compliance date, American Can must install add on control technology.

Under the existing federally approved SIP, each of American Can's side seam spray coating operation is subject to a limit of 5.5 pounds of VOC per gallon (lbs of VOC/gal), the emission limitation contained in Rule 205(n)(1))B)(v) of Chapter 2: Air Pollution, of the Illinois Pollution Control Board Rules and Regulations. In addition, each of American Can's end-sealing compound operations is subject to the 3.7 lbs of VOC/gal emission limitation contained in IPCB Rule 205 (n)(1)(B)(iv). Final compliance with these emission limitations was required by December 31, 1982. The proposed SIP revision would extend the date for final compliance by American Can to December 31, 1987.

USEPA's policy on approving compliance date extensions for controlling VOC emissions from certain can manufacturing processes was published in the March 10, 1982, Federal Register (47 FR 10293). The policy states that USEPA will approve compliance date extensions for control of VOC emissions from can coating operations in those cases where the extension will facilitate the expeditious conversion to low solvent technology. These extensions may be granted for a period up to December 31, 1985, where an expeditious, legally enforceable compliance program has been developed. In addition, an approvable compliance date extension must be consistent with the reasonable further progress (RFP) requirements of the Clean Air Act and must not prevent the area from attaining the ozone national ambient air quality standard by the area's attainment date.

USEPA has not issued subsequent general guidance allowing extensions past 1985 nor has the Agency indicated that (1) 3.7 lbs of VOC/gal no longer constitutes reasonably available control technology (RACT) for high fat resistant end sealing compounds or that (2) 5.5 lbs of VOC/gal no longer constitutes RACT for side sealing operations.

Although the present VOC emissions from American Can's side sealing and end-sealing compound operation do not indicate a RACT level of control, USEPA is approving this proposed SIP revision extended compliance for the following reasons: (1) American Can is located in Vermillion County which has always been designated as an attainment area for the pollutant ozone, (2) this proposed SIP revision does not include a permanent relaxation or a compliance date extension past 1987 and (3) approval of this proposed SIP revision will not produce any increase in emissions and therefore will not interfere with the maintenance of the ozone NAAQS. Any limitations imposed by USEPA policy with regard to compliance date extensions is directed toward those areas not having attained the NAAQS and are not applicable to this revision because Vermillion County is now and has always been attainment for Ozone. With this approval, the waiver from the requirement of one year of preconstruction ozone monitoring required by the Prevention of Significant Deterioration (PSD) regulations is terminated for Vermillion County.

USEPA is providing a 30-day comment period on this notice of proposed rulemaking. Public comments received on or before June 27, 1986, will be considered in USEPA's final rulemaking. All comments will be available for inspection during normal business hours at the Region V office listed at the front of this notice.

Under 5 U.S.C. Section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

Dated: December 20, 1985.

Robert Springer,

Acting Regional Administrator.

BILLING CODE 6560–50–M

---

40 CFR Part 65

[A–3–FRL–3022–5]

Air Quality Implementation Plans; Delayed Compliance Orders; Proposed Approval of an Administrative Order Issued By the Pennsylvania Department of Environmental Resources

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rulemaking; invitation for public comment.

SUMMARY: EPA is proposing to approve an Administrative Order, as a Delayed Compliance Order (Order), issued by the Pennsylvania Department of Environmental Resources to Reading Body Works, Inc. The Order requires the company to bring air emissions from its Reading Body Works, Inc., facility located in Reading, Berks County, Pennsylvania, into compliance with certain regulations contained in the federally approved Pennsylvania State Implementation Plan (SIP) for the control of ozone. Compliance shall be achieved by April 21, 1986 utilizing low solvent technology (LST) and April 21, 1987 should LST be abandoned and add-on controls installed. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a Delayed Compliance Order pursuant to the Clean Air Act (the Act). If approved by EPA, the Order will

BEST COPY AVAILABLE

constitute an addition to the SIP. In addition, a source in compliance with an approved Order may not be sued under the enforcement provisions of section 113 of the Act or citizen suit provisions, under section 304 of the Act, for violations of the SIP regulations covered by the Order. The purpose of this Notice is to invite public comment on EPA's proposed approval of the Order as a Delayed Compliance Order.

DATE: Written comments must be received on or before June 27, 1986.

ADDRESSES: Comments should be submitted to Director, Air Management Division, EPA Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. The Order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at the EPA Region III address above during normal business hours.

FOR FURTHER INFORMATION CONTACT: James B. Topsale, P.E., Environmental Engineer, Enforcement Policy and State Coordination Section, Air Management Division, U.S. EPA Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Telephone: (215) 597-6553.

SUPPLEMENTARY INFORMATION: On February 18, 1986, the Pennsylvania Department of Environmental Resources (PADER) entered into a Delayed Compliance Order (DCO) with the Reading Body Works, Inc. The Order is now subject to public comment and other State procedural requirements before it becomes a final State action. Under the EPA parallel processing procedures for public comment on this Order, EPA will work closely with the PADER as it finalizes this Order through the State process. EPA, Region III will consult with all other appropriate EPA offices as the Order is being developed and during the State and Federal rulemaking process to ensure that all issues are identified before final adoption by the State. If the PADER or EPA obtain no information that would require significant changes to the Order, it will be finally adopted by the PADER and submitted to EPA for final approval. Only after Pennsylvania's submission of the final Order would EPA take final action approving the Order. If significant changes are made to the Order during the State rulemaking proceeding, EPA will propose appropriate action on the resulting final Order.

Reading Body Works, Inc., operates a miscellaneous metal parts painting facility in Reading, Berks County, Pennsylvania. The Order under consideration addresses emissions from the surface coating processes, which are subject to § 129.52 Table 1, Nos. 10(g) and 10(e) of Title 25 of the Pennsylvania Code regulating the Reading Body Works Inc., to reduce the emissions into the outdoor atmosphere of Volatile Organic Compounds (VOC) from the Reading Body Works, Inc., miscellaneous painting operations to 3.0 lbs. per gallon (minus water) for the coatings which are baked dry and 3.5 lbs per gallon (minus water) for the coatings which are air dryed. The regulations limited the emissions of volatile organic compounds (VOC), and are part of the federally approved Pennsylvania State Implementation Plan for the control of ozone. The Order is to require final compliance with the regulation by April 21, 1988, through the use of low solvent technology (LST) and April 21, 1987, should LST be abandoned and add-on controls installed.

Because this Order be issued to a major source of VOC emissions and permit a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a Delayed Compliance Order and under section 113(d) of the Clean Air Act (the Act). EPA has reviewed the Order and has found that the Order does satisfy the requirements of this section of the Act.

EPA's review indicates that the Reading Body Works, Inc., miscellaneous metal parts painting facility is a major source of VOC emissions. The facility is located in the Northeast Pennsylvania Upper Delaware Valley Interstate (New Jersey-Pennsylvania) Air Quality Control Region, essentially a nonattainment area for the National Ambient Air Quality Standard for ozone excluding the attainment counties of Tioga, Bradford and Sullivan. The facility, as presently constructed, has been unable to comply with regulations limiting emissions of VOC's codified at 129.52 Table 1, Nos. 10(g) and 10(e), of Title 25 of the Pennsylvania Code part of the federally approved State Implementation Plan, because low solvent coatings are still being developed.

Through a public notice, dated January 8, 1986, the PADER has provided an opportunity for public comment and hearing on the Order. No public comments or request for public hearing were received. However, the issuance of the Order by PADER is an appealable action under the State Air Pollution Control Act. The appeal period extends for 30 days following the date of publication of the Notice of Action in the *Pennsylvania Bulletin*.

The Order contains requirements for expeditious increments of progress towards compliance and emission monitoring and reporting requirements, and provides for interim emission reduction requirements as required by section 113(d)(5) of the Clean Air Act. These requirements are sufficient to avoid any imminent and substantial endangerment to health within the meaning of section 113(d)(7)(A) of the Clean Air Act. The first increment of progress, which requires Reading Body Works, Inc., to submit to PADER's Norristown Regional Office two copies of an application for Plan approval for the electrocathodic painting system ("EPD") has been completed. The 1984 estimated VOC emission of 61.0 tons/year (T/Y) will be reduced to 38.1 T/Y by April 21, 1988 if low solvent coatings are chosen, but in any event no later than April 21, 1987 should add-on controls be installed.

The system of emissions reduction required during the period covered by this Order is the best practicable system in light of the ultimate emission reductions required for compliance with the SIP. This interim system provides substantial emission reduction in a manner which permits the Company to move toward the use of either low solvent coatings or facility alterations to install add-on controls.

The Order requires the facility to comply with the State Implementation Plan whenever it is temporarily able to do so and the Order, therefore, meets the requirements of section 113(d)(7)(B). The order notifies Reading Body Works, Inc., of its liability for noncompliance penalties under section 120 of the Clean Air Act, 42 U.S.C. 7420 as required by section 113(d)(1)(E) of the Act.

If the Order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the Act (section 304) would be similarly precluded.

If approved, the Order would also constitute an addition to the Pennsylvania SIP. However, source compliance with the Order will not preclude assessment of any penalties under section 120 of the Act, unless the source is otherwise entitled to an exemption under section 120(a)(2)(B) or (C).

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether EPA may approve the Order.

BEST COPY AVAILABLE

After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 55.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of the Executive Order 12291.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 64a

Obligated Service for Mental Health Traineeships

AGENCY: Public Health Service, Department of Health and Human Services.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend regulations implementing the provisions of section 303 of the Public Health Service (PHS) Act (42 U.S.C. 242a), as amended by section 803 of the Mental Health Systems Act, regarding the service payback obligations of individuals who receive clinical traineeships in psychology, psychiatry, social work or nursing (that are not of limited duration or experimental nature). The proposed rules would amend Part 64a of Title 42 of the Code of Federal Regulations to establish a uniform rate of interest for all individuals who receive clinical traineeships, clarify the fact that funds owed to the Government become a debt when the trainee fails to complete the obligation, require that training institutions conduct entrance and exit interviews with trainees to inform them of the seriousness of their service obligations, and provide guidelines for hardship deferrals.

DATE: Comments must be received on or before July 28, 1986.

ADDRESS: Submit written comments to: Joan W. Jenkins, Ph. D., Office of Policy Analysis and Coordination, National Institute of Mental Health, Room 17C-05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Comments will be available for public inspection at this location between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Diana Trunnel, Grants Management Specialist, National Institute of Mental Health, Room 7C-26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857 (301) 443-4524.

SUPPLEMENTARY INFORMATION: The Public Health Service proposes to amend § 64a.105(g) to provide that interest accrues from the date on which the trainee fails to undertake or complete the service obligation, and continues to accrue until the total amount due is repaid. It is also proposed to require trainees who do not fulfill their obligations to pay interest on outstanding indebtedness at a rate certified by the Secretary of the Treasury for use by the National Research Service Award (NRSA) program.

Many of the conditions established under the current regulations follow those which govern obligated service for recipients of NRSA research training support under section 472 of the Public Health Service Act, 42 U.S.C. 289*l*-1, and the NRSA regulations, 42 CFR Part 66. The proposed amendments would continue to parallel the conditions imposed under the NRSA program where it is legally permissible and deemed appropriate as a matter of policy.

Interest Rates

The existing regulation creates confusion over which interest rate applies to an outstanding debt. It provides that the maximum prevailing (monthly) legal rate in effect at the time and place of payment of the traineeship award would be applied to the debt. This conceivably could result in 50 different rates being in effect throughout the country, with disputes ensuing over what the maximum rate is within each jurisdiction.

A number of established interest rates were examined in an attempt to determine which one could fairly be characterized as approaching a "maximum legal rate," would be fair and equitable to trainees, and could be easily identified by the public. The rate certified by the Secretary of the Treasury for use with the National Research Service Awards (NRSA) was selected because it represents the highest rate assessed by the Government that appears appropriate for this type of program. This rate is established quarterly by the Federal Reserve Board after reviewing the private consumer lending rates of several major banks and is certified by the Treasury Department as the rate for use by NRSA. The rate is published in a Federal Reserve Board release entitled "Interest Rates on Selected Consumer Installment Loans at Reporting Commercial Banks," and can be obtained by the public by contacting the individual listed above under "further information." The fact that the NRSA program is similar in many respects to this program also influenced our decision. Since this rate represents the cost of funds from private commercial concerns, and is used by at least one other similar Federal program, this Department believes it would be equitable to have defaulting recipients pay their debts at this rate.

Repayment Terms

Individuals who have received clinical traineeships under the existing regulations are allowed up to 2 years after termination of their traineeship to begin their obligated service. If an individual does not perform obligated service, he or she has an additional 3 years to make monetary payback. At the end of the 3-year period, any unpaid amount becomes a debt with interest accruing. PHS believes that a 5-year interest-free period is too long and proposes to modify this provision.

Under the proposed regulations, the trainee will be charged interest from the date on which the trainee fails to meet the service obligation, thus eliminating the 3-year interest-free period. However, the proposed regulations will continue the policy of not charging interest during the 2-year period during which trainees may begin their obligated service so long as the trainee intends to perform service. Thus, a trainee who is unable to find suitable service and decides at the end of the 2-year period to make monetary payback will not be penalized by the charging of interest during that period.

In those instances where a trainee has incurred other conflicting service obligations (National Health Service Corps or NRSA), the current regulations (42 CFR 64a.105(f)) provide that the starting date for the metal health traineeship may be deferred for a corresponding length of time. This provision will remain unchanged by the proposed amendments.

Interviews

The existing regulations require that training institution give written notice of the service payback and recovery provisions to each individual at the time the individual becomes a candidate for the traineeship. Before awarding the traineeship, the institution is required to obtain the individual's written assurance that the service obligation will be satisfied. The PHS has found

however, that training institutions are failing to follow these regulations and that, in some cases, trainees are not required to sign payback agreements until after their appointment.

These amended regulations require that training institutions conduct entrance and exit interviews for recipients and document those interviews on existing forms: the form containing the individual's written assurance for the entrance interview, and the termination form for the exit interview. During the entrance interview, an individual is to be thoroughly informed of the service obligation and the consequence of failing to fulfill this obligation before the agreement is signed and the funds received. These amendments also require that an exit interview be conducted where the recipient is reminded of the service obligation, warned of the consequences of failing to fulfill it, and told that the Secretary has been notified of the termination of the traineeship.

Delay

The existing regulations authorize the Secretary to grant delays in performing the service obligation because of individual hardship, but do not establish any criteria for determining the existence of hardship. The amended regulations utilize the standards used for National Research Service Awards (42 CFR 66.111) as guidance for making this determination.

Economic Impact of Regulatory Requirements

Because the proposed rule would not impose a significant burden on training institutions, it is anticipated that compliance with the rule would not impose any new major expenditures on their part. The proposed change in the method of calculating the interest rate would affect solely individual trainees and, in the aggregate, is not expected to be substantial although it may be significant in individual cases. Therefore, these regulations will not have a significant economic impact on a substantial number of small entities and a Regulatory Flexibility Analysis under the Regulatory Flexibilty Act of 1980 is not required. Further, since these regulations do not meet any criteria for a major regulation under Executive Order 12291, a Regulatory Impact Analysis is not required.

Paperwork Reduction Act

Sections 64a.104 and 64a.105 of this proposed rule contain information collection requirements. Three forms necessary for the information collection have been approved for use through June 30, 1988 (OMB–0930–0074). The additional burden imposed by this NPRM is that of documenting entrance and exit interviews with individual trainees. As required by the Paperwork Reduction Act of 1980, we have submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these additional requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears under "futher information," and to the Office of Information and Regulatory Affairs, OMB, Room 3208, New Executive Office Building, Washington, DC 20503, Attention: Desk Officer for HHS.

List of Subjects in 42 CFR Part 64a

Health professions, Manpower training programs, Mental health programs, Clinical traineeships, Obligated service.

Dated: March 18, 1986.

Donald Ian Macdonald,

Acting Assistant Secretary for Health.

Approved: April 24, 1986.

Otis R. Bowen,

Secretary.

PART 64a—[AMENDED]

Therefore, it is proposed that Subchapter E of Chapter I of Title 42 of the Code of Federal Regulations be amended in Part 64a to read as follows:

1. The authority citation for Part 64a continues to read as follows:

Authority: Section 803, Pub. L. 99–398, 94 Stat. 1607–1608 (42 U.S.C. 242a).

2. In § 64a.104, paragraphs (b) and (c) are revised to read as follows:

§ 64a.104 What requirements are imposed upon grantees?

* * * * *

(b) Before awarding a clinical traineeship, conduct an entrance interview with the individual in order to explain and emphasize the service obligation the individual is incurring, obtain the individual's written assurance that he or she will satisfy the requirements of § 64a.105, and document, in accordance with paragraph (d) of this section, the entrance interview on the form containing the individual's written assurance.

(c) At the time of termination of the clinical traineeship,

(1) Notify the Secretary in writing of the date on which the individual's traineeship is terminated;

(2) Conduct an exit interview with the individual to remind the trainee of the service obligation, to fully explain the consequences that will incur should the trainee fail to satisfy the obligation, and, to tell the individual that the Secretary has been notified of the date of termination of the traineeship; and

(3) Document, in accordance with paragraph (d) of this section, the exit interview on the form notifying the Secretary of the termination of the traineeship.

(d) Document the entrance and exit interviews with at least the following information: the date of the interview, the names of the participants involved in the interview, and a statement that the interview included an explanation to the individual of the service payback requirement and the consequences of failing to fulfill the service payback requirement.

(Approved by the Office of Management and Budget under Control No. 0930–0074.)

§ 64a.105 [Amended]

3. Section 64a.105(e)(1) is proposed to be amended to include a subparagraph (iii) which reads as follows:

(e) *Conditions for deferral or break in service, waiver, or cancellation.* (1)

* * *

(iii) In making determinations under § 64a.105(e)(1)(i)(C), the Secretary will take into consideration the following factors:

(A) The individual's present financial resources and obligations;

(B) The individual's estimated future financial resources and obligations;

(C) The reasons for the individual's failure to complete the requirements within the prescribed period, such as problems of a personal nature;

(D) The unavailability of employment opportunities appropriate to the individual's education and training; and

(E) Any other extenuating circumstances.

4. Section 64a.105(g) is proposed to be revised as follows:

* * * * *

(g) *Recovery for failure to perform obligated service.*

(1) If an individual fails to begin or complete the obligated service in accordance with the requirements of paragraphs (a) through (f) of this section, that individual is obligated to repay the United States an amount equal to three times the cost of the award (including stipends and other trainee allowances) plus interest on that amount calculated for the total period since the trainee failed to perform the obligated service at the rate set by the Secretary of the Treasury for National Research Service

Awards prevailing on the date on which the period of appointment begins, multiplied, in any case in which the service that was required has been performed in part, by the percentage which the length of service that was not performed is to the length of the service that was required to be performed. The amount will be determined under the following formula:

$$A = 3(\theta + m\theta)\frac{(t-s)}{(t)}$$

where

A = The amount the United States is entitled to recover;

θ = The cost of the clinical traineeship (including stipends and other trainee allowances);

m = The number of months since the trainee failed to perform obligated service;

3 = The National Research Service Award rate on the date which the period of appointment begins divided by twelve;

t = The total number of months of the service obligation;

s = The number of months that have been served.

(2) Unless the Secretary extends the repayment period as provided in paragraph (e) of this section, the individual shall pay to the United States the total amount which the United States is entitled to recover under paragraph (g)(1), immediately upon the date that the individual fails to begin or complete the period of obligated service (including failing to comply with the applicable terms and conditions of an extension or break in service granted the individual) or upon the date that the individual indicates his or her intention not to fulfill the service obligation as determined by the Secretary. The amount is considered a debt owed to the United States, with interest accruing monthly upon the total debt as provided under paragraph (g)(1).

(Approved by the Office of Management and Budget Under Control No. 0990-0074.)

BILLING CODE 4160-17-M

Health Care Financing Administration

42 CFR Parts 431 and 433

[BPO-053-P]

Medicaid Program; Identification of Third Party Liability Resources for Medical Assistance

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing to revise regulations governing a Medicaid State agency's responsibility to take reasonable measures to determine the legal liability of third parties to pay for services under the plan. These proposed regulations would require that the agency at a minimum: (1) Obtain certain health insurance information for Medicaid applicants or recipients during the initial application and redetermination processes; (2) attempt to secure agreements to conduct certain types of data exchanges with specific State and Federal agencies, or in some cases alternate sources, to identify legally liable third parties; (3) conduct diagnosis and trauma code edits to identify third party resources; and (4) follow other specified procedures regarding frequency of conducting the above activities, follow up, safeguarding information obtained and exchanged, and reporting and reimbursement requirements.

The objectives of these requirements are to improve State agency performance in the identification of third party resources and to assure the timely incorporation of this resource information into the third party claims payment processing system.

DATES: To Be considered, comments must be received at an appropriate address as provided below by 5:00 p.m. on June 27, 1986.

ADDRESS: Address comments in writing to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPO-053-P, P.O. Box 26676, Baltimore, Maryland 21207.

In commenting, please refer to file code BPO-053-P.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication, in Room 309-G of the Department's offices at 200 Independence Ave. SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone 202-245-7890).

Please address a copy of comments on information collection requirements to: Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503. Attention: Fay Iudicello.

FOR FURTHER INFORMATION CONTACT: Al Czeraki (301) 597-0463.

SUPPLEMENTARY INFORMATION:

I. Background

A. General

A third party is any individual, entity or program that is or may be liable to pay all or part of the expenditures for medical assistance furnished under a State plan. Examples of liable third parties include commercial insurance companies through employment-related or privately purchased health insurance or through casualty coverage resulting from an accidental injury; payments received directly from an individual who has either voluntarily accepted or been assigned legal responsibility for the health care of one or more Medicaid recipients; fraternal groups; unions; or State Workers' Compensation commissions.

B. Statute-General

Section 1902(a)(25) of the Social Security Act (the Act), prior to the enactment of the Consolidated Omnibus Reconciliation Act of 1985 (Pub. L. 99-272, April 8, 1986), required that State or local Medicaid agencies take all reasonable measures to ascertain the legal liability of third parties to pay for care and services furnished to Medicaid recipients. This section required the agency to seek reimbursement from a third party to the extent that the party is legally liable for Medicaid covered services "arising out of an injury, disease, or disability."

Section 1903(o) of the Act prohibits Federal matching of State Medicaid payments if a private insurer would have been liable to pay for the medical care, except that the insurance contract limits or excludes liability when the individual is eligible for Medicaid. Section 1903(d)(2) of the Act provides for consideration of the Federal share of any amounts already recovered by a State from a third party for medical assistance as an overpayment to the State, and for appropriate adjustment of the quarterly Medicaid payments made by the Federal government to the State.

C. Deficit Reduction Act (DEFRA) of 1984

The Deficit Reduction Act of 1984 (Pub. L. 98-369, July 18, 1984) made several changes to the statute that affect requirements as they relate to third party liability.

Section 2367 of DEFRA added a new section 1902(a)(45) to the Act to provide,

as a Medicaid State plan requirement, for mandatory assignment of rights to payments for medical support and other medical care owed to recipients in accordance with section 1912 of the Act. Section 2357 also amended section 1912 of the Act to require (rather than allow as an option) that the Medicaid plan provide that (1) as a condition of eligibility for medical assistance, individuals assign to the State their rights to any medical support or other payments for medical care and that they cooperate with the State in establishing paternity and in obtaining third party payments; and (2) States enter into cooperative agreements for the enforcement of rights to and collection of third party benefits. These agreements may be with State child support enforcement (title IV–D) agencies, any other appropriate agency of a State, and appropriate courts and law enforcement officials. In addition, section 2651 of DEFRA added a new section 1137 to the Act. This section, in part, requires State agencies that administer the Unemployment Compensation program, the Food Stamp program, the Aid to Families with Dependent Children (AFDC) program, the adult assistance programs (Titles I, X, XIV, and XVI (AABD) of the Act) and the Medicaid program to have in effect an income and eligibility verification system (IEVS) under which certain income and other relevant information would be exchanged and utilized among the above agencies for the purpose of verifying eligibility and benefit amounts under the programs administered by those agencies (section 1137(a)(2) of the Act). Section 2651 also provides that such information be targeted to uses most likely to identify and prevent erroneous eligibility determinations and incorrect payments, (section 1137(a)(4)(C) of the Act).

We interpret the language of section 1137 of the Act to mean that State Medicaid agencies must use relevant information available under that section to the extent it is useful, as determined by the Secretary in the indentification and pursuit of legally liable third party payers of medical expenses, since this affects the correct amount of payment made under Medicaid.

D. Consolidated Omnibus Reconciliation Act (COBRA) of 1985

Section 9503 of COBRA, in part, amended Section 1902(a)(25) of the Act by adding a new provision under section 1902(a)(25)(A)(i) to specify that the Medicaid State plan must provide for the collection of sufficient information to enable the State to pursue claims against third parties, with such information being collected at the time of any application or redetermination process with regard to eligibility for medical assistance.

Section 9503 of COBRA provided for certain other requirements with respect to third party liability. Some of those provisions are already contained in current regulations and others will be dealt with in future Federal Register publications.

E. Current Third Party Regulations

Regulations containing third party liability requirements are located at 42 CFR Part 433, Subpart D. For purposes of the provisions proposed in this document, the relevant regulations sections to be considered are §§ 433.138 through 43.140. Section 433.138 requires the State agency to take reasonable measures to determine the legal liability of third parties to pay for services covered under the State's Medicaid State plan. Section 433.139 (as amended recently under final regulations published on November 12, 1985 (50 FR 46652), sets forth provisions for payment of claims involving liable third parties. Before publication of these final regulations, States had the flexibility to use either of two methods for paying claims. Under the first method, cost avoidance, if the amount of third party liability is established, the agency pays only to the extent that payment allowed under the agency's payment schedule exceeds the amount of the third party liability. The claim is then returned to the provider with the information necessary for the provider to bill the third party. The second method, "pay and chase", permits the agency to pay the total amount allowed under the agency's payment schedule and then seek reimbursement on a post-payment basis (within 30 days after the end of the month in which payment is made) from liable third parties. Final regulation § 433.139 now requires State agencies to use only the cost avoidance method of payment and certain specified procedures when the agency has established the probable existence of third party liability at the time the claim is filed. These requirements apply unless a waiver is appropriately requested by the State and approved by HCFA.

Under section 433.140, one of the requirements for Federal financial participation in Medicaid payments is that the State agency has fulfilled the requirements of §§ 433.138 and 433.139.

F. Program Experience

States, under current regulations, have been given significant flexibility in the administration of the third party liability provisions. However, we believe that areas of potential savings with respect to third party liability resources have not been consistently pursued by States. For example, program experience indicates a lack of systematic efforts by States in identifying liable third party resources through the use of available data sources identified during initial application and redetermination processes, and in coordinating with other entities such as social service agencies and other compensation programs to obtain relevant third party information. There have also been problems with incorporating identified third party resource information into State third party data bases or recovery units for proper claims processing. In addition, program experience has shown that it is more cost effective for States to use the cost avoidance method of claims payment whenever possible and that failure to do so or failure to consistently seek recovery from known third party resources after claims payment, has resulted in a loss in potential program savings.

G. Recent Initiatives.

In an effort to improve the administration of the Medicaid program and implement the sections of DEFRA with respect to third party liability, we have undertaken several initiatives.

As a joint effort, HCFA and a State work group developed and published a guide composed of the more successful State agency TPL practices. State practices identified in the guide, *A Guide to Successful State Agency Practices—TPL in The Medicaid Program*, were selected based on the States' documentation of the cost effectiveness of implementation and ongoing operation as well as long range TPL savings and recoveries to the States. The guide was distributed to all State Medicaid agencies in March 1985 to be used as a management tool to assist States in upgrading and improving State Medicaid TPL programs. It also provides an indication to States of the costs and benefits some States have experienced in initiating some of these practices and we continue to encourage States to refer to this guide in considering any changes to their current TPL programs.

On February 28, 1986, we and the Departments of Labor and Agriculture published jointly in the Federal Register (51 FR 7178) a final rule implementing section 2651 of DEFRA. This rule requires that States develop IEVS meeting certain statutory and regulatory requirements for the purpose of verifying eligibility and correct payment amounts.

In addition, HCFA and the Social Security Administration (SSA), based on the success of an earlier pilot project, have entered into an agreement to make available to interested State Medicaid agencies a third party liability program. Under this program, SSA field offices will collect, for purposes of identifying legally liable third parties, certain health insurance information from SSI individuals who are also Medicaid eligible. A more detailed discussion of this project follows under section II.A.1.

Also, in connection with third party liability resource initiatives, the Office of Child Support Enforcement (OCSE) published a final rule on October 16, 1985 (50 FR 41867), which implements section 16 of the Child Support Enforcement Amendments of 1984 (Pub. L. 98-378). This rule, in part, requires State IV-D agencies to obtain basic medical support information and provide this information to the State Medicaid agency. Also, if the custodial parent does not have satisfactory health insurance coverage, the IV-D agency must petition the court or administrative authority to include medical support in the form of health insurance in new or modified support orders and inform the State Medicaid agency of orders that include a medical support obligation. Finally, the IV-D agency must take steps to enforce health insurance coverage for dependent children which has been ordered by the court. These activities increase the use of available third party resources in the form of private health insurance, thus increasing medical cost savings to State and Federal government under the Medicaid program.

II. Major Provisions of Proposed Regulations

In an effort to further improve program efficiency and reduce Medicaid expenditures through increased third party liability savings and to implement certain portions of section 9503 of COBRA that relate to the identification of third parties, we are now proposing additional changes to the regulations located at Part 431, Subpart F and § 433.138. In developing these regulations we have relied on the statutory authority set out in I. B., C. and D. above, as well as program experience. We would expect State Medicaid agencies to carry out the provisions of this rule within existing information systems, making modifications only as necessary to meet the new requirements.

The regulations we are now proposing would provide that the State Medicaid agency take reasonable measures to determine the legal obligation of third parties to pay for services under the plan, at a minimum providing for the following:

A. Obtaining Health Insurance Information: Initial Application and Redetermination Processes

1. Collection by SSA

Under section 1634 of the Act, the Social Security Administration is authorized to enter into agreements with interested State Medicaid agencies to determine Medicaid eligibility for individuals who receive Supplemental Security Income (SSI) benefits under title XVI. Currently there are 32 Medicaid State agencies under such contractual agreements.

As mentioned earlier in section I.G. *Recent Initiatives*, based on the success of a previous pilot project, HCFA and SSA have entered into an agreement to make available to all section 1634 States, a program whereby SSA field offices will collect from SSI applicants or recipients certain health insurance information during the initial application and redetermination processes and will transmit that information to State Medicaid agencies.

States interested in this project, which became effective April 1, 1985, must execute an agreement with HCFA to participate. The effective date of an agreement would be no earlier than two months following the execution of the agreement. HCFA agreements with States will also incorporate by reference any modified section 1634 agreements entered into by States with SSA prior to February 1, 1985, with regard to the collection of health insurance information.

Currently 25 States and the District of Columbia have begun participation in the project. In order to implement section 1902(a)(25)(A)(i) of the Act as amended by COBRA, we are now proposing that all States having section 1634 agreements with SSA be required to participate in the joint SSA/HCFA third party program. Regulations located at § 433.138 would be amended by adding a paragraph (b)(2) to require States to enter into an agreement with HCFA (or prior to February 1, 1985, have executed a modified section 1634 agreement with SSA that is still in effect) to—

a. Provide for collection, from the SSI applicant or recipient during the initial and redetermination processes as described above, of health insurance information in the form and manner specified by the Secretary; and

b. Transmit the information to the Medicaid agency.

Instructions concerning the procedures to be followed by SSA with respect to this joint project are contained within the Program Operations Manual System, Part 05, Chapter 17, Subchapter 30—SSA Determinations of Medicaid Eligibility.

We are also proposing similar requirements for obtaining health insurance information in those instances in which eligibility is determined by the Medicaid agency or any other State agency.

2. Collection by State Agencies Other Than the Medicaid Agency

Under § 431.10(d) of current regulations, the State plan must provide for written agreements between the Medicaid agency and other State agencies that determine Medicaid eligibility; e.g., the State agency administering State supplemental payments under section 1616 of the Act or the State agency administering the AFDC program. The agreement must state the relationships and respective responsibilities of the agencies. In order to implement section 1902(a)(25)(A)(i) of the Act, with respect to State agencies (other than the Medicaid agency itself) that determine Medicaid eligibility in accordance with a written agreement, we are proposing under § 433.138(b)(3) that the Medicaid agency must modify its agreement to provide for the collection, during the initial application and each redetermination process for eligibility, of health insurance information. This information would then be forwarded to the Medicaid agency. The Medicaid agency would have flexibility in determining the type of information to be collected; however, the health insurance information must be in a form which is useful in identifying legally liable third party resources so that the Medicaid agency may process claims under the third party claims payment provisions specified in section 433.139 (b) through (f) as amended under the November 12, 1985 final rule. Some examples of appropriate health insurance information are: name of policy holder, his or her relationship to the claimant or recipient, relevant social security numbers (SSNs), name and address of insurance company, policy number, etc. Under section 1137 of the Act, States must require that each applicant and recipient of benefits furnish to the State their social security number(s) (SSNs) as a condition of eligibility. While States may, in connection with obtaining health insurance data, request the SSN of any person with legal responsibility (other than the applicant/recipient) for any member of the unit applying for or receiving benefits, they may not require that the applicant/recipient disclose

such numbers as a condition of eligibility. States requesting voluntary disclosure of SSNs must do so in compliance with section 7 of the Privacy Act, Pub. L. 93-579.

With respect to obtaining health insurance information, some applicants or recipients are not aware of potential health insurance coverage that may be available to them; therefore, in some cases it is not sufficient to simply ask during the initial application or redetermination processes if health insurance is available. Some examples of questions that have proven to be effective in identifying the potential existence of health insurance are—

- Is the Medicaid applicant or recipient or member of the family working or a member of a labor union?
- Is the Medicaid applicant or recipient or family member in the military?
- Is health insurance available through an absent parent?

3. Collection by State Medicaid Agency

If the State Medicaid agency determines Medicaid eligibility, we would require the agency itself to collect the health information described above during the initial application and each redetermination process. (§ 433.138(b)(1))

4. Followup Procedures

With respect to the health insurance information obtained by agencies, we would require that within 30 days the agency must follow up on such information (if appropriate) in order to identify legally liable third party resources and incorporate such information into the eligibility case file and into its third party data base and third party recovery unit so the agency can process claims under the third party liability payment procedures specified in § 433.139 (b) through (f). We would require the State to describe in their State plan the methods the agency would use to meet these requirements. In some cases followup may not be required since the applicant or recipient may supply complete identifying information during the eligibility determination or redetermination processes. (§ 435.138(a)(2))

B. Data Exchanges With State Wage Information Collection Agencies (SWICAs), the SSA Wage and Earnings Files and State Title IV-A Agencies

1. General

We are also proposing changes to § 433.138 which would require use of information obtained from certain data exchanges which each State is now required to have under the final IEVS regulations published in the Federal Register February 28, 1986. As discussed earlier, this final rule implements section 1137 of the Act by requiring Federally-funded State administered programs such as Medicaid, AFDC, food stamps, etc., to have in effect an income and eligibility verification system (IEVS) under which certain wage and other relevant information must be exchanged and utilized among those program agencies for purposes of verifying eligibility and benefit amounts under those programs.

Under § 435.948(a) (1) and (2) of the final Medicaid IEVS regulations, the Medicaid agency, when it determines Medicaid eligibility, is required to obtain and utilize information for those purposes from SWICAs during the application period and at least on a quarterly basis and from the SSA wage and earnings files for applicants during the application period and for the recipients for whom the information has not previously been requested. (A State title IV-A agency, the other agency responsible for administering the AFDC programs, is also required under IEVS regulations located at 45 CFR 205.55 to conduct similar data exchanges with respect to its AFDC population, a population automatically eligible for Medicaid services.)

As set forth in the IEVS final rule, a SWICA is the State agency administering the State unemployment compensation law; a separate agency administering a quarterly wage reporting system; or a State agency administering an acceptable alternative system. SWICAs that do not use reported wages for unemployment insurance benefit calculations or that is an alternative system approved by the Secretary of Labor are required (and other SWICAs are strongly encouraged) to maintain and exchange wage information that identifies the SSN, full name, wages earned, and an identifier of the employer (for example, name and address) (§ 435.4.). The SSA wage and earnings files are nationwide files of wages, including those paid by Federal government, earnings from self-employment and pension benefits.

Also, under § 435.948(a)(6)(i) of the IEVS regulations the Medicaid agency must request any additional income, resource, or eligibility information relevant to determinations concerning eligibility or correct amount of medical assistance payments available from certain State agencies, including the title IV-A agency.

We interpret the language contained in section 1137 to require the Medicaid agency when it determines Medicaid eligibility to utilize, through direct data exchanges, available SWICA and SSA wage and earnings files information to the extent it is useful, as determined by HCFA, and to request and utilize relevant information from title IV-A agencies in identifying legally liable third parties since it affects benefit amounts. Therefore, in conjunction with the requirements set forth under §§ 435.4 and 435.948 of the final IEVS regulations, we would incorporate into § 433.138 new paragraphs (c) and (d)(1) through (d)(3) containing the requirements described in preamble sections B.2. through B.5 following.

2. Social Security Numbers of Absent or Custodial Parents

The Agency would be required, under a new paragraph (c), to incorporate into the Medicaid eligibility case file the names and SSNs of absent or custodial parents of recipients to the extent available for the purpose of conducting data matches with SWICAs, the SSA wage and earnings file and the Workers' Compensation or Industrial Accident Commissions. The agency will have already obtained available names and SSNs of absent or custodial parents through the health insurance information gathering processes mentioned in paragraph II.A. of this preamble. These names and SSNs would also be available (under section 1137 of the Act and the recently published IEVS regulations located at 42 CFR 435.948(a)(6)) from the State agencies administering title IV-A and (under section 452(d) of the Act and the recently published OCSE regulations located at 45 CFR 306.50) from the State IV-D agencies that administer the Child Support Enforcement program.

We realize that there may be some duplication of information involving absent parents resulting from the requirements just mentioned due to the final rule discussed earlier published by OCSE on October 18, 1985. That rule requires State IV-D agencies to collect information if it is available or can be obtained on IV-D case for which an assignment is in effect under title IV-A or IV-E of the Act. If the IV-D case does not have an assignment in effect under Title IV-A or IV-E of the Act, the State IV-D agency is required to collect information if the custodial parent is a Medicaid applicant or recipient. However, the data exchange required by this proposed rule will yield additional benefits. The match will identify some employed absent parents that IV-D was unable to locate. It will also reveal some absent parents who have changed employers without the knowledge of IV-D. In addition, there will be some

instances where the Medicaid recipient or custodial parent has not filed application with IV–D but the absent parent is working and may have health insurance available. Further duplication would result from the data matches with SWICA and the SSA wage and earnings files since State wage information would also be contained in the SSA wage and earnings files. However, the SSA wage and earnings files would pick up those Medicaid recipients and absent parents who are Federal employees, self-employed or employed in another State which would not be picked up under the SWICA data exchange. We believe that the benefits of conducting these matches will outweigh the administrative burden of some duplication of effort.

3. Data Exchanges With SWICAs and SSA Wage and Earnings Files

The agency must (for purposes of identifying third parties) as part of the SWICA and SSA wage and earnings files data exchange requirements, use the information that identifies those Medicaid recipients that are employed and their employer(s) and, the agency must also (assuming that it has obtained the names and SSNs of absent or custodial parents of Medicaid recipients) obtain information that identifies those absent or custodial parents of recipients that are employed and their employer(s), unless the agency can demonstrate to HCFA that it has an alternate source of information that can be obtained as timely and is as complete and useful for identifying third parties as SWICA and SSA information. (§ 433.138(d) (1) and (2))

4. Data Exchanges With State Title IV–A Agencies

The Medicaid agency must, as required under the final IEVS regulations § 435.948(a)(6)(i), request from the State title IV–A agency income information obtained from the title IV–A agency SWICAs and SSA wage and earnings files data exchanges. As mentioned earlier, the IV–A agency, in accordance with a written agreement with the State Medicaid agency under § 431.10(d) of the regulations make Medicaid eligibility determinations. Under section 1137 of the Act, the IV–A agency is required to conduct data exchanges with SWICAs and the SSA wage and earnings files for their AFDC population which is also automatically eligible for Medicaid. By requesting the information obtained under these data exchanges, the Medicaid State agency will be able to identify those Medicaid recipients that are employed and their employer(s). (§ 433.138(d)(3))

5. Followup Procedures

With respect to the information obtained from the data exchanges with the SWICAs, the SSA wage and earnings files and title IV–A agencies, followup requirements are the same as discussed under section II.A.5 for obtaining health insurance information. (§ 433.138(g)(1))

6. Frequency of Exchanges

The frequency of the Medicaid agency's data exchanges with regard to SWICAs and SSA wage and earnings files have already been set under the final IEVS regulations. the frequency of title IV–A agency data exchanges with SWICAs and SSA wage and earnings files under the IEVS regulations are located at 45 CFR 205.56(a)(1) and (a)(3). With regard to the Medicaid agency obtaining information under § 435.948(a)(6)(i) from the State title IV–A agency, we would require that the information be obtained from the title IV–A agency on a timely basis that is consistent with the intervals specified in § 205.56(a)(1) and (a)(3).

In most cases, follow up would include contact with the identified employed individual's employer to obtain information regarding the availability of health insurance for the Medicaid recipient. We would expect that in the interest of efficiency, this information should be gathered when the case worker is following up with an employer to verify income and eligibility requirements under IEVS regulations to avoid two employer contacts for the same individual. If the eligibility case file already contains information regarding health insurance available through the individual's employer(s) it is not necessary to do the additional followups.

C. Other Data Exchanges

Sections 1137 and 1902(a)(25) of the Act do not specifically provide for data exchanges with certain additional State agencies, such as State Workers' Compensation or Industrial Accident Commissions or Motor Vehicle Departments. However, we believe that such additional data exchanges constitute "reasonable measures to ascertain the legal liability of third parties" for purposes of section 1902(a)(25) of the Act, and that, therefore, such exchanges would be appropriate complements to the mandated SWICA and SSA Earnings file exchanges. Many States, on their own initiative, have adopted various practices to identify third party resources. We have selected the two examples identified above for incorporation into regulations as a requirement because they have been successful in identifying liable third parties, and have proved cost effective to the Medicaid program in those States that have implemented them.

Therefore we are proposing to require that State Medicaid agencies attempt to secure agreements with these two agencies (to the extent permitted by State law) to conduct data exchanges as discussed below.

1. State Workers' Compensation or Industrial Accident Commission Files

Assuming that an agreement can be reached, and such exchanges comply with applicable State and Federal law, data exchanges would entail matching identifying information (for example, name, SSN) for Medicaid recipients and (assuming names and SSNs have been obtained) absent or custodial parents of Medicaid recipients with Workers' Compensation or Industrial Accident files to identify those individuals with employment-related injuries or illnesses (§ 433.138(d)(4)(i)). A match with a Medicaid recipient may indicate that the individual was involved in a job-related injury and that the Worker's Compensation or Industrial Accident Commission may be a liable third party resource for the cost for care and services furnished to the recipient. A match involving an absent parent or custodial parent could indicate that the parent is or was employed and that third party resources may be available through health insurance provided by their employer.

2. State Motor Vehicle Accident Report Files

Required data exchanges would involve matching identifying information for Medicaid recipients with State motor vehicle accident report files to identify those recipients injured in motor vehicle accidents, whether injured as pedestrians, drivers or passengers in motor vehicles, or as bicyclists (§ 433.138(d)(4)(ii). A match may indicate that third party resources would be available through an automobile or liability insurance policy.

3. Securing Agreements

We would require the Medicaid agency to attempt to secure agreements with the above two agencies. If unable to secure agreements, the agency must submit documentation to the regional office that demonstrates that the agency made a reasonable attempt to secure them. If HCFA determines that a reasonable attempt was made, the requirements concerning data

exchanges with these two agencies would be deemed to be met (§ 433.138(d)(5)). In this context we would not require, but strongly encourage States to seek other alternative sources for obtaining similar information with respect to identifying liable third parties. Such activities could produce significant combined Federal and State cost savings in expenditures under Medicaid. An example of one alternative is demonstrated by California and Iowa which have adopted legislation requiring that attorneys representing Medicaid recipients in a liability-related accident notify the State Medicaid agency of such activity. This practice would encompass cases involving automobile accidents, Workers' Compensation claims, as well as other accidential injury claims and has resulted in substantial savings to the Medicaid program both in the Federal and State share.

4. Frequency of Exchange

Under our proposed regulations at § 433.138(f), if agreements have been secured, States would be required to conduct data exchanges with the above two agencies on a routine and timely basis. The State Medicaid agency would have the flexibility to develop a plan (as part of its State plan) defining the frequency of the exchanges.

5. Followup Procedures

a. *State Workers' Compensation or Industrial Accident Commission Files.* Followup requirements are the same as discussed before under section II.A.5 for obtaining and acting on health insurance information. States would have flexibility in developing a plan for followups. We expect that followup methods will vary depending on the nature of the match. For example, a match involving a Medicaid recipient with Workers' Compensation files may involve followup with the commission, whereas a similar match with an absent parent would probably involve followup with the employed individual's employer(s) to obtain information regarding the availability of health insurance for the Medicaid recipient. (§ 433.138(g)(2))

b. *State Motor Vehicle Accident Report Files.* With respect to the information obtained from the State Motor Vehicle Accident Report files, we would require the agency to develop and submit a plan (as part of its State plan) that describes its methods for following up on this information in order to identify legally liable third party resources so the agency can process claims under the third party liability payment procedures specified in § 433.139(b) through (f). Also, after followup, the agency would be required to incorporate that information into the eligibility case file and into its third party data base and third party recovery unit within timeframes specified in the State plan. (§ 433.138(g)(3))

We are providing more flexibility in State followup procedures for State Motor Vehicle exchanges because followup on the information obtained from the State Motor Vehicle Accident Report files may be extensive. Therefore, we have given the States flexibility in developing methods and timeframes for followup. In most instances, the Medicaid agency would receive a listing of all individuals injured in accidents. Since States do not require that SSNs be included on accident reports, the Medicaid agency would have to manually match the names of insured individuals against the names of Medicaid recipients. Once a match is established, the Medicaid agency would be required to followup to determine liability for the accident. This may involve obtaining and reviewing police reports, interviewing witnesses, etc. to establish legal liability.

D. Diagnosis and Trauma Code Edits

1. General

We are proposing to amend § 433.138 by adding a new paragraph (e) to include a requirement regarding diagnosis and trauma code edits. As part of the Medicaid claims payment process, providers submit claims to the State agency for payment. Claims are compiled for entry into the claims payment processing system. State claims data which are generated periodically include a listing of claims paid, the amount of the claim and the diagnosis code under which the claim was submitted. These diagnosis codes can be found in the International Classification of Disease, 9th Revision, Clinical Modification, Volume 1 (ICD–9–CM). Within this coding system there are specific codes (800–999 inclusive) that could denote a possible trauma-related injury. An example would be code 809 that denotes a fracture of the vertebral column with spinal cord injury. With regard to paid claims with these codes, if the trauma occurred as result of, for example, a criminal act, a car accident or employment-related injury, third parties such as the State Crime Compensation Commission, the Workers' Compensation Commission or a commercial health insurance company may be liable for payment for services provided under Medicaid.

Therefore, under the authority of section 1902(a)(25) of the Act, we are proposing to require in § 433.138(e) that State agencies take action to identify those paid claims that contain diagnosis or trauma codes 800–999, inclusive, and follow up on that information for purposes of identifying liable third parties.

2. Frequency of Trauma Edits and Followup

We would require agencies to conduct these edits on a routine and timely basis and develop and specify in the plan the frequency of the edits performed (§ 433.138(f)) and the methods used to followup. As part of the followup procedures, we are also proposing that States periodically take action to identify those trauma codes which have yielded the highest third party collections. Based on these findings, future followup procedures would give higher priority to those codes likely to be the most productive.

In the case of followup with trauma edits, we are providing States with flexibility in developing methods and timeframes for followup due to the nature of the followup. States would most likely have to begin followup by contacting the recipient by phone or questionnaire to determine the nature of the trauma and then followup with insurance companies, attorneys, witnesses, etc., to establish liability depending on the situation. After followup the agency must incorporate all information identifying legally liable third parties (so the agency can process claims under the third party liability payment procedures specified in § 433.139(b)) through (f)) into the eligibility case file and its third party data base and recovery unit within timeframes specified in the plan. (§ 433.138(g)(4))

E. Safeguarding of Information

1. Background

Section 1902(a)(7) of the Act requires that a State plan must provide safeguards that restrict the use or disclosure of information concerning applicants and recipients to purposes directly connected with the administration of the plan. Current regulations located at 42 CFR Part 431, Subpart F implement this requirement by specifying State plan requirements, the types of information to be safeguarded, the conditions for release of safeguarded information, and restrictions on the distribution of other information.

We believe that these current regulations adequately specify requirements to safeguard information

and need very little revision to protect information received under § 433.138 concerning third party liability. However, we do propose two changes to Part 431, Subpart F as discussed below.

2. General Safeguards

Current regulations at 42 CFR 431.306 (as amended under the IEVS final rule) specify that the data to be safeguarded must include, at least, names and addresses, medical services provided, social and economic conditions, agency evaluation of personal information, medical data, and any information received for verifying income eligibility and the amount of medical assistance payments under § 435.940ff. We would amend § 431.305 by adding a new subparagraph (7) to specifically state that the agency must also have criteria that govern the safeguards of third party liability data received under proposed § 433.138. We would also add a new paragraph (h)(1) to proposed § 433.138 to indicate that the agency must safeguard information obtained under § 433.138 in accordance with regulations at Part 431, Subpart F.

3. Data Exchanges

Also, as background to the change we are now proposing to § 431.306, Release of information, the final IEVS regulations added to § 431.306 a new paragraph (g) that requires, as a safeguarding measure, that the State Medicaid agency have a written agreement (as specified in § 435.945(f) of the IEVS regulations) with any agency with which it exchanges data under section 1137 of the Act. Under § 435.945(f), those agreements at a minimum must specify—

(1) The information to be exchanged and the titles of officials with authority to request the information;

(2) The methods and timing for requesting and providing information;

(3) Safeguards limiting the use and disclosure of information; and

(4) Methods in reimbursing agencies for the cost of furnishing information.

Because our proposed third party liability regulations at § 433.138 contain data exchanges falling within the scope of IEVS, as well as other similar exchanges, we are proposing two changes to regulations. We would add a new paragraph (h) to § 431.306 to require that the State Medicaid agency have a written agreement as specified in a new paragraph 433.138(h)(2) before requesting information from, or releasing information to, other agencies to identify legally liable third party resources under data exchange requirements contained in § 433.138(d) of the regulations. The written agreement requirements in the new § 433.138(h)(2) would parallel the requirements contained in the final IEVS regulations § 435.945(f).

F. Reimbursement and Reports

We would add new paragraphs (i) and (j) to § 433.138 to provide for reimbursement to agencies for furnishing information and for reports with respect to certain activities.

1. Reimbursement

We would require under paragraph (i), State Medicaid agencies to reimburse agencies, upon request, for reasonable costs incurred in furnishing information to the Medicaid agency. Also, in connection with reimbursement, as mentioned earlier, we would require each State Medicaid agency to specify when entering into an agreement with another agency to obtain data, how it would reimburse reasonable costs for those activities (§ 433.138(h)(2)). Each State would be expected to maintain some type of accounting method so that appropriate costs and reimbursement amounts can be calculated. We believe that these requirements are necessary to ensure that program agencies providing data receive reimbursement from the agency receiving data and also because we believe adequate reimbursement mechanisms may be an important determining factor in an agency's willingness to enter into an agreement with State Medicaid agencies to perform certain services with respect to third party liability.

2. Reports.

Finally, under § 433.138(j), we would require State Medicaid agencies to provide such reports as the Secretary prescribes for purposes of determining compliance with requirements in § 433.138, and evaluating the effectiveness of the third party liability identification system. We would highlight the reporting requirements for the data exchanges set forth in final IEVS regulations at § 435.945(e) as they relate to third party activities and also require reports for the State Workers' Compensation and State Motor Vehicle data exchanges and for trauma code edit activities.

III. Regulatory Impact Analysis

A. Executive Order 12291

Executive Order 12291 requires us to prepare and publish an initial regulatory impact analysis for any proposed major rule. A major rule is defined as any regulation that is likely to: (1) Have an effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or (3) result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This regulation is likely to result in a significant reduction of Federal Medicaid program expenditures. Additionally, while there may be moderate increases in State Administrative costs, such costs would be offset by larger savings to States due to more effective identification of liable third parties.

Implementation of this rule would result in program savings to the extent that liable third parties are identified and payments are made for services that would otherwise be paid for by the Medicaid program under existing TPL identification programs. It is difficult to estimate precisely the overall impact of this rule due to the flexible nature of many of the proposed requirements, a lack of sufficient data on existing State TPL programs, and the overlapping nature of this regulation with other regulations that affect TPL collections.

We have, however, made a rough estimate of the impact based on a study prepared under contract with HCFA by Maximum, Inc. (Contract No. 500–79–0500) titled *Evaluation of the Cost-Effectiveness of the Collection of Third-Party Liability by State Medicaid Agencies*, completed in 1981. Based on the findings of that study, we concluded that between 1.0 and 2.5 percent of annual Federal Medicaid expenditures could be eliminated through better use of TPL information collection and related State agency procedures. We attempted to take into account the impact of related regulations discussed elsewhere in this preamble, and developed low and high approximations, reflecting 1.0 percent and 2.5 percent reductions respectively, of savings that could be achieved if all the TPL-related regulations were implemented. We then apportioned that estimate to each of the regulations under development. Below, we provide our best high and low approximations illustrating the range of potential savings that would result from implementing the provisions of this proposed rule.

SAVINGS PER FISCAL YEAR

(Rounded to nearest $25 million)

1986*	1987*	1988	1989	1990
Low negligible**.....	50	100	125	125
High negligible**.....	125	275	300	325

* Amounts in FY 1986 and 1987 are set at ¼ and ½ of ultimate levels to account for lags in implementation and impact.

** Both the low and high estimates for FY 86 are less than $12.5 million.

In total, we estimate that implementation of this rule would result in Federal Medicaid savings of between $450 million and $1.15 billion during the next five-year period. Because potential annual savings would exceed the $100 million threshold under E.O. 12291, this is considered a major rule and an initial regulatory impact analysis is necessary.

While each proposed requirement is discussed previously in this preamble, fulfilling some of the requirements of an initial impact analysis, we are highlighting below the areas that may produce the greatest impact. We invite States and others to comment on them and to provide additional data and analyses related to their impact.

The costs of implementation and operation of a revised TPL identification program will vary from State to State. We recognize that in some States the costs will be high. However, it is these States that we believe will benefit the most from the proposed requirements. The States that already have effective TPL identification and collection procedures will not benefit as much. On the other hand, implementation costs for them will be relatively small.

The main factors that will affect the magnitude of savings achieved by implementation of these proposals are:

- The effectiveness of agencies in obtaining liability information at the time of application or redetermination.
- The intensity of followup actions taken by the State Medicaid agency to bring about actual payments from liable third parties.
- The degree of success in obtaining agreements with other agencies for exchanging relevant data.
- The relative usefulness and frequency of utilizing diagnosis codes related to trauma in identifying liable third parties.

This proposed rule should have no effect on Medicaid eligibility determinations. It is intended to provide assistance and incentives to States for the identification of alternative sources of payment for health services provided to Medicaid participants. It is further possible that may making Medicaid enrollees more aware of other health insurance coverage available to them, access to care may be enhanced.

B. Regulatory Flexibility Act

Consistant with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare and publish an initial regulatory flexibility analysis for proposed regulations unless the Secretary certifies that the regulation would not have a significant economic impact on a substantial number of small entities.

The primary impact of this proposed rule would fall on State Medicaid agencies and on other, primarily private, insurers. For purposes of the RFA, States are not considered small entities. Further, we do not believe that increased payments on the part of other insurers or payers would represent a significant portion of their total payments. The Department generally uses 3 percent as a threshold in determining whether the impact is significant under the RFA. We estimate that private insurance companies, in calendar year 1984, paid out about $111.8 billion in the form of benefits to enrollees. Thus, even the high estimate of $325 million eventual additional annual payments by other payers is significantly less than the 3 percent criteria. Additionally, the increased payments by third parties would not be a result of revised payment policies. These would be payments for which the third parties are presently liable but ineffectively identified and billed. For these reasons, we have determined, and the Secretary certifies, that this regulation would not have a significant economic impact on a substantial number of small entities. Therefore, an initial regulatory flexibility analysis is not required.

IV. Information Collection Requirements

Sections 431.305(b), 431.306(h), 433.138 (b) through (h), and 433.138(j) of this proposed rule contain information collection requirements that are subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1980. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to OMB as indicated in the **ADDRESS** section of this document.

V. Response to Comments

Because of the large number of comments we receive on proposed regulations, we cannot acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments received timely and respond to the major issues in the preamble to that rule.

List of Subjects

42 CFR Part 431

Grant programs—health, Health facilities, Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 433

Administrative practice and procedure, Claims, Grant programs—health, Medicaid, Reporting and recordkeeping requirements.

42 CFR Chapter IV, Subchapter C would be amended as set forth below:

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

* * * * *

SUBCHAPTER C—MEDICAL ASSISTANCE PROGRAMS

* * * * *

PART 431—STATE ORGANIZATION AND GENERAL ADMINISTRATION

The authority citation for Part 431 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

A. Part 431, Subpart F would be amended as set forth below:

1. In § 431.305, the introductory text to paragraph (b) is republished and a new paragraph (b)(7) is added to read as follows:

§ 431.305 Types of information to be safeguarded.

* * * * *

(b) This information must include at least—

* * * * *

(7) Any information received in connection with the identification of legally liable third party resources under § 433.138 of this chapter.

2. In § 431.306, a new paragraph (h) is added to read as follows:

§ 431.306 Release of information.

* * * * *

(h) Before requesting information from, or releasing information to, other agencies to identify legally liable third party resources under § 433.138(d) of this chapter, the agency must execute data exchanges agreements, as specified in § 433.138(h)(2) of this chapter.

PART 433—STATE FISCAL ADMINISTRATION

The authority citation for Part 433 continues to read as follows:

Authority: Secs. 1102, 1902(a)(4), 1902(a)(25), 1902(a)(45), 1903(a)(3), 1903(d)(2), 1903(d)(5), 1903(o), 1903(p), 1903(r), and 1912 of the Social Security Act; 42 U.S.C. 1302.

1396a(a)(4), 1396a(a)(25), 1396a(a)(45), 1396b(a)(3), 1396b(d)(2), 1396b(d)(3), 1396b(o), 1396b(p), 1396b(r) and 1396k, unless otherwise noted.

B. In Part 433, Subpart D, § 433.138 is revised to read as follows:

§ 433.139 Determining liability of third parties.

(a) *Basic provisions.* The agency must take reasonable measures to determine the legal liability of third parties to pay for services furnished under the plan. At a minimum, such measures must include the requirements specified in paragraphs (b) through (j) of this section.

(b) *Obtaining health insurance information: Initial application and redetermination processes for Medicaid eligibility.* (1) If the Medicaid agency determines eligibility for Medicaid, it must, during the initial application and each redetermination process, obtain from the applicant or recipient such health insurance information as would be useful in identifying legally liable third party resources so that the agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f). Health insurance information may include, but is not limited to, the name of the policy holder, his or her relationship to the applicant or recipient, the social security number (SSN) of the policy holder, and the name and address of insurance company and policy number.

(2) If Medicaid eligibility is determined by the Federal agency administering the supplemental security income program under title XVI in accordance with a written agreement under section 1634 of the Act, the Medicaid agency must take the following action. It must enter into an agreement with HCFA or must have, prior to February 1, 1965, executed a modified section 1634 agreement that is still in effect to provide for—

(i) Collection, from the applicant or recipient during the initial application and each redetermination process, of health insurance information in the form and manner specified by the Secretary; and

(ii) Transmittal of the information to the Medicaid agency.

(3) If Medicaid eligibility is determined by any other agency in accordance with a written agreement, the Medicaid agency must modify the agreement to provide for—

(i) Collection, from the applicant or recipient during the initial application and each redetermination process, of such health insurance information as would be useful in identifying legally liable third party resources so that the Medicaid agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f). Health insurance information may include, but is not limited to, those elements described in paragraph (b)(1) of this section; and

(ii) Transmittal of the informatioin to the Medicaid agency.

(c) *Obtaining other information.* The agency must, for purposes of implementing the requirements in paragraph (d)(1)(ii) and (d)(4)(i) of this section, incorporate into the eligibility case file the names and SSNs of absent or custodial parents of Medicaid recipients to the extent such information is available.

(d) *Exchange of data.* To obtain and use information for the purpose of determining the legal liability of third parties so that the agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f), the agency must take the following actions:

(1) Except as specified in paragraph (d)(2) of this section, as part of the data exchange requirements under § 435.945 of this chapter, from the State wage information collection agency (SWICA) defined in § 435.4 of this chapter and from the SSA wage and earnings files data as specified in § 435.948(a)(2) of this chapter, the agency must—

(i) Use the information that identifies Medicaid recipients that are employed and their employer(s); and

(ii) Obtain and use, if their names and SSNs are available to the agency under paragraph (c) of this section, information that identifies absent or custodial parents of recipients that are employed and their employer(s).

(2) If the agency can demonstrate to HCFA that it has an alternate source of information that furnishes information as timely, complete and useful as the SWICA and SSA wage and earnings files in determining the legal liability of third parties, the requirements of paragraph (d)(1) of this section are deemed to be met.

(3) The agency must request, as required under § 435.948(a)(6)(i), from the State title IV–A agency, information that identifies those Medicaid recipients that are employed and their employer(s).

(4) Except as specified in paragraph (d)(5) of this section, the agency must attempt to secure agreements (to the extent permitted by State law) to provide for obtaining—

(i) From State Workers' Compensation or Industrial Accident Commission files, information that identifies Medicaid recipients and, (if their names and SSNs were avaialble to the Agency under paragraph (c) of this section) absent or custodial parent of Medicaid recipients with employment related injuries or illnesses; and

(ii) From State Motor Vehicle accident report files, information that identifies those Medicaid recipients injured in motor vehicle accidents, whether injured as pedestrians, drivers, passengers, or bicyclists.

(5) If unable to secure agreements as specified in paragraph (d)(4) of this section, the agency must submit documentation to the regional office that demonstrates the agency made a reasonable attempt to secure these agreements. If HCFA determines that a reasonable attempt was made, the requirements of paragraph (d)(4) of this section are deemed to be met.

(e) *Diagnosis and trauma code edits.* The agency must take action to identify those paid claims for Medicaid recipients that contain diagnosis codes 800 through 999 (ICD–9–CM) International Classification of Disease, 9th Revision, Clinical Modification, Volume 1) inclusive, for the purpose of determining the legal liability of third parties so that the agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f).

(f) *Data exchange and trauma code edits; Frequency.* The agency must conduct the data exchange required in paragraph (d)(1) of this section in accordance with the intervals specified in § 435.948 of this chapter; the data exchanges required in paragraph (d)(3) of this section on a timely basis that is consistent with the intervals specified in 45 CFR 205.55 (a)(1) and (a)(3); and must conduct the data exchanges and diagnosis and trauma edits required in paragraphs (d)(4) and (e) of this section on a routine and timely basis. The State plan must specify the frequency of these activities.

(g) *Followup procedures for identifying legally liable third party resources.*— (1) *SWICA, SSA wage and earnings files, and title IV–A data exchanges.* With respect to information obtained under paragraphs (d)(1) through (d)(3) of this section—

(i) Within 30 days, the agency must followup (if appropriate) on such information in order to identify legally liable third party resources and incorporate such information into the eligibility case file and into its third party data base and third party recovery unit so the agency may process claims under the third party liability payment

procedures specified in § 433.139 (b) through (f); and

(ii) The State plan must describe the methods the agency uses for meeting the requirements of pargraph (g)(1)(i) of this section.

(2) *Health insurance information and worker's compensation data exchanges.* With respect to information obtained under paragraphs (b) and (d)(40(i) of this section—

(i) Within 30 days, the agency must followup on such information (if appropriate) in order to identify legally liable third party resources and incorporate such information into the eligibility case file and into its third party data base and third party recovery unit so the agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f); and

(ii) The State plan must describe the methods the agency uses for meeting the requirements of paragraph (g)(2)(i) of this section.

(3) *State motor vehicle accident report file data exchanges.* With respect to information obtained under paragraph (d)(4)(ii) of this section—

(i) The State plan must describe the methods the agency uses for following up on such information in order to identify legally liable third party resources so the agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f);

(ii) After followup, the agency must incorporate all information that identifies legally liable third party resources into the eligibility case file and into its third party data base and third party recovery unit; and

(iii) The State plan must specify timeframes for incorporation of the information.

(4) *Diagnosis and trauma code edits.* With respect to the paid claims identified under paragraph (e) of this section—

(i) The State plan must describe the methods the agency uses to follow up on such claims in order to identify legally liable third party resources so the agency may process claims under the third party liability payment procedures specified in § 433.139 (b) through (f) (Methods must include a procedure for periodically identifying those trauma codes that yield the highest third party collections and giving priority to following up on those codes.);

(ii) After followup, the agency must incorporate all information that identifies legally liable third party resources into the eligibility case file and into its third party data base and third party recovery unit; and

(iii) The State plan must specify the timeframes for incorporation of the information.

(h) *Obtaining other information and data exchanges: Safeguarding information.* (1) The agency must safeguard information obtained from and exchanged under this section with other agencies in accordance with the requirements set forth in Part 431, Subpart F of this chapter.

(2) Before requesting information from, or releasing information to other agencies to identify legally liable third party resources under paragraph (d) of this section the agency must execute data exchange agreements with those agencies. The agreements, at a minimum, must specify—

(i) The information to be exchanged;

(ii) The titles of all agency officials with the authority to request third party information;

(iii) The methods, including the formats to be used, and the timing for requesting and providing the information;

(iv) The safeguards limiting the use and disclosure of the information as required by Federal or State law or regulations; and

(v) The method the agency will use to reimburse reasonable costs of furnishing the information if payment is requested.

(i) *Reimbursement.* The agency must, upon request, reimburse and agency for the reasonable costs incurred in furnishing information under this section to the Medicaid agency.

(j) *Reports.* The agency must provide such reports with respect to the data exchanges and trauma code edits set forth in paragraphs (d)(1) through (d)(4) and paragraph (e) of this section, respectively, as the Secretary prescribes for the purpose of determining compliance under § 433.138 of the regulations and evaluating the effectiveness of the third party liability identification system.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[PR Docket No. 86-169; RM-5103; FCC 86-216]

Amendment of Part 90 of the Commission's Rules and Regulations To Permit Expanded Use of the 450 MHz 12.5 kHz Offset Channels in the Special Industrial Radio Service

Correction

IN FR Doc. 86-10552 beginning on page 17367 in the issue of Monday, May 12, 1986, the Docket No. should read as it appears in the heading above.

BILLING CODE 1505-01-M

DEPARTMENT OF DEFENSE

48 CFR Parts 215 and 252

Federal Acquisition Regulation Supplement; Industrial Modernization Incentives Program (IMIP)

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory Council is considering coverage in the DoD Federal Acquisition Regulation Supplement (DFARS) for the Industrial Modernization Incentives Program (IMIP). This program when implemented will benefit both the contractor and DoD in the form of increased manufacturing efficiencies based upon the terms and conditions established in a mutually agreed upon IMIP Business Agreement.

DATE: Comments on the proposed rule should be submitted in writing to the DAR Council at the address shown below no later than (July 28, 1986), to be considered in the formulation of the final rule. Please cite DAR Case 85-167 in all correspondence related to this issue.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)/DARS, c/o OASD(A&L)(MRS), Room 3C841, The Pentagon, Washington, DC 20301-3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202) 697-7268.

SUPPLEMENTARY INFORMATION:

A. Background

The Department of Defense, in its DoD Directive 5000.44 of April 16, 1986, established policy covering the Industrial Modernization Incentives Program (IMIP). The objective of the program is to stimulate additional defense contractor capital investment and productivity improvement efforts that result in reduced DoD acquisition costs.

B. Regulatory Flexibility Act Information

In accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is believed that this rule will not have a significant impact on a substantial number of small entities. There will be a requirement for a "report" in that those businesses desiring to participate in IMIP will be required to submit IMIP agreement proposals. However, the data submitted in the proposals will be generated from cost data already contained in the contractor's recordkeeping systems.

C. Paperwork Reduction Act Information

The rule contains information collection requirements which require approval of OMB under 44 U.S.C. 3501, et seq, the collection of information requirements have been submitted to OMB for review pursuant to Section 3504(h) of the Act. Comments should be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for DoD.

List of Subjects in 48 CFR Parts 215 and 252

Government procurement.

Charles W. Lloyd,

Executive Secretary Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Parts 215 and 252 be amended as follows:

PART 215—CONTRACTING BY NEGOTIATION

The authority citation for 48 CFR Parts 215 and 252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

2. Section 215.872 is revised to read as follows:

§ 215.872 Capital investment incentives.

(a) *Policy.* Although DoD profit and competition policies are intended to provide adequate incentives to the contractor for capital investment and productivity, it is also recognized that individual cases will arise when additional incentives may be appropriate. In these individual cases, it is the policy of DoD that industrial modernization incentives may be negotiated and included in contracts for research, development, and/or production of weapons systems, major components, or material. The purpose is to motivate the contractor to invest in facilities modernization and to undertake related productivity improvement efforts it would not have otherwise undertaken or to invest earlier than it otherwise would have done.

(b) *General.* Any industrial modernization incentives program (IMIP) shall be accomplished in accordance with this coverage and with DoD Directive 5000.44 and DoD Guide 5000.44–G. Sufficient flexibility is provided in the directive and guide to allow the IMIP to be tailored to the requirements of an individual situation. The incentives may be in the form of productivity savings rewards, contractor investment protection, and/or other appropriate forms. They may be used separately or in combination, as addressed in subparagraphs (b) (1), (2), and (3) of this subsection. However, in no event, shall an IMIP agreement be made between DoD and a contractor until careful analyses have been conducted and reduced acquisition costs or equivalent benefits (such as improved quality, as a result of the application of the IMIP) are clearly evident. It may be generally desirable to initially negotiate a memorandum of understanding (MOU) to establish guidelines and criteria against which to analyze and negotiate a specific IMIP.

(1) *Productivity Savings Reward (PSR).* This incentive shares the savings achieved from facilities modernization and related productivity improvement efforts. This incentive may be used to encourage productivity improvements in all facets of the production process including major cost driving areas such as labor, materials, overhead, support systems (including software), and organizations. In order for these to be considered viable projects that are beneficial for both the Government and the contractor, the contractor must show that PSR is required for project implementation and that these projects are over and above requirements to meet normal contractual obligations. The scope and limitation of productivity savings rewards are as follows:

(i) Productivity savings rewards in conjunction with contractor capital investment will be based on an internal rate of return analysis. The productivity savings rewards should be sufficient to allow the contractor to obtain an equitable return on the investment. Nonserverable plant equipment and real property may be included on a limited basis as part of the contractor's investment basis for calculating the appropriate return on investment. The effect of any Government funding provided in conjunction with modernization efforts must be included in the contractor's return on investment (ROI), and no contractor costs or expenses otherwise allocable and allowable to any specific DoD contract may be included.

(ii) Productivity savings rewards providing the contractor a reward for productivity improvements other than through capital investment will be based on an economic analysis of the benefits to the Government and the contractor. The negotiated sharing amount or percentage shall be based on benefits and risks to both parties. It will be paid only for savings that are validated, and will be negotiated for a period normally no longer than five years after the date of implementation.

(iii) Productivity savings rewards shall not constitute fee within the meaning of the limitations imposed by 10 U.S.C. 2306(d).

(2) *Contractor Investment Protection.* If formally agreed to by the parties, this incentive would become operative in the event that the contract or program is terminated or funds are not provided in subsequent fiscal years for the planned acquisition upon which the investment decision was based. This incentive may permit the Government to acquire specific capital investments at no more than the undepreciated value. This value may be determined by considering a combination of investment incentives, income tax credits or incentives, and allowable depreciation costs pursuant to cost principles established in FAR Part 31. The scope and limitations are as follows:

(i) This technique is designed to transfer to the Government some of the risk associated with acquisition of certain capital assets by contractors. Its purpose is to cover only specifically identified cost-effective capital assets. It is not to be used to override the general policy that all facilities needed for the performance of Government contracts will be provided by the contractor as set forth in FAR Part 45.

(ii) This investment incentive is designed primarily for the situation when one program dominates the business base and the contractor may bear unacceptable monetary risk from the modernization effort. The program must provide for a sufficient buy to

allow for amortization of the planned investment.

(iii) Capital assets which may be covered by such an investment incentive include only severable industrial plant equipment, and other types of severable plant equipment with a unit value in excess of $10,000, including associated accessories which would be capitalized in accordance with the contractor's disclosed accounting practices, but excluding real property.

(iv) The exact value and nomenclature of each piece of capital equipment must be included in the contract documents.

(v) The fiscal authority who commits funds to the resultant contract must certify that the approval authority has approved by fiscal year the amount of contingent Government liability and that the approval authority has notified the Congress in advance that the technique will be used on contracts for a specific weapon system or material program element. Unless there are unusual circumstances, this notification will be included in the justification material submitted to the Congress in support of authorization and appropriation requests. A copy of the notification shall be retained in the contract file.

(vi) Approval for use of this investment incentive must be obtained from the Secretary of the Military Departments or the Director of DLA. Authority up to $50 million may be delegated no lower than the Commander, AFSC, AFLC, ONAS, or AMC.

(vii) In the event that it becomes apparent that the contingent liability resulting from the use of this technique will become an actual obligation, the approval authority shall be notified and immediate steps shall be taken to obtain sufficient funds to cover the obligation.

(3) *Other appropriate incentives.* Other incentives such as award fees, direct Government funding, and the productivity reward factor under the weighted guidelines, based on IMIP methodologies, may be provided under IMIP when appropriate.

(c) *Contracting Officer Evaluation.* The contracting officer must evaluate the proposed IMIP agreement to determine that benefits to the U.S. Government can be expected. A contractor statement that the investments or actions would not be undertaken without, or will be accelerated with, the use of the incentive may be required. The evaluation should include the following elements:

(1) A cost/benefit analysis of the investment or action and the overall cost savings or other benefits to the Government, including the payback quantities and payback periods and how the savings will be reflected in the pricing of individual contracts.

(2) An analysis of the contractor's past investments and capital investment profiles, and the relationship of specific projects to the contractor's factory analysis.

(3) Other considerations such as:

(i) Interaction with other incentives provided on the contract.

(ii) Effects of variations in procurement quantities on the incentives.

(iii) How the incentive techniques are integrated with the overall acquisition strategy, including items such as second sourcing plans and multiyear procurement.

(iv) Effects on overhead and indirect costs.

(d) *Negotiation.* (1) The Government objective should be to provide only those incentives sufficient to motivate the contractor to implement the desired investment or action. Ceiling should normally be provided to establish a maximum incentive amount.

(2) Emphasis should be placed on flowing down requirements or involvement to subcontractors and vendors where appropriate.

(3) Provisions should be provided establishing the extent to which the contractor may use equipment for commercial purposes. This should be reflected in the amount of incentive provided.

(4) The extent of disclosure or dissemination of technologies or processes contained in the IMIP are subject to negotiation and agreement.

(e) *Contractual requirements.* (1) Specific contract requirements should be structured to match the circumstances of the individual acquisition.

(2) Measurement and verification requirements should be addressed contractually, and systems established that match the incentives used and the needs in this area. Contractors should be required to develop, maintain, and provide data supporting any measurement of savings achieved.

(f) *Contract clause.* The contracting officer shall include the clause at 252.215–7001, "IMIP Productivity Savings Reward", in all solicitations involving the acquisition of supplies (i.e., weapon systems, equipment, and material) expected to result in contracts or contract modifications greater than $1 million. The clause is discretionary for inclusion in solicitations less than $1 million. Inclusion of the clause does not in itself result in the payment of any productivity savings reward amounts to the contractor—the clause becomes operable only when an IMIP business agreement has been executed establishing all the terms and conditions for payment of the productivity savings rewards.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Section 252.215–7001 is added to read as follows:

252.215–7001 IMIP Productivity Savings Rewards.

As prescribed at § 215.872(f), insert the following clause: IMIP PRODUCTIVITY SAVINGS REWARDS (1986).

(a) *Purpose.* The purpose of this clause is to permit a contractor to be paid Productivity Savings Rewards (PSR) in accordance with the terms and conditions of an Industrial Modernization Incentives Program (IMIP) business agreement contained in this contract or which benefits this contract. PSR constitutes the Contractor's incentives paid from the total DoD net benefits (savings/cost avoidances).

(b) *Applicability.* This clause provides conditions for payment of the PSR amount applicable to this contract pursuant to the provisions of the IMIP business agreement. Inclusion of this clause in this contract does not in itself result in the payment of any PSR amounts to the Contractor. This clause shall become operable only when an IMIP business agreement has been established and placed in an IMIP contract, or incorporated into this contract, including all of the terms and conditions for payment of the PSR, the total amount of the PSR, and specifying that this total amount has not been earned through previous contracts. This agreement may be directly between DoD and the Contractor, or between the Contractor and a lower-tier DoD Contractor; *Provided,* DoD approval has been obtained for the subcontract program.

(1) *Payment.* The Contracting Officer is authorized to approve payment of PSR amounts under this contract during the sharing period as defined in the IMIP business agreement. PSR amounts may be calculated and paid through a protected sharing, a sharing factor, or other approach as agreed to in the IMIP business agreement. The amount of PSR allocable to this contract along with the frequency of payment will be determined in accordance with the terms and conditions of the IMIP business agreement. When these conditions are met and verified, as determined by the Contracting Officer,

the Contractor shall be paid PSR amounts on this contract. The Contractor or subcontractor shall keep records acceptable to the Contracting Officer of all PSR payments received under a specific IMIP business agreement. The Contractor is authorized to request payment of PSR in accordance with terms specified in the IMIP business agreement.

(2) *Sharing Factor Certification.* When a sharing factor approach is used, the Contractor shall include the following certification on each invoice for payment of a PSR share:

It is hereby certified that the PSR amount requested on this invoice represents an incremental share of the total PSR amount agreed to in the IMIP Business Agreement or this contract Dated, ——————— between the Government and , for which no entitlement has been previously paid. ———————

(3) *Subcontract Applicability.* The Contractor shall include this clause (suitably modified, except for the certification requirement, to meet the circumstances of the subcontract concerned), and shall provide payment of PSR amounts for any subcontract wherein the subcontractor is participating in a DoD-approved IMIP business agreement. All subcontractor cost/price reductions attributable to an IMIP after establishment of the PSR shall be directly and entirely passed through to the Government.

(End of clause.)

BILLING CODE 3810-01-M

Notices

Federal Register
Vol. 51, No. 102
Wednesday, May 28, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

Housing Demonstration Program; Acceptance of Proposals

AGENCY: Farmers Home Administration, USDA.

ACTION: Notice of Housing Demonstration Program.

SUMMARY: Notice is hereby given that effective on the date of this published notice, the Farmers Home Administration (FmHA) of the U.S. Department of Agriculture (USDA) will accept proposals for the initiation of the section 502 Housing Demonstration Program as authorized by Title V 1949 Housing Act, as amended. Section 506(b). Under this section of the Act, FmHA may provide funding for innovative housing units and systems which do not meet existing published standards, rules, regulations, or policies. The Congress of the United States made two conditions: (1) That the health and safety of the population of the areas in which the demonstrations are carried out will not be adversely affected, and (2) that the aggregate expenditures for the demonstration may not exceed $10,000,000 in any fiscal year.

FOR FURTHER INFORMATION CONTACT: Mathies J. Felber, Branch Chief, Special Programs Branch, Single Family Housing Processing Division, Farmers Home Administration, 14th and Independence Avenues, SW., Room 5343, South Building, Washington, DC 20250, Telephone 202-382-1543 or Cliff J. Herron, Senior Loan Officer, Special Programs Branch, Single Family Housing Processing Division, Farmers Home Administration, 14th and Independence Avenues, SW., Room 5343, South Building, Washington, DC 20250, Telephone 333-382-1484.

SUPPLEMENTARY INFORMATION: The primary objective of the demonstration is to increase the availability of affordable housing for low-income families, through innovative designs and systems. Under current standards, rules, regulations, and policies many low-income rural families lack sufficient incomes to afford adequate housing.

To expedite the demonstration, Farmers Home Administration State Directors are authorized to accept proposed demonstration concept plans and specifications from nonprofits, profit organizations and individuals. The State Directors will evaluate the proposals and make recommendations to the National Office.

Approximately 300 units will be funded for this fiscal year. Proposal concepts will be evaluated by FmHA on a first-come first-served basis. Each state will initially have a demonstration set aside of approximately $180,000. However, the National Office reserves the right to make appropriate adjustments to the initial appropriation as it deems necessary. Funding is available for fiscal year 1986 only, and any future commitments are based upon availability of funds.

This program activity is listed in the Catalog of Federal Domestic Assistance under No. 10.410. For the reasons set forth in Final Rule related to Notice 7 CFR 3015, Subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940-J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), this program/activity is excluded from the scope of Executive Order 12372 which requires the intergovernmental consultation with state and local officials.

All interested parties must make a written request for a proposal package. The request must be made to the State Director in the state in which the proposal will be submitted for evaluation. The government will not reimburse or be liable for any expenses incurred by respondents in the development and submission of applications. Following is a list of State Directors and their addresses.

State and Address

Alabama

State Director, Farmers Home Administration, Room 717, Arnaov Building, 474 South Court Street, Montgomery, Alabama 36104

Alaska

State Director, Farmers Home Administration, Post Office Box 1289, Palmer, Alaska 99720

BILLING CODE 3410–07–M

Soil Conservation Service

Adaman Farm Irrigation Measure, Arizona; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Adaman Farm Irrigation Measure, Maricopa County, Arizona.

FOR FURTHER INFORMATION CONTACT: Verne M. Bathurst, State Conservationist, USDA Soil Conservation Service, 201 East Indianola Avenue, Suite 200, Phoenix, AZ 85012, Telephone (602) 241–2247.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federal action indicates that the exchange will not cause significant local, regional or national impacts on

the environment. As a result of these findings, Verne M. Bathurst, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this measure plan.

This activity concerns the on-going efforts of area farmers to limit groundwater use by lining canals and taking advantage of available surface water. The use of groundwater causes land subsidence and is very expensive. This measure will reduce subsidence and will improve the profit potential of the benefited farms. Approximately two and one-half miles of earthen ditch will be concrete lined.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available at the above address to fill single copy requests. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Verne M. Bathurst.

No administrative action on implementation of this measure plan will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development, and is subject to the provision of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: May 19, 1986.

Verne M. Bathurst,

State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

International Trade Administration

Applications for Duty-Free Entry of Scientific Instruments; Cornell University, et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with §§ 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-197. Applicant: Cornell University, Department of Geological Sciences, Snee Hall, Ithaca, NY 14853-1504. Instrument: Mass Spectrometer, Model VG Sector with Accessories. Manufacturer: VG Isotopes Ltd., United Kingdom. Intended use: The instrument is intended to be used for the study of naturally occurring geologic materials, include isotopic compositions and trace element abundances. These studies will involve isotopic composition of radiogenic elements in rock and mineral specimens, primarily of terrestrial origin. Elements of interest will be separated chemically from the rock/mineral and from each other and their isotopic compositions measured by the mass spectrometer. Application received by Commissioner of Customs: April 30, 1986.

Docket No. 86-201. Applicant: The Solomon R. Guggenheim Foundation, 223 Broadway, New York, NY 10279. Instrument: Light Microscope with Accessories. Manufacturer: Carl Zeiss, West German. Intended use: The instrument is intended to be used for investigations of paint polymers, papers and fabrics incorporated in modern art works. The study will have great educational benefits by providing the public with additional information about the art they are viewing, and by providing them with greater insight into the artistic process. In addition, graduate students in the laboratory will use the instrument while learning basic techniques of microscopy and its application to the conservation process. Application received by Commissioner of Customs: May 2, 1986.

Docket No. 86-202. Applicant: Mount Sinai School of Medicine, One Gustave L. Levy Place, New York, NY 10029. Instrument: Laser Microprobe Mass Analyzer. Manufacturer: Leybold-Heraeus GmbH, West Germany. Intended use: The instrument is intended to be used for trace element analysis of biomedical tissues during investigations of pathogenetic mechanisms of disease states. Application received by Commissioner of Customs: May 5, 1986.

Docket No. 86-203. Applicant: Brigham Young University, Chemistry Department, Business Office, 105 NICB, Provo, UT 84602. Instrument: Annular Diffusion Denuder with Accessories. Manufacturer: Gruppo Flow S.P.A., Italy. Intended use: The instrument is intended to be used for characterization of nitric acid chemistry in the plume of gasfired power plant with emphasis on chemistry in the ambient environment. The primary educational benefits will relate to Chemistry 597, Research Techniques, for about 10 to 12 graduate students. Application received by Commissioner of Customs: May 5, 1986.

Docket No. 86-205. Applicant: Yale University School of Medicine, Department of Molecular Biophysics and Biochemistry, P.O. Box 6666, New Haven, CT 06511. Instrument: Small Animal NMR Spectrometer/Imager, Model Biospec 300/4.7T. Manufacturer: Oxford Research Systems, United Kingdom. Intended use: The instrument is intended to be used for metabolic studies on living animals. Methods for acquiring 13C and 1H spectra from brain, heart, liver and kidney of living animals will be the most important of these studies. Techniques in nuclear magnetic resonance spectroscopy will be developed and used for the following:

(1) Investigation of cerebral metabolism in the brains of living rabbits.

(2) Investigation of renal metabolism, in the rat, *in vivo*.

(3) Determination of the stoichiometric relationship between sodium transport and energy utilization in the mammalian kidney.

(4) Quantitation of the *in vivo* rates of hearts glycogen synthesis and breakdown in both normal and diabetic animals.

In addition, the instrument will be used for an occasional demonstration in courses on NMR in medicine. Application received by Commissioner of Customs: May 5, 1986.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Frank W. Creel,

Director, Statutory Import Programs Staff.

Exporters' Textile Advisory Committee; Open Meeting

A meeting of the Exporters' Textile Advisory Committee will be held on June 24, 1986 at 2:30 P.M. to 4:30 P.M., in Room 406 of the Princeton Club, 15 West 43rd Street, New York City. The Committee provides advice about ways to promote increased exports in U.S. textiles and apparel.

Agenda: Review of export data; report on conditions in the export market; recent foreign restrictions affecting

textiles; export expansion activities; and other business.

The meeting will be open to the public with a limited number of seats available. For further information or copies of the minutes, contact Helen LaGrande (202) 377–3737.

Dated: May 20, 1986.

William H. Houston III,

Deputy Assistant Secretary for Textiles and Apparel.

National Oceanic and Atmospheric Administration

Gulf of Mexico Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico Fishery Management Council will convene separate public meetings of its Mackerel Management and Swordfish Management Committees as follows:

Mackerel Management Committee will convene June 10–11, 1986, to discuss development of the Mackerel Fishery Management Plan (FMP) Amendment Options Paper for proposed amendments to the Mackerel FMP. The meeting will be held in the Gulf of Mexico Fishery Management Council's conference room, Suite 881, Lincoln Center, 5401 West Kennedy Boulevard, Tampa, FL; telephone: (813) 228–2815.

Swordfish Management Committee will convene June 17, 1986, to review data and conclusions of the Swordfish Working Panel and to recommend to the South Atlantic Fishery Management Council, on behalf of the Gulf of Mexico Council, a seasonal closure and other actions to protect undersized swordfish in the Gulf of Mexico. The meeting will be held at the Holiday Inn, Route 9, Highway 49 and I–10, Gulfport, MS.

FOR FURTHER INFORMATION CONTACT: Wayne Swingle, Executive Director, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL; telephone: (813) 228–2815.

Dated: May 21, 1986.

Richard B. Roe, Director,

Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Gulf of Mexico Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico Fishery Management Council and its Committees will convene public meetings at the Holiday Inn, 495 Brickell Avenue, Miami, FL, as follows:

Council will review the Mackerel Fishery Management Plan (FMP) Amendment Options Paper; review public comment and take final action on the Spiny Lobster FMP, amendment as well as discuss federal and state management of the red drum fishery; will convene July 9 and 10, 1986, at 8:30 a.m. and recess at 5 p.m., both days; reconvene July 11, at 8:30 a.m. and adjourn at noon.

Committees will convene July 7, at 1 p.m. with an Intercouncil (Gulf of Mexico and South Atlantic Fishery Management Councils) Spiny Lobster Management Committee meeting, and recess at 5 p.m.; reconvene July 8 at 8 a.m. and adjourn at noon.

Subsequent to the above Intercouncil Spiny Lobster Management Committee meeting, other Council Committees also will convene: Budget Committee from 1 p.m. to 3 p.m.; Reef Fish Committee from 3 p.m. to 3:30 p.m., and the Mackerel Management Committee, from 3 p.m. to 5 p.m.

FOR FURTHER INFORMATION CONTACT: Wayne E. Swingle, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL; telephone: (813) 228–2815.

Dated: May 21, 1986.

Background

A CITA directive dated May 27, 1983 (48 FR 25257), as amended, established a new export visa requiement and exempt certification for certain cotton textiles and cotton textile products and man-made fiber work gloves in Category 631 pt. (only TSUSA numbers 704.3215, 704.8525, 704.8550, and 704.9000), produced or manufactured in Pakistan. The Goverments of the United States and Pakistan have exchanged letters further amending the visa arrangement, effective on May 29, 1986, to provide for the use of a new visa form, which will be the Special Customs Invoice Form 5515, printed on green guilloche patterned background paper for merchandise exported on and after December 31, 1985.

The visa and certification stamps are not being changed at this time. In the following letter, the Chairman of CITA

BEST COPY AVAILABLE

directs the Commissioner of Customs to permit entry of the previously designated cotton and man-made fiber textile products visaed using the new form.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of textile agreements

May 22, 1986.

Commissioner of Customs
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of May 27, 1983, as amended, which established an export visa requirement for certain cotton and man-made fiber textile products, produced or manufactured in Pakistan.

Effective on May 28, 1986, the Government of Pakistan will use a new visa form which will be the Special Customs Invoice Form 5515, printed on green guilloche patterned background paper for merchandise currently subject to the export visa requirement, exported on and after December 31, 1985.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Export Visa Requirement for Additional Cotton and Wool Textile Products Produced or Manufactured in the Republic of Uruguay

May 22, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 1, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

Effective on June 1, 1986, pursuant to the terms of the visa and exempt certification mechanism established under the Bilateral Textile Agreement of December 30, 1983 and January 23, 1984, between the Governments of the United States and the Republic of Uruguay, as amended, export visas will be required for women's, girls' and infants' cotton coats in Category 335, men's and boys' wool coats in Categories 433 and 434, and wool skirts in Category 442, in addition to those categories previously designated, e.g., Categories 410, 435 and 444. (See 50 FR 6232.) The new requirement will be effective for goods in the foregoing categories, exported on and after June 1, 1986. Textile products in these categories, exported before June 1, 1986, will not be denied entry, or withdrawal from warehouse for consumption in the United States for lack of a visa.

The visa stamp and officials authorized to issue visas for the Government of the Republic of Uruguay are not being changed at this time.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 22, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of February 8, 1985, which directed you to prohibit entry of certain specified categories of wool textile products, produced or manufactured in Uruguay and exported on and after January 1, 1985.

Effective on June 1, 1986, the directive of February 8, 1985 is hereby amended to require export visas for cotton and wool textile products in Categories 335, 433, 434, and 442, produced or manufactured in Uruguay and exported on and after June 1, 1986. Merchandise in these categories which has been exported before June 1, 1986 shall not be denied entry for lack of a visa.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With Czechoslovakia Concerning Category 443

May 22, 1986.

On April 29, 1986, the United States Government, under Article 3 of the Arrangement Regarding International Trade in Textiles and the Agreement Regarding Trade in Textiles and Consultations on Market Disruption of March 22 and March 28, 1977, requested consultations with the Government of the Czechoslovak Socialist Republic concerning exports to the United States of men's and boys' wool suits in Category 443, produced or manufactured in Czechoslovakia.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations with Czechoslovakia, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of such products, produced or manufactured in Czechoslovakia and exported to the United States during the twelve-month period which began on April 29, 1986 and extends through April 28, 1987 at a level of 4,401 dozen.

A summary market statement concerning this category follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 443 or on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. William H. Houston III, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly.

Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

COPY AVAILABLE

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect to the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Czechoslovakia—

Market Statement—Category 443—Men's and Boys' Wool Suits

April 1986.

Summary and Conclusions

U.S. imports of Category 443 from Czechoslovakia were 5,039 dozens during year-ending February 1986, almost three times the number imported in year-ending February 1985.

The substantial increase of low-valued Category 443 imports from Czechoslovakia is contributing to the disruption of the U.S. market for men's and boys' wool suits.

U.S. Production and Market

U.S. production of wool suits declined 9 percent between 1981 and 1983. Production rose slightly in 1984 to 285,000 dozens, but remained 3,000 dozens below the level of 1981. Production data for 1985 are not currently available, however industry sources estimate a substantial decline in production.

During the 1981–1984 period, the market for men's and boys' wool suits expanded by 84,000 dozens. However, the U.S. producers' share of the market steadily eroded. In 1981, the domestic share accounted for 71 percent of the market, but by 1984 their share had dropped to 58 percent.

U.S. Imports and Import Penetration

U.S. imports of Category 443 grew from 115,000 dozens in 1981 to 202,000 dozens in 1984, a 76 percent increase. Imports continued to grow in 1985, increasing 4 percent to 209,000 dozens. The ratio of imports to domestic production rose from 40 percent in 1981 to 71 percent in 1984.

Import and Domestic Values

Approximately 96 percent of Czechoslovakia's 1985 imports of Category 443 entered under TSUSA No. 381.8359 (previously 379.8359)—men's and boys' wool suits over 4 U.S. dollars per pound, not knit or ornamented. These garments enter the U.S. at landed duty-paid values below the U.S. producers' price for comparable items.

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With the Government of Japan To Review Trade in Categories 314, 341/361 and 613

May 22, 1986.

On April 30, 1986, the Government of the United States, under Article 3 of the Arrangement Regarding International Trade in Textiles, requested consultations with the Government of Japan with respect to cotton poplin and broadcloth in Category 314, women's girls' and infants' cotton and man-made fiber woven blouses and shirts in Category 341/641, and spun noncellulosic fabric in Category 613, produced or manufactured in Japan.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations between the two governments, the Committee for the Implementation of Textile Agreements may later establish limits for the entry and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 314, 341/641 and 613, produced or manufactured in Japan and exported to the United States during the twelve-month period which began on April 30, 1986 and extends through April 29, 1987 of 17,369,414 square yards (Category 314), 466,528 dozen (Category 341/641), and 16,952,306 square yards (Category 613).

Summary market statements concerning these categories follow this notice.

Anyone wishing to comment or provide data or informaton regarding the treatment of these categories, or to comment on domestic production of availability of textile products included in the categories, is invited to submit such comments or information in ten copies to Mr. William H. Houston III, Chairman, Committee for the Implementation of textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile agreement considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Japan—Market Statement

Category 314—Cotton Poplin and Broadcloth

April 1986.

Summary and Conclusions

United States imports of cotton poplin and broadcloth—Category 314—from Japan were 18.5 million yards for the year ending February 1986. This compares with 17.5 million yards for the same period one year earlier. Japan was the largest supplier, accounting for 23.7 percent of the YE February 1986 imports.

The market for Category 314 is being disrupted by imports and imports from Japan contributed to the market disruption. Continuation of the growth of imports from Japan would further the disruption.

Production and Market Share

U.S. production of cotton poplin and broadcloth continued its sharp decline from its 1983 level. Production in 1984 declined 10.5 percent from it's 1983 level and experienced an additional 12.5 percent decline in 1985.

The U.S. producers share of the market for domestically produced and imported fabric dropped from 63 percent in 1983 to 50 in 1984 percent. The domestic producers market share in 1985 was further reduced and represented only 48 percent.

Imports and Import Penetration

U.S. imports of Category 314 from all sources attained their highest levels ever in 1984 and 1985 at 73.4 and 71.2 million square yards, respectively. The 1985 level was 45 percent above the 1983 level. Imports continued reaching record levels increasing to 77.9 million square yards for year ending February 1986.

The ratio of imports to domestic production increased from 59.7 percent in 1983 to 99.4 percent in 1984, and reached 110.1 percent in 1985.

Import Values

Approximately 55 percent of Japan's Category 314 imports are entered under TSUSA's 322.2923, 322.3923, and 322.4923. These are cotton colored poplin/broadcloth not over 5.9 oz. per square yard of 20 to 40 yarn count. The landed duty-paid import values of these fabrics from Japan are near those of other low cost major suppliers.

Japan—Market Statement

Categories 341/641—WGI Cotton and Man-made Fiber Woven Blouses

April 1986.

Summary and Conclusions

U.S. imports of categories 341/641 from Japan were 489,000 dozens during year-ending February 1986, 32 percent greater than the 371,000 dozens imported during year-ending February, 1985. Full year 1985 imports

from Japan totaled 426,000 dozens, compared with 378,580 dozens in 1984.

The sharp and substantial increase of low valued categories 341/641 imports from Japan are disrupting the U.S. market for WCI cotton and man-made fiber woven blouses.

U.S. Production and Market Share

After rising in 1983, U.S. production declined 7 percent in 1984 to 25.8 million dozens.

Industry sources have indicated that production continued to fall in 1985. U.S. production worker employment in the women's, misses', and juniors' blouse manufacturing industry declined 4.5 percent in 1985.

Between 1982 and 1984 the U.S. market expanded by 5.6 million dozen. However, the U.S. producers' share of the market declined from 67 percent in 1982 to 61 percent in 1984.

U.S. Imports and Import Penetration

U.S. imports of Categories 341/641 increased 36 percent between 1982 and 1984. Imports continued to increase in 1985, rising an additional 27 percent to 20.7 million dozens. The import to production ratio correspondingly rose from 49 percent in 1982 to 94 percent in 1984.

Duty-Paid Values and U.S. Producer Price

Approximately 79 percent of the recent Categories 341/641 imports from Japan entered under the following two TSUSA Numbers: (Category 341) 384.4809—women's other cotton blouses, not knit, not ornamented, nspf; (Category 641) 384.9115—women's man-made fiber blouses and shirts, not knit, not ornamented. These garments entered the U.S. at landed, duty-paid values below U.S. producers' prices for comparable garments.

Japan—Market Statement

Category 613—Spun Noncellulosic Fabrics

April 1986.

Summary and Conclusions

U.S. imports of Category 613 from Japan were 17.1 million square yards during year ending February 1986, up 12.8 percent from a year earlier. Over a third of the imports from Japan were lightweight, plainweave polyester/cotton fabrics. These Japanese imports increased 48 percent during the year ending February 1986. In 1985, the lightweight plainweave polyester/cotton fabric portion of Category 613 has a ratio of imports to domestic production of 197.1 percent. For the entire Category 613, domestic production declined over 30 percent in 1985 and imports equaled about 4 percent of U.S. production.

The substantial increase in imports of Category 613 from Japan disrupted the U.S. market for such fabrics.

Production

U.S. production of Category 613 increased in 1984 but dropped sharply in 1985. Market conditions during the last half of 1985 were slack. Production in the third and fourth quarters of 1985 for both the category as a whole and lightweight plain weave polyester/cotton fabric were well below comparable period 1984 production.

Domestic production of lightweight, plainweave polyester/cotton fabric declined 34 percent in 1985.

Imports

U.S. imports of Category 613 increased sharply over the 1982/1985 period, rising from 104 million square yards to 189 million square yards.

Imports of lightweight plainweave polyester/cotton fabrics increased from 80 million square yards in 1984 to 116 million in 1985. These imports were equal to domestic production in 1984 and nearly double 1985 domestic production.

Import Penetration

The ratio of imports to domestic production for Category 613 doubled over a two year period, rising from 1.9 percent in 1983 to 3.9 percent in 1985. The imports of lightweight plainweave polyester/cotton fabrics were nearly equal to domestic production in 1984 and nearly double the 1985 production.

Import Values and U.S. Producer Prices

Japan is a low cost supplier of Category 613 fabrics. TSUSA Numbers 338.3902 and 338.3943 are typical lightweight polyester/cotton plainweave fabrics imported from Japan. The duty-paid import value of these fabrics from Japan are near those of other low-cost major suppliers.

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With the Government of Sri Lanka To Review Trade in Category 644

May 22, 1986.

On April 29, 1986, the Government of the United States requested consultations with the Government of Sri Lanka with respect to man-made fiber textile products in Category 644 (women's, girls' and infants' suits). This request was made on the basis of the agreement between the Governments of the United States and Sri Lanka of May 10, 1983, as amended, relating to trade in cotton, wool and man-made fiber textile products. The agreement provides for consultations when imports, due to market disruption, or the threat thereof, threaten to impede the orderly development of trade between the two countries.

The Government of the United States has decided, pending a mutually satisfactory solution, to control imports in Category 644 exported during the 90-day consultation period which began on April 29, 1986 and extends through July 27, 1986 at the prescribed limit of 4,332 dozen.

According to the terms of the bilateral agreement, if no mutually satisfactory solution is reached during consultations, the United States may establish a prorated specific limit covering the current agreement year, which ends May 31, 1986. According to the terms of the bilateral agreement, if no solution is reached during consultations, the United States also may establish a twelve month specific limit covering the subsequent agreement year.

In the event the limit established for the ninety-day period is exceeded, such excess amount, if allowed to enter, may be charged to the limit established during the subsequent restraint period.

The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Sri Lanka, further notice will be published in the Federal Register.

A summary market statement for this category follows this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

Anyone wishing to comment or provide data or information regarding the treatment of Category 644 under the agreement with Sri Lanka, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. William H. Houston III, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Sri Lanka—Market Statement

Category 644—WGI Man-made Fiber Suits

April 1986.

Summary and Conclusions

U.S. imports of Category 644 from Sri Lanka were 16,000 dozens during year-ending February 1986, a four fold increase over the number imported in year-ending February, 1985. During the first two months of 1986, 6,000 dozens were imported, compared with zero trade for the same period in 1985.

The rapid increase of Category 644 imports from Sri Lanka is contributing to the disruption of the WGI man-made fiber suit market.

U.S. Production and Market Share

U.S. production of Category 644 has steadily declined. In 1984, production fell 5 percent from 890,000 dozens to 850,000 dozens. This trend continued into 1984 declining another 18 percent to 695,000 dozens.

After expanding by 136,000 dozens in 1983, the U.S. market for WGI man-made fiber suits declined by 113,000 dozens in 1984. The U.S. producers' share of this market shrunk in both years from 79 percent in 1982 to 67 percent in 1983 to 60 percent in 1984.

U.S. Imports and Import Penetration

U.S. imports of Category 644 increased 21 percent from 394,000 dozens during year-ending February, 1985 to 478,000 dozens during year-ending February, 1986. During the first two months of 1986, world imports were 130,000 dozens, 71 percent greater than in the same period a year earlier. The import to production ratio increased from 27.1 percent in 1982 to 68.0 percent in 1984.

Domestic and Import Values

Approximately 80 percent of Category 644 imports from Sri Lanka entered under TSUSA No. 384.9162 (previously 383.9062)—women's, girls' and infants' and other man-made fiber suits, not knit, not ornamented. These garments entered the U.S. at landed, duty-paid values below U.S. producers' prices for comparable items.

Committee for the Implementation of Textile Agreements

May 22, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, as amended, between the Governments of the United States and Sri Lanka; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 29, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 644, produced or manufactured in Sri Lanka and exported during the ninety-day period which began on April 29, 1986 and extends through July 27, 1986, in excess of the following limit:

Category	90 day limit [1]
644	4,922 dozen.

[1] The limit has not been adjusted to account for any imports exported after April 28, 1986.

Textile products in Category 644 which have been exported to the United States prior to April 29, 1986 shall not be subject to this directive.

Textile products in Category 644 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607) December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754, November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86-11912 Filed 5-27-86; 8:45 am]

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With the Government of Turkey on Categories 341 and 369-S

May 22, 1986.

On April 28, 1986, the United States Government, under Article 3 of the Arrangement Regarding International Trade in Textiles, requested the Government of Turkey to enter into consultations concerning exports to the United States of women's, girls' and infants' cotton blouses in Category 341 and cotton shop towels in Category 369-S (T.S.U.S.A. 366.2040), produced or manufactured in Turkey.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations with Turkey the Committee for the Implementation of Textile Agreements may later establish limits for the entry and withdrawal from warehouse for consumption of women's, girls' and infants' cotton blouses in Category 341 and cotton shop towels in Category 369-S, produced or manufactured in Turkey and exported to the United States during the twelve-month period which began on April 28, 1986 and extends through April 27, 1987 at levels of 311,376 dozen (Category 341) and 971,962 pounds (Category 369-S).

Summary market statements for these categories follow this notice.

Anyone wishing to comment or provide data or information regarding the treatment of these categories is invited to submit such comments or information in ten copies to Mr. William H. Houston III, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textile and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any aspect of the exemption contained in 5 U.S.C. 533(a)(1) relating

to matters which constitute "a foreign affairs function of the United States."

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Turkey—Market Statement

Category 341—WGI Cotton Woven Blouses

April 1986

Summary and Conclusion

U.S. imports of Category 341 from Turkey were 342,353 dozens during year-ending February 1986, more than four times the number imported in year-ending February 1985. During calendar year 1985, 251,669 dozens were imported from Turkey, compared to 46,308 a year earlier.

The sharp and substantial increase of low-valued Category 341 imports from Turkey is disrupting the U.S. market for WGI cotton woven blouses. Category 341 imports from Turkey must be controlled before further injury is sustained.

U.S. Production and Market Share

After rising in 1982 and 1983, U.S. production leveled off in 1984 at 7,050,000 dozens, only 2 percent above the 1983 level. Betwen 1982 and 1984, the market for WGI cotton blouses grew by 3,966,000 dozens, however, the U.S. producers' share of this market dropped from 46 percent to 42 percent as imports grew faster.

U.S. Cutting Data

Production data for 1985 are not currently available, however, government cuttings data are reported. These data show cuttings of women's blouses [1] down 16 percent in 1985 compared to the previous year.

Employment Data

Government sources report that in 1985, total employment in the women's and misses' blouse and waist industries (SIC 2331) fell 2.6 percent. The decline in production worker employment was more severe, 4.3 percent, and the average manhours worked fell 4.0 percent.

U.S. Imports and Import Penetration

U.S. imports of Category 341 increased 41 percent between 1982 and 1984, rising from 6,852,000 dozens to 9,628,000 dozens. This upward trend continued into 1985 as imports reached 11,376,000 dozens, an 18 percent increase over the 1984 level. The import to production ratio increased from 117 percent in 1982 to 137 percent in 1984.

Duty-Paid Value and U.S. Producer Price

Approximately 72 percent of Category 341 imports from Turkey during 1985 entered under TSUSA No. 384.4609 (previously 383.4709)—women's other cotton woven blouses, not ornamented. These garments entered at landed, duty-paid values below U.S. producers' prices for comparable blouses.

[1] Cuttings data are for cotton, wool and man-made fiber blouses and include both wovens and knits, excluding knit tops.

Turkey—Market Statement

Category 369 Part—Cotton Shop Towels

April 1986.

Summary and Conclusions

During the first two months of 1986, U.S. imports of cotton shop towels—Category 369 Pt.—from Turkey were 388,000 pounds. This was more than half the amount imported from Turkey in calendar year 1985. This is a sharp and substantial increase of imports in a sector already adversely affected by imports. Turkey was the largest supplier of cotton shop towels, accounting for 28 percent of the total imports in 1985.

U.S. Market

The U.S. cotton shop towel market is adversely affected by imports. The U.S. producer's share of the market for domestically produced and imported cotton shop towels in 1985 was 48 percent compared with 59 percent in 1981. The U.S. market for shop towels was disrupted by imports in 1985. The market continues to be disrupted by imports in 1986 and Turkey's position as a major supplier of these towels makes it a major contributor to the market disruption.

U.S. Production

U.S. production of cotton shop towels declined from 162 million units in 1981 to 125 million units in the 1982 recession year, a decrease of 22 percent. Production regained some of the loss in 1983 and 1984, reaching a level of 138 million units in 1984, up 10 percent over the 1981 recession level, but 15 percent below the 1982 level and lower than any level on record prior to 1982. Production in 1985 was 131 million units, down 5 percent from 1984.

U.S. Imports

U.S. imports of Category 369 Pt., after remaining relatively flat at 94 million units during 1982 and 1983 due in part to the soft domestic market and the antidumping and countervailing duty actions initiated by the United States with specific major suppliers, increased substantially in 1984. Imports in 1984 soared to a record high of 156 million units. Although imports in 1985 were down, due to the imposition of limits on two major suppliers, import penetration continues at the same high rate as in 1984.

Import Penetration

The ratio of imports to domestic production increased from 69 percent in 1982 to 106 percent in 1985.

Import Value

Imports from Turkey are entered under TSUSA No. 366.2740-cotton shop towels, other than pile or tuft construction. The duty-paid landed value of these imports from Turkey are below the U.S. producer price for comparable towels.

BILLING CODE 3510-DR-M

Import Limits for Certain Cotton and Man-Made Fiber Apparel Products Exported From the Dominican Republic

May 22, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 1, 1986. For further information contact Ann Fields, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 30, 1983 between the Governments of the United States and the Dominican Republic establishes specific limits for Categories 340 (men's and boys' woven cotton shirts), 351 (pajamas and other nightwear), 639 (women's, girls, and infants' knit shirts of man-made fibers), 644 (women's, girls' and infants' suits of man-made fibers), and 649 (brassieres of man-made fibers), exported during the agreement year beginning on June 1, 1986 and extending through May 31, 1987. The following letter directs the Commissioner of Customs to prohibit entry for consumption and withdrawal from warehouse for consumption in the United States of textile products in the forgoing categories in excess of the designated restraint limits.

A description of the textile categories in terms of T.S.U.S.A. members was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

This letter and the actions taken purusant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to

assist only in the implementation of certain of its provisions.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 22, 1986.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 30, 1983, between the Governments of the United States and the Dominican Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 1, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 340, 351, 639, 644, and 649, produced or manufactured in the Dominican Republic and exported during the twelve-month period beginning on June 1, 1986 and extending through May 31, 1987, in excess of the following restraint limits:

Category	12-mo. limit [1]
340	196,007 dozen.
351	465,716 dozen.
639	442,561 dozen.
644	49,771 dozen.
649	2,200,330 dozen.

[1] The restraint limits have not been adjusted to reflect any imports exported after May 31, 1986.

In carrying out this directive, entries of textile products in the foregoing categories, produced or manufactured in the Dominican Republic, which have been exported to the United States during the period which began on June 1, 1985 and extended through May 31, 1986, shall, to the extent of any unfilled balances, be charged against the restraint limits established for such goods during that twelve-month period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the limits set forth in this letter.

The limits set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of December 30, 1983, between the Governments of the United States and the Dominican Republic which provide, in part, that: (1) Specific limits may be exceeded by designated percentages to account for swing, provided that an equal amount in equivalent square yards is deducted from another specific limit; and (2) specific limits may also be increased for carryover and carryforward. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983, (48 FR 57584), April 4, 1984, (49 FR 13397), June 28, 1984, (49 FR 26822), July 16, 1984, (49 FR 28754), November 9, 1984, (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products, Produced or Manufactured in Sri Lanka

May 22, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 1, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, between the Governments of the United States and Sri Lanka establishes specific restraint limits for cotton and man-made fiber gloves and mittens in Categories 331 and 631, men's other coats of cotton and man-made fibers in Categories 334 and 634, women's, girls' and infants' cotton and man-made fiber coats in Categories 335 and 635, cotton dresses in Category 336, cotton playsuits in Category 337, cotton knit skirts in Categories 338 and 339, woven shirts and blouses of cotton and man-made fibers in Categories 340, 341, 640 and 641, cotton skirts in Category 342, cotton and man-made fiber trousers in Categories 347, 348, 647, and 648, cotton towels in Category 363, shop towels in Category 363pt. (T.S.U.S.A. number 366.2040), and wool and man-made fiber sweaters in Categories 445/446 and 645/646, produced or manufactured in Sri Lanka and exported to the United States during the twelve-month period beginning on June 1, 1986 and extending through May 31, 1987. The limit for Category 341 has been reduced by 29,732 dozen to account for carryforward used in the previous agreement year.

The agreement also provides a consultation mechanism for categories of textile products which are not subject to specific ceilings and for which levels may be established during the year upon agreement between the two governments.

In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textile products in the foregoing categories, produced or manufactured in Sri Lanka and exported during the twelve-month period beginning on June 1, 1986, in excess of the designated restraint limits.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended in April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules 3 of the Tariff Schedules of the United States Annotated (1986).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 22, 1986.

Commissioner of Customs,

Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Agreement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, between the

Governments of the United States and Sri Lanka; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 1, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories produced or manufactured in Sri Lanka and exported during the twelve-month period beginning on June 1, 1986, and extending through May 31, 1987, in excess of the indicated restraint limits:

Category	12-month limit
331	1,021,322 dozen pairs.
334	199,094 dozen.
335	146,904 dozen.
336	67,416 dozen.
337	112,360 dozen.
338	245,920 dozen.
339	424,002 dozen.
340	534,994 dozen.
341	495,524 dozen.
342	190,800 dozen.
347	393,553 dozen.
348	291,810 dozen.
363	6,380,000 numbers.
369pt.[1]	647,756 pounds.
445/446	93,072 dozen.
631	309,694 dozen pairs.
634	119,102 dozen.
635	166,518 dozen.
640	102,406 dozen.
641	325,256 dozen.
645/646	107,191 dozen of which not more than 71,461 dozen shall be in Category 646.
647	376,300 dozen.
648	178,682 dozen.

[1] In Category 369, only TSUSA number 366.2940.

In carrying out this directive, entries of cotton, wool and man-made fiber textile products in the foregoing categories, produced or manufactured in Sri Lanka, and exported during the period that ends on May 31, 1986, shall, to the extent of any unfilled balances, be charged to the levels of restraint established for such goods during that period. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The limits set forth above are subject to the adjustment in the future according to the provisions of the bilateral agreement of May 10, 1983 between the Governments of the United States and Sri Lanka, which provide, in part, that (1) any specific limits and sublimit may be exceeded by designated percentages of the square yards equivalent total in any agreement period, provided that the amount of the increase is compensated for by an equivalent decrease in one or more other specific limits; (2) specific limits may be increased for carryover and carryforward up to 11 percent of the applicable category limit or sublimit; however, carryover will not be available in the agreement period during which the specific limit is first established; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement, any of the adjustments referred to above, will be made to you by letter.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 15, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15178), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 26, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 8, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

CONSUMER PRODUCT SAFETY COMMISSION

Interagency Committee on Cigarette and Little Cigar Fire Safety; Technical Study Group Meeting

AGENCY: Interagency Committee on Cigarette and Little Cigar Fire Safety, CPSC.

ACTION: Notice of meeting.

SUMMARY: The Technical Study Group on Cigarette and Little Cigar Fire Safety will meet on July 10 and 11, 1986, in Washington, DC, to review testing conducted by the National Bureau of Standards to measure ignition propensity of cigarettes; to discuss the status of the benefit-cost study; and to hear and discuss comments pertaining to implementation of the Cigarette Safety Act of 1984.

DATE: The meeting will be on July 10 and 11, 1986, from 9:30 a.m. to 5:00 p.m.

ADDRESS: The meeting will be in the Auditorium, first floor of the Hubert Humphrey Building, 200 Independence Avenue SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tawanna Segears, Office of Program Management, Consumer Production Safety Commission, Washington, DC. 20207; telephone: (301) 492-6554.

SUPPLEMENTARY INFORMATION: The Cigarette Safety Act of 1984 (Pub. L. 98-567, 98 Stat. 2925, October 30, 1984) created the Technical Study Group on Cigarette and Little Cigar Fire Safety to prepare a final technical report to Congress within 30 months concerning the technical and commercial feasibility of developing cigarettes and little cigars with minimum propensity to ignite upholstered furniture and mattresses.

The Technical Study Group will meet on July 10 and 11, 1986, to discuss the following topics:

(1) The portion of the meeting to be held on July 10 will consist of a review of testing conducted by the National Bureau of Standards to measure ignition propensity of cigarettes. The Technical Study Group will also discuss the status of the benefit-cost analysis required by the Cigarette Safety Act, and other matters pertaining to implementation of the act.

The July 10 portion of meeting will be open to observation by members of the Public, but only members of the Technical Study Group may participate in the discussion.

(2) The portion of the meeting to be held on July 11, 1986 will be devoted to hearing from any member of the public who wishes to present information or views of the implementation of the Cigarette Safety Act. Examples of the kinds of information which might be presented by interested members of the public include presentations about patented inventions intended to reduce the potential hazard of cigarettes as a source of ignition of upholstered furniture and mattresses, and information about studies or research concerning cigarettes as a source of ignition. The presentation of information previously provided to the Technical Study Group, for example information provided to the Technical Study Group at its public meeting last year on July 11, 1985, should not be repeated due to time constraints.

Each person desiring to make a presentation should provide a brief summary to Colin Church, Consumer Product Safety Commission, Room 420, Washington, DC 20207 by July 1, 1986. Presentations will be limited to approximately 20 minutes. Additional restriction on the length of presentations may be imposed depending on the number of people who wish to speak. The Technical Study Group is neighter soliciting nor expecting to discuss confidential business information.

Dated: May 22, 1986.

Colin B. Church,

Federal Employee Designated by the Interagency Committee on Cigarette and Little Cigar Fire Safety.

BILLING CODE 3710–08–M

DEPARTMENT OF ENERGY

Alaska Power Administration

Snettisham Project; Proposal to Adjust Wholesale Power Rate

AGENCY: Department of Energy, Alaska Power Administration.

ACTION: Notice of Proposal to Adjust Wholesale Power Rates Snettisham Project, Alaska.

SUMMARY: Proposal to adjust rate schedule SN–F2 increasing the energy rate from 25 mills per kilowatt-hour to approximately 29.3 mills per kilowatt-hour. Included in the proposal will be a new rate schedule SN–IN1, establishing a rate for interruptible energy at approximately 20 mills per kilowatt-hour. The proposed rates will be submitted to the Deputy Secretary of Energy for final approval from the Federal Energy Regulatory Commission.

DATES: Written comments will be considered for 90 days from the date of publication. Interim basis rates are expected to be in effect by October 1, 1986.

To Submit Written Comments or for Further Information Contact

Gordon Hallum, Chief, Power Division, Alaska Power Administration, Department of Energy, Room 825, Federal Building, P.O. Box 50, Juneau, AK 99802, (907) 586–7405

or

Darlene Low, Public Utilities Specialist, Alaska Power Administration, Department of Energy, Room 825, Federal Building, P.O. Box 50, Juneau, AK 99802, (907) 586–7405.

SUPPLEMENTARY INFORMATION: Preliminary studies show that an increased rate is necessary to meet cost recovery criteria, including repayment of deferred interest, and to offset inflation-related cost increases in O&M. The interruptible rate is being established as an incentive rate for conservation of fuel oils and efficient utilization of electric energy resources that would otherwise spill and be wasted during periods of surplus hydroelectric energy.

The Rate Proposal and supporting studies will be available June 15, 1986 in the Alaska Power Administration's headquarters office, Room 825, Federal Building, Juneau, Alaska.

Formal meetings with the utility customers will be scheduled for late June 1986. A public information and comment forum is scheduled for July 8, 1986, 7:30 p.m., Room 117, Federal Building, Juneau, Alaska.

All comments will be considered and the proposed rate may be revised on the basis of public input.

Dated: May 19, 1986.

Robert J. Cross,

Administrator.

Great Lakes Gas Transmission Co.; Application To Amend Authorization To Import and Export Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Application to Amend Authorization to Import and Export Natural Gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 10, 1986, of an application filed by Great Lakes Gas Transmission Company (Great Lakes) requesting an amendment to its natural gas import/export authorization granted by the ERA in Opinion and Orders No. 61 and 61–A issued May 9, 1985, and July 24, 1985, respectively. The amendment for which Great Lakes seeks approval would permit it to increase the volumes of natural gas it presently imports and exports for TransCanada Pipelines Limited (TransCanada) from 825,000 Mcf per day to 887,500 Mcf per day for a term ending November 1, 2005.

Great Lakes would import all of the volumes under the TransCanada contract at the U.S.-Canadian boundary near Emerson, Manitoba, Canada for transport from Minnesota to the U.S.-Canadian boundary near Sault Ste.

Marie and St. Clair, Michigan. There, the gas would be exported back into Canada for redelivery to TransCanada and its customers. None of the gas volumes, including the additional 62,500 Mcf in daily contract quantities Great Lakes requests to import and export, would be delivered to markets in the United States.

The application was filed with the ERA pursuant to section 3 of the Natural Gas Act and Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m., on June 27, 1986.

FOR FURTHER INFORMATION CONTACT:

Tom Dukes, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–9560;

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines and Delegation Order No. 0204–111 (49 FR 6684, February 22, 1984). Parties that may oppose this application should demonstrate to the ERA that granting Great Lakes an authorization to import gas and export that some gas back into Canada without taking ownership to the gas would not be in the public interest.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076, RG–43, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–9478. They must be filed no later than 4:30 p.m., June 27, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Great Lakes' application is available for inspection and copying in the Natural Gas Division Docket Room GA–076, (202) 252–9478, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, D.C., May 12, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; CLARCO Gas Company, Inc.; Order Granting Rehearing for Further Consideration

Issued May 22, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

Moody Gas Gathering System and Endevco, Inc. have filed timely requests for rehearing of the order issued March 28, 1986, in *CLARCO Gas Company, Inc.*, 34 FERC ¶ 61,384. That order denied CLARCO's request for a waiver of certain of the transitional provisions of Order No. 436.[1] Rehearing is granted solely for the purpose of affording the Commission additional time to consider the requests for rehearing. Pursuant to Rule 713(b) of the Commission's procedural rules, no answer to this order, or to the requests for rehearing, will be entertained.

By the Commission.

Kenneth F. Plumb,

Secretary

Federal Energy Regulatory Commission

[Docket Nos. CI86–378–000 et al.]

Arkla, Inc. (Exploration and Production Division et al.) Applications for Blanket Abandonment and Blanket Certificates With Pre-Granted Abandonment

May 21, 1986.

Take notice that on April 23, 1986, as supplemented on April 30, 1986, the Exploration and Production Division of Arkla, Inc. (Arkla E & P) and Arkla Energy Marketing Company (AEM) (Applicants), P.O. Box 21734, Shreveport, Louisiana 71151, filed applications in Docket Nos. CI86–378–000 and CI86–397–000. In Docket No. CI86–397–000 Arkla E & P requests blanket authorization to abandon for an indefinite period certain of its obligations to supply gas from company-owned reserves dedicated to the system supply of Arkla Energy Resources, a division of Arkla, Inc., (AER), which gas is released by AER because it is in excess of quantities required from time to time by AER. All wells and properties

[1] FERC Statutes and Regulations, Regulations Preambles 1982–1985, ¶ 30,665 (1985), 50 FR 42,408 (October 16, 1985).

subject to this applications are listed in the attached Exhibits A and B. In Docket No. CI86-378-000 Arkla E & P and AEM request blanket certificates with pre-granted abandonment for resale of the released gas. AEM is a wholly-owned subsidiary of Arkla, Inc.

Applicants state that Arkla E & P expects to be restricted due to depressed market conditions from being able to produce for delivery to AER any more than 15% of current total deliverability for at least the next year. Such reduced production it is avered will cause loss of cash-flow and potential permanent loss of certain reserves through drainage and engineering problems such as "trapping" of gas in partial water-drive reservoirs.

Applicants requests authorization pursuant to a December 31, 1985, amendment to a February 27, 1986, intracompany operating agreement between AER's production division and AER's pipeline division whereby the pipeline division released gas in excess of its system supply requirements, provided such gas is priced in excess of the replacement cost of gas available on AER's system, for a primary period extending through December 31, 1988, and continuing on a month-to-month basis until terminated by either party. The December 31, 1985, amendment provides that the production division in return has agreed to release the pipeline division from take-or-pay liabilities, credit released gas sold to a third party against future take-or-pay obligations and insert market responsive pricing provisions in the February 27, 1986, intracompany operating agreement to the extent not previously provided. Such provisions include a ceiling of $2.35 MMBtu through December 31, 1988, with periodic renegotiations at six-month intervals.

Arkla E & P states that it intends to sell released gas to AEM or other purchasers. Arkla E & P further states that AER has reserved the right to recall supplies needed to meet system requirements.

If the Commission issues certificates to other natural gas companies authorizing blanket interstate transportation of gas abandoned under similar programs, Applicants request blanket certificate authorization with pre-granted abandonment for transportation by interstate pipelines of the subject released gas.

Waiver of Parts 154 and 271 of the Commission's regulations is requested so Applicants will not be required to file and maintain rate schedules for the sales of released gas but price will not exceed applicable maximum lawful prices.

Exhibits to the applications indicate the gas involved is priced under NGPA section 104, 108 or 109 (see Exhibits A and B attached hereto).[1] Applicants state that since it is not absolutely clear whether pipeline production which was consumed in the state of production as of November 8, 1978, but is currently flowing across state lines, is subject to the abandonment requirements of the NGA, such gas has been included in this application.

If the Commission desires, Applicants state they will file quarterly reports detailing the transactions.

The circumstances presented in the applications meet the criteria for consideration on an expedited basis, pursuant to section 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436-A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should, on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC, 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to the proceedings herein must file petitions to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[Docket No. FA86-13-001]

Canal Electric Co. Order Establishing Hearing Procedures

Issued: May 21, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

Under the Federal Power Act (Act) every public utility or licensee must keep such accounts, records of cost-accounting procedures, and any other records as the Commission may prescribe as necessary or appropriate for the administration of the Act. The Commission, after notice and opportunity for hearing, may determine by order the accounts in which particular outlays and receipts shall be entered, charged, or credited.

Commission staff (staff) recently performed an audit of Canal Electric Company (Canal). In a letter order issued February 28, 1986,[1] the Commission noted that Canal had not agreed to adopt the recommendations relating to the staff's determination that Canal had overcapitalized the allowance for funds used during construction (AFUDC) applicable to its ownership interest in the Seabrook Nuclear Station. Staff's position, as stated in the letter order, is that the overcapitalization results from Canal's failure to reduce its AFUDC base by construction related deferred income taxes not deducted from rate base.

The letter order requested Canal to notify the Commission within 30 days as to whether it would consent to disposition of the contested accounting matter in accordance with the shortened procedure set forth in Part 41, of the Commission's regulations. Under the shortened procedure, the Commission would rule on the matter solely on pleadings submitted by interested parties and staff. By letter dated March 28, 1986, Canal notified the Commission that it did not consent to the use of the shortened procedure. Consequently, we now set these matters for hearing.

Any interested person seeking to participate in this docket shall file a motion to intervene under Rule 214 of the Commission's rule of practice and procedure (18 CFR 385.214) no later than 15 days after the date of publication of this order in the Federal Register.

The Commission orders:

(A) Pursuant to the provisions of the Federal Power Act, particularly section 301 thereof, and pursuant to the Commission's regulations thereunder, a public hearing shall be held concerning the appropriateness of Canal's accounting as discussed above.

(B) A Presiding Administration Law Judge, to be designated by the Chief Administrative Law Judge, shall

[1] 34 FERC ¶ 61,305 (1986).

convene a conference in this proceeding to be held within 30 days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. The Presiding Judge is authorized to establish procedural dates and to rule on motions as provided in the Commission's regulations.

(C) Secretary shall promptly publish this Order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ES86-43-000 et al.]

Electric Rate and Corporate Regulation Filings; Central Corporation et al.

Take notice that the following filings have been made with the Commission:

1. Central Corporation

[Docket No. ES86-43-000]

May 21, 1986.

Take notice that on May 16, 1986, Central Corporation (Applicant), filed an application with the Federal Energy Regulatory Commission, pursuant to section 204 of the Federal Power Act (ACT), seeking an Order authorizing the issuance of up to $60,000,000 aggregate principal amount of unsecured notes or debentures.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Citizens Utilities Company

[Docket No. ES86-42-000]

May 21, 1986.

Take notice that on May 14, 1986, Citizens Utilities Company (Applicant), filed an application with the Federal Energy Regulatory Commission, pursuant to section 204 of the Federal Power Act (ACT), authorizing the issuance of not more than $50,000,000 of First Mortgage Bonds and Collateral Trust Bonds, and request exemption from compliance with competitive bidding requirements.

Comment date: June 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Pacific Gas & Electric Company

[Docket No. ES86-484-000]

May 21, 1986.

Take notice that on May 14, 1986, Pacific Gas and Electric Company (PG and E) tendered for filing actual 1985 and 1986 thermal capacity charges in response to a request by the Commission for acutal 1985, 1984 and 1985 thermal capacity charges accompanied by appropriate data and the charges. PG and E said the 1985 actual thermal capacity charge is not currently available pending completion of the 1985 study to determine PG and E's cost of thermal electric capacity ($/kW-mo). PG and E said as soon as the study is completed, the acutal charge and cost computation will be sent.

Comment date: June 2, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. South Carolina Electric & Gas Company

[Docket No. ES86-485-000]

May 20, 1986.

Take notice that South Carolina Electric & Gas Company on May 14, 1986, tendered for filing proposed cancellation of its Rate Schedule 36 (FERC).

Under the proposal, South Carolina Electric & Gas Company Rate Schedule 36 (FERC), contract between South Carolina Electric & Gas Company and Savannah Electric Power Company for purchase of 50 megawatts of capacity and associated energy effective June 28, 1984, is to be cancelled effective May 31, 1985.

Copies of this filing were served upon Savannah Electric Power Company.

Comment date: June 2, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER86-399-000]

Electric Rates; El Paso Electric Co.; Order Accepting for Filing and Suspending Rates in Part, Granting Motion To Reject, Noting Interventions, Ordering Summary Disposition in Part, and Establishing Hearing and Price Squeeze Procedures; Mobile-Sierra

Issued: May 22, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On March 26, 1986, El Paso Electric Company (EPE) tendered for filing a proposed two-phase increase in its rates to one full requirements customer, Rio Grande Electric Cooperative, Inc. (Rio Grande), and two partial requirements customers, Texas-New Mexico Power Company (TNP) and Imperial Irrigation District (Imperial).[1] The proposed Phase I rates would increase revenues by approximately $22 million (7%) based upon the calendar 1985 test period. The proposed Phase II rates would increase revenues by an additional $10.2 million, for a total increase of approximately $432.2 million (10.6%). EPE requests effective dates of May 20, 1986, for Phase I, and May 27, 1986, for Phase II. EPE further requests that if both phases are suspended for the same period, Phase I be deemed withdrawn.

Notice of EPE's filing was published in the Federal Register,[2] with comments due on or before April 11, 1986. Timely motions to intervene were filed by Rio Grande, TNP, and Imperial. In addition, the New Mexico Public Service Commission (New Mexico Commission) filed a timely notice of intervention.

Rio Grande requests that the filing be rejected on the grounds that it violates a settlement agreement between Rio Grande and EPE in two respects: first, that EPE has impermissibly included costs associated with Palo Verde Nuclear Generating Station Unit No. 2 (Palo Verde 2) period to commencement of the unit's commercial operation; and second, that the company has failed to advance some mechanism to "phase-in" the costs associated with the Palo Verde project. Rio Grande alternatively requests a five month suspension of the rates, that the issue of decommissioning the Palo Verde project be addressed in a separate proceeding, and that Rule 717 procedures not be instituted. Finally, Rio Grande reqests that price squeeze procedures be instituted.

---

[1] *See* Attachment for rate schedule designations.

[2] 51 FR 11,971 (1986).

TNP requests that both phases be suspended for five months and that phased hearing procedures be developed, with the first phase expedited and devoted to developing a rate moderation or phase-in program. In support of this request, TNP alleges that EPE's proposed rate increase would result in a price squeeze and, further, would "wreak catastrophic adverse consequences" on the company and the local economy. TNP states that the bulk of its revenues are derived from power sales to copper mining companies, and that the copper industry is currently economically depressed. EPE's filing, TNP asserts, would only serve to make the situation worse.[3]

Imperial requests rejection of EPE's filing in light of three issues; alternatively Imperial seeks summary disposition as to these issues: depreciation rates, nuclear decommissioning costs, and the inclusion of a revenue shortfall provision in the company's tariff. Imperial further requests a five month suspension of the proposed rates.

The New Mexico Commission filed supplemental comments on May 8, 1986. It requests that both Phase I and Phase II be suspended for five months and that the filing be set for hearing. In support of this request, the New Mexico Commission argues that the proposed rate increase could have a devastating impact on New Mexico consumers and the State's economy. It also requests a phased hearing procedure, with the first phase devoted to the development of a rate moderation plan. In addition, Rio Grande, Imperial, TNP, and the New Mexico Commission raise a variety of cost of service and rate design issues.[4]

On April 28, 1986, EPE filed an answer. While not opposing the motions to intervene, EPE denies that a five month suspension is warranted. EPE asserts that many of the objections to the filing present questions of fact best resolved at hearing. The company opposes the motions to reject its filing or to order summary disposition as to the three issues raised by Imperial. It also opposes Rio Grande's motion for rejection due to the absence of a phase-in plan for the costs of the Palo Verde projects. However, EPE concedes that Palo Verde 2 costs should not be included in its rates to Rio Grande prior to commercial operation, and accepts summary disposition on this issue. In addition, the company states that it accepts summary disposition as to six other issues raised by the intervenors in their pleadings.[5]

Discussion

Under Rule 214 of the Commission's rules of practice and procedure,[6] the timely, unopposed pleadings serve to make Rio Grande, TNP, Imperial, and the New Mexico Commission parties to this proceeding.

We find that EPE's filing minimally complies with our threshold filing requirements and, except as discussed below with respect to Rio Grande, no other basis for rejection has been shown. Imperial requests rejection or summary disposition regarding EPE's alleged failure to file studies to support its requested depreciation rates for non-nuclear plant. The company has included a capital recovery study as required by section 35.13 of the Commission's regulations. To the extent that Imperial does not find the study sufficient, it is free to seek more detailed information in discovery. We do not, however, find a basis in Imperial's allegations for rejection or summary disposition.

As to the question of whether EPE's filing violates the provision in its settlement agreement with Rio Grande in Docket No. ER84-236-000 [7] concerning phasing-in the costs of the Palo Verde project, section 4.2 of that agreement provides:

> The Company will negotiate a phase-in of the Palo Verde nuclear project to wholesale electric rate base on terms no less favorable to Rio Grande than any other phase-in method agreed to by the Company, recognizing, however, that previous rate payments made by other jurisdictions might justify a different phase-in methodology. . . . If the Company and Rio Grande are unable to agree, the Company will file rates with the Commission reflecting the Company's views of the appropriate phase-in consistent with the principles stated here . . . .

Rio Grande contends that EPE's filing should be rejected because the company has not proposed any phase-in procedure as part of its filing. EPE argues that the settlement agreement requires EPE to include a phase-in plan only when one has been agreed to, and that this has not yet occurred. The company states that the phase-in plan presently under consideration at the retail level in New Mexico is merely proposed, not "agreed to."

We find that EPE's filing does not conflict with the settlement agreement with Rio Grande and we shall reject the rates as applicable to that customer. As EPE admits, it has submitted a phase-in plan for consideration at the retail level. Construing section 4.2, we believe that it is reasonable to conclude that, inasmuch as EPE has offered a plan at the retail level, it has "agreed to" a retail phase-in as intended by this provision of the settlement. However, it is unnecessary to make such a determination. Even if EPE has not specifically "agreed to" a phase-in plan at the retail level, the settlement agreement clearly required EPE to engage in negotiations with Rio Grande on the issue; since the company has not secured the customer's agreement, it was obligated, under any reasonable construction of the settlement, to propose some phase-in plan for Rio Grande "consistent with the principles" in the settlement agreement.[8]

We further find that summary disposition is warranted concerning the "revenue shortfall" provision, which would permit EPE to retroactively increase charges to reflect the outcome of the Commission's ultimate decision on demand allocation. In EPE's Phase I rates, EPE has allocated demand-related costs to TNP on the basis of TNP's coincident demand. In its Phase II rates, the company has allocated demand

---

[3] Both Rio Grande and TNP filed supplements to their motions to intervene in which they elaborated upon several of the points raised in their initial pleadings. EPE opposes these submissions as untimely. Rio Grande's and TNP's actions have not resulted in undue prejudice to EPE, as evidenced by the company's response to those pleadings in its answer. We shall not reject the pleadings. Pursuant to Rule 213(d)(2) of the Commission's rules of practice and procedure, therefore, the pleadings are deemed effective.

[4] The issues raised include: (1) The rate of return on common equity; (2) O&M expenses; (3) the treatment of investment tax credits; (4) revenue credits for off-system sales; (5) the computation of deferred income taxes; (6) the prudence of EPE's continued involvement in the Palo Verde project; (7) computation of income taxes; (8) allocation of regulatory expenses; and (9) cash working capital.

[5] Specifically, EPE agrees that: (1) It made an error in amortizing investment tax credits, resulting in a negative flow-back to the customers of $2.26 million; (2) it made an error in synchronizing the amount added to accumulated deferred taxes for AFUDC interest with the $18.1 million in deferred taxes on AFUDC interest; (3) it erroneously included some O&M expenses for retired Rio Grande Units 2, 4, and 5 as a result of not adjusting budgeted expenses to reflect the decision to retire the units; (4) it erroneously used unratcheted billing determinants in designing the rates to Rio Grande; (5) it should have used the 40 year license life as the life of the plant for Palo Verde Nos. 1 and 2; and (6) it erroneously depreciated interim additions to Palo Verde.

[6] 18 CFR 385.214.

[7] 28 FERC ¶ 61,091 (1984).

[8] As noted, Rio Grande also requests that summary disposition be granted on its claim that EPE's filing violates the settlement agreement because the costs of Palo Verde No. 2 are included prematurely. It also asks that Rule 717 procedures not be instituted and that the issue of Palo Verde decommissioning costs be phased or addressed in a separate docket. EPE agrees to accept summary disposition on the first of these issues as well as its use of unratcheted billing determinants in designing its rates to Rio Grande. It is not necessary to decide these issues, since we are rejecting EPE's filing as to Rio Grande because of the absence of a phase-in provision.

costs to TNP on the basis of TNP's contract demands. TNP's contract demand is about 58% higher than its coincident demand. If the Commission approves the allocation of demand costs to TNP on the basis of TNP's contract demand, EPE contends that it will have understated its Phase I rates to TNP, and the company proposes that it be permitted to collect any revenue shortfall from TNP. On the other hand, if the Commission requires the use of coincident demand, EPE's Phase II rates to Rio Grande and Imperial will allegedly be understated, in which case EPE proposes to collect any shortfall from Rio Grande and Imperial. EPE contends that the revenue shortfall provision is not unlawful because, by filing it now as part of its proposed tariff, any amounts collected would be in accordance with the filed rate and after timely notice to its customers.

In essence, EPE seeks to shield itself from any adverse effects of its approach to demand allocation. The manner in which EPE has proposed to allocate demand costs in its various rate phases was a matter of the company's choice. However, having made that choice, the selection of allocation methods must necessarily factor into the Commission's evaluation of the filing, including its suspension decision.[9] To endorse EPE's *ex post facto* adjustment proposal would undermine the bases for the Commission's analysis; it would also subject certain customers to what we consider to be an inequitable, continuing surcharge liability arising out of the company's own choice. This is contrary to Commission practice generally and no compelling justification has been provided for the proposal which, in effect, would substitute a fixed, filed rate ceiling with an uncertain and variable cap. We are compelled to conclude that EPE must bear the risks of its filing decisions and that this make-up provision must be rejected. *See FPC* v. *Tennessee Gas Co.*, 371 U.S. 145 (1962).

We also find that summary disposition is warranted on the other issues affecting the rates to TNP and Imperial as to which the company concedes error. Within thirty (30) days of the date of this order, EPE shall file revised rate schedules reflecting our determinations on all the issues noted above.

Our preliminary examination of EPE's filing and the pleadings indicates that the rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing, as modified by summary disposition, and we shall suspend them as ordered below.

In *West Texas Utilities Company*, 18 FERC ¶ 61,189 (1982), we explained that, where our preliminary examination indicates that proposed rates may be unjust and unreasonable, but may not be substantially excessive as defined in *West Texas*, we would generally impose a nominal suspension. Here, our examination suggests that the Phase I and Phase II rates to Imperial may not yield substantially excessive revenues. EPE has requested that the Phase I rates be deemed withdrawn if the same suspension period would be imposed for both Phase I and Phase II. Therefore, we shall deem Phase I withdrawn as to Imperial and shall suspend Phase II as to Imperial, as modified by summary disposition, for one day, to become effective on May 28, 1986, subject to refund. As to the rates for TNP, our examination suggests that the Phase I rates, as modified, may not yield substantially excessive revenues, while the Phase II rates may be substantially excessive. Therefore, we shall suspend Phase I as to TNP, as modified, for one day, to become effective on May 27, 1986, subject to refund, and Phase II, as modified, for five months, to become effective on October 27, 1986, subject to refund.[10]

We note that EPE proposes, in its filing, to flow the costs of an unsuccessful uranium venture through its fuel adjustment clause. The company's proposal has been questioned in a recent audit by the Commission's Office of Chief Accountant.[11] We shall also set this issue for hearing.

In accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, 8 FERC ¶ 61,131 (1979), we shall phase the price squeeze issue raised by the intervenors.[12]

The Commission Orders

(A) The pleadings filed by Rio Grande on April 16, 1986, by TNP on April 17, 1986, and by the New Mexico Commission on May 8, 1986, are hereby accepted.

(B) EPE's proposed rates for service to Rio Grande are hereby rejected.

(C) Summary disposition is hereby ordered, as noted in the body of this order, with respect to (1) the revenue shortfall provision; (2) the amortization of investment tax credits; (3) the error in synchronizing the amount added to accumulated deferred taxes for AFUDC interest with the $16.1 million in deferred taxes on AFUDC interest; (4) the O&M expenses for retired Rio Grande units 3, 4, and 5; (5) the life of the plant for Palo Verde Nos. 1 and 2; and (6) the depreciation of interim additions to Palo Verde. EPE is hereby directed to submit revised rate schedules and cost support reflecting these determinations within thirty (30) days of the date of this order.

(D) All other motions for rejection of EPE's filing or summary disposition are hereby denied.

(E) EPE's proposed rates are hereby accepted for filing, as modified by summary disposition; the Phase II rates to Imperial are suspended for one day, to become effective May 28, 1986, subject to refund, and the Phase I rates to Imperial are deemed withdrawn. The Phase I rates to TNP are suspended for one day, to become effective on May 27, 1986, subject to refund. The Phase II rates to TNP are suspended for five months, to become effective on October 27, 1986, subject to refund.

(F) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's rules of practice and procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of EPE's rates.

(G) The Commission staff shall serve top sheets within ten (10) days of the date of this order.

---

[9] It is noted that the distinction in demand allocation method is a major cost of service distinction between Phase I and II rates to TNP.

[10] TNP requests that EPE's rates be suspended for five months due to an alleged price squeeze. As the Commission has noted on a number of occasions, in the absence of extraordinary circumstances unproved price squeeze allegations are not considered in determining an appropriate suspension period. We are not persuaded that TNP has demonstrated extraordinary circumstances in this case.

[11] Letter Directive of December 20, 1985. By letter dated January 24, 1986, EPE responded to the Chief Accountant and requested that its proposed accounting for these costs be approved.

[12] As noted, TNP requests that this case be phased, with the first phase to consider rate moderation plans in order to eliminate an alleged price squeeze, and that the Commission decide the matter on an expedited basis during the suspension period. The New Mexico Commission also asks that the first phase be devoted to a rate moderation plan. Under *Arkansas Power & Light Co.*, the presiding judge is free to depart from the usual phasing procedure for good cause. We believe, therefore, that TNP's arguments are more appropriately considered, in the first instance, by the presiding judge.

(H) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days of the service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Such conference shall be held for purposes of establishing a procedural schedule, including the submission of EPE's case-in-chief. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's rules of practice and procedure.

(I) Subdocket 000 in Docket No. ER84-236-000 is hereby terminated. The evidentiary hearing established herein is assigned Docket No. ER84-236-001.

(J) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(K) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5334-001]

Joint Ypsilanti Recreation Organization; Application for Approval of Completed Development of Project Lands

May 21, 1986.

Take notice that the Joint Ypsilanti Recreation Organization (JYRO), licensee, for the Ford Lake Project No. 5334, has completed developing Phase I of certain lands designated as the North Bay Reclamation Project, located on the Huron River in Washtenaw County, Michigan.

On November 19, 1984, the Commission issued a public notice for JYRO's proposed North Bay Reclamation Project. The purpose of the proposed project was to enhance recreational opportunities in the North Bay through dredging to create a usable water depth. This work was to be achieved through a 3-phase process. Since then, JYRO has substantially revised its reclamation project. In early 1985, JYRO completed construction of Phase I, which consisted of 3 islands and approximately 23,500 cubic yards of shoreline filling. Phase I was constructed as a mitigation measure to enhance fish and wildlife habitat and increase shoreline fishing area in order to offset the loss of lake surface area resulting from disposal of dredge material in the lake as originally proposed in Phase II. Initially, Phase I consisted of creating 11.75 acres of wetlands, filling 1.5 acres of islands and shoreline, dredging 8.7 acres of channel area to depths of 9 feet to 12 feet, and constructing three-foot bridges between the islands. Currently, Phases II and III are in the conceptual stage. JYRO will file an application for Commission approval of the proposed work in Phases II and III after the plans are finalized.

Correspondence with the licensee should be directed to: Mr. Kenneth R. Oscarson, Orhcard, Hiltz and McCliment, Inc., 34935 Schoolcraft Road, Livonia, Michigan 48150.

Agency Comments.—Federal, State, and local agencies are invited to file comments on the completed Phase I of the project. A copy of the plans for completed Phase I of the reclamation project may be obtained by agencies directly from the licensee. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of Rules 211 or 214, 18 CFR 38.211 or 385.214, 47 FR 19025-26 (1983). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before July 2, 1986.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: Fred E. Springer, Director, Division of Project Management, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 203 RB at the above address. A copy of any motion to intervene must also be served upon each

representative of the licensees specified in the third paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11880 Filed 5-27-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER86-6-000]

Mobil Exploration and Producing North America, Inc.; Modification of Caption and Paragraph K of Show Cause Order

Issued May 21, 1986.

On April 21, 1986, the Commission commenced a show cause proceeding (Show Cause Order) against Mobil Oil Corporation (Mobil). The Show Cause Order was for the purpose of determining whether a change by Mobil in the method of accounting for plant volume reduction of natural gas sold by Mobil from an allocation on a weighted average basis, to one allocated to the lowest price gas may have resulted in sales of natural gas at unlawfully high rates in violation of the Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432 (1982) (NGPA).

The Show Cause Order provided for the bifurcation of the proceeding into two phases. Phase I was to determine the legal issue of whether the actions that are the subject of the above-referenced proceeding are consistent with the NGPA. If a violation is found, Phase II would resolve the issue of the extent of the violations, and the appropriate monetary remedies to be imposed. Paragraph (K) of the Show Cause Order required Mobil to respond to the data request specified therein, within thirty days, *i.e.*, May 21, 1986.

On May 13, 1986, Mobil filed a petition, pursuant to Rule 207 of the Commission's Rules of Practice and Procedure, 18 CFR 385.207, to modify the Show Cause Order in two respects. The first sought to change the caption of the proceeding to "Mobil Exploration and Producing North America, Inc." since the natural gas processing plants that are the subject of this proceeding were owned by The Superior Oil Company (Superior). Effective April 24, 1986, Superior was merged into Mobil Exploration and Producing North America, Inc. (MEPNA), an affiliate of Mobil, and MEPNA is the successor to Superior. Mobil has had no direct involvement with the plants that are the subject of the Show Cause Order and thus should not be named as the respondent.

The second request was that the Commission defer the date to respond to the data request specified in Paragraph K of the Show Cause Order until Phase II commences, since the data sought bears only upon the issues relating to Phase II.

On May 15, 1986, the Enforcement Section, Office of General Counsel filed its response stating it had no objection to Mobil's requests for modification. Accordingly, the Show Cause Order of April 21, 1986, is hereby modified by:

1. Changing the caption to Mobil Exploration and Producing North America, Inc.; and

2. Changing Paragraph (K) to state that Mobil Exploration and Producing North America, Inc. shall produce the documents only after Phase II of the proceeding has commenced.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL86-11-000]

Cities of Newark, New Castle, and Milford, DE, and Town of Smyrna, DE v. Delmarva Power and Light Co; Order Setting Matter for Investigation and Hearing

Issued: May 21, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On November 27, 1985, the Cities of Newark, New Castle, and Milford, Delaware and the Town of Smyrna Delaware (Municipalities) filed a complaint pursuant to Rule 206 of the Commission's rules of practice and procedure against Delmarva Power and Light Company (DP&L). The Municipalities allege that DP&L violated a settlement agreement between DP&L and the Municipalities.

The Municipalities own and operate municipal electric utilities in Delaware and are currently partial requirements customers of DP&L. On February 2, 1983, the Municipalities filed with the Commission an agreement with DP&L which settled in part four cases pending before the Commission [1] and settled antitrust cases brought by the Municipalities against DP&L.[2]

The Municipalities characterize the settlement as having established a comprehensive mechanism to equalize the rates of return between DP&L's GS-P tariff, applicable to large industrial customers, and the wholesale rates to the Municipalities. According to the Municipalities, when DP&L files wholesale rates, it must provide a rate of return comparision with its filing. The Municipalities state that the agreement then requires DP&L to furnish to the Municipalities, within ten days following a Commission order establishing the effective date for wholesale rates applicable to the Municipalities, a further rate of return comparison between the wholesale rates and the retail GS-P rate which DP&L expects will be in effect as of the effective date of the wholesale rates. They state that the agreement provides that if the rate of return comparison indicates that DP&L would receive a greater return on the Municipalities' wholesale rates than on the GS-P rate, DP&L and the Municipalities must file with the Commission a joint request for decreased interim wholesale rates applicable to the Municipalities at the level necessary to indicate equal rates of return. According to the Municipalities, the agreement further provides that if the Commission fails to approve a decrease in wholesale rates coincidentally with a decrease in retail GS-P rates, DP&L and the Municipalities would seek to adjust interim wholesale rates so that the Municipalities would receive reimbursement, plus interest, of the difference between the effective rates and the rates required to eliminate price squeeze based upon a rate of return comparison.

The crux of the Municipalities' complaint is that DP&L has, since March of 1984, issued six refunds or rate decreases to its retail customers, while making only one rate reduction to the Municipalities during the same period. The Municipalities allege that pursuant to the settlement agreement, DP&L was obligated to file wholesale rate decreases corresponding to each of the retail rate reductions. The Municipalities allege that a rate reduction of approximately $2,800,000 is due them. They request that the Commission order DP&L to file reduced rates or refunds in that amount, plus interest. In the alternative, they request that the Commission order DP&L to reduce rates to the Municipalities and order a hearing to determine the amount of the rate reduction.

Notice of the Municipalities' complaint was published in the Federal

---

[1] Docket Nos. ER78-414, ER80-365, ER81-504, and ER82-751.

[2] *City of Newark* v. *DP&L*, Civ. A. No. 77-254 (D. Del.) and *City of New Castle* v. *DP&L*, Civ. A. No. 77-286 (D. Del.). By order issued on May 31, 1983, the Commission approved the agreement. 23 FERC ¶ 61,363 (1983). Among other things, the agreement addressed the question of future price squeeze disputes and related procedures before the Commission.

Register,[3] with comments due on or before January 13, 1986. On December 23, 1985, the Municipalities filed a motion to defer all procedural dates pending settlement negotiations. On February 26, 1986, the Municipalities filed a motion requesting that the Commission address its complaint, inasmuch as the parties had been unsuccessful in their attempts to settle the issues in this proceeding.

Old Dominion Electric Cooperative (ODEC) filed a motion to intervene in this proceeding on March 3, 1986. ODEC states that as a wholesale customer of DP&L, it has a direct interest in any rate reductions that may be ordered by the Commission for DP&L wholesale customers in this proceeding. On March 17, 1986, OP&L filed an answer in opposition to ODEC's motion to intervene. DP&L opposes ODEC's intervention on the grounds that ODEC is not a party to the settlement agreement and does not have standing to challenge DP&L's compliance with a settlement agreement to which it is not a party.[4] On March 26, 1986, the Commission issued a notice establishing a deadline for protests, interventions, and answers of April 14, 1986.[5]

DP&L filed a timely answer to the Municipalities' complaint. DP&L states that the complaint is based on an incorrect interpretation of the settlement agreement. The company denies the allegation that the settlement agreement requires DP&L to file reduced wholesale rates to create equal rates of return between its GS–P retail rate and the Municipalities' wholesale rates whenever there is a reduction in retail rates. DP&L asserts that the settlement agreement provides for the adjustment of interim wholesale rates only while a wholesale rate case is pending before the Commission. DP&L admits that it issued refunds and rate decreases to its Delaware retail customers on the dates alleged in the compliant.[6] However, DP&L argues that because there was not a wholesale rate case pending before the Commission during these periods, DP&L was not required to adjust its wholesale rates to correspond with such retail rate reductions. DP&L states that its actions have been conisistent with its obligations under the settlement agreement and requests that the Commission summarily dispose of this proceeding by dismissing the complaint. In the alternative, the company requests that the Commission set the matter for hearing.

On April 30, 1986, the Municipalities filed a motion for leave to file a late opposition to DP&L's motion for summary disposition. In the response, they present a point-by-point argument concerning their interpretation of the settlement agreement and also dispute DP&L's quantification of its retail rate reductions. The Municipalities state that they must obtain information through discovery to determine the exact amount of one of DP&L's retail reductions. They request that the Commission grant summary disposition for the Municipalities on the question of DP&L's alleged violation of the settlement agreement, and order a hearing to determine the proper amount of wholesale rated reduction or refunds.

Discussion

Notwithstanding DP&L's opposition to ODEC's intervention, we find that good cause exists to grant its motion. Although the Municipalities' complaint focuses principally on an interpretation of *their* earlier settlement agreement with DP&L, we are not prepared to conclude that ODEC has not legitimate interest in the outcome of this proceeding, particularly in view of the scope of the hearing which we discuss below. In this context, ODEC's participation may be in the public interest and we shall therefore grant the motion to intervene.

Because of the apparent absence of any undue prejudice or delay, we shall grant the Municipalities' motion to file an untimely reply to DP&L's motion for summary disposition. We do so somewhat reluctantly, however, because the Municipalities have provided no explanation for their untimeliness and because the response does not provide any new facts or information which could not have been included in their original complaint; rather, it merely sets forth a more detailed argument on their interpretation of the settlement agreement.

This controversy centers on the proper interpretation of a settlement agreement between the parties. As noted, the Municipalities argue that DP&L is required to initiate actions necessary to equalize the rates of return between GS–P retail rates and wholesale rates to the Municipalities whenever DP&L makes a retail rate reduction. DP&L, on the other hand, argues that such procedures are triggered only after a wholesale rate filing has already been made.

Whatever the objectives of the parties might have been when they entered into the settlement agreement three years ago, we are unable to find a clear indication within the four corners of that document that the provisions referred to by the Municipalities impose any separate and direct obligation on DP&L to initiate wholesale rate change proceedings. Rather, by their terms, the provisions appear to control only after such a filing has first been made, and to address procedures for amending interim rate levels while the filing is pending.[7] Nonetheless, the pleadings are somewhat cryptic and we are not prepared to determine conclusively that there is room for only one interpretation. Further, we would, in any case, consider it reasonable to initiate a hearing on the assumption that the Municipalities are alleging, albeit indirectly, on ongoing price squeeze concern which might be remedied prospectively, if not under the terms of the settlement.[8] Therefore, we shall set the complaint for hearing with the expectation that issues such as burden of proof and appropriate relief, if any, shall be considered in the proceeding.

The Commission Orders

(A) ODEC's motion to intervene is hereby granted.

(B) The motions for summary disposition filed by DP&L and the Municipalities are hereby denied.

(C) Pursuant to the authority contained in, and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(c) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's rules of practice and procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the issues presented by the Municipalities' complaint filed against DP&L.

---

[3] 50 FR 52,365 (1985).

[4] On March 25, 1986, ODEC filed a supplement to its motion to intervene in repeonse to DP&L's opposition to its intervention. On April 7, 1986, DP&L filed an answer to ODEC's supplemental pleading. Because the Commission's Rules of Practice and Procedure do not permit the filing of a responsive pleading to an answer, we shall disregard these pleadings. 18 CFR 385.213(a)(2).

[5] 51 FR 10,917 (1986).

[6] We note, however, that the amounts, percentages, and types of rate reductions claimed by DP&L do not correspond to those alleged by the Municipalities.

[7] Conceivably, the preeminent issue at the time of the settlement involved rate increases rather than decreases, but we need not so speculate as to motives.

[8] While this option would be available in any event under section 206 of the Federal Power Act, we note that the settlement specifically reserves to the Municipalities the right to file complaints and to bring price squeeze actions before the Commission. We also note that a hearing would be required, in any case, to resolve the dispute as to the magnitude of DP&L's various retail rate reductions.

(D) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. The presiding judge is authorized to establish procedural dates, including the initial submission of testimony and exhibits by the Municipalities, and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(E) Subdocket 009 of Docket No. EL85-11 is hereby terminated. Docket No. EL86-11-001 is hereby assigned to the evidentiary hearing ordered herein.

(F) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11883 Filed 5-27-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86-78-000]

Northwest Alaskan Pipeline Co.; Tariff Changes

May 22, 1986.

Take notice that on May 15, 1986, Northwest Alaskan Pipeline Company ("Northwest Alaskan"), 295 Chipeta Way, Salt Lake City, Utah 84108-0900, tendered for filing in Docket No. RP86-78, Eighteenth Revised Sheet No. 5 to its FERC Gas Tariff Original Volume No. 2.

Northwest Alaskan states that it is submitting Eighteenth Revised Sheet No. 5 reflecting a decrease in current demand charges for Canadian gas purchased by Northwest Alaskan from Pan-Alberta Gas Ltd. ("Pan-Alberta") and resold to its four U.S. purchasers, Northern Natural Gas Company, a Division of Enron Corp. ("Northern"), Panhandle Eastern Pipe Line Company ("Panhandle"), United Gas Pipe Line Company ("United"), and Pacific Interstate Transmission Company ("PIT") under Rate Schedules X-1, X-2, X-3, and X-4, respectively. Total demand charges for Northern, Panhandle, and United increase due to a larger demand charge adjustment than in the January-June 1986 period, while total demand charges for PIT are less.

Northwest Alaskan states that it is submitting Eighteenth Revised Sheet No. 5 pursuant to the provisions of the amended purchase agreements between Northwest Alaskan and Northern, Panhandle, United and PIT, and pursuant to Rate Schedules X-1, X-2, X-3, and X-4, which provide for Northwest Alaskan to file 45 days prior to the commencement of the next demand charge period (July 1, 1986 through December 31, 1986) the demand charges and demand charge adjustments which Northwest Alaskan will charge during that period.

Northwest Alaskan requests that Eighteenth Revised Sheet No. 5 become effective July 1, 1986.

Northwest Alaskan states that a copy of this filing is being served on Northwest Alaskan's customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 29, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11885 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TA86-3-28-005 and TA86-3-28-003]

Panhandle Eastern Pipe Line Co.; Change in Tariff

May 22, 1986.

Take notice that on May 15, 1986 Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following revised sheets to its FERC Gas Tariff, Original Volume No. 1:

First Substitute Fourth Revised Sheet No. 43-2.1
Fourteenth Revised Sheet No. 43-4

The proposed effective date of these revised sheets is December 1, 1986.

Panhandle states that the purpose of the revisions to Panhandle's purchased gas adjustment tariff language is to implement the Commission's new methodology to account for out-of-balance concurrent exchange transactions. Panhandle is proposing to implement this "adjusted methodology" together with the attendant tariff language beginning December 1, 1986. Accordingly, a December 1, 1986 effective date is proposed for First Substitute Fourth Revised Sheet No. 43-2.1 and Fourteenth Revised Sheet No. 43-4.

Panhandle respectfully requests waiver of § 154.22 of the Commission's Regulations together with any other such waivers as may be necessary, for the acceptance of First Substitute Fourth Revised Sheet No. 43-2.1 and Fourteenth Revised Sheet No. 43-4 submitted herewith to become effective December 1, 1986.

Copies of this letter and enclosures are being served on all jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 29, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Western Area Power Administration

Stampede Division, Washoe Project; Proposed Power Rate

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Proposed Power Rate—Stampede Division, Washoe Project.

SUMMARY: The Sacramento Area Office of the Western Area Power Administration (Western) is proposing a minor rate adjustment for a new service from the Stampede Division, Washoe Project (Stampede). The Bureau of Reclamation (Reclamation) is currently constructing the Stampede Powerplant as part of the Stampede Division. The powerplant, a 3.65-MW hydroelectric facility producing only nonfirm energy, is expected to be operable by August 15, 1986. The nonfirm energy will be marketed by Western to Truckee-Donner Public Utility District (TDPUD)

pursuant to the final Power Marketing Plan (50 FR 21350, May 23, 1985) and final allocation (50 FR 43456, October 25, 1985).

Proposed Rates

Two alternative rates are now being considered to recover the costs associated with the nonfirm Stampede energy. In the event that the Government operates and maintains the Stampede power-related facilities, the customer will pay the SNF–1 rate. In the event the customer operates and maintains the Stampede power related facilities at its own expense, the customer will pay the SNF–2 rate.

The customer will pay one of these proposed alternative rates for each kWh of nonfirm energy delivered to the customer at the Stampede Powerplant, except for the energy designated to service the project loads. The determination of the rate which will be applicable will be dependent upon whether the customer agrees to operate and maintain the Stampede Powerplant at its own expense. Both of the rates and the effective dates are shown below.

	Date effective	Nonfirm energy charge (mills/kWh)
SNF–1	The first day of commercial service of Stampede Powerplant.	40.85
SNF–2	do	28.38

EFFECTIVE DATE: The new rate will become effective on the date that Stampede Powerplant is placed in commercial service. In the event that the powerplant becomes commercially operable prior to the issuance of the rate order applicable to the rates described herein the rate may be applied retoractively.

DATES: The consultation and comment period will begin with publication of this notice in the Federal Register and will end 30 days thereafter. The alternative rates described herein are expected to become effective at such time that Stampede Powerplant is placed in commercial service. Written comments may be submitted to the address below on or before the end of the consultation and comment period.

ADDRESS: For further information contact: Mr. David G. Coleman, Area Manager, Sacramento Area Office, Western Area Power Administration, 1825 Bell Street, Suite 105, Sacramento, CA 95825, Phone: (916) 978–4418.

SUPPLEMENTARY INFORMATION: Power rates for the Stampede Division are established pursuant to the Department of Energy (DOE) Organization Act of August 4, 1977 (42 U.S.C. 7101 *et seq.*); the Reclamation Act of 1902 (43 U.S.C. 372 *et seq.*) as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)); and the Act of August 1, 1966, 70 Stat. 775, authorizing construction of the Washoe Project.

The DOE Delegation Order No. 0204–108 (48 FR 55664, December 14, 1983) delegates to the Administrator of Western, on a nonexclusive basis, the authority to develop power and transmission rates. The order also delegates to the Deputy Secretary, on a nonexclusive basis, the authority to confirm, approve, and place in effect, on an interim basis, power and transmission rates.

Western is developing these rates for Stampede Division, Washoe Project, in accordance with Reclamation Law, DOE financial reporting policies, procedures, and methodology (DOE Order No. RA 6120.2, September 20, 1979), and the procedures for public participation in rate adjustments found in Title 10 CFR Part 903 (1985).

This notice initiates the public proceedings for a minor new service, announcing the rates under consideration and the beginning of the 30-day consultation and comment period. A public information and comment forum will not be held. Under DOE procedures, such forums are optional for minor rate adjustments, which include rate adjustments for power systems with installed capacity of less than 20,000 kW. Stampede Powerplant capacity is 3,650 kW, well under the 20,000 kW limit, making the forums optional for Stampede. Western's decision not to hold public forums is primarily due to the absence of public interest and involvement during the power marketing proceedings.

Rate Components

The two alternative rates will be based on power related costs associated with the Stampede nonfirm energy, as delivered to the customer at the Stampede Powerplant Switchyard.

a. *SNF–1.* In the event that the Government operates and maintains the Stampede facilities, the customer will pay full cost of service, now calculated at 40.85 mills per kWh. The customer will pay this rate for each kWh of nonfirm energy delivered to the customer at the Stampede Powerplant, except for the energy designated to service the project loads. The full cost of service is defined as payment of the following costs, as allocated to the commercial power function: (1) The annual operation and maintenance (O&M) expenses, to be repaid in the year of occurrence; (2) the annual interest expenses, to be repaid in the year of occurrence; (3) the replacement costs, to be repaid over the service lives of the replaceable items or 50 years, whichever is shorter, such replacements to be repaid with interest; and (4) the power investment and associated planning costs, to be repaid over a 50-year repayment period at the Stampede power facility's authorized 2.591 percent interest rate.

b. *SNF–2.* In the event that the customer operates and maintains all of the Stampede Powerplant facilities at its own expense, the customer will pay the cost of service, less the O&M expenses, now calculated at 28.38 mills per kWh. The customer will pay this rate for each kWh of nonfirm energy delivered to the customer at the Stampede Powerplant, except for the energy designated to service the project loads. The costs to be repaid by the SNF–2 rate are the same costs as those defined for the SNF–1 rate, excluding the annual O&M expenses.

Background

Stampede Dam and Reservoir are located on the Little Truckee River approximately 8 miles above the confluence of the Little Truckee and Truckee Rivers. The dam and reservoir are in Sierra County, California, about 11 miles northeast of the town of Truckee. The water source for Stampede Reservoir is the Little Truckee River drainage basin containing about 126 square miles of dense wooded slopes and grass meadowlands.

When the Stampede Dam and Reservoir project was authorized in 1956, hydroelectirc power development was included. However, power facilities were not constructed at the time Stampede Dam was built during the period 1966 to 1970 because the power function was not economically justified. Nevertheless, provisions were made to facilitate the addition of power facilities at a later date.

A preliminary reevaluation of a powerplant at Stampede was published in a special Reclamation report, "Adding Powerplants at Existing Federal Dams in California," July 1978. The report recommended construction of a Stampede Powerplant. As a result, definite plan studies were initiated in fiscal year 1977 and construction of the powerplant is nearly complete.

Stampede Dam and Reservoir are presently operated to fulfill three purposes: flood control, fisheries enhancement, and recreation. Power generation, resulting from the addition

of the 3.65-MW powerplant at the dam, will add a fourth purpose. It is estimated Stampede Powerplant will provide approximately 9.6 million kWh annually. The powerplant will be operated as an unattended plant with automatic means for maintaining relatively constant downstream water releases in the event of unit shutdown. Generator control is completely automatic with capability for complete shutdown.

Under contract with Western, the Sierra Pacific Power Company (Sierra) constructed a ½ mile 60-kV transmission line between the Stampede power facility and Sierra's existing 60-kV transmission system for the purpose of delivering energy to Sierra's system. All plant and switchyard controls are centrally located inside the powerplant.

The energy generated by the Stampede Powerplant has an initial priority reservation for designated Washoe Project loads. The Lahontan National Fish Hatchery and the Marble Bluff Fish Facility have been designated by Reclamation and Western as project loads of the Washoe Project. Such designation makes the Fish and Wildlife Service facilities eligible to be served by the Stampede Powerplant on a priority basis. The projected demand of these facilities should not exceed 500-kW peakload and 2 million kWh annually. Energy generated at the Stampede Powerplant will be nonfirm in nature and, except for the energy designated to service the project loads, will be sold to the TDPUD as a preference agency.

Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*), each agency, when required by 5 U.S.C. 553 to publish a proposed rule, is further required to prepare and make available for public comment an initial regulatory flexibility analysis to describe the impact of the proposed rule on small entities. In this instance, the rate adjustment for Stampede relates to nonregulatory services provided by Western at a particular rate. Under 5 U.S.C. 601(2), rates or services of particular applicability are not considered "rules" within the meaning of the Act. Since the rate for Stampede power is of limited applicability and is being set in accordance with specific regulations and legislation under particular circumstances, Western believes that no flexibility analysis is required.

Environmental Evaluation

In compliance with the National Environmental Policy Act of 1969 and DOE regulations published in the Federal Register (45 FR 20694–20701, as amended), Western has reviewed the environmental impacts of the proposed ratesetting for Stampede Division and has determined that it does not involve a major Federal action having a significant adverse impact on the human environment. The preparation of an environmental assessment or environmental impact statement is not required.

Executive Order 12291

The purpose of Executive Order 12291, dated February 17, 1981, is

> . . . to reduce the burdens of existing and future regulations, increase agency accountability for regulatory actions, provide for presidential oversight of the regulatory process, minimize duplication and conflict of regulations, and insure well-reasoned regulations . . . .

The DOE has determined that this is not a major rule pursuant to the criteria of section 1(b) of the Order. Furthermore, Western has received an exemption from sections 3, 4, and 7 of Executive Order 12291 and therefore has not prepared a regulatory impact statement.

Availability of Information

All brochures, studies, comments, letters, memorandums and other documents made or kept by Western for the purpose of developing the proposed alternative rates are and will be available for inspection and copying at the Sacramento Area Office, Western Area Power Administration, 1825 Bell Street, Suite 105, Sacramento, California 95825, (916) 978–4418.

Issued at Golden, Colorado, May 8, 1986.

William H. Clagett,
Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ORD-FRL-3012-4]

Air Quality Criteria; Addendum to the Health Assessment Document for Tetrachloroethylene (Perchloroethylene, PERC, PCE)

AGENCY: Environmental Protection Agency.

ACTION: Reopening of the Public Comment Period.

SUMMARY: This notice announces the reopening of the public comment period for the external review draft of the Addendum to the Health Assessment Document for Tetrachloroethylene (Perchloroethylene): Updated Carcinogenicity Assessment for Tetrachloroethylene (Perchloroethylene, PERC, PCE), EPA/600/8–82–005FA, dated April 1986. On April 8, 1986 a notice was published in the Federal Register (51 FR 12202) announcing the Addendum as being available for public comment from April 7, 1986 through May 5, 1986.

DATES: The Agency will make this document available for public review and comment from the date of this notice through July 30, 1986.

ADDRESSES: To obtain a copy of the draft document, interested parties should contact the ORD Publications Center, CERI–FRN, Environmental Protection Agency, 26 W. St. Clair Street, Cincinnati, Ohio 45268, (513) 569–7562, and request the external review draft of the Addendum to the Health Assessment Document for Tetrachloroethylene (Perchloroethylene, PERC, PCE), EPA document number EPA–600/8–82–005FA. Please provide your name, mailing address, and the EPA document number when requesting a copy of the draft document.

The draft document will also be available for public inspection and copying at the EPA Library, EPA headquarters, Waterside Mall, 401 M Street SW., Washington, DC 20460.

Comments on the draft document should be sent to: Project Manager for Tetrachloroethylene, Carcinogen Assessment Group (RD–689), Office of Health and Environmental Assessment, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Technical Information Staff, Office of Health and Environmental Assessment (RD–689), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, 202/382–7343.

SUPPLEMENTARY INFORMATION: The Health Assessment Document for Tetrachloroethylene is available from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161, (703) 487–4650. The NTIS ordering number is PB85–248704.

Dated: May 20, 1986.

Norbert A. Jaworski,
Acting Assistant Administrator for Research and Development.

[OPP-66131; FRL-3018-4]

Phorate; Intent To Cancel Registrations of Certain Pesticide Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Intent to Cancel.

SUMMARY: EPA has issued a Guidance Document for pesticide products containing the active ingredient phorate. This Guidance Document indicated that certain label changes implementing risk reduction measures were necessary to assure that continued use of phorate would not cause unreasonable adverse effects on the environment. This Notice announces EPA's intent to cancel the registrations of six pesticide products whose registrants have failed to make labeling changes specified in the Guidance Document, and to prohibit sale or distribution of existing stocks of those products. The products are called Agro-Chem Brand Granules, Phorate 15-G Soil and Systemic Insecticide, Phorate 10-G Soil and Systemic Insecticide, 7-10-14+0.50% T Contains 0.50% Thimet 6-8-6+0.10% T Contains 0.10% Thimet, and El Blanco Brand Terraclor Thimet 6.5—6.5 Soil Fungicide Systemic Insecticide Granular. Persons who would be adversely affected by such actions may request that EPA hold a hearing.

DATE: A request for a hearing submitted by a registrant or an applicant for registration of an affected product must be received on or before June 27, 1986, or within 30 days after receipt by mail of this notice, whichever is the later date. A request for a hearing submitted by any other adversely affected person must be received on or before June 27, 1986.

ADDRESS: Hearing requests must be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:
By mail: William H. Miller, Product Manager (PM) 23, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
Office location and telephone number: Rm. 211, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2600).

SUPPLEMENTARY INFORMATION: Pesticide products containing the active ingredient phorate have been registered in the United States since about 1966. There are currently 21 registered pesticide products containing phorate used either to control insects on a wide variety of crops or to control nematodes on commercially grown ornamentals.

As part of its ongoing program to reexamine previously registered pesticides, EPA conducted a comprehensive review of the existing data on registered pesticide products containing phorate. Based on this review, EPA decided to impose data requirements and to state the conditions and label modifications necessary for products containing that active ingredient to comply with the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). EPA's conclusions on these matters were set forth in a Guidance Document on phorate dated August 1984, a copy of which was sent to all registrants of products containing phorate.

The Guidance Document identified a number of revisions in the labels of phorate products necessary to maintain these registrations in compliance with FIFRA. Most registrants have made the changes, but four registrants have not. This Notice announces the Agency's intent to cancel the registrations of the six phorate products which have not been revised to comply with the provisions of the phorate Guidance Document.

I. Legal Background

In order to reregister a pesticide under FIFRA, a registrant must demonstrate that the pesticide satisfies the statutory standard for registration. That standard requires, among other things, that the pesticide perform its intended function without causing "unreasonable adverse effects on the environment" (FIFRA section 3(c)(5)). The term "unreasonable adverse effects on the environment" is defined in section 2(bb)(b) of FIFRA as "any unreasonable risk to man or the environment, taking into account the economic, social and environmental costs and benefits of the use of any pesticide." This standard requires a finding that the benefits of each use of the pesticide exceed the risks of use, when the pesticide is used in compliance with the terms and conditions of registration or in accordance with widespread and commonly recognized practice.

The proponents of registration have the burden of proving that a pesticide satisfies the standard for registration, both at the time of initial registration and as long as the registration remains in effect. Under section 6 of FIFRA, the Administrator may issue a Notice of Intent to Cancel the registration of a pesticide, or to cancel it unless the terms and conditions of registration are modified, whenever it appears that the pesticide causes unreasonable adverse effects on the environment.

In determining whether the use of a currently registered pesticide poses risks which are greater than its benefits, the Agency considers possible changes to its terms and conditions of registration which can reduce risks and the impacts of such modifications on the benefits of use. FIFRA section 6(b) expressly states that "in taking any final action under this subsection, the Administrator shall consider restricting a pesticide's use or uses as an alternative to cancellation . . . ."

The Agency's authority to classify pesticides for restricted use is contained in FIFRA section 3(d)(1)(C) and is implemented by regulations at 40 CFR 162.11(c), 162.30, and 162.31. If some or all uses of a pesticide are classified for restricted use, the use of a product labeled for such uses may be limited only to certified applicators or individuals under their direct supervision, as provided by FIFRA section 3(d)(1)(c) and 40 CFR 162.11(c)(5). A person may become certified to apply restricted-use pesticides only by demonstrating his competency, usually at the end of a State or Federal training program, to use these potentially dangerous pesticides safely and effectively, under FIFRA section 4 and 40 CFR Part 171. Section 3(d)(1)(C) of FIFRA provides that a restricted use classification "will" be imposed on a pesticide (or some of its uses) if the Administrator determines that without such restriction the pesticide "may generally cause unreasonable adverse effects on the environment."

EPA's regulations at 40 CFR 126.11(c)(2) and (3) elaborate upon these statutory standards and state that a pesticide will be classified for restricted use if, among other things, the pesticide is used in non-domestic settings, it is extremely toxic on skin contact or when inhaled, and its labeling does not adequately mitigate the risk. Hazards to nontarget wildlife and other hazards may also provide a basis for restricting the use of a pesticide under § 62.11(c) (2) and (4).

The Agency's authority to require specified labeling on pesticide products is derived from FIFRA sections 3(c)(5)(B) and 2(q)(1) (E), (F), and (G) and is implemented by regulations at 40 CFR 162.10.

If the Agency determines that changes in the label of a pesticide—for example, a statement that the pesticide is classified for use by certified applicators only, or imposing other conditions on its continued registration—are necessary to

BEST COPY AVAILABLE

reduce the risks to a level where the benefits will outweigh the risks, the Agency may inform the registrant that he must request amendments to the registration to make those changes. If any registrant fails to comply, EPA may issue a Notice of Intent to Cancel the registrations in question.

II. Determination of Unreasonable Adverse Effects

As explained in Unit II.A EPA has determined that continued unrestricted use of certain pesticide products containing phorate is likely to result in unreasonable adverse effects on the environment, and in accordance with FIFRA section 6(b)(1), EPA is issuing this Notice of its intent to cancel the registrations of the products and to prohibit sale or distribution by registrants of existing stocks of such products. The following discussion of the risks and benefits of phorate summarizes information in the Phorate Registration Standard and supporting science chapters. For information regarding the availability of "The Guidance for the Registration of Manufacturing-Use and Certain End-Use Pesticide Products Containing Phorate, August 1984" call Catherine Grimes at (703-557-3240).

A. Risks

Phorate is acutely toxic to humans and wildlife. Due to its acute toxicity, EPA has concluded that there is a substantial risk that mixer-loaders and applicators of phorate and other farmworkers will suffer adverse effects as a result of their exposure to phorate. Even instances of minor failures to follow directions for use and disposal of phorate products could result in serious adverse effects to individuals through accidental ingestion, inhalation of dust from broken granules of pesticide, or dermal contact.

Due to phorate's very high toxicity, EPA has also concluded that use of phorate poses a risk to endangered species including: Attwater's greater prairie chicken, Aleutian goose, Everglades kite, slackwater darter, woundfin, freshwater mussels, valley elderberry, longhorn, beetle, delta green ground beetle and Kern primrose sphinx moth.

Risks to applicators and to endangered species could be reduced by revising the labels of phorate products as provided in the Guidance Document on phorate. This is accomplished by providing persons trained in the proper use of pesticides with specific directions for use which limit exposure to those at risk.

B. Risk Reduction Measures

To mitigate these risks EPA specified the following labeling statements for all manufacturing-use products:

Warnings and precautionary statements applicable to products in Toxicity Category I, as required in 40 CFR 162.10(h).

Wear protective clothing, rubber gloves and goggles. Wear a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under provisions of 30 CFR Part 11 for organic phosphate protection.

For formulation into end-use insecticide and/or nematicide products intended for [specify the appropriate use pattern listed in section F.3 of the Guidance Document on phorate].

Do not discharge effluent containing this product directly into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identifieid and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the Environmental Protection Agency.

Further, EPA specified that end-use products must contain certain additional labeling statement, depending on the toxicity, type of formulation and/or use pattern:

(All formulations)

Warnings and precautionary statements depending on toxicity category of the product, as required in 40 CFR 162.10(h).

Do not reenter treated fields before 24 hours after application. If reentry prior to 24 hours is required, take the same precautions as an applicator of the product including use of protective clothing, gloves and goggles."

Not for use or storage in or around the home.

Restricted Use Pesticide

For retail sale to and use only by Certified Appplicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

Food/feed crops other than those registered for use with phorate may not be planted in phorate-treated soil.

(Granular formulations)

When applying product, wear protective clothing, gloves and goggles.

(EC formulations)

When applying product, wear protective clothing, rubber gloves and goggles. Wear a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11 for organic phosphate protection.

(*Greenhouse Uses*)

Wear a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11 for organic phosphate protection.

(*Terrestrial Crops Other Than Rice*)

This pesticide is toxic to fish and wildlife. Birds and other wildlife feeding in treated areas may be killed. Do not apply directly to water or wetlands. Runoff and drift from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water by cleaning of equipment or disposal of wastes. Cover or incorporate spills.

(*Rice Uses*)

This pesticide is toxic to fish and wildlife. Aquatic organisms may be killed at the recommended application rate. Do not contaminate water by cleaning of equipment or disposal of wastes. Cover and incorporate spills.

Adding these label statements will better inform users about the risk presented by use of phorate. Imposition of reentry intervals and protective clothing requirements will reduce applicator and farmworker exposure. Reducing exposure will result in a substantially lower level of risk to these parties. Moreover, since the use of phorate would be restricted to certified applicators, EPA expects that users will follow use directions more carefully and that such actions will mitigate or eliminate the risks to humans and to the nontarget wildlife which are the subject of the label requirements.

C. Benefits

As explained more fully in Unit II.D, EPA believes that requiring registered products containing phorate to bear the label statements set forth above will have no significant impact on the benefits of using phorate pesticides. Specifically, the Agency does not anticipate any substantial adverse impact on users or the agricultural economy as a result of this action.

Although registrants of 6 products out of 21 currently registered products subject to the labeling requirements have not sought to amend their registrations to make the specified

BEST COPY AVAILABLE

changes, the remaining products are in compliance. Because there are currently registered products containing phorate which are in compliance with the above labeling requirements, EPA concludes that cancellation of noncomplying products would have no impact on the availability of phorate.

Moreover, the incorporation of the labeling statements specified above would be unlikely to have an impact on the availability or benefits of phorate. Phorate products would still be available for use on all sites that are currently registered. The labeling statements would not impair the users' ability to apply the product when needed for pest control.

D. Risk/Benefit Balance

EPA concludes that phorate products which do not bear the label statements specified in Unit II.B will cause unreasonable adverse effects on the environment. This conclusion rests on the determination that the risks of using phorate, without the proposed restrictions, outweigh the benefits of such use. EPA has further determined that these risks can be substantially diminished or eliminated by adding certain label statements and that such changes would not significantly reduce the benefits of the product. With such restrictions, EPA concludes that the risks would be reduced to the point where the benefits would outweigh the risks of using the product. Accordingly, the Agency is issuing this notice of intent to cancel the registration of phorate pesticides that do not comply with the applicable label requirements specified in Unit II.B of this Notice.

E. Existing Stocks

This unit of the Notice sets forth EPA's determination regarding further sale or distribution of existing stocks of phorate products cancelled by operation of this Notice. The term "existing stocks" refers to any quantity of phorate product which is in the physical custody of any registrant on the date this Notice becomes effective by operation of law.

No registrant may distribute, sell, offer for sale, hold for sale, ship, deliver for shipment, or receive and (having so received) deliver or offer to deliver any existing stocks of a pesticide product containing phorate after the date on which the registration of that product is cancelled by operation of law (See Unit IV.C). Any other quantity of a pesticide product containing phorate that has been cancelled (e.g., quantities in distributors' and users' possession) may be sold, distributed, or used according to label directions until December 31, 1986.

The purpose of this provision governing existing stocks is to clear the channels of trade of non-complying phorate products as quickly as possible without unreasonably penalizing distributors and users for the registrants' failure to adopt the specified labeling. Registrants are not being allowed any period of time to sell or distribute their existing stocks of phorate in view of EPA's conclusion that these products cause unreasonable adverse effects on the environment and the lengthy period during which registrants have been on notice of EPA's intention to cancel the registration of phorate products which did not bear the specified label statements. EPA believes that the amount of existing stocks in the hands of distributors and retailers is relatively limited. Sale and eventual use of such stocks should not significantly add to the risks to the environment.

III. Statutory Review

Sections 25(d) and 6(b) of FIFRA require that, prior to issuing a notice of intent to cancel the registration of any pesticide product, EPA shall notify the Scientific Advisory Panel (Panel) and the U.S. Department of Agriculture (USDA) of the proposed action. Following such notice, the Panel waived its right to comment on this Notice by memorandum dated January 9, 1986. USDA indicated by memorandum dated March 31, 1986 that it had no objection to this Notice.

IV. Procedural Matters

This unit of the Notice describes the different procedures by which EPA will implement the regulatory decision described in Unit II. Specifically, this unit announces EPA's intent to cancel the registration of affected phorate products unless the changes required by Unit II.A of this Notice are made. Under section 6(b)(1) of FIFRA, registrants and certain other adversely affected parties may request a hearing on the cancellation action that this Notice initiates. Unless the registrant makes the required change(s) or a hearing is properly requested with regard to a particular registration, the registration will be cancelled by operation of law.

A. Procedure for Amending Registration

Registrants can avoid cancellation of product numbers 1528-492, 23486-65, 23486-66, 9659-240, 9659-242 and 11656-29 by submitting an application for product labeling revised as specified in the August 1984 phorate Guidance Document, within 30 days from receipt of this Notice or its publication in the Federal Register, whichever is later. To do so, a registrant should submit an Application for Amended Pesticide Registration (EPA Form 8570-1) along with two copies of draft labeling, including the label and associated brochures.

Send application for amended registration to: William H. Miller, PM 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

B. Procedure for Requesting a Hearing

To contest any provision of this Notice, registrants may request a hearing within 30 days of receipt of this Notice or within 30 days from publication of this Notice in the Federal Register, whichever occurs later. Any other person adversely affected by the cancellation action described in this Notice, may request a hearing within 30 days of publication of this Notice in the Federal Register.

A registrant or other adversely affected party who requests a hearing must file the request in accordance with the procedures established by FIFRA and the Agency's Rules of Practice Governing Hearings (40 CFR Part 164). These procedures require, among other things, that each request must identify the specific registration(s) by registration number(s) and the specific use(s) for which a hearing is requested, and that each request must be received by the Hearing Clerk within the applicable 30-day period. Failure to comply with these requirements will result in denial of the request for a hearing. A request for a hearing must also be accompanied by objections specific to each use of the pesticide product for which a hearing is requested.

Requests for a hearing must be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

C. Consequences of Filing or Failing to File a Hearing Request

1. *Consequences of filing a timely and effective hearing request.* If a hearing on the action initiated by this Notice is requested in a timely and effective manner, the hearing will be governed by the Agency's Rules of Practice for hearings under FIFRA section 6 (40 CFR Part 164). The hearing will be limited to the specific uses and specific product registrations for which the hearing is requested.

In the event of a hearing, the specific use or uses of the specific registered

product which is the subject of the hearing will not be cancelled except pursuant to an order of the Administrator at the conclusion of the hearing or pursuant to an Accelerated Decision issued under 40 CFR 164.91.

2. *Consequence of failure to file in a timely and effective manner.* If a hearing concerning the registration of a specific pesticide product subject to this Notice is not requested by the end of the applicable 30-day period registration of that product will automatically be cancelled by operation of law unless the registrant files a request for an amended registration within the statutory period.

If the registration of a product is cancelled by operation of law, no quantity of that product produced after the effective date of cancellation may be sold or distributed in commerce by the registrant. Any quantity of a cancelled pesticide that has been put into channels of trade by the registrant before the effective date of this notice may be sold or distributed with its existing labeling by persons other than the registrant.

D. Separation of Functions

The Agency's rules of practice at 40 CFR 164.7 forbid anyone who may take part in deciding this case, at any stage of the proceeding, from discussing the merits of the proceeding *ex parte* with any party or with any person who has been connected with the preparation or presentation of the proceeding as an advocate or in any investigative or expert capacity, or with any of their representatives.

Accordingly, the following Agency offices, and the staffs thereof, are designated as the judicial staff to perform the judicial function of the Agency in any administrative hearing on this Notice of Intent to Cancel: the office of the Administrative Law Judge, the office of the Judicial Officer, the Administrator, Deputy Administrator, and the members of the staff in the immediate office of the Administrator and Deputy Administrator. None of the persons designated as the judicial staff may have any *ex parte* communication with the trial staff or any interested person not employed by EPA, on the merits of any of the issues involved in this proceeding, without fully complying with the applicable regulations.

Dated: May 7, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-66127A; FRL-3020-6]

Techne Weed-D; Intent To Cancel Registration; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; correction.

SUMMARY: This document corrects a notice of voluntary cancellations of registrations of pesticide products. The Company withdrew its voluntary cancellation request for the registration of Techne Weed-D within the 30 day comment period.

FOR FURTHER INFORMATION CONTACT: John Richards, Chief, Federal Register Staff (TS-788), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, (202-382-2253).

SUPPLEMENTARY INFORMATION: In FR Doc. 86-850, appearing in the Federal Register of January 22, 1986 (51 FR 2959), the product below was listed for voluntary cancellation: After the publication, the Agency received a request within the 30 day comment period to withdraw the product from the voluntary cancellation category.

Registration No.	Product name	Registrant	Date registered
1990-434	Techne Weed-D	Farmland Industries, P.O. Box 7305, Kansas City, MO 64116.	June 7, 1982.

Therefore, registration number 1990-434 for Techne Weed-D has not been cancelled.

Dated: May 15, 1986.

Susan H. Sherman,

Acting Director, Office of Pesticide Programs.

Furadan 75 Wettable Powder; Intent to Cancel Registration; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; correction.

SUMMARY: This document corrects a notice of voluntary cancellation that inadvertently cancelled the registration for Furadan 75 Wettable Powder that was published in the Federal Register.

FOR FURTHER INFORMATION CONTACT: John Richards, Chief, Federal Register Staff (TS-788), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460 (202-382-2253).

SUPPLEMENTARY INFORMATION: In FR Doc. 85-20307, appearing in the Federal Register of August 28, 1985 (50 FR 34908), the product below was inadvertently listed as voluntarily cancelled:

Registration No.	Product name	Registrant	Date registered
279-2575	Furadan 75 Wettable Powder	FMC Corporation, Agricultural Chem. Group, 2000 Market St., Philadelphia, PA 19103.	March 7, 1972.

Registration number 279-2575 for Furadan 75 Wettable Powder was erroneously listed; it has not been cancelled.

Dated: May 15, 1986.

Susan H. Sherman,

Acting Director, Office of Pesticide Programs.

Malathion 50 Emulsifiable Liquid; Intent to Cancel Registration; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; correction.

SUMMARY: This document corrects a notice of voluntary cancellation that inadvertently cancelled the registration for Malathion 50 Emulsifiable Liquid that was published in the Federal Register.

FOR FURTHER INFORMATION CONTACT: John Richards, Chief, Federal Register Staff (TS-788), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460 (202-382-2253).

SUPPLEMENTARY INFORMATION: In FR Doc. 85-3227, appearing in the Federal Register of February 13, 1985 (50 FR 6045), the product below was inadvertently listed as voluntarily cancelled:

Registration No.	Product name	Registrant	Date registered
934-250	Malathion 50 Emulsifiable Liquid.	Penn-Gabriel Division, Miller Chemical and Fertilizer Corp., 264 21st Ave., Paterson, NJ 07509.	January 21, 1964.

Registration number 904–259 for Malathion 50 Emulsifiable Liquid was erroneously listed; it has not been cancelled.

Dated: May 16, 1986.

BILLING CODE 6560–50–M

[PP 5G3173/T518; FRL–3021–5]

Dow Chemical Co.; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for the residues of the herbicide 2-(3,5-dichlorophenyl)-2-(2,2,2-trichloroethyl)oxirane and its metabolite in or on certain raw agricultural commodities. These temporary tolerances were requested by Dow Chemical Co.

DATE: These temporary tolerances expire April 9, 1988.

FOR FURTHER INFORMATION CONTACT:

By Mail: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 245, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA. (703–557–1800).

SUPPLEMENTARY INFORMATION: Dow Chemical Co., Agricultural Products Dept. P.O. Box 1706, Midland, MI 48640, has requested in pesticide petition PP 5G3173 the establishment of temporary tolerances for the combined residues of the herbicide 2-(3,5-dichlorophenyl)(2-2,2,2-trichloroethyl)oxirane and its metabolite 3,5-dichlorobenzoic acid in or on the raw agricultural commodities grain sorghum, grain, forage and fodder at 0.05 part per million (ppm).

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 464–EUP–85, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Dow Chemical Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire April 9, 1988. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 610–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Authority: 21 U.S.C. 346a(j).

Dated: May 19, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Shell Oil Co.; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for the combined residues of the herbicide *exo*-1-methyl-4-(1-methylethyl)-2-[(2-methylphenyl)metyoxy]-7-oxabicyclo[2.2.1] heptane and its five mono-hydroxylated metabolites, in or on certain raw agricultural commodities. These temporary tolerances were requested by Shell Oil Co.

DATE: These temporary tolerances expire April 4, 1988.

FOR FURTHER INFORMATION CONTACT:

By mail: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 245, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA. (703–557–1800).

SUPPLEMENTARY INFORMATION: Shell Oil Co., Suite 200, 1025 Connecticut Ave. NW., Washington, DC 20036, has requested in pesticide petition PP 4G3085 the establishment of temporary tolerances for the combined residues of the herbicide *exo*-1-methyl-4-(1-methylethyl)-2-[(2-methylphenyl)metyoxy]-7-oxabicyclo [2.2.1] heptane and its five mono-hydroxylated metabolites, 7-oxabicyclo [2.2.1] heptane-1-methanol, alpha, alpha, 4-trimethyl-3,2-[(2-methylphenyl]metyoxyl]-*exo;* 7-oxabicyclo [2.2.1.] heptane-2-ol, *exo*-1-methyl-4-methyl-1-(1-methylethyl)-5-[(2-methylphenyl]metyoxy]-, *exo, exo-*; benzenemethanol, 2-[(1-methyl-4-(1-methylethyl)-7-oxabicyclo (2.2.1) hept-2-yloxy)methyl]-, *exo-*; phenol, 4-methyl-3-[(1-methyl-4-(1-methylethyl)-7-oxabicyclo (2.2.1) hept-2-yloxy) methyl]-, *exo-;* and phenol, 3-methyl-4-[(1-methyl-4-(1-methylethyl)-7-oxabicyclo (2.2.1) hept-2-yloxy)-methyl]-, *exo,* in or on the raw agricultural commodities soybeans, soybean forage, soybean fodder, cottonseed, peanuts, peanut hulls, peanut forage and peanut hay at 0.1 part per million (ppm).

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 201–EUP–79, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Shell Oil Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire April 4, 1988. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 610-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Issuance of Experimental Use Permits; American Cyanamid Co. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: By mail, the product manager cited in each experimental use permit at the address below:

Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC. 20460.

In person or by telephone: Contact the product manager at the following address at the office location or telephone number cited in each experimental use permit.

1921 Jefferson Davis Highway, Arlington, VA.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

241-EUP-116. Issuance. American Cyanamid Company, Agricultural Research Division, P.O. Box 400, Princeton, NJ 08540. This experimental use permit allows the use of 547.5 pounds of the herbicide imazaquin and 2,190 pounds of the herbicide pendimethalin on soybeans to evaluate the control of broadleaf weeds and annual grasses. A total of 4,380 acres are involved; the program is authorized only in the States of Alabama, Arkansas, Delaware, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, New Jersey, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, and Virginia. The experimental use permit is effective from April 17, 1986 to April 17, 1987. A permanent tolerance for residues of the active ingredients in or on soybeans has been established (40 CFR 180.361). (Robert Taylor, PM 25, Rm. 245, CM# 2, (703-557-1800))

279-EUP-101. Renewal. FMC Corporation, 2000 Market St., Philadelphia, PA 19103. This experimental use permit allows the use of 886.5 pounds of the insecticide cyclopropanecarboxylic acid, 3-(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2-dimethyl-(3-methyl-[1,1'-biphenyl]-3-yl)methyl ester on alfalfa, cotton, field corn, potatoes, sorghum, soybeans, and tobacco to evaluate the control of various insect pests. A total of 1,147 acres are involved; the program is authorized in the States of Alabama, Arizona, Arkansas, California, Connecticut, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakaot, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Wisconsin, and Wyoming. The experimental use permit was previously effective from April 1, 1986 to April 1, 1986. The permit is now effective from April 21, 1986 to April 21, 1987. This permit is issued with the limitation that all crops are destroyed or used for research purposes only. (George LaRocca, PM 2, Rm. 204, CM# 2, (703-557-2400))

10163-EUP-1. Issuance. Gowan Company, P.O. Box 5569, Yuma AZ 85364. This experimental use permit allows the use of 1,200 pounds of the insecticide sodium fluoaluminate on grapes to evaluate the control of grapes leafhopper, omnivorous leafroller, and grape leaf skeletonizer. A total of 200 acres are involved; the program is authorized in the State of California. The experimental use permit is effective from April 10, 1986 to April 10, 1987. A permanent tolerance for residues of the active ingredient in or on grapes has been established (40 CFR 180.145) William Miller, PM 16, Rm. 211 CM# 2 (703-557-2000))

53219-EUP-1. Extention: Mycogen Corporation, P.O. Box 5128, Valdosta, GA 31603-5128. This experimental use permit allows the use of 92.5 pounds of the fungus *alternaria cassiae* on peanuts and soybeans to evaluate the control of sicklepod. A total of 185 acreas are involved; the program is authorized only in the States of Alabama, Arkansas, Florida, Georgia, Louisana, Mississippi, and North Caroline. The experimental use permit is effective from May 10, 1986 to May 10, 1987. A temporary tolerance for residues of the active ingredient in or on peanuts and soybeans has been established. (Richard Mountfort, PM 23, Rm. 245, CM# 2, (703-557-1830))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits

should be directed to the persons cited above. It is suggested that interested perons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136c.

Dated: May 19, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE [illegible]

[OPTS-59218B; FRL-3022-9]

Toxic and Hazardous Substances Controls; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME-86-38. The test marketing conditions are described below.

EFFECTIVE DATE: May 20, 1986.

FOR FURTHER INFORMATION CONTACT: Michelle Roddy, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Environmental Protection Agency, RM. E-609B, 401 M Street, SW., Washington, DC 20460, (202-475-8935).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME-86-38. EPA has determined that test marketing of the new technical substance described below, under the conditions set out in the TME application, and for the time period and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volumes, uses and number of customers must not exceed those specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-86-38. A bill of lading accompanying each shipment must state that the use of the substance is restricted to those approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available to EPA for inspection or copying in accordance with section 11 of TSCA.

1. The applicant must maintain records of the quantity of the TME substance produced and must make these records available to EPA upon request.

2. The applicant must maintain records of the dates of shipment to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substances.

T-86-38

Date of Receipt: April 10, 1986.

Notice of Receipt: April 25, 1986 (51 FR 15885).

Applicant: Confidential.

Chemical: (G) Functionalized styrenated acrylic polymer.

Use: (G) Industrial resin for products having an open use.

Production Volume: 7,000 kg.

Number of Customers: One.

Worker Exposure: Manufacturing: Dermal, a total of 3 workers, 2 hours/day for 3 days/year. Processing: Dermal, a total of 2 workers, 2 hours/day for 10 days/year each. Use: Dermal/Inhalation, a total of 5 workers, 7 hours/day for 10 days/year each.

Test Marketing Period: Sixty days.

Commencing on: May 20, 1986.

Risk Assessment: EPA identified no significant health or environmental concerns. Therefore, the test market substance will not pose any unreasonable risk of injury to health or the environment.

Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its findings that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: May 20, 1986.

Don R. Clay,

Director, Office of Toxic Substances.

[FR Doc. 86-11907 Filed 5-27-86; 8:45 am]

BILLING CODE [illegible]

[OW-FRL-3022-3]

Water Quality Criteria; Request for Comments

AGENCY: Environmental Protection Agency.

ACTION: Notice of request for comments on ambient aquatic life water quality criteria documents.

SUMMARY: EPA announces the availability for public comment and provides a summary of an ambient aquatic life water quality criteria document for zinc. When published in final form after the review of public comments, these water quality criteria may form the basis for enforceable standards. These criteria are published pursuant to section 304(a)(1) of the Clean Water Act.

DATES: Written comments should be submitted to the person listed directly below by July 28, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. Frank Gostomski, Criteria and Standards Division (WH-585), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460 (202) 245-3030.

Availability of Documents: This notice contains a summary of a document containing proposed ambient water quality criteria for the protection of aquatic life and its uses. Copies of the complete criteria documents may be obtained upon requests from the person listed above. This document is also available for public inspection and copying during normal business hours at: Public Information Reference Unit, U.S. Environmental Protection Agency, Room 2404 (rear), 401 M St., SW., Washington, DC 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. Copies of this document are also available for review in the EPA Regional Office libraries.

SUPPLEMENTARY INFORMATION:

Background

Section 304(a)(1) of the Clean Water Act (33 U.S.C. 1314(a)(1)) requires EPA to publish and periodically update ambient water quality criteria. These criteria are to reflect the latest scientific knowledge on the identifiable effects of pollutants on public health and welfare, aquatic life, and recreation.

EPA has periodically issued ambient water quality criteria beginning in 1973 with the publication of the "Blue Book" (Water Quality Criteria 1972). In 1976, the "Red Book" (Quality Criteria for Water) was published. On November 28, 1980 (45 FR 79318), EPA announced the publication of 64 individual ambient water quality criteria documents for pollutants listed as toxic under section 307(a)(1) of the Clean Water Act. A document addressing 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) was announced on February 15, 1984 (FR 49: 5831) completing the coverage of the 65 priority pollutants listed in 307(a)(1). Nine ambient water quality criteria documents, including revision of seven of the 1980 documents, were released on July 29, 1985 (50 FR 30784). A bacteriological ambient water quality criteria document was published on March 7, 1986 (51 FR 8012).

Today EPA is announcing the availability for public comment of a proposed ambient aquatic life water quality criteria document for zinc. This document, upon final publication will update and revise appropriate sections of the 1980 criteria document.

The document announced today will not contain information on the effects of zinc on human health. An advisory will be issued to update the human health section of the 1980 ambient water quality criteria document for zinc, if a review of the available information indicates that such a revision is necessary. Both the criteria document announced today and the water quality advisory addressing human health may form the basis for enforceable standards, when published in final form.

Dated: May 12, 1986.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

Zinc

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration (in μg/l) of zinc does not exceed the numerical value given by $e^{(0.8545\ [\ln(\text{hardness})]+0.7614)}$ more than once every three years on the average and if the one-hour average concentration (in μg/l) does not exceed the numerical value given by $e^{(0.8545\ [\ln(\text{hardness})]+0.7614)}$ more than once every three years on the average. For example, at hardnesses of 50, 100, and 200 mg/l as $CaCO_3$ the four-day average concentrations of zinc are 49, 86, and 150 μg/l, respectively, and the one-hour average concentrations are 54, 95, and 170 μg/l.

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of zinc does not exceed 70 μg/l more than once every three years on the average and if the one-hour average concentration does not exceed 67 μg/l more than once every three years on the average.

EPA believes that "acid-soluble" is probably the best measurement at present for expressing criteria for metals and the criteria for zinc were developed on this basis. However, at this time, no EPA approved method for such a measurement is available to implement criteria for metals through the regulatory programs of the Agency and the States. The Agency is considering development and approval of a method for a measurement such as "acid-soluble". Until one is approved, however, EPA recommends applying criteria for metals using the total recoverable method. This has two impacts: (1) Certain species of some metals cannot be measured because the total recoverable method cannot distinguish between individual oxidation states, and (2) in some cases these criteria might be overly protective when based on the total recoverable method.

The allowed average excursion frequency of three years is the Agency's best scientific judgment of the average amount of time it will take an unstressed aquatic ecosystem to recover from a pollution event in which exposure to zinc exceeds the criterion. Stressed systems, for example, one in which several outfalls occur in a limited area, would be expected to require more time for recovery. The resiliencies of ecosystems and their abilities to recover differ greatly, however, and site-specific criteria may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model. The Agency recommends interim use of 1Q5 and 1Q10 for the Criterion Maximum Concentration (CMC) design flow and 7Q5 and 7Q10 for the Criterion Continuous Concentration (CCC) design flow in steady-state models for unstressed and stressed systems, respectively. These matters are discussed in more detail in the Technical Support Document for Water Quality-Based Toxics Control (U.S. EPA 1985).

BILLING CODE 6560-50-M

[OPP-36123; (FRL-3021-4)]

Tuberculocidal Activity Testing Methods for Antimicrobial Pesticides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Policy on Testing Methods.

SUMMARY: This notice announces three tuberculocidal activity testing options that will be permitted by the Agency. Applicants/registrants of all antimicrobial pesticides with proposed or existing tuberculocidal claims for their stressed (re-used) and/or non-stressed (discarded daily) product solutions must choose one testing approach for the development of data to substantiate tuberculocidal effectiveness.

EFFECTIVE DATE: May 28, 1986.

FOR FURTHER INFORMATION CONTACT:

By mail: D. Jean Jenkins, Registration Division (TS-767C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, Virginia, (703-557-7443).

SUPPLEMENTARY INFORMATION: Since 1976 the Agency has been advised by numerous registrants, testing laboratories, researchers, and other scientific groups that inconsistent test results were being obtained when glutaraldehyde-based products were tested by the Association of Official Analytical Chemists (AOAC) Tuberculocidal Activity Method at 20°C at 10 minutes exposure. Such findings were not reported for other chemical classes (i.e., phenolics, iodine). Researchers have indicated that glutaraldehyde-based products require longer exposure times and/or higher temperatures for tuberculocidal activity than those specified in the AOAC Tuberculocidal Activity Method. Similar

inconsistencies were experienced in the preregistration tuberculocidal testing of antimicrobial pesticides by the EPA microbiological testing facility in Beltsville, Maryland between 1971 and 1979. Adverse tuberculocidal data on glutaraldehyde-based products, developed by the established AOAC method, were submitted to the Agency under FIFRA section 6(a)(2) in 1979 and 1983.

Quaternary ammonium compounds are generally considered to be non-tuberculocidal. However, registrations have been issued for products in this chemical class which bear tuberculocidal efficacy claims, based on tuberculocidal data developed by the AOAC procedure and submitted in support of registration. The EPA tuberculocidal testing facility also obtained inconsistent test results when products in this chemical class were tested for tuberculocidal activity by the AOAC procedure.

In 1983, the AOAC Associate Referee for the AOAC Tuberculocidal Activity Method submitted a new quantitative tuberculocidal procedure for Agency consideration as an alternative testing method. The Agency distributed this new quantitative tuberculocidal procedure on May 21, 1984, in conjunction with the Label Improvement Program for registrants of glutaraldehyde-based hospital sterilant/disinfectant products. The new procedure was identified as an option alternative to the AOAC Tuberculocidal Activity Method for glutaraldehyde-based disinfectant products.

Subsequently, controversy arose concerning the validity of the new quantitative procedure and of the established AOAC method. In September 1984, an EPA Scientific Advisory Panel (SAP) Subpanel was established to evaluate the new procedure. The consensus of this Subpanel was that the new procedure had scientific merit but that more testing was needed before adoption as a standard method. In July 1985, a new SAP Subpanel was selected to provide a comparative assessment of the existing AOAC Tuberculocidal Activity Method and the new quantitative tuberculocidal procedure. A public meeting of the SAP Subpanel was held on September 30, 1985, and comments were solicited from the public and interested parties.

Having received the findings of the first and second SAP Subpanel and public comments relative to the tuberculocidal activity testing methods, the Agency announces the following regulatory policy:

1. Manufacturers/registrants/applicants of all antimicrobial pesticides with proposed or existing tuberculocidal claims for their stressed (re-used) and/or non-stressed (discarded daily) product solutions must choose one of three available tuberculocidal testing options to substantiate claims of tuberculocidal effectiveness. The testing options are as follow:

a. Use of the new quantitative tuberculocidal procedure.

b. Use of the existing AOAC Tuberculocidal Activity Method, but with modification of the standard test conditions of contact/exposure time and/or temperature that are necessary to achieve tuberculocidal effectiveness.

c. Use of the existing AOAC Tuberculocidal Activity Method, employing the standard test conditions of 10 minutes exposure time and 20° C. Since the tuberculocidal efficacy of glutaraldehyde-based products at 10 minutes exposure time and 20° C is questionable, selection of option (c) for glutaraldehyde-based products must be accompanied by validation data, based on the same test conditions (10 minutes at 20°C), from a second testing facility, (other than the laboratory that developed the original data). Registrants and/or applicants for registration are advised that withholding test results from the Agency which indicate failing tuberculocidal efficacy at 10 minutes and 20°C constitutes violation of FIFRA section 6(a)(2) concerning information required to be reported to the Agency.

2. Registrants and applicants for products with existing or proposed tuberculocidal claims, that are formulated with quaternary ammonium compounds will be permitted to base their tuberculocidal claims on data developed by optional procedures (a), (b), or (c) above. However, validation testing from a different laboratory will be required for any optional procedure chosen by the registrant/applicant for this chemical class of products. This validation testing requirement is considered necessary and warranted since it is questionable that quaternary ammonium compounds are tuberculocidal under any test conditions.

3. Registrants or applicants for products with existing or proposed tuberculocidal efficacy claims, that are formulated with chemical groups other than glutaraldehyde or quaternary ammonium compounds, are permitted at this time to base their tuberculocidal claims on any one of the three optional test procedures ((a), (b), or (c)) without the required validation testing. Validation testing is not necessary since it has been currently determined that reliable and reproducible test results are obtained for chemicals other than glutaraldehyde or quaternary ammonium compounds, using test conditions of 10 minutes contact time and 20°C. Should the tuberculocidal efficacy of other chemicals at 10 minutes exposure and 20°C be considered questionable in the future, validation testing will be required.

4. The contact/exposure time and temperature necessary to achieve effective use of the product must be reflected in the directions for use on the product label.

5. Applicants for registration of new antimicrobial pesticide prodcuts bearing tuberculocidal activity claims are required to provide supporting tuberculocidal activity claims are required to provide supporting tuberculocidal data by one of the three testing options and any required validation data prior to issuance of registration.

6. Registrants of antimicrobial pesticide products which do not currently bear tuberculocidal claims, but who wish to amend their product registration and label to add a tuberculocidal activity claim, are required to provide supporting tuberculocidal data by one of the three testing options and any required validation data prior to acceptance of the requested amendment.

7. Registrants of antimicrobial pesticide products with existing tuberculocidal activity claims which are not supported by one of the three testing options and any required validation data must provide data by one of the three options and any required validation data within 180 days of their response to a notification under section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) by the Agency in order to avoid suspension of their product registration.

8. The Agency will support review and collaborative testing of the new quantitative procedure by the AOAC as a replacement for the existing AOAC Tuberculocidal Activity Method, or as an additional alternative procedure.

9. The Agency will notify affected registrants, under the authority of FIFRA section 3(c)(2)(B), of the specific requirements for compliance with this announced tuberculocidal testing policy and the action that will be taken in the event of non-compliance.

The Agency believes that the validity of tuberculocidal efficacy claims for antimicrobial pesticides is a critical concern due to the public health implications of environmental contamination with *Mycobacterium tuberculosis* microorganisms. Therefore, it is for this reason that the Agency

sought a scientific consensus on the validity of tuberculocidal test methodology, and announces the required testing approaches to documentation of tuberculocidal effectiveness of antimicrobial pesticides.

Dated: May 16, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

FEDERAL MARITIME COMMISSION

Licensing of Ocean Freight Forwarders; Extension of Time for Filing Comments

May 22, 1986.

On April 23, 1986 (published at 51 FR 15834, Apr. 28, 1986) the Commission noticed the filing of a petition by the National Customs Brokers & Forwarders Association of America, Inc. requesting the Commission to amend its rules pertaining to the licensing of ocean freight forwarders. Interested persons were given until May 30, 1986, to submit views, arguments or data on the petition.

The Transpacific Westbound Rate Agreement (TWRA) has now filed a request for a three week extension of time in which to file comments. TWRA indicates that the current deadline is too short for its members to properly evaluate the petition and formulate an appropriate response.

Accordingly, for good cause shown, the Commission will extend the date for all comments from May 30, 1986, to June 23, 1986.

By the Commission.

John Robert Ewers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Ozark Bancshares, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than June 18, 1986.

A. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Ozark Bankshares, Inc.*, Ozark, Arkansas; to acquire at least 80 percent of the voting shares of Newco Corporation, Jasper, Arkansas, and thereby indirectly acquire Newton County Bank, Jasper, Arkansas, and Bankstock Two, Inc., Dardanelle, Arkansas, and thereby indirectly acquire Arkansas Valley Bank, Dardanelle, Arkansas.

Board of Governors of the Federal Reserve System, May 21, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 86F-0173]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of thiodiethylene bis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamate) as an antioxidant for polymers intended to contact food.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6B3928) has been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) be amended to provide for the safe use of thiodiethylene bis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamate) as an antioxidant for polymers intended to contact food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental

impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c), as published in the Federal Register of April 26, 1985 (50 FR 16636).

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

[Docket No. 85F-0281]

Mobil Chemical Co.; Withdrawal of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal without prejudice of a petition (FAP 5B3724) proposing that the food additive regulations be amended to provide for the safe use of pentaerythritol esters of fatty acids as surface lubricants in the manufacture of metallic articles in contact with food.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of September 21, 1983 (48 FR 43096), FDA published a notice that it had filed a petition (FAP 3B3724) from Mobil Chemical Co., 150 East 42d St., New York, NY 10017, that proposed to amend the food additive regulations to provide for the safe use of pentaerythritol esters of fatty acids as surface lubricants in the manufacture of metallic articles in contact with food. Mobil Chemical Co. has now withdrawn the petition without prejudice to a future filing (21 CFR 171.7).

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

Sharplan Lasers, Inc.; Premarket Approval of Sharplan Model 702 Nd: YAG Laser

Correction

In FR Doc. 86-10284, beginning on page 17099 in the issue of Thursday, May 8, 1986, make the following corrections:

1. On page 17099, in the third column, the fifteenth from last line should read "Evaluation, CDRH."

2. On page 17100, in the first column, in the eleventh line of the first paragraph, "of a review" should read "or a review".

3. Also on page 17100 in the first column, in the sixth from last line of the first paragraph, between "petition," and "FDA" insert "FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If".

BILLING CODE 1505-01-M

Public Health Service

National Institutes of Health; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HN (National Institutes of Health) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 51 FR 15699-70, April 25, 1986) is amended to reflect the following changes: (1) Recode the Standard Administrative Codes (SACs) for the NIH research institutes, divisions, and centers listed below; (2) delete the title Office of the Director and Deputy Directors (HNA1); and (3) change the Standard Administrative Code (SAC) for the Division of Equal Opportunity. These actions are internal administrative realignments and represent no change in mission or reporting relationships for the affected organizations.

Section HN-B, Organization and Functions is amended as follows:

(1) Change the Standard Administrative Codes (SACs) for the following research institutes, divisions, and centers:

National Eye Institute (HN-W) to *National Eye Institute (HNW); National Institute of Allergy and Infectious Diseases (HN-M)* to *National Institute of Allergy and Infectious Diseases (HNM); National Institute on Aging (HN-X)* to *National Institute on Aging (HNN); National Institute of Child Health and Human Development (HN-T)* to *National Institute of Child Health and Human Development (HNT); National Institute of Dental Research (HN-P)* to *National Institute of Dental Research (HNP); National Institute of Arthritis and Musculoskeletal and Skin Diseases (HN-Y)* to *National Institute of Arthritis and Musculoskeletal and Skin Diseases (HNB); National Institute of Environmental Health Sciences (HN-V)* to *National Institute of Environmental Health Sciences (HNV); National Institute of General Medical Sciences (HN-S)* to *National Institute of General Medical Sciences (HNS); National Institute of Neurological and Communicative Disorders and Stroke (HN-Q)* to *National Institute of Neurological and Communicative Disorders and Stroke (HNQ); Clinical Center (HN-2)* to *Clinical Center (HNI); John E. Fogarty International Center for Advanced Study in the Health Sciences (HN-5)* to *John E. Fogarty International Center for Advanced Study in the Health Sciences (HNF); Division of Research Grants (HN-1)* to *Division of Research Grants (HNG); Division of Research Services (HN-3)* to *Division of Research Services (HNE); Division of Computer Research and Technology (HN-6)* to *Division of Computer Research and Technology (HNU); Division of Research Resources (HN-4)* to *Division of Research Resources (HNR),* and *National Center for Nursing Research (HN-7)* to *National Center for Nursing Research (HN2).*

(2) Delete the title *Office of the Director and Deputy Directors (HNA1)* in its entirety.

(3) Under the heading *Office of the Director (HNA),* add "and assists the Assistant Secretary for Health in the formulation of national health policy" to the functional statement.

(4) Change the Standard Administrative Code for the *Division of Equal Opportunity (HNA12)* to the *Division of Equal Opportunity (HNA-2).*

Dated: May 8, 1986.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management, PHS.

BILLING CODE 4310-70-M

Bureau of Land Management

New Mexico Off-Road Vehicle Designations; Las Cruces District, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Decision.

SUMMARY: All public lands administered by Bureau of Land Management in the 600,500 acre Divide Planning Area, Socorro Resource Area, Las Cruces District, are hereby designated open, limited, or closed to off-road motorized vehicle use.

The 600,500 acre area affected by the designations is known as the Divide Planning Area (Socorro Resource Area), which includes lands in Catron and Socorro Counties in New Mexico. These designations are the result of land use decisions made in the Divide Management Framework Plan (MFP) approved February 1, 1983. Comments received from public meetings, hearings and numerous written responses on the Draft MFP were considered in the designation decisions.

These designations are final as published May 31, 1986. Under 43 CFR 4.21, an appeal may be filed within 30 days with the Interior Board of Land Appeals. The designations will remain in effect until rescinded or modified by the Las Cruces District Manager.

A. Open Designation

Areas which are designated open comprise 562,839 acres of public land in the Divide Planning Area of the Socorro Resource Area. An open designation was determined to be appropriate for these lands since off-road motorized vehicle use is an important recreational activity, is essential to the conduct of other authorized uses, and impacts to natural resources would not be significant.

B. Limited Designation

Eleven areas, comprising 137,661 acres are designated limited to existing roads and trails. These areas are as follows:

1. Use Limited to existing roads and trails.

a. Eagle Peak Wilderness Study Area (WSA)—43,960 acres. The Eagle Peak WSA is located in Catron County in west-central New Mexico approximately 6 air miles west of Quemado. Use is limited to maintain the scenic values and cultural resources within the area.

b. Mesita Blanca Wilderness Study Area (WSA)—19,414 acres. The Mesita Blanca WSA is located in Catron County in west-central New Mexico approximately 20 air miles west of Quemado. Use is limited to maintain the scenic and cultural resources within the area.

c. Continental Divide Wilderness Study Area (WSA)—68,761 acres. The Continental Divide WSA is located in Catron County in west-central New Mexico approximately 29 air miles south of Datil. Use is limited to maintain the scenic, cultural and wildlife resources within the area.

d. Horse Mountain Wilderness Study Area (WSA)—5,032 acres. The Horse Mountain WSA is located in Catron County in west-central New Mexico approximately 25 air miles southwest of Datil. Use is limited to maintain the scenic, recreational and wildlife resources within the area.

e. Cox Ranch Pueblo—40 acres. The Cox Ranch Pueblo is located in Catron County in west-central New Mexico approximately 8 air miles north of Quemado. Use is limited to protect cultural resources.

f. Kellog Canyon—10 acres. The Kellog Canyon is located in Catron Country in west-central New Mexico approximately 15 air miles southeast of

Datil. Use is limited to protect cultural resources.

g. Newton Communities—160 acres. The Newton Communities is located in Catron County in west-central New Mexico approximately 25 air miles north of Datil. Use is limited to protect cultural resources.

h. Zuni Salt Lake—160 acres. The Zuni Salt Lake is located in Catron County in west-central New Mexico approximately 10 air miles northwest foo Quemado. Use is limited to maintain scenic and cultural resources within the area.

i. Cerro Colorado—40 acres. The Cerro Colorado is located in Catron County in west-central New Mexico approximately 15 air miles southeat of Datil. Use is limited to maintain scenic and cultural resources within the area.

j. Twenty Two Springs—20 acres. The Twenty Two Springs is located in Catron County in west-central New Mexico approximately 25 air miles nothwest of Quemado. Use is limited to maintain senic and cultrual resources within the area.

k. Datil Well Campground—20 acres. The Datil Well Campground is located in Catron County in west-central New Mexico, approximatly 1 air mile west of Datil. Use is limited to enhance the use of developed recreational facilities and maintain the natural resources surrounding the campground.

C. Closed Designation

None, however emergency closures will be used should the need arise.

FOR FURTHER INFORMATION CONTACT: Harlen Smith, Area Manager, Bureau of Land Management, Las Cruces District, Socorro Resource Area, 198 Neel Avenue, NW., Socorro, NM 87801.

Dated: May 16, 1986.

H. James Fox,

District Manager.

BILLING CODE 4310-FB-M

Mineral Management Service

Oil and Gas and Sulphur Operation in the Outer Continental Shelf; Mobile Expoloration & Producing Southeast Inc.

AGENCY: Mineral Management Service..

ACTION: Receipt of a Proposed Development Operations Coordination Document.

SUMMARY: This Notice announces that Mobil Expoloration & Producing Southeast Inc., Unit Operator of the Ship Shoal Block 72 Federal Unit Agreement No. 14-08-001-2945, submitted on March 28, 1986, and May 15, 1986, a proposed Development Operations Coordination Document describing the activities it proposes to conduct on the Ship Shoal Block 72 Federal unit.

The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Mineral Management Service is considering approval of the plan and that it is available for public review at the offices of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 N. Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Mineral Management Service, Record Management Section, Room 143, open weekdays 9:00 a.m. to 3:30 p.m. 3301 N. Causeway Blvd., Metairie, Louisiana 70002, phone (504) 838-0519.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in the proposed development operations coordiation document available to affected States, executives of affected local governments, and other interested parties became effective on December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: May 19, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

National Park Service

Intention to Negotiate Concession Contract With Chisos Remuda

Pursuant to the provisions of section 5 of the Act of October 9, 1965, 16 U.S.C. 20, public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Chisos Remuda, authorizing it to continue to provide saddle horse rental and associated guide services and facilities for the public at Big Bend National Park, Texas, for a period of five (5) years from January 1, 1987 through December 31, 1991.

This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which will expire by limitation of time on December 31, 1986, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Superintendent, Big Bend National Park, Texas, 79834, telephone number (915) 477-2251, for information as to the requirements of the proposed contract.

Dated: April 24, 1986.

Robert I. Kerr,

Regional Director, Southwest Region.

Aircraft Management Plan, Grand Canyon National Park, AZ; Public Meetings

Notice is hereby given that public meetings will be held at the following locations and times for the purpose of receiving comments on the management of aircraft overflights at Grand Canyon National Park.

June 9, 1986, at 7:30 p.m.
Imperial Palace, 3535 Las Vegas Boulevard South, Las Vegas, Nevada
June 10, 1986, at 7:30 p.m.

Golden Gate National Recreation Area Park Headquarters, Building 201, Fort Mason, San Francisco, California

June 11, 1986, at 7:30 p.m.
Board of Supervisors' Auditorium, 205 West Jefferson, Phoenix, Arizona

June 12, 1986, at 7:30 p.m.
City Council Chambers, 211 West Aspen, Flagstaff, Arizona

Copies of an environmental assessment describing potential alternatives to address this issue may be obtained from the Superintendent, Grand Canyon National Park, P.O. Box 129, Grand Canyon, Arizona 86023, (602) 638–7701 or from the Regional Director, Western Region, National Park Service, 450 Golden Gate Avenue, Box 36063, San Francisco, California 94102, (415) 556–5560.

Interested individuals, representatives of organizations, and public officials are invited to express their views in person at the aforementioned public meetings. Those not wishing to appear in person may submit written statements to the Superintendent on the environmental assessment which will be accepted until August 1, 1986.

Time limitations may make it necessary to limit the length of verbal presentations, to restrict to one person the presentation made in behalf of an organization, and to allow an individual to make only one statement during the entire set of public meetings. A verbal statement may, however, be supplemented by a more complete written statement which may be submitted to the moderator at the time of presentation of the verbal statement or sent to the Superintendent at the above address. Written statements presented in person at the meetings will be considered for inclusion in the official record; however, all materials presented at the meeting shall be subject to a determination by the moderator that they are appropriate for inclusion in the official record.

After an explanation of the environmental assessment by a representative of the National Park Service, the moderator, insofar as possible, will adhere to the following order in calling for the presentation of verbal statements:

1. Governor of the State or his representative.
2. Members of Congress.
3. Members of the State Legislature.
4. Official representatives of the counties in which the National Park Service unit is located.
5. Officials of other Federal agencies or public bodies.
6. Organizations.
7. Individuals.

Each meeting will be recorded for documentation purposes only and will not be transcribed for dissemination.

Dated: April 29, 1986.

W. Russell White,

Acting Regional Director, Western Region.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Boston Stock Exchange, Inc.

May 22, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following securities:

Audio-Video Affiliates, Inc.
Common Stock, $1.00 Par Value (File No. 7–8970)

Blair (John) & Co.
Common Stock, $1.00 Par Value (File No. 7–8971)

Burger King Investors Master, L.P.
Units of Partnership Interests (File No. 7–8972)

Mylan Laboratories, Inc.
Common Stock, $0.50 Par Value (File No. 7–8973)

Manpower, Inc.
Common Stock, $1.50 Par Value (File No. 7–8974)

These securities are listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 13, 1986, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23249; File No. 4-289]

Self-Regulatory Organizations, Filing of Proposed Plan by the Philadelphia Stock Exchange, Inc.; Quarterly Reporting of Minor Rule Violations

Pursuant to Section 19(d)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19d-1(c)(2) thereunder,[1] notice is hereby given that on May 2, 1986, the Philadelphia Stock Exchange, Inc. ("Phlx") submitted copies of a proposed plan specifying those uncontested minor rule violations with sanctions not exceeding $2,500 which would not be subject to the provisions of Rule 19d-1(c)(1) of the Act.[2] Rule 19d-1(c)(1) requires that an SRO promptly file notice with the Commission of any final disciplinary action taken with respect to any person or organization. In accordance with paragraph (c)(2) of Rule 19(d)-1, the Phlx proposes to designate certain violations of its Option Floor Procedure Advices as minor rule violations, and that it be allowed to report these violations on a quarterly, instead of current, reporting basis. The Phlx proposes to include the following violations of its Option Floor Procedure Advices under its proposed plan: Section A of the Options Floor Procedure Advices, *Specialists*, Advices A-1 (responsibility for displaying best bid and offer); A-2 (orders to be accepted onto specialist's book); A-6 (acceptance of stop and stop limit orders). Section B *Registered Options Traders*, Advices B-1 (responsibility to make markets); B-2 (crowd courtesy); B-3 (trading requirements); B-4 (trading from off-floor); B-5 (agency-principal restrictions); B-6 (parity); B-7 (splitting orders); B-8 (use of floor brokers). Section C, *Floor Brokers*, Advices C-1 (presence of registered option traders in trading crowd); C-2 (clocked tickets); C-3 (handling registered option trade orders); C-4 (floor brokers handling orders for same firm); C-5 ("legging" combination orders). Section E, *Staffing*, E-1 (required staffing of options floor). Section F, *Miscellaneous*, Advices F-1 (use of identification letters and numbers); F-2 (time-stamping and matching); F-3 (requests for sold sale designations); F-4 (orders executed as spreads, straddales, or combinations); F-5 (changes or corrections to material terms of a cleared trade); F-6 (option quote parameters).[3] A party charged with a violation of one or more of the rules will receive written notice from the exchange.[4] The Phlx also notes that there exists sufficient discretion in each step of the process to permit a particular incident to be evaluated as meriting more formal disciplinary action that exists under the plan. The Business Conduct Committee of the Phlx has the ability, pursuant to Exchange Rule 960.2, to evaluate the severity of a violation and, in appropriate circumstances, authorize the issuance of a complaint.

The submission filed by the Phlx contemplates, subject to Commission approval, the addition of other violations within the minor rule violation plan.

According to the Phlx, the quarterly report of actions taken on minor rule violations, which under the Phlx procedure would be submitted to the Commission, would list for each violation the Commission file number, the name of the individual or member organization, the nature of the violation, the specific rule provision violated, the sanction imposed, the date of disposition, and the internal file number.

In order to assist the Commission in determining whether to approve the proposed plan or institute proceeding to determine whether the proposed plan should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of publication in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Reference should be made to File No. 4-289.

Copies of the submission, all subsequent amendments, all written statements with respect to the plan which are filed with the Commission, and all written communications relating to the plan between the Commission and any other person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of the filing and of any subsequent amendments also will be available at the offices of the Phlx.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

---

[1] *See* Securities Exchange Act Release No. 21013 (June 1, 1984) 49 FR 22928. The Commission adopted amendments to paragraph (c) of Rule 19d-1 to allow self-regulatory organizations ("SROs") to submit for Commission approval plans for the abbreviated reporting of minor disciplinary infractions. Under the amendments, any disciplinary action taken by an SRO against any person for violation of an SRO rule that has been designated a minor rule subject to a plan shall not be considered "final" for purposes of Section 19(d)(1) of the Act if the sanction imposed consists of a fine of less than $2,500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his administrative remedies.

[2] *See* Letter from Douglas Block, Vice President, Philadelphia Stock Exchange, to Michael Cavalier, Branch Chief, Division of Market Regulation, dated May 1, 1986.

[3] Sanctions applicable to the minor rule violations are outlined in *Exhibit B* of the Phlx filing. The specific fine schedule for the various violations is as follows: For violations of Advice C-2, the fine schedule is $50 for the first offense, $250 for the second offense and $500 for the third offense; for violations of Advices A-2(i), B-4 and B-5, the fine schedule is $250 for the first offense, $500 for the second offense and $800 for the third offense; for violations of Advice E-1, the fine schedule is a warning for the first offense, $500 for the second offense and $800 for the third offense; for violations of Advice B-3(1), the fine schedule is a warning for the first offense, $500 for the second offense; for violation of Advices B-1, B-7 and B-8, the fine schedule is $100 for the first offense, $250 for the second offense and $500 for the third offense; for violations of Advices A-1, A-6, B-2, B-6, C-1, C-3, C-4, F-1, F-2, F-3, F-4, and F-6, the fine schedule is $50 for the first offense, $100 for the second offense and $250 for the third offense; for violations of Advice B-3(2), the fine schedule is a warning for the first offense, and $200 for the second offense; for violations of Advice A-2(ii), the fine schedule is $50 for the first offense, $100 for the second offense; for violations of Advice F-5, the fine schedule is $50 for the first offense, $50 for the second offense. For all Advices, sanction for an offense after the last listed offense is left to the discretion of the Business Conduct Committee of the Phlx.

[4] The notice, entitled "Notice of Fine For Minor Violation(s) of Options Floor Procedure Advices" is attached, as *Exhibit C*, to the Phlx filing.

Dated: May 18, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23253; File No. SR-OCC-86-03]

Self-Regulatory Organizations; Options Clearing Corp.; Proposed Rule Change

Pursuant to Section 19(b)(1), of the Securities Exchange Act of 1934 (the Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 28, 1986, Options Clearing Corporation ("OCC") filed with the Securities Exchange Commission the proposed rule change described below. The proposal would enable Canadian banks and trust companies to issue escrow receipts representing underlying securities which Clearing Members have deposited with the institution to cover short positions in stock options carried for customer accounts. The Commission is publishing this Notice to solicit comment.

I. Description of the Proposal

OCC is proposing to amend its rules to permit certain Canadian banks and trust companies to qualify as issuers of escrow receipts. Currently, Clearing Members can deposit with OCC escrow receipts, issued by a qualified financial institution and collateralized by the underlying security, in lieu of OCC margin on short equity option call positions.[1] The proposed rule change consists of a list of standards for Canadian financial institutions wishing to issue escrow receipts (the "Standards"), the form of Depository Agreement between OCC and Canadian escrow receipt issuers, the form of Escrow Receipt, and a recommended form of Escrow Receipt Agreement between Canadian escrow receipt issuers and their customers.

OCC's Standards are similar to existing OCC standards for a U.S. financial institution. Specifically, a Canadian financial institution must: (1) Be either a Schedule A (Canadian domestic) bank governed by the Canadian Bank Act or a trust company governed by Canadian federal or provincial legislation; (2) have shareholders' equity [2] of at least $27,500,000 Canadian. (This provision is comparable to the $20,000,000 shareholders' equity requirement for U.S. financial institutions.); and (3) file F.R. Form T-2 (or its equivalent conforming to Section 8(a) of the Act) with the Board of Governors of the Federal Reserve System in which the financial institution agrees to comply with U.S. law relating to the use of credit to finance securities transactions.[3]

Canadian financial institutions qualifying as escrow receipt issuers would be subject to certain requirements. First, each of those institutions could issue escrow receipts as long as either (i) the total amount of cash and securities (at current market value) held by it pursuant to all outstanding escrow receipts and guarantee letters collateralizing puts and calls,[4] or (ii) the intrinsic or "in-the-money" value of all such puts and calls, does not exceed a dollar amount equal to 25% of the shareholders equity of the institution. This limitation currently applies to U.S. escrow issuers.[5] Second, Canadian financial institutions would be subject to reporting requirements almost identical to those requirements for U.S. escrow issuers. Canadian financial institutions, upon application to OCC for escrow issuance approval, must supply OCC with their latest available audited financial statements. After approval, they would be required to submit quarterly unconsolidated statements. Thereafter, the institution would need to submit to OCC each year an audited report containing a consolidated or unconsolidated statement of financial condition and a special supplemental report signed by the chief officer of the internal credit department regarding the adequacy of the institution's internal accounting controls relating to escrow receipts and the underlying assets. Third, Canadian institutions will be required to submit a signature list of those employees authorized to sign escrow receipt form.[6]

The form of Depository Agreement, *i.e.*, the application for approval to issue escrow receipts, is almost identical to that used by U.S. institutions. Like U.S. applicants, Canadian institutions would represent that they meet the Standards and agree to perform the obligations set forth in the escrow receipt form. Except for necessary changes in terminology reflecting the Standards, the escrow receipt form also is almost identical to the form used by U.S. institutions.[7]

OCC also has filed a form of escrow receipt agreement for use by Canadian institutions and their customers. Canadian institutions, however, are free to use their own forms of agreement, provided they include the substantive terms of OCC's escrow receipt form.

II. OCC's Rationale for the Proposed Rule Change

OCC states in its filing that the proposed rule change is consistent with the purposes and requirements of Section 17A of the Act because it would promote greater Canadian participation in the U.S. options markets. Although options traded on U.S. securities exchanges have been marketed in Canada for a number of years, OCC expects that its recent adoption of rules permitting foreign brokers to become direct OCC Clearing Members [8] and the future establishment of an OCC branch office in Toronto will generate increased Canadian investor interest in U.S. options. OCC believes that enabling Canadian institutions to issue escrow receipts will increase further the trading of U.S. options in Canada by enabling Canadian institutional and public investors to cover their options positions at qualifying local financial institutions, consistent with the Commission's desire to facilitate efficient and safe handling of international securities transactions.[9]

OCC also believes that by increasing the number of financial institutions eligible to issue escrow receipts, it will promote competition among those institutions. At the same time, OCC states that investors will continue to be protected by the reasonable safeguards

---

[1] *See* OCC Rule 610.

[2] Shareholders' equity would be computed on an unconsolidated basis and would consist of common stock, surplus and retained earnings; preferred stock and subordinated debt would not be considered.

[3] In its filing, OCC represents that the staff of the Board of Governors of the Federal Reserve System (the "Fed") has stated that escrow receipts issued by any foreign banking institution that has filed a Form T-2 qualify as "escrow agreements" for purposes of Regulation T. *See* letter dated May 18, 1984, from Laura Homer, Securities Credit Officer, Fed, to Marvin Pormery, Esq.

[4] OCC represents that it will accept escrow receipts relating to deposited stocks underlying short stock option call positions only. If it appears in the future that there is a significant demand in Canada for index option escrow receipts, OCC states that it will prepare a Canadian version of the index option escrow receipt and submit this as a separate rule change filing.

[5] *See* Securities Exchange Act Release No. 22344 (May 18, 1985), (published May 27, 1985) approving File No. SR-OCC-85-03 in which OCC proposed the alternative "in-the-money" formula for limiting the amount of escrow receipts that a custodian bank may have outstanding.

[6] Moreover, OCC proposes a $2.00 fee for each Escrow Receipt Form.

[7] As amended in File No. SR-OCC-86-03, *see infra* note 4.

[8] *See* Securities Exchange Act Release No. 22123 (June 6, 1985), 50 FR 24853 (June 13, 1985) approving File No. SR-OCC-85-02.

[9] *See* Securities Exchange Act Release No. 21958 (April 16, 1985), 50 FR 16302 (April 26, 1985), File No. S7-19-85.

provided in connection with the escrow receipt program.

III. Request for Comments

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submission should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of the filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to the file number in the caption above and should be submitted by June 18, 1986.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: May 19, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-15108; (812-6321)]

USAT Mortgage Securities, Inc.; Application for Exemptive Order from all Provisions of the Act

May 20, 1986.

Notice is hereby given that USAT Mortgage Securities, Inc. ("Applicant"), 10333 Harwin, Houston, Texas 77036, filed an application on March 20, 1986, and amendments thereto on April 18 and May 15, 1986, for an order pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicant from all provisions of the Act in connection with the issuance of mortgage related securities. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the applicable provisions thereof.

According to the application, Applicant is a wholy-owned limited purpose finance subsidiary of United Savings Association of Texas, incorporated under Texas law for the purpose of investing in certain certificates representing interests in mortgage pools ("Certificates") to be purchased principally with the proceeds of bonds ("Bonds") collateralized by such Certificates. Applicant states that it does not intend to engage in any business or investment activities other than issuing and selling Bonds collateralized primarily by Certificates under an indenture, acquiring, owning, holding and pledging Certificates, investing cash balances on an interim basis in certain short-term investments and engaging in activities incidental to and necessary for such purposes.

Applicant proposes to issue and sell the Bonds in series ("Series") issued pursuant to one or more indentures ("Indentures") between Applicant and a qualified unaffiliated trustee ("Trustee"). Applicant states that the Indenture for each Series of Bonds will be qualified under the Trust Indenture Act of 1939. Applicant further states that it will only issue Bonds rated in the highest investment grade rating by at least two unaffiliated nationally recognized statistical rating organizations.

According to the application, each Series of Bonds will be secured separately by assignments to the Trustee of any combination of "fully modified pass-through" certificates guaranteed by the Government National Mortgage Association ("GNMA Certificates"), Guaranteed Mortgage Pass-Through Securities issued and guaranteed by the Federal National Mortgage Association ("FNMA Certificates"), or Mortgage Participation Certificates issued and guaranteed by the Federal Home Loan Mortgage Corporation (the "FHLMC Certificates"). Applicant states that the Bonds will be secured by collateral ("Collateral"), which Collateral includes (i) the Certificates, (ii) distributions thereon, (iii) cash, a letter of credit or any combination thereof if required with respect to any Series, (iv) cash, if any, required to be initially deposited by the Applicant with respect to any Series and (v) the reinvestment income on such distributions. Applicant represents that the Collateral for each Series of Bonds will secure only that Series and that each Series of Bonds will be fully payable from the principal and interest payments on the Collateral pledged to secure such Series.

Applicant asserts that it is not the type of entity that was intended to be regulated under the Act, and that its limited activities do not require the protection of the Act. Applicant further asserts that there are strong policy reasons for granting the requested exemptive order because Applicant's activities will supply capital to builders and other institutions engaged in the real estate and mortgage markets, and thereby facilitate the financing of mortgages, a critical national need.

Applicant consents to the following conditions with respect to the issuance of the requested order:

(1) Each series of bonds will be registered under the Securities Act of 1933 ("Securities Act"), unless offered in a transaction exempt from registration pursuant to Section 4(2) of the Securities Act.

(2) The bonds will be "mortgage related securities" within the meaning of Section 3(a)(41) of the Securities Exchange Act of 1934. However, the mortgate collateral underlying the bonds will be limited to mortgage certificates guaranteed by the Government National Mortgage Association, the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation.

(3) If new mortgage collateral is substituted, the substitute collateral must: (i) Be of equal or better quality than the collateral replaced; (ii) have similar payment terms and cash flow as the collateral replaced; (iii) be insured or guaranteed to the same extent as the collateral replaced; and (iv) meet the conditions set forth in paragraphs (2), (4) and (6). In addition, new collateral may not be substituted for more than 40% of the aggregate face amount of the mortgage certificates initially pledged as mortgage collateral. In no event may any new mortgage collateral be substituted for any substitute mortgage collateral.

(4) All mortgage certificates, funds, accounts or other collateral securing a series of bonds ("bond collateral") will be held by the Trustee or on behalf of the Trustee by an independent custodian. The custodian may not be an affiliate (as the term "affiliate" is defined in Securities Act Rule 405, 17 CFR 230.405) of the Applicant. The Trustee will be provided with a first priority perfected security or lien interest in and to all bond collateral.

(5) Each series of bonds will be rated in one of the two highest bond rating categories by at least one nationally recognized statistical rating organization that is not affiliated with the Applicant. The bonds will not be considered redeemable securities within the meaning of Section 2(a)(32) of the Act.

(6) No less often than annually, an independent public accountant will audit the books and records of the

Applicant and in addition will report on whether the anticipated payments of principal and interest on the bonds in accordance with their terms. Upon the completion, copies of the auditor's report(s) will be provided to the Trustee.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 12, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of the interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

Part II

Department of Labor

Office of Assistant Secretary for Veterans' Employment and Training

41 CFR Part 61-250

Annual Report From Federal Contractors; Proposed Rule

DEPARTMENT OF LABOR

Office of Assistant Secretary for Veterans' Employment and Training

41 CFR Part 61-250

Annual Report From Federal Contractors

AGENCY: Office of the Assistant Secretary for Veterans' Employment and Training, Labor.

ACTION: Proposed rule.

SUMMARY: Enactment of the Veterans' Compensation, Education, and Employment Amendments of 1982 established the requirements for Federal contractors to submit a report at least annually to the Secretary of Labor. This proposal would implement those requirements.

DATES: Written comments must be received no later than June 27, 1986.

ADDRESS: Comments should be addressed to Donald E. Shasteen, Assistant Secretary for Veterans' Employment and Training, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, Attention: Mr. Joseph C. Juarez, Director, Office of Veterans' Employment and Training Programs.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph C. Juarez. Telephone (202) 523-9110.

SUPPLEMENTARY INFORMATION: Prior to January 20, 1982, the Office of Federal Contract Compliance Programs (OFCCP) in the Department of Labor required, pursuant to regulations, contractors and subcontractors subject to 38 U.S.C. 2012(a) to submit a report, at least quarterly, to the appropriate office of the State employment service. The reports were intended to provide both the State employment services and the Department of Labor with information regarding hiring and provision of required affirmative action for "special disabled veterans" and "veterans of the Vietnam-era," as defind under 38 U.S.C. 2011. Such a reporting requirement was not specifically required in the legislation at 38 U.S.C. 2012.

By notice in the Federal Register, the regulatory requirement for the quarterly report at 41 CFR 60-250.4(d) was suspended until further notice by OFCCP at 47 FR 4256 (January 29, 1982). At that time the quarterly report had not been approved by the Office of Management and Budget under the Paperwork Reduction Act.

Subsequently, Congress enacted the Veterans' Compensation, Education, and Employment Amendments of 1982 (Pub. L. 97-306) which included a provision requiring Federal contractors to submit a report at least annually to the Secretary of Labor. Section 316(a) of the amendments added a new subsection (d) to 38 U.S.C. 2012, as follows:

(d)(1) Each contractor to whom subsection (a) of this section applies shall, in accordance with the regulations which the Secretary shall prescribe, report at least annually to the Secretary on—

(A) The number of employees in the work force of such contractor, by job category and hiring location, who are veterans of the Vietnam era or special disabled veterans; and

(B) The total number of new employees hired by the contractor during the period covered by the report and the number of such employees who are veterans of the Vietnam era or special disabled veterans.

(2) The Secretary shall ensure that the administration of the reporting requirement under paragraph (1) of this subsection is coordinated with respect to any requirement for the contractor to make any other report to the Secretary.

Section 310(b) required the Secretary to issue regulations implementing the report. The Assistant Secretary for Veterans' Employment and Training has responsibility for administering the report requirements.

The reports required by this legislation are intended to assist the Department of Labor in carrying out its responsibilities for maintaining Federal contractor compliance with the statute. The implementing regulations also serve to strengthen the governmental network available to inform and assist Federal contractors in meeting their veterans' affirmative action obligations.

The Department is exploring several alternatives in seeking the simplest and most cost-effective way to handle the annual veterans' employment report. Among the options being considered is full use of the capability and experience that the Equal Employment Opportunity Commission (EEOC) has gained in collecting information from Federal contractors via the Standard Form 100, Equal Employment Opportunity Employer Information Report EEO-1. Under this option, contractual arrangements would be made with EEOC to distribute, receive and process a one-page veterans' report form using procedures and definitions virtually identical to those used for the EEO-1. However, there would be no direct association of the veterans' report requirements with those of the EEO-1.

Other options include "contracting out" of the processing of the veterans' employment report or, alternatively, development and implementation of a processing system by the Department of Labor. At this time, it appears that these latter options would be more costly and would take longer to implement. We welcome further comment on the options described above or any other alternatives.

An Advance Notice of Proposed Rulemaking was published at 50 FR 33360-33362 (August 19, 1985) for purposes of advising interested parties concerning the content and scope of a proposed rule and requesting comments regarding its adequacy, coverage and effectiveness. The Department received fourteen sets of comments from veterans' organizations, State employment service agencies, Federal agencies, Federal contractors, and other interested parties. The following summarizes significant comments and recommendations received and their resolution for publication of these proposed rules:

Location of Proposed Rules

Commenters and the Department agree that the location of the proposed rules at 41 CFR Part 61-250 would be convenient, since they would be in close proximity to current regulations issued by the Office of Federal Contract Compliance Programs (OFCCP) at 41 CFR Part 60-250. The OFCCP regulations also cover affirmative action for Vietnam-era and special disabled veterans pursuant to 38 U.S.C. 2012. One commenter expressed concern that the similarity in regulatory citations might result in confusion and inadvertent oversight by contractors familiar only with the OFCCP rules, notwithstanding the contractor's obligation to maintain a working knowledge of all current regulations which affect them. As an accommodation to this concern, the Department proposes to include the regulatory citation on the proposed VETS-100 form in the section which discusses the legal basis for the reporting requirement.

Impact of Rule Regarding Cost and Time Burdens

Potential recordkeeping and reporting burdens were described only by one commenter. While the pertinent comments generally stated that the reporting requirements would impose substantial cost and time burdens, no specific figures were given. The reasons suggested for extra burdens were that employers would have to survey their workforces for veterans' data not already maintained, computer programming would have to be revised and veteran data collected would have to be protected in order to maintain the privacy required for such records. We recognize that contractors will experience some additional burdens and

will take that into consideration when selecting from among the options for processing of the reports. Section 61–250.12 addresses the issue of privacy and voluntary disclosure.

Report Form or Format; Feasibility of Incorporating Required Data into the EEO–1 Report

Most of the commenters who addressed a report form or format generally favored incorporation of the veterans' data into the EEO–1 form. Only one suggested that contractors be allowed to develop individual reporting formats because of the variety of recordkeeping systems employed by the multitude of contractors involved. It appears, however, that the best way to minimize excessive processing and computer programming costs is through the use of a standard form, rather than individualized formats. However, incorporation of veterans' data entries into the EEO–1 itself is not feasible at this time. Therefore, a proposed format for a Federal Contractor Veterans' Employment Report (Form VETS–100) based upon the EEO–1, with which many Federal contractors are familiar, has been developed consistent with commenter suggestions. (See proposed § 61–250.11.)

This required veterans' report form could be distributed along with the mailing of the EEO–1 to covered employers as long as the EEO–1 is required on the same annual reporting basis. One major drawback to this process arises, however, because the universe of Federal contractors covered by the EEO–1 reporting requirements is only part of the total universe subject to 38 U.S.C. 2012(d) requirements. The EEO–1 must be submitted only by those Federal contractors holding a contract of $50,000 or more and who have 50 or more employees unless they serve as a depository of Government funds in any amount, or as a financial institution which issues Government savings bonds or savings notes, in which case no specific contract amount is required.

Large numbers of Federal contractors who have fewer employees and contracts of smaller dollar amounts are also subject to 38 U.S.C. 2012(d). Thus, to ensure uniform compliance by all nonexempt Federal contractors with requirements of 38 U.S.C. 2012(d), under these proposed rules the Office of the Assistant Secretary for Veterans' Employment and Training (OASVET) will identify contractors through the contract award reporting systems and distribute the form in time for filing by the annual March 31 deadline. However, since it is not possible to ensure that all nonexempt Federal contractors will be identified through available contract award reporting systems, § 61–250.11(c) would require contractors who have not received the supplemental veterans' data form to request the form from OASVET in time to meet the filing deadline.

Voluntary Disclosure of Veterans' Status

Some commenters were concerned that voluntary disclosure of a person's veterans' status, particularly special disabled veterans' status, could result in adverse effects on the individual. In addition, there was concern that reliance on such voluntary disclosure would make it difficult for Federal contractors to provide accurate data in their reports. In our view these comments raise legitimate concerns which we have attempted to address by the addition of a new § 61–250.12. This section would provide that the information is to be given by the veteran on a voluntary basis and will be kept confidential, and that use of the information is limited to matters related to the implementation of 38 U.S.C. 2012. Additionally, the section would provide that a veteran's disclosure of the requested information or refusal to provide the information would not provide the employer with a basis for taking adverse action. It is hoped that these additional safeguards will operate as an incentive for the veteran to come forth with the information. The content of this section has also been incorporated into Paragraph (e) of the required reporting clause set forth at § 61–250.10.

Definition of Hiring Location

One commenter pointed out that many hiring and employment locations do not maintain personnel records. The Department agrees and has accepted a recommendation to incorporate the EEO–1 definition for "establishment" at § 61–250.2(d) as the definition for "hiring location" in order to ensure consistency for Federal contractors subject to the reporting obligations of the EEO–1 and the veterans' employment reports.

Uses of Reports

The reports received pursuant to these proposed rules will be used to serve both long-term use and short-term purposes. Long-term use includes, for example, comparison of successive reports received from the same contractor to determine veterans' employment trends in terms of job categories by veteran status and comparisons with total hiring trends. Short-term applications include provision of report data to Veterans' Employment and Training Service field staff and State employment service agencies for their use in (1) determining whether or not contractors are fulfilling their obligations to list job openings and (2) comparisons with placement and referral records to determine contractor practices in hiring covered veterans who have been given priority referrals to subject contractors. In addition, information received will be considered by the OFCCP as one of several factors that are used in selecting contractors for compliance reviews.

Classification—Executive Order 12291

The proposed rule is not a major rule pursuant to Executive Order No. 12291 because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation or the ability of limited States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required. In addition, this proposed rule does not affect any trade-sensitive activity or lessen any restraints because it does not apply in any way to any other rules or regulations of governing international trade.

Paperwork Reduction Act

Section 61–250.10 of this proposed rule contains information collection requirements subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of the Office of Management and Budget marked "Attention: Desk Officer for Veterans' Employment and Training."

Regulatory Flexibility Act

This proposed rule will not have "significant economic impact upon a substantial number of small entities" within the meaning of 5 U.S.C. 605(b). The Secretary of Labor has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. This conclusion is reached because the proposed rule implements an annual report from Federal contractors according to a new requirement at 38 U.S.C. 2012(d) with little cost of economic impact expected with respect to small entities. Therefore, no regulatory flexibility analysis is required.

List of Subjects in 41 CFR Part 61–250

Government contracts, Equal Employment Opportunity, Reporting and recordkeeping requirements, Veterans.

This proposed rule would implement the requirement at 38 U.S.C. 2012(d) by the regulation described below in a new Part 61–250 in Chapter 61 of Title 41, Code of Federal Regulations (CFR). Chapter 61 of Title 41, CFR, is a new chapter which has been assigned to the Office of the Assistant Secretary for Veterans' Employment and Training.

Accordingly, it is proposed that Title 41, Code of Federal Regulations be amended by adding a new Chapter 61 to read as follows:

CHAPTER 61—OFFICE OF THE ASSISTANT SECRETARY FOR VETERANS' EMPLOYMENT AND TRAINING, DEPARTMENT OF LABOR

PART 61–250—ANNUAL REPORT FROM FEDERAL CONTRACTORS

Sec.

61–250.1 Purpose and scope.
61–250.2 Definitions.
61–250.10 Reporting requirements contract clause.
61–250.11 Reporting format.
61–250.12 Voluntary disclosure.
61–250.20 Monitoring of compliance.

Authority: 38 U.S.C. 2012(d).

§ 61–250.1 Purpose and scope.

(a) This Part 61–250 implements 38 U.S.C. 2012(d). Each contractor or subcontractor who enters into a contract in the amount of $10,000 or more with any department or agency of the United States for the procurement of personal property and non-personal services (including construction) to whom 38 U.S.C. 2012(a) and 41 CFR Part 60–250 applies, shall submit a report according to requirements of § 61–250.10 of this Part.

(b) Except as noted in § 61–250.10 of this Part, these regulations do not revise or replace the regulations in force at 41 CFR 60–250 which apply to veterans' affirmative action obligations of contractors and subcontractors administered by the Office of Federal Contract Compliance Programs (OFCCP), Employment Standards Administration, Department of Labor.

§ 61–250.2 Definitions.

(a) For the purposes of this Part, and unless otherwise indicated in paragraph (b) of this section, the terms set forth in this Part shall have the same meaning as set forth in 41 CFR Part 60.250.

(b) For the purposes of this Part:

(1) "Hiring location" (Identical to "establishment" as defined by the instructions for completing Standard Form 100, Equal Employment Opportunity Employer Information Report EEO–1) means an economic unit which produces goods or services, such as a factory, office, store, or mine. In most instances, the establishment is at a single physical location and is engaged in one, or predominantly one, type of economic activity (definition adapted from the 1967 Standard Industrial Classification Manual). Units at different physical locations, even though engaged in the same kind of business operation should be reported as separate establishments. For locations involving construction, transportation, communications, electric, gas, and sanitary services, oil and gas fields, and similar types of physically dispersed industrial activities; however, it is not necessary to list separately each individual site, project, field, line, etc., unless it is treated by the contractor as a separate legal entity with a separate Employer Identification Number. For these types of activities, list as establishments only those relatively permanent main or branch offices, terminals, stations, etc., which are either (i) directly responsible for supervising such dispersed activities, or (ii) the base from which personnel and equipment operate to carry out these activities. (Where these dispersed activities cross State lines, at least one such "establishment" should be listed for each State involved.)

(2) "Job category" means any of the following: officials and managers, professional, technicians, sales workers, office and clerical, craft workers (skilled), operatives (semi-skilled), laborers (unskilled), service workers, as required by Standard Form 100, Equal Employment Opportunity Employer Information Report EEO–1, as defined below:

(i) "Officials and managers" means occupations requiring administrative and managerial personnel who set broad policies, exercise overall responsibility for execution of these policies, and direct individual departments or special phases of a firm's operation. Includes: officials, executives, middle management, plant managers, department managers, and superintendents, salaried supervisors who are members of management, purchasing agents and buyers, railroad conductors and yard masters, ship captains and mates (except fishing boats), farm operators and managers, and kindred workers.

(ii) "Professional" means occupations requiring either college graduation or experience of such kind and amount as to provide a comparable background. Includes: accountants and auditors, airplane pilots, and navigators, architects, artists, chemists, designers, dietitians, editors, engineers, lawyers, librarians, mathematicians, natural scientists, registered professional nurses, personnel and labor relations specialists, physical scientists, physicians, social scientists, teachers, and kindred workers.

(iii) "Technicians" means occupations requiring a combination of basic scientific knowledge and manual skill which can be obtained through about 2 years of post-high school education, such as is offered in many technical institutes and junior colleges, or through equivalent on-the-job training. Includes: computer programmers and operators, drafters, engineering aides, junior engineers, mathematical aides, licensed, practical or vocational nurses, photographers, radio operators, scientific assistants, surveyors, technical illustrators, technicians (medical, dental, electronic, physical science), and kindred workers.

(iv) "Sales" means occupations engaging wholly or primarily in direct selling. Includes: advertising agents and salesworkers, insurance agents and brokers, real estate agents and brokers, stock and bond salesworkers, demonstrators, salesworkers and sales clerks, grocery clerks and cashier-checkers and kindred workers.

(v) "Office and clerical" includes all clerical-type work regardless of level of difficulty, where the activities are predominantly nonmanual though some manual work not directly involved with altering or transporting the products is included. Includes bookkeepers, cashiers, collectors (bills and accounts), messengers and office helpers, office machine operators, shipping and receiving clerks, stenographers, typists and secretaries, telegraph and telephone operators, legal assistants, and kindred workers.

(vi) "Craft Workers (skilled)" means manual workers of relatively high skill level having a thorough and comprehensive knowledge of the processes involved in their work. Exercise considerable independent judgment and usually receive an extensive period of training. Included are: the building trades, hourly paid supervisors and lead operators who are not members of management, mechanics and repairers, skilled machining occupations, compositors and typesetters, electricians, engravers, job setters (metal), motion picture projectionists, pattern and model makers, stationary engineers, tailors and tailoresses, arts occupations, handpainters, coaters, decorative and kindred workers.

(vii) "Operatives (semiskilled)" means workers who operate machine or processing equipment or perform other factory-type duties or intermediate skill level which can be mastered in a few weeks and require only limited training. Include: apprentices (auto mechanics, plumbers, bricklayers, carpenters, electricians, machinists, mechanics, building trades, metalworking trades, printing trades, etc.), operatives, attendants (auto service and parking), blasters, chauffeurs, delivery workers, dressmakers and sewers (except factory), dryers, furnace workers, heaters (metal), laundry and dry cleaning operatives, milliners, mine operatives and laborers, motor operators, oilers and greasers (except auto), painter (except construction and maintenance), photographic process workers, stationary firefighters, truck and tractor drivers, weavers (textile), welders and flamecutters, electrical and electronic equipment assemblers, butchers and meatcutters, inspectors, testers and graders, handpackers and packagers, and kindred workers.

(viii) "Laborers (unskilled)" means workers in manual occupations which generally require no special training to perform elementary duties that may be learned in a few days and require the application of little or no independent judgment. Include: garage laborers, car washers and greasers, gardeners (except farm) and groundskeepers, stevedores, wood choppers, laborers performing lifting, digging, mixing, loading and pulling operations, and kindred workers.

(ix) "Service Workers" means workers in both protective and non-protective service occupations. Includes: attendants (hospital and other institutions, professional and personal service, including nurses aides, and orderlies), barbers, charworkers and cleaners, cooks (except household), counter and fountain workers, elevator operators, firefighters and fire protection, guard, doorkeepers, stewards, janitors, police officers and detectives, porters, waiters and waitresses, amusement and recreation facilities attendants, guides, ushers, public transportation attendants and kindred workers.

(3) "Special disabled veteran" means (i) a veteran who is entitled to compensation (or who but for the receipt of military retired pay would be entitled to compensation) for a disability rated at 30 percent or more, or (ii) a person who was discharged or released from active duty because of service-connected disability.

(4) "Veteran of the Vietnam era" means a person who served more than 180 days of active military, naval, or air service, any part of which was during the period August 5, 1964, through May 7, 1975, and who (i) was discharged or released therefrom with other than a dishonorable discharge, or (ii) was discharged or released from active duty because of a service-connected disability. No veteran may be considered to be a veteran of the Vietnam era under this paragraph after December 31, 1991.

(5) "OFCCP" means the Office of Federal Contract Compliance Programs in the Employment Standards Administration of the U.S. Department of Labor.

(6) "OASVET" means the Office of the Assistant Secretary for Veterans' Employment and Training, U.S. Department of Labor.

§ 61-250.10 Reporting requirements contract clause.

Each contractor or subcontractor described in § 61–250.1 of this Part shall submit reports according to the following reporting clause which shall be included in each of its covered government contracts or subcontracts (and modifications, renewals, or extensions thereof if not included in the original contract). Such clause is considered as an addition to the affirmative action clause required by 41 CFR Part 60–250, the provisions of which continue in force until otherwise revised or amended by the OFCCP. The reporting requirements clause is as follows:

Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era

(a) The contractor agrees to report at least annually, as required by the Secretary of Labor, on:

(1) The number of special disabled veterans and the number of veterans of the Vietnam era in the workforce of the contractor by job category and hiring location; and

(2) the total number of new employees hired during the period covered by the report, and of that total, the number of special disabled veterans, and the number of veterans of the Vietnam era.

(b) The above items shall be reported by completing the form entitled "Federal Contractor Veterans' Employment Report VETS–100."

(c) Reports shall be submitted no later than March 31 of each year beginning March 31, 1987.

(d) Reports shall reflect the employment profile as required in paragraph (a)(1) above and the employment activity as required in paragraph (a)(2) above, for the most recent 12-month period ending (1) with any pay period during the period January through March, or (2) on December 31 if the contractor has previous written approval from the Equal Employment Opportunity Commission to do so for purposes of submitting the Employer Information Report EEO–1 (Standard Form 100).

(e) The count of veterans reported according to paragraph (a) above shall be based on voluntary disclosure, as follows:

Each contractor subject to reporting requirements at 38 U.S.C. 2012(d) shall invite all special disabled veterans and veterans of the Vietnam era who wish to benefit under the affirmative action program at 38 U.S.C. 2012 to identify themselves to the contractor. The invitation shall state that the information is voluntarily provided, that the information will be kept confidential, that disclosure or refusal to provide the information will not subject the applicant or employee to any adverse treatment, and that the information will be used only in accordance with the regulations promulgated under 38 U.S.C. 2012. Nothing in this paragraph (e) shall preclude an employee from informing a contractor at a future time of his or her desire to benefit from this program. Nothing in this paragraph (e) shall relieve a contractor from liability for discrimination under 38 U.S.C. 2012.

§ 61.250.11 Reporting format.

(a) Data items required in § 61–250.10(a) are to be reported for each hiring location in the format (VETS–100) as set forth below:

Federal Contractor Veteran's Employment Report

VETS–100

Federal Contractor Veterans' Employment Report VETS-100

This supplemental report is to be completed by all nonexempt contractors and subcontractors with contracts (or subcontracts) for the furnishing of supplies and services or the use of real or personal propety (including construction) for $10,000 or more. The report is to be completed for each "hiring location". Reports must be completed for establishments located in Hawaii."

How to Prepare Form

Company Identification

Parent Company. Please provide company name, receiving office, address and employer identification number of the headquarter's office of the multi-hiring location company which owns the hiring location for which this report is filed.

Hiring Location For Which This Report is Filed. Please provide the name, address and employer identification number of each company's hiring location if different from that provided.

Information on Veterans

Employment data must include ALL permanent full-time and part-time employees who were employed during the selected payroll period, except those employees specifically excluded as indicated in the Appendix. Appendix. Employees must be counted by veteran status for each of the nine occupational categories (columns L and M). Entries in columns L and M on line 23 are optional.

New Hires Data: Report on line 23, columns N thur P, the total number of permanent full-time and part-time employees by veteran status (columns N and O) and total employees (column P who were included in the payroll for the first time during the most recent 12-month period ending March 31 of the survey year (i.e., between April 1 and March 31). Entries in columns N thru P, lines 14 thru 22, are optional.)

Definitions

"Hiring location" means an establishment as defined at 41 CFR 61–250.2(b).

"Job Categories"—See 41 CFR 61–250.2(b).

"Special Disabled Veteran" means (i) a veteran who is entitled to compensation (or who but for the receipt of military retired pay would be entitled to compensation) for a disability rated at 30 percent or more, or (ii) a person who was discharged or released from active duty because of a service-connected disability.

"Veteran of the Vietnam era" means a person who served more than 180 days of active military, naveal, or air service, any part of which was during the period August 5, 1964, through May 7, 1975, and who (1) was discharged or released therefrom with other than a dishonorable discharge, or (ii) was discharged or released from active duty because of a service-connected disability. No veteran may be considered to be a veteran of the Vietnam era under this paragraph after December 31, 1991.

Legal Basis for Reporting Requirement

Title 38, United States Code, Section 2012(d), requires that Federal contractors report at least annually the number of special disabled and Vietnam-era veterans in their workforce by job category and hiring location and the total number of employees and the numbers of special disabled and Vietnam-era veterans hired during the reporting period. Implementing regulations are found at 41 CFR 61–250.

(b) The Office of the Assistant Secretary for Veterans' Employment and Training, or its designee, will use all available information to distribute the required forms to contractors. identifiable as subject to the requirements of this Part.

(c) Contractors who do not receive forms should request them in time to meet the annual March 31 deadline. Requests should be addressed to:

OASVET
U.S. Department of Labor,
200 Constitution Avenue, NW.,
Washington, DC 20210

§ 61–250.12 Voluntary disclosure.

Each contractor subject to this Part shall invite all special disabled veterans and veterans of the Vietnam era who wish to benefit under the affirmative action program at 38 U.S.C. 2012 to identify themselves to the contractor. The invitation shall state that the information is voluntarily provided, that the information will be kept confidential, that disclosure or refusal to provide the information will not subject the applicant or employee to any adverse treatment, and that the information will be used only in accordance with the regulations implementing 38 U.S.C. 2012. Nothing in this section shall preclude an employee from informing a contractor at a future time of his or her desire to benefit from this program. Nothing in this section shall relieve a contractor from liability for discrimination under 38 U.S.C. 2012.

§ 61–250.20 Monitoring of compliance.

During the course of its compliance reviews, OFCCP will determine if the contractor is submitting reports as required by this Part.

Signed at Washington, DC this 19th day of May, 1986.

William E. Brock,

Secretary of Labor.

Part III

Environmental Protection Agency

40 CFR Part 268

Schedule for Land Disposal Restrictions; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 268

[SWH-FRL 2994-1]

Schedule for Land Disposal Restrictions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency is establishing a schedule setting forth the order in which listed hazardous wastes will be prohibited from land disposal unless EPA can set appropriate standards or grant case-by-case exemptions. Development of a schedule for these determinations is mandated by section 3004(g) of the Resource Conservation and Recovery Act (RCRA) as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA). Pursuant to the Act, if EPA fails to set treatment standards or grant exemptions in accordance with this schedule, hazardous wastes will be subject to partial land disposal restrictions or banned from land disposal.

DATE: This final rule is effective 30 days from May 28, 1986.

FOR FURTHER INFORMATION CONTACT: For general information contact the RCRA Hotline, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (800) 424-9346 (toll free) or 382-3000 locally.

For information on specific aspects of this rule contact: Susan Bromm, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (202) 382-4770.

III. Schedule Interpretation
IV. Wastes Included in the Ranking
V. Regulatory Impact
  A. Executive Order 12291
  B. Regulatory Flexibility Act
  C. Paperwork Reduction Act
VI. Impact on Authorized States
VII. References

I. Background

A. Hazardous and Solid Waste Amendments of 1984

The Hazardous and Solid Waste Amendments of 1984 (HSWA), enacted on November 8, 1984, establish a strong statutory presumption against land disposal by prohibiting the continued land disposal of hazardous wastes beyond specified dates, unless such disposal is determined to be protective of human health and the environment. In its enactment of HSWA, Congress stated explicitly that "reliance on land disposal should be minimized or eliminated, and land disposal, particularly landfill and surface impoundment, should be the least favored method for managing hazardous wastes" (RCRA section 1002(b)(7), 42 U.S.C. 6901 (b)(7)).

The statute requires EPA to set "levels or methods of treatment, if any, which substantially diminish the toxicity of the waste or substantially reduce the likelihood of migration of hazardous constituents from the waste so that short-term and long-term threats to human health and the environment are minimized" (RCRA section 3004(m), 42 U.S.C. 6924(m)). Wastes that meet the treatment standards established by EPA are not subject to land disposal prohibitions.

The amendments specify that EPA may not find that a land disposal method is "protective" unless a petitioner demonstrates to the Administrator "to a reasonable degree of certainty, that there will be no migration of hazardous constituents from the disposal unit or injection zone for as long as the wastes remain hazardous" (RCRA section 3004(d)(1), (e)(1), (g)(5), 42 U.S.C. 6924(d)(1), (e)(1), (g)(5)).

The legislation sets forth a series of deadlines for Agency action. At certain deadlines, further land disposal of a particular group of hazardous wastes is prohibited unless the waste meets treatment standards established by the Agency, or unless a petition successfully demonstrates that there will be no migration of hazardous constituents from the disposal units(s) in which such wastes are placed for as long as the wastes remain hazardous. Other deadlines cause conditional restrictions on land disposal to take effect if the wastes do not comply with treatment standards promulgated by EPA or are not the subject of a successful petition. In any case where EPA does not set a treatment standard for a waste by the statutory date, it is not precluded from later promulgating a treatment standard for that waste. Likewise, where EPA has set a treatment standard, it is not precluded from revising that standard after the statutory date through rulemaking procedures. The relevant statutory deadlines are explained in detail below. This rulemaking concerns the schedule for those listed wastes discussed in items 3 and 4 below.

1. *Solvents and dioxins.* Effective November 8, 1986 (24 months from November 8, 1984, the date of enactment of the 1984 amendments), the statute prohibits further disposal (except with respect to underground injection into deep injection wells) for the following wastes:

Dioxin-containing hazardous wastes numbered F020, F021, F022, F023, F026, F027, and F028 and solvent-containing hazardous wastes numbered F001, F002, F004, and F005. (Sections 3004(e) (1) and (2), 42 U.S.C. 6924(e) (1) and (2).)

2. *"California List."* Effective July 8, 1987 (32 months from November 8, 1984), the statute prohibits disposal (except with respect to underground injection into deep injection wells) for the following wastes, listed or identified under section 3001:

a. Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing free cyanides at concentrations greater than or equal to 1,000 mg/l.

b. Liquid hazardous wastes, including free liquids associated with any solid or sludge, containing the following metals (or elements) or compounds of these metals (or elements) of concentrations greater than or equal to those specified below:

i. Arsenic and/or compounds (as As) 500 mg/l;

ii. Cadmium and/or compounds (as Cd) 100 mg/l;

iii. Chromium (VI and/or compounds (as Cr VI)) 500 mg/l;

iv. Lead and/or compounds (as Pb) 500 mg/l;

v. Mercury and/or compounds (as Hg) 20 mg/l;

vi. Nickel and/or compounds (as Ni) 134 mg/l;

vii. Selenium and/or compounds (as Se) 100 mg/l;

viii. Thallium and/or compounds (as Tl) 130 mg/l.

c. Liquid hazardous wastes having a pH less than or equal to two (2.0).

d. Liquid hazardous wastes containing polychlorinated biphenyls at

* This list is based on regulations developed by the California Department of Health Services for hazardous waste land disposal restrictions in the State of California. Thus, it has become known as the "California List."

concentrations greater than or equal to 50 ppm.

e. Hazardous wastes containing halogenated organic compounds in total concentrations greater than or equal to 1,000 mg/kg. (Sections 3004(d) (1) and (2), 42 U.S.C. 6924(d) (1), and (2)).

During the period ending November 8, 1988 (48 months from November 8, 1984), disposal of contaminated soil or debris resulting from a response action under section 104 or 106 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), or a corrective action required under RCRA, is not subject to any land disposal prohibition or treatment standard for solvent-and dioxin-containing wastes and wastes covered by the "California List." (Sections 3004(d)(3), (e)(3), 42 U.S.C 6924 (d)(3), (e)(3).)

Decisions on deep well injection of dioxin-containing hazardous wastes, solvent-containing hazardous wastes, and California List wastes must be made no later than August 8, 1988 (45 months from November 8, 1984). (Section 3004(f), 42 U.S.C. 6924(f)).

3. *Scheduled wastes.* Section 3004(g) of RCRA, 42 U.S.C. 6924(g), also requires the Agency to schedule, for land disposal determinations, all hazardous wastes listed, as of November 8, 1984, under section 3001 which are not referred to under the above headings, "Solvents and Dioxins" and "California List." EPA is required to develop and submit this schedule to Congress by November 8, 1986. EPA proposed this schedule in the Federal Register of May 31, 1985 (50 FR 23280).

Section 3004(g)(2), 42 U.S.C. 6924(g)(2) requires that the schedule be based on a ranking of the listed hazardous wastes which considers their intrinsic hazard and their volume such that decisions regarding the land disposal of high volume hazardous wastes with high intrinsic hazard shall be scheduled first and low volume wastes with lower intrinsic hazard shall be scheduled last.

Section 3004(g)(4), 42 U.S.C. 6924(g)(4) requires EPA to make determinations on land disposal within the following timeframes:

a. At least one-third of all ranked and listed hazardous wastes by August 8, 1988 (45 months from November 8, 1984).

b. At least two-thirds of all ranked and listed hazardous wastes by June 8, 1989 (55 months from November 8, 1984).

c. All remaining ranked and listed hazardous wastes and all hazardous wastes identified by characteristic under section 3001 by May 8, 1990 (66 months from November 8, 1984).

Although the statute establishes deadlines by which decisions on specific wastes must be made, EPA is not precluded from banning land disposal and requiring treatment for any scheduled wastes before the scheduled deadlines.

4. *Newly listed wastes.* The land disposal prohibitions apply to all hazardous wastes identified or listed under section 3001 as of the date of enactment of the HSWA. EPA is required to make land disposal determinations for any hazardous waste identified or listed under section 3001 after November 8, 1984, within 6 months of the date of identification or listing. (Section 3004(g)(4), 42 U.S.C. 6924(g)(4).)

The statute does not impose an automatic prohibition if EPA misses a deadline for any newly listed waste.

B. Failure by EPA to Meet Statutory Deadlines

If EPA fails to promulgate regulations establishing conditions under which solvents, dioxins, and "California List" constituents may be land disposal by their respective statutory deadlines of November 8, 1986, and July 8, 1987, the statute states that such wastes are prohibited from land disposal as of such date (other than in injection wells, where the applicable statutory deadline is August 8, 1988). Continued land disposal beyond the statutory deadline would be allowed only if the waste is the subject of a successful petition or a later deadline has been established pursuant to 3004(h), 42 U.S.C. 6924(h).

If, by the statutory deadline for any hazardous waste in the first one-third or second one-third of the schedule, EPA fails to promulgate regulations establishing conditions under which such hazardous wastes may be land disposed, such hazardous wastes may be disposed in a landfill or surface impoundment only if the facility is in compliance with the technology requirements set forth in section 3004(o) (42 U.S.C. 6924(o)) of RCRA. Moreover, prior to disposal, the generator must certify to the Administrator that he has investigated the availability of treatment capacity and has determined that the use of such landfill or surface impoundment is the only practical alternative to treatment currently available to him. These conditions apply until EPA promulgates regulations making determinations for the waste concerned. In the above described situation, wastes may be land disposed in other land disposal units (e.g., waste piles and underground injection wells) without such restriction.

If EPA fails to set treatment standards for any of the scheduled listed wastes by May 8, 1990, such wastes are prohibited from land disposal as of that date unless the waste is subject to a successful petition or EPA establishes a later deadline pursuant to 3004(h), 42 U.S.C. 6924(h).

EPA interprets the statute to provide that an automatic prohibition is not imposed for hazardous wastes "identified" under section 3001 if EPA misses the May 8, 1990, deadline for setting treatment standards. "Identified" wastes are wastes defined as hazardous because they meet one or more of the general hazardous characteristic tests in 40 CFR 261.21 through 261.24, rather than wastes "listed" as hazardous in 40 CFR 261.30 through 261.33 because they contain one or more specified hazardous constituents. Section 3004(g)(5)(C), 42 U.S.C. 6924(g)(5)(C), states "if the Administrator fails to promulgate regulations or make a determination under paragraph (5) for any hazardous waste referred to in paragraph (1), within 66 months after the date of enactment of the Hazardous and Solid Waste Amendments of 1984, such hazardous wastes shall be prohibited from land disposal." Because section 3004(g)(1), 42 U.S.C. 6924(g)(1), refers to listed wastes only, the Agency interprets the statute to impose an automatic prohibition for listed wastes but not for wastes identified under section 3001. The comments that were received on the proposed rule generally support this interpretation. One comment did note that there appeared to be no rational basis for treating listed and characteristic wastes differently in this context. However, this comment ignores the plain language of the statute.

EPA believes that this interpretation will have little impact on the timing of land disposal determinations for "identified" wastes, because many of these wastes will be addressed by other statutory prohibitions or treatment standards prior to the 66-month deadline. Prior to the enactment of the HSWA, EPA had already promulgated conditional restrictions on land disposal of hazardous wastes "identified" by the characteristic of ignitability and reactivity (see 40 CFR 264.17, 265.17 and 265.312). In addition, EPA expects that many "identified" wastes will be covered by the "California List" described in Unit I.A.2 above. These wastes will be automatically prohibited from land disposal if EPA fails to promulgate treatment regulations within 32 months of the date of enactment of the HSWA. Consequently, EPA believes that relatively few "identified" wastes will be governed by the 66 month deadline.

C. Summary of Comments Received on the Proposed Rule

Of the comments on the proposed rule, the majority focused on the development of the scores used in the ranking. The most prevalent comment was that the Agency should consider the concentration of constituents in the waste when developing toxicity scores. Other comments focused on the quality of data used to develop the toxicity (T) and volume (V) scores including consideration of exposure factors.

Additional comments expressed the following concerns:

1. EPA should reconsider the use of Appendix VII for determining which constituents are present in various waste streams because the Appendix VII listings are not representative of all companies' waste streams. Thus, the most toxic Appendix VII constituent for a listed waste may not be present in a specific generator's waste.

2. EPA should modify the requirements of sections 3004 (c), (d), (e), (f), (g), (o), and (u) and of section 3005 concerning mining wastes should these wastes be subject to RCRA regulation.

3. Although land disposed in high volume, EPA should not consider metal hydroxide sludges (Waste No. F006) to be highly toxic.

4. The toxicity score for steel industry wastes is based on hexavalent chromium. This score should be adjusted because hexavalent chromium is present in small amounts.

5. EPA should keep the record on the schedule rulemaking open because critical elements of the land disposal process have not yet been defined (e.g., the petition process, treatment standards, variances, extensions). These elements should be published and subjected to public review before the comment period on this rulemaking closes.

Finally, the Agency received several comments stating that land treatment should be considered a method of treatment and not land disposal.

The comments identified in the above section are addressed in the following sections. The original comments to the proposed rule are available for public review in the docket to this rulemaking.

II. Toxicity and Volume (T x V) Methodology for Development of Schedule

Section 3004(g)(2) (42 U.S.C. 6924(g)(2)) requires the schedule to be based on a ranking of wastes such that high volume wastes with a high intrinsic hazard are ranked first and low vlue wastes with a lower intrinsic hazard are ranked last. The Agency is ranking listed hazardous wastes by multiplying a toxicity score (T) for each waste (representing the inherent toxicological properties of hazardous constituents in the waste) and a volume score (V) for each waste (representing the volume of the hazardous waste disposed of in or on the land). The comments received on the proposed rule generally support the T x V methodology for establishing a schedule for land disposal restrictions.

1. *Toxicity scores (T).* EPA has selected toxicity as a measure of a hazardous waste's inherent hazard. Although the legislative history of the 1984 HSWA indicates that "the critical factors in determining which wastes present the greatest hazards in land disposal are the toxicity of the waste and the volume of the waste being land disposed," the legislative history states that EPA may consider other factors in the areas of exposure (i.e., mobility and persistence) and data availability in establishing the schedule (see Conference Report, H.R. Rep. No. 98-1133, 98th Congress, 2nd Sess., at 98, *reprinted in* [1984] U.S. Code & Ad. News 5649-6). A number of comments requested that the Agency consider exposure in the schedule ranking methodology. At this time, EPA does not have sufficient data to consider exposure factors in ranking the relative hazard of hazardous wastes. While the Agency is in the process of gathering exposure data for the listed hazardous wastes and constituents, the statutory timeframe for schedule development precludes the use of this data in the scheduling rule.

Several comments focused on the quality of data used to develop the toxicity scores. These comments included suggestions for adjusting toxicity scores on the basis of data quality including a request for EPA to develop a contingency plan for evaluating waste constituents without chronic toxicity data.

The Agency is in the process of improving the toxicity data base for listed hazardous wastes and constituents through data collection and development. However, as is the case with exposure factors, the statutory time frame for schedule development precludes the use of the refined toxicity data base in the scheduling rule.

Although toxicity data vary widely in quantity and quality for each listed hazardous waste, the Agency has developed a procedure for objectively and systematically translating a variety of measures of chronic and acute toxicity into a toxicity score. This procedure, briefly described below, assigns a toxicity score, indicative of intrinsic hazard, to hazardous waste constituents identified as "P" or "U" waste (i.e., commercial chemical products, off-specification species, container residues and spill residues thereof) and hazardous waste constituents listed in Appendix VII of 40 CFR Part 261. Although Appendix VII of 40 CFR Part 261 does not list constituents representative of *all* companies' waste streams, it is the best data EPA has and does list the hazardous constituents in the majority of waste streams.

Acute toxicity data (LD_{50}),[3] sub-chronic and chronic toxicity data (ADI's,[3] and UCR's [4]) are the measures of toxicity used for scoring. Each hazardous waste constituent is assigned a score from 1 to 10 based on its toxic potency with the most toxic constituents receiving a score of 10 and the least toxic constituents receiving a score of 1. For example, metal hydroxide sludges (Waste No. F006) received a toxicity score of 5 indicating moderate toxicity.

In this schedule, less weight is given in the scoring procedure to acute effects than chronic effects. Historically, chronic effects resulting from continued exposure over long time periods have been used in evaluating environmental risks, e.g., drinking water regulations. However, there are still concerns over acute effects. For this reason, scoring is based primarily on the measures of chronic toxicity, which take the values of 1 to 9. Acute effects take the values of 1 or zero.

ADI or UCR values provide the basis for assigning scores from 1 to 9 to constituents, which roughly corresponds to order of magnitude changes in their toxic potency. Using the ADI as a measure of chronic toxicity, a substance with a low value for an ADI (high potency) receives a high toxicity score. In contrast, a substance with a high UCR value (high potency) receives a high toxicity score. The chronic toxicity score does not consider the severity of effect. The chronic toxicity scores of hazardous waste constituents judged to possess high acute toxicity are then adjusted upward by one unit according to the following scale:

---

[3] LD_{50} represents the dose that is lethal to fifty percent of the animal test population following a single exposure.

[3] ADI (acceptable daily intake) is the amount of toxic, noncarcinogenic, agent in mg/kg body weight/day (or in mg/day for a 70 kg person) which is not expected to result in any adverse effects after chronic exposure to the general population of humans, including sensitive subgroups.

[4] UCR (unit carcinogenic risk) is the upper limit on the lifetime probability that the carcinogen will cause cancer at a dose of 1 mg/kg body weight/day.

For hazardous waste constituents with an LD_{50} less than or equal to 50 mg/kg, add 1 to its chronic score.

For hazardous waste constituents with an LD_{50} greater than 50 mg/kg, add 0 to its chronic score.

The 50 mg/kg cutoff was used for addressing acute toxicity in the scoring procedure because EPA uses this level to differentiate between "acute hazardous wastes" which are listed in 40 CFR 261.33(e) and "toxic wastes" which are listed in 40 CFR 261.33(f).

Constituent scores are converted to waste scores by assigning each hazardous waste the score of its most toxic constituent listed in Appendix VII to 40 CFR Part 261. The Agency based the schedule ranking on Appendix VII constituents in the waste because of limits in available data indicating which Appendix VIII constituents are found in the listed wastes.

The majority of comments of the proposed rule suggested that the concentration of toxic constituents in the waste stream be considered when establishing a toxicity score. Since wastes are assigned a toxicity score based on the most toxic constituent, it is possible that a waste can be scored for a constituent which is present at a low concentration. Despite EPA's request in the proposed schedule rule for data on constituent concentrations in hazardous waste, virtually none was received.

The Agency agrees that it is desirable to categorize wastes by constituent concentration. However data submitted to the Agency via permit applications, manifests, biennial reports and the "National Survey of Hazardous Waste Generators and Treatment, Storage and Disposal Facilities Regulated under RCRA in 1981," contain no information of constituent concentrations in hazardous wastes. EPA recognizes that the use of the most toxic constituent to determine the toxicity score for a waste may overestimate the relative hazard of a waste; however, lack of data characterizing wastes by constituent concentrations limits EPA to the most toxic constituent approach (Ref. 1). Therefore, although the steel industry commented that hexavalent chromium is present in their wastes in low concentrations, under the EPA approach, the toxicity score for these wastes is based on hexavalent chromium.

2. *Volume scores.* The volume scores for the proposed schedule were developed from data from the "National Survey of Hazardous Waste Generators and Treatment, Storage and Disposal Facilities Regulated under RCRA in 1981" (Ref. 2). This survey provides the best readily available database on the volumes of specific waste generated and disposed. The reported volume land disposed [5] for each hazardous waste identified by this survey was converted to a 1 to 10 order of magnitude scale. Hazardous wastes for which no volume was reported were assigned a score of 1.[6] Basing the ranking on volume disposed rather than volume generated is consistent with the legislative history of the RCRA amendments (see H.R. Rep. No. 98–1133, 98th Cong., 2nd Sess., at 88 (1984)). In addition, since EPA is concerned with wastes that are being land disposed rather than wastes that are treated, recycled, or recovered, it is more appropriate to base the ranking on a volume disposed.

Several of the comments responding to the proposed rule expressed concern over the use of this data base as the only source for volume data. These comments identified the limitations of this database, i.e., only one-third of existing RCRA facilities were surveyed, and approximately one-half of the scheduled wastes report no volume disposed. Several commenters suggested using data from biennial reports instead of the survey data.

The Agency acknowledges the limitations in the database used to develop the volume scores. However, the Agency does not believe that the 1983 biennial reports, in addition to Part A permits or manifests provide better, more reliable data than the survey.

For example, the available summary data from the 1983 biennial reports represents the Agency's first attempt to gather summary biennial report data from the States (most of which are authorized to run their own hazardous waste program). The overall quality and representativeness of the information was low due to a combination of differing priorities given to this effort among the States and the lack of a uniform reporting format (i.e., forms and frequency of reporting required) among the States. Furthermore, because this is a census, and not a statistical survey, it is difficult to extrapolate from the submitted data to account for data gaps and incompatibilities. As a result, the Agency is working with the States to improve the quality and usefulness of biennial report data to be submitted in 1986 (on waste management activities in calendar year 1985). However, summary data from this effort will not be available in time to use it as a basis for volume scores in the schedule, given the November 8, 1986 statutory deadline.

An additional comment received on the volume scores stated that estimates of a volume disposed may include treatment residues as well as untreated wastes. As a result, EPA should determine which wastes are treated (by percent) and adjust volume scores accordingly. The Agency points out, however, that treated wastes are subject to land disposal restrictions unless the EPA approved treatment standard is met. Therefore, including treatment residues with untreated wastes for the purpose of developing a volume score is appropriate.

A more detailed explanation of the toxicity and volume scoring procedures is available upon request in a document titled "Documentation For The Development of Toxicity and Volume Scores, for the Purposes of Scheduling Hazardous Wastes." Requests for this document should be made by telephone to the RCRA Hotline, (800) 424–9346 (toll free) or (202) 382–3000 or in writing to Docket Clerk, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M St., SW, Washington, DC 20460.

III. Schedule Interpretation

The Agency received comments on use of the T x V methodology in future EPA actions unrelated to the schedule. When assessing the schedule it is important to recognize that the method used to develop the schedule does not result in an absolute risk ranking. Rather, the schedule is the Agency's attempt to develop a relative hazard ranking for all wastes listed under section 3001. Therefore, the schedule should not be taken as an indication of Agency decisions on acceptable levels for these wastes and constituents.

In addition, the Agency received several comments suggesting that land treatment be considered as a method for treating hazardous wastes, rather than a method for land disposing hazardous wastes. HSWA defines land treatment as a method of land disposal thereby limiting the Agency's discretion to consider land treatment units as other than land disposal. The Agency refers these commenters to the discussion on land treatment contained in the

---

[5] Consistent with the statutory definition of land disposal in Section 3004(k) volume disposed is that quantity of a hazardous waste managed in deep injection wells landfills, surface impoundments, land treatment facilities, and waste piles.

[6] The "National Survey of Hazardous Waste Generators and Treatment, Storage and Disposal Facilities Regulated under RCRA in 1981" included only one-third of all facilities in the United States. In addition, land disposal facilities were required to report the 10 highest volume wastes disposed of in their facility. Thus, some listed hazardous wastes were not reported to be land disposed in the survey. Most of these wastes are P and U wastes listed in 40 CFR 261.33 whose total volume disposed is a small percentage of all hazardous wastes disposed.

BEST COPY AVAILABLE

Hazardous Waste Management System: Land Disposal Restrictions proposed rule (see 51 FR at 1602, January 14, 1986).

Lastly, a comment suggested that EPA keep open the record on this rulemaking because critical elements of the land disposal process have not yet been defined (e.g., the petition process, treatment standards, variances, extensions). The standard for developing the schedule is laid out clearly in the statute and accompanying legislative history (3004(g); see Conference Report, H.R. Rep. No. 98–1133, 98th Congress, 2nd Sess., at 98 *reprinted in* [1984] U.S. Code & Ad. News 5858–9). EPA does not believe that information pertaining to the Agency's implementation of the other elements of the land disposal restriction program is necessary in order to provide informed comment on EPA's approach to meeting this standard. Public comment on these elements will be allowed for within the Hazardous Waste Management System; Land Disposal Restriction; proposed rulemaking.

IV. Wastes Included in the Ranking

Today's rulemaking includes all the wastes that were listed as hazardous in 40 CFR Part 261 as of November 8, 1984, except for the spent solvent wastes listed as EPA hazardous waste numbers F001, F002, F003, F004 and F005 and Dioxin-containing hazardous wastes numbered F020, F021, F022, F023, F026, F027 and F028. These two categories of waste are excluded from the schedule because the statute requires decisions on them to be made within 24 months of enactment.

The ranking does, however, contain wastes that may be covered by the "California List." There are several reasons for their inclusion. First, the "California List" is expressed in the RCRA amendments in terms of concentration of constituents, rather than as specific EPA hazardous waste codes. Translating the generic categories of the "California List" into EPA waste codes is very difficult. This is because a specific waste code may apply to a number of different wastes which vary significantly in concentration of hazardous constituents. At this time, the Agency anticipates that its rules on the "California List" will follow the same format as the provision in the RCRA amendments, that is, expressed as a concentration of constituents, rather than as EPA waste codes.

A second reason for including wastes potentially covered by the "California List" on the ranking is that the "California List" may address some, but not necessarily all, of the constituents of concern in a waste. Wastes which contain "California List" constituents in concentrations lower than the levels set by the statute (or set by the Agency when it reviews the California List) might contain other hazardous constituents that threaten human health and the environment. Consequently, the Agency is scheduling these wastes for bans or treatment standards related to these other constituents.

Also, wastes identified as hazardous based on a characteristic alone (i.e., corrosivity, reactivity, ignitability and EP Toxicity) are not included in the proposed ranking. The RCRA amendments specify that these wastes will be reviewed in the last third.

The American Mining Congress commented that land disposal restrictions were designed by Congress for wastes other than those from the extraction, beneficiation and processing of ores and minerals. Section 3004(x) of RCRA authorizes EPA to modify the requirements of subsections 3004(d), (e), (f), and (g) to take into account the special characteristics of certain mining wastes, the practical difficulties associated with implementating requirements for such wastes and site specific characteristics including but not limited to the climate, geology, hydrology and soil chemistry at the site, so long as such modified requirements protect human health and the environment. Accordingly, EPA intends to examine how land disposal restriction decisions should apply to mining wastes prior to subjecting them to regulation. The Agency points out however, that should mining wastes become listed or characteristic wastes under section 3001 after November 8, 1984, EPA is required to make land disposal restriction determinations within 6 months of the date of listing.

Lastly, since all of the wastes listed as hazardous under 40 CFR Part 261 (including those specifically exempted from this rulemaking), are CERCLA hazardous substances, releases of any of these wastes (except federally permitted releases), that equal or exceed the applicable reportable quantity must be reported immediately to the National Response Center.

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), requires that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities (RQs) immediately notify the National Response Center (at (800) 424–8802 or (202) 426–2675) of the release.

V. Regulatory Impact

A. Executive Order 12291

Executive Order 12291 requires that the regulatory impact of potential Agency actions be evaluated as part of the process of developing regulations. Such an assessment consists of a description of the potential benefits of the rule, including any beneficial effects that cannot be quantified in monetary terms (Section 3(d)(2)); and a description of the potential costs of the rule, including any adverse effects that cannot be quantified in monetary terms (section 3(d)(3)).

In addition, Executive Order 12291 requires that regulatory agencies prepare a Regulatory Impact Analysis in connection with major rules (Section 3). Major rules are defined in section 1(b) as those which are likely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, innovation, or international trade.

Today's rule establishes the timing for regulatory decisions on listed hazardous wastes not designated as solvents or dioxins by the statute. The schedule does not impose any mandatory requirements, unless the Agency fails to make decisions as Congress has mandated. It will be EPA's regulatory decisions that define the impacts on regulated parties. EPA will evaluate the risks, costs, and impacts of these decisions. Therefore, EPA does not consider this rule to be a major rule as defined by Executive Order 12291.

This rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5, U.S.C. 601 et seq., whenever an agency is required to issue a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a Regulatory Flexibility Analysis which describes the impact of the rule on small entities (i.e., small business, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities. Since, as explained above, this schedule is only a preliminary step that has no direct regulatory impact, I hereby certify that this regulation will not have a significant economic impact on a

BEST COPY AVAILABLE

substantial number of small entities, and therefore, does not require a Regulatory Flexibility Analysis.

C. Paperwork Reduction Act

Section 3004(g)(3) of RCRA as amended by the HSWA exempts the schedule from the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. Development of the schedule does not, in any event, contain any information collection requirements as described by provisions of the Paperwork Reduction Act.

VI. Impact on Authorized States

This proposal has no immediate impact on authorized States as it merely establishes EPA's schedule for land disposal prohibitions and treatment determinations. The impact on authorized States will be addressed when these determinations are made.

List of Subjects in 40 CFR Part 268

Environmental protection, Hazardous materials.

Dated: May 21, 1986.

Lee M. Thomas,

Administrator.

Therefore, Chapter I of Title 40 of the Code of Federal Regulations is amended by adding new Part 268 to read as follows:

PART 268—LAND DISPOSAL RESTRICTIONS

Subpart A—[Reserved]

Subpart B—Schedule for Land Disposal Prohibition and Establishment of Treatment Standards

Sec.

268.10 Identification of wastes to be evaluated by August 8, 1988.
268.11 Identification of wastes to be evaluated by June 8, 1988.
268.12 Identification of wastes to be evaluated by May 8, 1990.
268.13 Schedule for wastes identified or listed after November 8, 1984.

Authority: Secs. 1105, 2002(a), 3001, and 3004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6924].

Subpart A—[Reserved]

Subpart B—Schedule for Land Disposal Prohibition and Establishment of Treatment Standards

§ 268.10 Identification of wastes to be evaluated by August 8, 1988.

EPA will take action under sections 3004(g)(5) and 3004(m), of the Resource Conservation and Recovery Act, by August 8, 1988, for the following wastes (for ease of understanding the wastes have been listed by the section of 40 CFR Part 261 under which they were listed):

§ 261.31 Wastes

F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum.

F007—Spent cyanide plating bath solutions from electroplating operations.

F008—Plating bath sludges from the bottom of plating baths from electroplating operations where cyanides are used in the process.

F009—Spent stripping and cleaning bath solutions from electroplating operations where cyanides are used in the process.

F019—Wastewater treatment sludges from the chemical conversion coating of aluminum.

§ 261.32 Wastes

K001—Bottom sediment sludge from the treatment of wastewaters from wood preserving processes that use creosote and/or pentachlorophenol.

K004—Wastewater treatment sludge from the production of zinc yellow pigments.

K006—Over residue from the production of chrome oxide green pigments.

K011—Bottom stream from the wastewater stripper in the production of acrylonitrile.

K013—Bottom stream from the acetonitrile column in the production of acrylonitrile.

K014—Bottoms from the acetonitrile purification column in the production of acrylonitrile.

K015—Still bottoms from the distillation of benzyl chloride.

K016—Heavy ends or distillation residues from the production of carbon tetrachloride.

K017—Heavy ends (still bottoms) from the purification column in the production of epichlorohydrin.

K018—Heavy ends from the fractionation column in ethyl chloride production.

K020—Heavy ends from the distillation of vinyl chloride in vinyl chloride monomer production.

K021—Aqueous spent antimony catalyst waste from fluoromethanes production.

K022—Distillation bottom tars from the production of phenol/acetone from cumene.

K024—Distillation bottoms from the production of phthalic anhydride from naphthalene.

K030—Column bottom or heavy ends from the combined production of trichloroethylene and perchloroethylene.

K031—By-products salts generated in the production of MSMA and cacodylic acid.

K035—Wastewater treatment sludges generated in the production of creosote.

K036—Still bottoms from toluene reclamation distillation in the production of disulfoton.

K037—Wastewater treatment sludge from the production of disulfoton.

K044—Wastewater treatment sludges from the manufacturing and processing of explosives.

K045—Spent carbon from the treatment of wastewater containing explosives.

K046—Wastewater treatment sludges from the manufacturing, formulation and loading of lead-based initiating compounds.

K047—Pink/red water from TNT operations.

K048—Dissolved air flotation (DAF) float from the petroleum refining industry.

K049—Stop oil emulsion solids from the petroleum refining industry.

K050—Heat exchange bundle cleaning sludge from the petroleum refining industry.

K051—API separator sludge from the petroleum refining industry.

K052—Tank bottoms (leaded) from the petroleum refining industry.

K060—Ammonia still lime sludge from coking operations.

K061—Emission control dust/sludge from the primary production of steel in electric furnaces.

K062—Spent pickle liquor from steel finishing operations in chlorine production.

K069—Emission control dust/sludge from secondary lead smelting.

K071—Brine purification muds from the mercury cells process in chlorine production, where separately prepurified brine is not used.

K073—Chlorinated hydrocarbon waste from the purification step of the diaphragm cell process using graphite anodes

K083—Distillation bottoms from aniline production.

K084—Wastewater treatment sludges generated during the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.

K085—Distillation of fractionation column bottoms from the production of chlorobenzenes.

K086—Solvent washes and sludges; caustic washes and sludges, or water washes and sludges from cleaning tubs and equipment used in the formulation of ink from pigments, driers, soaps, and stabilizers containing chromium and lead.

K087—Decanter tank tar sludge from coking operations.

K090—Untreated wastewater from the production of 2,4-D.

K101—Distillation tar residues from the distillation of aniline-based compounds in the production of veterinary

pharmaceuticals from arsenic or organo-arsenic compounds.
K102—Residues from the use of activated carbon for decolorization in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds.
K103—Process residues from aniline extraction from the production of aniline.
K104—Combined wastewater streams generated from nitrobenzene/aniline production.
K106—Wastewater treatment sludge from the mercury cell process in chlorine production.

§ 261.33(e) Wastes

P001—Warfarin, when present at concentration greater than 0.3%
P004—Aldrin
P005—Allyl alcohol
P010—Arsenic acid
P011—Arsenic (V) oxide
P012—Arsenic (III) oxide
P015—Beryllium dust
P016—Bis-(chloromethyl) ether
P018—Brucine
P020—Dinoseb
P030—Soluble cyanide salts not elsewhere specified
P036—Dichlorophenylarsine
P037—Dieldrin
P039—Disulfoton
P041—Diethyl-p-nitrophenyl phosphate
P048—2,4-Dinitrophenol
P050—Endosulfan
P058—Fluoroacetic acid, sodium salt
P059—Heptachlor
P063—Hydrogen cyanide
P068—Methyl Hydrazine
P069—Methyllactonitrile
P070—Aldicarb
P071—Methyl parathion
P081—Nitroglycerine
P082—N-Nitrosodimethylamine
P084—N-Nitrosomethylvinylamine
P087—Osmium tetroxide
P089—Parathion
P092—Phenylmercuric acetate
P094—Phorate
P097—Famphur
P102—Propargyl alcohol
P105—Sodium azide
P108—Strychnine and salts
P110—Tetraethyl lead
P115—Thallium (I) sulfate
P120—Vanadium pentoxide
P122—Zinc phosphide, when present at concentrations greater than 10%
P123—Toxaphene

§ 261.33(f) Wastes

U007—Acrylamide
U009—Acrylonitrile
U010—Mitomycin C
U012—Aniline
U016—Benz(c)acridine
U018—Benz(a)anthracene
U019—Benzene
U022—Benzo(a)pyrene
U029—Methyl bromide
U031—n-Butanol
U036—Chlordane, technical
U037—Chlorobenzene
U041—n-Chloro-2,3-epoxypropane
U043—Vinyl chloride
U044—Chloroform
U046—Chloromethyl methyl ether
U050—Chrysene
U051—Creosote
U053—Crotonaldehyde
U061—DDT
U063—Dibenz o (a, h) anthracene
U064—1,2:7,8 Dibenzopyrene
U066—Dibromo-3-chloropropane 1,2-
U067—Ethylene dibromide
U074—1,4-Dichloro-2-butene
U077—Ethane, 1,2-dichloro-
U078—Dichloroethylene, 1,1-
U089—N,N Diethylhydrazine
U089—Diethylstilbestrol
U103—Dimethyl sulfate
U105—2,4-Dinitrotoluene
U108—Dioxane, 1,4-
U115—Ethylene oxide
U122—Formaldehyde
U124—Furan
U129—Lindane
U130—Hexachlorocyclopentadiene
U133—Hydrazine
U134—Hydrofluoric acid
U137—Indeno(1,2,3-cd)pyrene
U151—Mercury
U154—Methanol
U155—Methapyrilene
U157—3-Methylcholanthrene
U158—4,4-Methylene-bis-(2-chloroaniline)
U159—Methyl ethyl ketone
U171—Nitropropane, 2-
U177—N-Nitroso-N-methylurea
U180—N-Nitrosopyrrolidine
U185—Pentachloronitrobenzene
U188—Phenol
U192—Pronamide
U200—Reserpine
U209—Tetrachloroethane, 1,1,2,2-
U210—Tetrachloroethylene
U211—Carbon tetrachloride
U219—Thiourea
U220—Toluene
U221—Toluenediamine
U223—Toluene diisocyanate
U226—Methylchloroform
U227—Trichloroethane, 1,1,2-
U228—Trichloroethylene
U237—Uracil mustard
U238—Ethyl carbamate
U248—Warfarin, when present at concentrations of 0.3% or less
U249—Zinc phosphide, when present at concentrations of 10% or less

§ 268.11 Identification of wastes to be evaluated by June 8, 1988.

EPA will take action under sections 3004(g)(5) and 3004(m) of the Resource Conservation and Recovery Act, by June 8, 1988, for the following wastes (for ease of understanding the wastes have been listed by the section of 40 CFR Part 261 under which they were listed):

§ 261.31 Wastes

F010—Quenching bath sludge from oil baths from metal heat treating operations where cyanides are used in the process.
F011—Spent cyanide solutions from salt bath pot cleaning from metal heat treating operations.
F012—Quenching wastewater treatment sludges from metal heat operations where cyanides are used in the process.
F024—Wastes including but not limited to, distillation residues, heavy ends, tars and reactor clean-out wastes from the production of chlorinated aliphatic hydrocarbons, having carbon content from one to five, utilizing free radical catalyzed processes. [This listing does not include light ends, spent filters and filter aids, spend desiccants, wastewater, wastewater treatment sludges, spent catalysts, and wastes listed in § 261.32.].

§ 261.32 Wastes

K009—Distillation bottoms from the production of acetaldehyde from ethylene.
K010—Distillation side cuts from the productions of acetaldehyde from ethylene.
K019—Heavy ends from the distillation of ethylene dichloride in ethylene dichloride production.
K025—Distillation bottoms from the production of nitrobenzene by the nitration of benzene.
K027—Centrifuge and distillation residues from toluene diisocyanate production.
K029—Spent catalyst from the hydrochlorinator reactor in the production of 1,1,1-trichloroethane.
K029—Waste from the product steam stripper in the production of 1,1,1-trichloroethane.
K038—Wastewater from the washing and stripping of phorate production.
K039—Filter cake from the filtration of diethylphosphoro-dithioic acid in the production of phorate.
K040—Wastewater treatment sludge from the production of phorate.
K041—Wastewater treatment sludge from the production of toxaphene.
K042—Heavy ends or distillation residues from the distillation of tetrachlorobenzene in the production of 2,4,5-T.
K043—2,6-Dichlorophenol waste from the production of 2,4-D.
K095—Distillation bottoms from the production of 1,1,1-trichloroethane.
K096—Heavy ends from the heavy ends column from the production of 1,1,1-trichloroethane.
K097—Vacuum stripper discharge from the chlordane chlorinator in the production of chlordane.
K098—Untreated process wastewater from the production of toxaphene.
K105—Separated aqueous stream from the reactor product washing step in the production of chlorobenzenes.

§ 261.33(e) Wastes

P002—1-Acetyl-2-thiourea
P003—Acrolein
P007—5-(Aminoethyl)-3-isoxazolol
P008—4-Aminopyridine
P014—Thiophenol
P026—1-(o-Chlorophenyl)thiourea
P027—Propanenitrile, 3-chloro
P029—Copper cyanides
P040—O,O-Diethyl o-pyrazinyl phosphorothioate
P043—Diisopropyl fluorophosphate
P044—Dimethoate
P049—2,4-Dithiobiuret
P054—Aziridine
P057—Fluoroacetamide
P060—Isodrin
P062—Hexaethyltetraphosphate

P068—Methomyl
P067—2-Methylaziridine
P072—Alpha-naphthylthiourea (ANTU)
P074—Nickel cyanide
P085—Octamethylpyrophosphoramide
P098—Potassium cyanide
P104—Silver cyanide
P106—Sodium cyanide
P107—Strontium sulfide
P111—Tetraethylpyrophosphate
P112—Tetranitromethane
P113—Thallic oxide
P114—Thallium (I) selenite

§ 261.33(f) Wastes

U002—Acetone
U003—Acetonitrile
U005—o-Acetylaminofluorene
U006—Acrylic acid
U011—Amitrole
U014—Auramine
U015—Azaserine
U020—Benzenesulfonyl chloride
U021—Benzidine
U022—Benzotrichloride
U025—Dichloroethyl ether
U026—Chlornaphazine
U028—Bis-(2-ethylhexyl)phthalate
U032—Calcium chromate
U035—Chlorambucil
U047—Beta-chloronaphthalene
U049—4-Chloro-o-toluidine, hydrochloride
U057—Cyclohexanone
U058—Cyclophosphamide
U059—Daunomycin
U060—DDD
U062—Diallate
U070—o-Dichlorobenzene
U073—Dichlorobenzidene, 3,3-
U080—Methylene chloride
U083—Dichloropropane, 1,2-
U092—Dimethylamine
U093—Dimethylaminoazobenzene
U094—Dimethylbenz[a]anthracene,7,12-
U095—Dimethylbenzidine,3,3'-
U097—Dimethylcarbamoyl chloride
U098—Dimethylhydrazine, 1,1-
U099—Dimethylhydrazine, 1,2-
U101—Dimethylphenol, 2,4-
U105—Dinitrotoluene, 2,6-
U107—Di-n-octyl phthalate
U109—1,2,-Diphenylhydrazine
U110—Dipropylamine
U111—Di-N-Propylnitrosamine
U114—Ethylenebis-(dithiocarbamic acid)
U116—Ethylene thiourea
U119—Ethyl methanesulfonate
U127—Hexachlorobenzene
U128—Hexachlorobutadiene
U131—Hexachloroethane
U135—Hydrogen sulfide
U138—Methyl iodide
U140—Isobutyl alcohol
U142—Kepone
U143—Lasiocarpine
U144—Lead acetate
U146—Lead subacetate
U147—Maleic anhydride
U148—Maleonitrile
U150—Melphalan
U161—Methyl isobutyl ketone
U162—Methyl methacrylate
U163—N-Methyl-N-nitro-N-nitrosoguanidine
U164—Methylthiouracil
U165—Naphthalene
U168—Napthylamine, 2-
U169—Nitrobenzene
U170—p-Nitrophenol
U172—N-Nitroso-di-n-butylamine
U173—N-Nitroso-diethanolamine
U174—N-Nitroso-diethylamine
U176—N-Nitroso-N-ethylurea
U178—N-Nitroso-N-methylurethane
U179—N-Nitrosopiperidine
U189—Phosphorus sulfide
U193—1,3-Propane sultone
U196—Pyridine
U202—Safrole
U205—Selenium disulfide
U206—Streptozotocin
U208—Tetrachloroethane, 1,1,1,2-
U213—Tetrahydrofuran
U214—Thallium (I) acetate
U215—Thallium (I) carbonate
U216—Thallium (I) chloride
U217—Thallium (I) nitrate
U219—Thioacetamide
U235—Tris (2,3-Dibromopropyl) phosphate
U239—Xylene
U244—Thiram

§ 268.12 Identification of wastes to be evaluated by May 8, 1990.

EPA will take action under sections 3004(g)(5) and 3004(m) of the Resource Conservation and Recovery Act, by May 8, 1990, for the following wastes (for ease of understanding, the wastes have been listed by the section of 40 CFR Part 261 under which they were listed):

§ 261.32 Wastes

K002—Wastewater treatment sludge from the production of chrome yellow and orange pigments.
K003—Wastewater treatment sludge from the production of molybdate orange pigments.
K005—Wastewater treatment sludge from the production of chrome green pigments.
K006—Wastewater treatment sludge from the production of chrome oxide green pigments (anhydrous and hydrated).
K007—Wastewater treatment sludge from the production of iron blue pigments.
K023—Distillation light ends from the production of phthalic anhydride from naphthalene.
K026—Stripping still tails from the production of methyl ethyl pyridines.
K032—Wastewater treatment sludge from the production of chlordane.
K033—Wastewater and scrub water from the chlorination of cyclopentadiene in the production of chlordane.
K034—Filter solids from the hexachlorocyclopentadiene in the production of chlordane.
K093—Distillation light ends from the production of phthalic anhydride from ortho-xylene.
K094—Distillation bottoms from the production of phthalic anhydride from ortho-xylene.
K100—Waste leaching solution from acid leaching of emission control dust/sludge from secondary lead smelting.

§ 261.33(e) Wastes

P009—Ammonium picrate
P013—Barium cyanide
P017—Bromoacetone
P021—Calcium cyanide
P022—Carbon disulfide
P023—Chloroacetaldehyde
P024—p-Chloroaniline
P028—Benzyl chloride
P031—Cyanogen
P033—Cyanogen chloride
P034—4,6-Dinitro-o-cyclohexylphenol
P036—Diethylarsine
P042—Epinephrine
P045—Thiofanox
P046—Alpha, alpha-Dimethylphenethylamine
P047—4,6-Dinitro-o-cresol and salts
P051—Endrin
P056—Fluorine
P064—Methyl isocyanate
P065—Mercury fulminate
P073—Nickel carbonyl
P075—Nicotine and salts
P076—Nitric oxide
P077—p-Nitroaniline
P078—Nitrogen dioxide
P088—Endothall
P093—N-Phenylthiourea
P095—Phosgene
P096—Phosphine
P099—Potassium silver cyanide
P101—Propanenitrile
P103—Selenourea
P109—Tetraethyldithiopyrophosphate
P116—Thiosemicarbazide
P118—Trichloromethanethiol
P119—Ammonium vanadate
P121—Zinc cyanide

§ 261.33(f) Wastes

U001—Acetaldehyde
U004—Acetophenone
U006—Acetyl chloride
U017—Benzal chloride
U024—Bis(2-chloroethoxy)methane
U027—Bis(2-chloroisopropyl)ether
U030—Benzene, 1-bromo-4-phenoxy
U033—Carbonyl fluoride
U034—Chloral
U038—Ethyl-4-4'-dichlorobenzilate
U039—4-Chloro-m-cresol
U042—Vinyl ether, 2-chloroethyl
U045—Methyl chloride
U048—o-Chlorophenol
U052—Cresols
U055—Cumene
U056—Cyclohexane
U068—Methane, dibromo
U069—Dibutyl phthalate
U071—m-Dichlorobenzene
U072—p-Dichlorobenzene
U075—Dichlorodifluoromethane
U076—Ethane, 1,1-dichloro-
U079—1,2-Dichlorethylene
U081—2,4-Dichlorophenol
U082—2,6-Dichlorophenol
U084—1,3-Dichloropropene
U085—2,2'-Bioxirane
U087—0,0,-Diethyl-S-methyl-dithiophosphate
U088—Diethyl phthalate
U090—Dihydrosafrole
U091—3,3'-Dimethoxybenzidine
U096—alpha,alpha-Dimethylbenzylhydroxyperoxide
U102—Dimethyl phthalate
U112—Ethyl acetate
U113—Ethyl acrylate
U117—Ethyl ether

U118—Ethylmethacrylate
U120—Fluoranthene
U121—Trichloromonofluoromethane
U123—Formic acid
U125—Furfural
U126—Glycidylaldehyde
U127—Hexachlorophene
U130—Cacodylic acid
U131—Iron dextran
U141—Isosafrole
U145—Lead phosphate
U148—Maleic hydrazide
U152—Methacrylonitrile
U159—Methanethiol
U160—Methyl chlorocarbonate
U161—Methyl ethyl ketone peroxide
U166—1,4-Naphthaquinone
U167—1-Naphthylamine
U168—2-Naphthylamine
U171—2-Nitro-o-toluidine
U173—Paraldehyde
U180—Pentachlorobenzene
U184—Pentachloroethane
U185—1,3-Pentadiene
U187—Phenacetin
U190—Phthalic anhydride
U191—2-Picoline
U194—1-Propanamine
U197—p-Benzoquinone
U201—Resorcinol
U202—Saccharin and salts
U204—Selenious acid
U207—1,2,4,5-tetrachlorobenzene
U222—o-Toluidine hydrochloride
U225—Bromoform
U234—Sym-Trinitrobenzene
U236—Trypan blue
U240—2,4-D, salts and esters
U243—Hexachloropropene
U248—Cyanogen bromide
U247—Methoxychlor

Wastes identified as hazardous based on a characteristic alone (i.e., corrosivity, reactivity, ignitability and EP toxicity).

§ 268.13 Schedule for wastes identified or listed after November 8, 1984.

In the case of any hazardous waste identified or listed under section 3001 after November 8, 1984, the Administrator shall make a land disposal prohibition determination within 6 months after the date of identification or listing.

Part IV

Department of Education

34 CFR Part 300

Special Education and Rehabilitation Services; Assistance to States for Education of Handicapped Children; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 300

Special Education and Rehabilitation Services; Assistance to States for Education of Handicapped Children

AGENCY: Department of Education.

ACTION: Final regulations; technical amendments.

SUMMARY: The Secretary amends the regulations for Part B of the Education of the Handicapped Act (EHA–B). These technical amendments are needed to implement the revisions made to section 611(c)(2)(A)(i)(II) of the EHA–B (20 U.S.C. 1411(c)(2)(A)(i)(II)) by section 901(a) of Pub. L. 99–159. The amount available for State administrative costs has been changed to implement the statutory amendment.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the Federal Register or later if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: David B. Weber, Director, Division of Assistance to States, Special Education Programs, Department of Education, 400 Maryland Avenue SW. (Switzer Building, Room 3511—M/S2313) Washington, DC 20202; Telephone: (202) 732–1014.

SUPPLEMENTARY INFORMATION: Certain provisions of Section 611 of Part B of the Education of the Handicapped Act (20 U.S.C. 1401, 1411 et seq.) are revised by Pub. L. 99–159, enacted on November 22, 1985. Part B authorizes formula grants to State educational agencies and, through them, to local educational agencies and intermediate educational agencies to assist them in the education of handicapped children. The purposes of the EHA–B, according to section 601(c), are to ensure that a free appropriate public education is made available to all handicapped children; to ensure that the rights of handicapped children and their parents are protected; to assist States and localities to provide for the education of handicapped children; and to assess and ensure the effectiveness of efforts to educate those children.

Section 611 of the EHA–B includes a formula for calculating each State's grant for any fiscal year. Section 611 also provides the percentage of its grant that a State educational agency must distribute to local educational agencies (75 percent) and the percentage of its grant that may be used for administrative costs and for direct and support services (25 percent). Section 611(c)(2)(A)(i)(II) previously provided that a State educational agency may use an amount equal to up to five percent of the grant or $300,000, whichever is greater, for administrative costs. Section 901(a) of Pub. L. 99–159 amended that requirement by increasing the amount available for State administration to $350,000. This technical revision also applies to the Department of the Interior's grant since the Secretary of Education allows the Secretary of the Interior to use an amount comparable to the amount available to a State educational agency for program administrative costs.

An additional technical amendment is made to 34 CFR 300.620. A sentence is added to clarify that there is a twenty-five percent limitation on the amount that may be used for administrative costs in any fiscal year. This amendment also deletes an error in a cross-reference to other sections of the regulations previously published at 34 CFR 300.620.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities.

To the extent that these regulations affect States and States agencies, they will not have an impact on small entities because States and State agencies are not considered to be small entities under the Regulatory Flexibility Act.

These regulations may affect those small local educational agencies receiving Federal financial assistance under this program. However, the regulations will not have a significant economic impact on the small local educational agencies affected because the amount of funds in question is a maximum of $50,000 per State, and this amount must not be deducted from the 75 percent portion of the EHA–B grant that must be distributed to local educational agencies. These final regulations do not impose any additional regulatory burden.

This amendment to the regulations imposes no additional requirements other than the specific change required by the statute.

Waiver of Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)), and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, since the change made in the regulations merely incorporates a statutory change into existing regulations and does not itself establish new substantive policy, public comment could have no effect on the content of this amendment. Therefore, the Secretary has determined under 5 U.S.C. 553(b)(B) that proposed rulemaking on this amendment is unnecessary and contrary to the public interest.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

The Secretary has determined that the regulations in this document would not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 300

Administrative practice and procedure, Education, Education of handicapped, Equal education opportunity, Grants program—education, Privacy, Private Schools, and Reporting and recordkeeping requirements.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations.

(Catalog of Federal Domestic Assistance No. 84.027; Assistance to States for Education of Handicapped Children)

Dated: May 22, 1986.

William J. Bennett,

Secretary of Education.

PART 300—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN

The Secretary amends Part 300 of Title 34 of The Code of Federal Regulations as follows:

1. The authority citation for Part 300 is revised to read as follows:

Authority: 20 U.S.C. 1411–1420, unless otherwise noted.

2. Section 300.262 is amended by revising paragraph (a) to read as follows:

§ 300.262 Use of Part B funds.

(a) The Department of the Interior may use five percent of its payment in any fiscal year, or $350,000, whichever is greater, for administrative costs in carrying out the provisions of this part.

* * * * *

3. Section 300.620 is revised to read as follows:

§ 300.620 Federal funds for State administration.

A State may use five percent of the total State allotment in any fiscal year under Part B of the Act, or $350,000, whichever is greater, for administrative costs related to carrying out sections 612 and 613 of the Act. However, this amount cannot be greater than twenty-five percent of the State's total allotment for the fiscal year under Part B of the Act.

(20 U.S.C. 1411 (b), (c))

Educational Research Grant Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary of Education (the Secretary) issues final regulations, that consolidate ten existing regulations affecting the Office of Education Research and Improvement's (OERI) direct grant programs into one regulation implementing section 405 of the General Education Provisions Act (GEPA), except for subsections 405(f) and 405(k). These final regulations streamline government administration, improve readability, and reduce the burdens on the affected public.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the Federal Register or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Frank Sobol, U.S. Department of Education, Office of Education Research and Improvement, Mail Stop 1612, 1200 19th Street, NW, Washington, DC 20208. Telephone Number (202) 254-5740.

SUPPLEMENTARY INFORMATION:

Background

The existing regulations which are affected by the final regulations were promulgated by the National Institute of Education (NIE). Since the publication of the notice of proposed rulemaking for NIE's Educational Research Grant Program, the functions of NIE have been reorganized within the Office of Educational Research and Improvement (OERI) pursuant to Section 413 of the Department of Education Organization Act (DEOA) (20 U.S.C 3473). While NIE has been abolished as a separate entity within OERI, its functions, which are governed by these final regulations, are continued within OERI. NIE's educational research grant programs and the rules which govern those programs are to be administered by the Assistant Secretary for OERI.

The Secretary has reviewed the existing regulations governing the programs authorized by section 405 of GEPA and amends Title 34 of the Code of Federal Regulations (CFR) by removing Parts 701, 702, 703, 709, 710, 715, 719, 720, and 795, and by revising Part 700. The final regulations consolidate portions of existing regulations while removing others that are obsolete. The final regulations establishing an Educational Research Grant Program define applicant eligibility; provide definitions of terms used in the regulations; specify types of grants; list authorized activities; list possible funding priorities; establish application procedures for field-initiated studies projects; establish procedures for the evaluation of applications; and provide selection criteria.

A notice or proposed rulemaking was published in the Federal Register on March 12, 1985 (50 FR 9970). No comments were received during the public comment period.

The Secretary has made several technical changes to improve the clarity of these final rules. The citation of authority for these rules has been changed to conform to the Federal Register format using only the United States Code (U.S.C.) reference.

"Planning" as an educational research project activity has been added to the list of types of projects the Secretary may assist under § 700.11(b). Like the other activities listed § 700.11(b), this activity is authorized by section 405(e)(1) of GEPA. It was inadvertently left out of the NPRM.

As a clarification, "school discipline" has been added to the funding priority "organization and management of schools, including effective school administration and leadership" at § 700.12(a)(6).

Section 700.32, concerning procedures for selecting field-initiated studies applications for funding, has been revised. The order of the paragraphs (a) and (b) of this section has been reversed. This change is made so that the most important information about field-initiated studies applications comes first in the section. The new § 700.32(a) sets out the rules governing competitions for field-initiated studies grants. It is followed by new § 700.32(b) which specifies the membership of the review board for field-initiated studies applications, and the procedure for reviewing those applications. In addition, § 700.32(b)(4) has been deleted as an unnecessary duplication of EDGAR. The rules governing the Secretary's authority to hold all applications submitted under a particular priority for a separate competition are established in 34 CFR 75.105.

The rules governing the Unsolicited Proposal Program in current 34 CFR Parts 700 and 701 are superseded by these final rules. Applications for grants under OERI's announced Unsolicited Proposal Program for Fiscal Year 1986, published in the Federal Register on January 6, 1986 (51 FR 425), should note that review of their applications will be governed by § 700.32 of these final regulations concerning the review of field-initiated studies applications. The term "field-initiated studies applications" in these final rules has the same meaning as "unsolicited proposals" at superseded 34 CFR 701.6.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require the transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the lack of comments on the proposed rules and the Department's own review, it has been determined that the regulations in this document do not require information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 700

Education, Education research, Grant programs—education, Reporting and recordkeeping requirements.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations.

(Catalog of Federal Domestic Assistance number 84.117, Educational Research and Development)

Dated: May 22, 1986.

William J. Bennett,

Secretary of Education.

PARTS 701, 702, 703, 709, 710, 715, 719, 720, AND 795 [REMOVED]

The Secretary amends Title 34 of the Code of Federal Regulations by removing Parts 701, 702, 703, 709, 710, 715, 719, 720, and 795 and by revising Part 700 to read as follows:

PART 700—EDUCATIONAL RESEARCH GRANT PROGRAM

Subpart A—General

Sec.

700.1 What is the Educational Research Grant Program
700.2 What parties are eligible for an award under the Educational Research Grant Program?
700.3 What regulations apply to this program?
700.4 What definitions apply to this program?

Subpart B—What Types of Activities Does the Secretary Support Under This Program?

700.10 What types of awards does the Secretary make under this program?
700.11 What types of projects does the Secretary assist under this program?
700.12 What funding priorities does the Secretary establish for this program?

Subpart C—How Does One Apply for a Grant?

700.20 Are preapplications required?

Subpart D—How Does the Secretary Make a Grant?

700.30 How does the Secretary evaluate an application?
700.31 What selection criteria does the Secretary use to evaluate an application under this program?
700.32 What procedures may the Secretary use to select a field-initiated studies application for funding?
700.33 What special considerations may the Secretary use in selecting an application for funding?
700.34 What restrictions apply to the use of funds awarded under this program?

Authority: 20 U.S.C. 1221e, unless otherwise noted.

Subpart A—General

§ 700.1 What is the Educational Research Grant Program

The Educational Research Grant Program supports scientific inquiry designed to provide more dependable knowledge about the processes of learning and education.

(20 U.S.C. 1221e(a))

§ 700.2 What parties are eligible for an award under the Educational Research Grant Program?

Parties eligible for an award under the Educational Research Grant Program are public or private organizations, institutions, agencies, or individuals.

(20 U.S.C. 1221e(c))

§ 700.3 What regulations apply to this program?

(a) The following regulations apply to awards under the Educational Research Grant Program:

(1) The Educational Department General Administration Regulations (EDGAR) established in Title 34 of the Code of Federal Regulations in Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions that Apply to Department Regulations), and Part 78 (Education Appeal Board).

(2) The regulations in this Part 700.

(b) The regulations in this Part 700 do not apply to contracts awarded under the Educational Research Grant Program or to projects carried out directly by the Secretary.

(20 U.S.C. 1221e)

§ 700.4 What definitions apply to this program?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Applicant.
Application.
Award.
Budget.
Budget period.
Contract.
ED.
EDGAR.
Equipment.
Facilities.
Grant.
Grantee.
Local educational agency.
Nonprofit.
Private.
Project.
Project period.
Public.
Secretary.
State educational agency.

(b) *Definitions that apply to this part.* The following definitions also apply to this part:

"Educational research" means all research and related activities including, but not limited to, basic and applied research, planning, surveys, evaluations, investigations, dissemination, experiments, development, and demonstrations in the field of education (including career education).

"Institution of higher education" means an institution of higher education as defined in section 1201(a) of the Higher Education Act of 1965, as amended.

(20 U.S.C. 1141(a))

"Technical assistance" means assistance provided by a grantee to others for the purpose of applying the results of educational research to resolve educational problems at the State or local level.

(20 U.S.C. 1221e)

Subpart B—What Types of Activities Does the Secretary Support Under This Program?

§ 700.10 What types of awards does the Secretary make under this program?

(a) In a notice published in the Federal Register, the Secretary may choose an amount between $25,000 and $50,000 as the maximum amount of a small grant in any competition under this Part 700. An application for a small grant may not request funding for more than 12 months. An application that requests more than the maximum amount for a small grant or requests funding for more than 12 months is considered an application for a large grant.

(b) If the Secretary announces a maximum amount for a small grant under paragraph (a) of this section, the Secretary establishes separate competitions for large and small grants.

(20 U.S.C. 1221e)

§ 700.11 What types of projects does the Secretary assist under this program?

(a) For each competition announced in the Federal Register, the Secretary may fund applications that include, but are not limited to, those designed to accomplish one or more of the following:

(1) Educational research.

(2) Dissemination of educational research.

(3) Training of individuals in educational research.

(4) Technical assistance.

(b) For each competition announced in the Federal Register, the Secretary may restrict educational research projects to one or more of the following activities:

(1) Basic research.
(2) Applied research.
(3) Planning.
(4) Surveys.
(5) Evaluations.
(6) Investigations.
(7) Dissemination.
(8) Experiments.
(9) Development.
(10) Demonstrations in the field of education.

(20 U.S.C. 1221e)

§ 700.12 What funding priorities does the Secretary establish for this program?

(a) *Priorities.* For each competition, the Secretary may select one or more funding priorities by choosing from the following list of priorities or by combining one or more of the priorities:

(1) Learning.
(2) Teaching.

(3) Educational technology.
(4) Instructional processes and materials, including textbooks and computer software for instruction.
(5) Preparation and training of educational personnel.
(6) Organization and management of schools, including effective school administration and leadership, and school discipline.
(7) Evaluation and school indicators, including testing and measurement.
(8) Governance of education, including school board policies and practices.
(9) Educational finance.
(10) Dissemination and knowledge utilization in education.
(11) Change and improvement processes in education.
(12) Student achievement and educational standards, including students' motivation to learn, their failure to learn, and their failure to attend school and graduate.
(13) Home, family, parental choice, and community influences is education.
(14) Education, work and careers.
(15) Desegregation, busing, and their impact on educational equity and excellence.
(16) Guidance and counseling.
(17) International education.
(18) English literacy, including reading, writing, and language skills.
(19) Disciplines of the humanities, including history, philosophy, and literature.
(20) Mathematics.
(21) Science.
(22) Foreign languages.
(23) Preschool education.
(24) Elementary education.
(25) Secondary education.
(26) Private education.
(27) Adolescent education.
(28) Postsecondary education.
(29) Adult and continuing education.
(30) Education of special populations, including the educationally disadvantaged, the handicapped, and the academically gifted and talented.

(b) *Field-initiated studies.* The Secretary may fund any field-initiated studies application that—

(1) Does not meet a priority established in accordance with paragraph (a) of this section;
(2) Is limited to activities listed in § 700.11(a)(1)–(4); and
(3) Satisfies all other requirements for funding under this program.

Note: EDGAR establishes the method for applying priorities. See 34 CFR 75.105 (Annual priorities).

(20 U.S.C. 1221e)

Subpart C—How Does One Apply for a Grant?

§ 700.20 Are preapplications required?

As announced in the Federal Register, the Secretary may require or invite an applicant to submit a preapplication for a particular competition.

Note: EDGAR establishes the procedures under which the Secretary considers a preapplication. See 34 CFR 75.128–75.134.

(20 U.S.C. 1221e)

Subpart D—How Does the Secretary Make a Grant?

§ 700.30 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application submitted under this program on the basis of the selection criteria § 700.31.

(b) The Secretary awards up to 100 points, including a reserved 25 points to be distributed in accordance with paragraph (d) of this section, based on the selection criteria in § 700.31.

(c) Subject to paragraph (d) of this section, the maximum possible points for each criterion is indicated in parentheses after the heading of each criterion.

(d) For each competition announced in the Federal Register, the Secretary distributes the reserved 25 points among the criteria in § 700.31. In the case of a filed-initiated studies competition conducted in accordance with § 700.32(b)(1), the Secretary assigns the reserved 25 points to the selection criterion in § 700.31(f) (Significance).

(20 U.S.C. 1221e)

§ 700.31 What selection criteria does the Secretary use to evaluate an application under this program?

(a) *Plan of operation.* (10 Points)

The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(1) The quality of the design of the project;
(2) The extent to which the plan of management is effective and insures proper and efficient administration of the project;
(3) How well the objectives of the project relate to the purpose of the program;
(4) The quality of the applicant's plans to use its resources and personnel to achieve each objective; and
(5) The extent to which the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(i) Members of racial or ethnic minority groups;
(ii) Women;
(iii) Handicapped persons; and
(iv) The elderly

(b) *Quality of key personnel.* (20 Points)

(1) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director (if one is to be used);
(ii) The qualifications of each of the other key personnel to be used in the project;
(iii) The time that each person referred to in paragraphs (b)(1) (i) and (ii) of this section will commit to the project; and
(iii) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;
(B) Women;
(C) Handicapped persons; and
(D) The elderly.

(2) To determine personnel qualifications under paragraphs (b)(1) and (ii) of this section, the Secretary considers—

(i) Experience and training in fields related to the objectives of the project; and
(ii) Any other qualifications that pertain to the quality of the project.

(c) *Budget and cost effectiveness.* (5 Points)

The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project; and
(2) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (5 Points)

The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(1) Are appropriate to the project; and
(2) To the extent possible, are objective and produce data that are quantifiable.

Cross-reference. See 34 CFR 75.590 Evaluation by the grantee.

(e) *Adequacy of resources.* (5 Points)

The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

(f) *Significance.* (15 Points)

(1) The Secretary reviews each application to determine the significance of the proposed project.

(2) The Secretary determines the project's potential to make a significant contribution to American education, as measured by factors such as—

(i) Importance of the proposed project from the standpoint of basic knowledge or of American education;

(ii) The likely magnitude of the addition that will be made to knowledge or educational practices if the project is successful, including the generalizability of the results;

(iii) The extent to which the project involves creative or innovative approaches that complement or are alternatives to existing approaches to the project's problem area; and

(iv) The extent to which the project is designed to yield outcomes that can be disseminated and utilized in other settings, such an information, materials, processes, or techniques.

(g) *Technical soundness.* (15 Points)

(1) The Secretary reviews each application to determine the technical soundness of the proposed activities.

(2) The Secretary determines—

(i) The adequacy of the project's design, methodology, instrumentation, and data analysis plan, where applicable;

(ii) The extent to which the application exhibits a thorough knowledge of current research and development concepts, theories, and outcomes and relates these to the proposed activity; and

(iii) Evidence that, where appropriate, the prespectives of a variety of disciplines are used.

(h) *Applicant's commitment and capacity.* (0 Points) (The Secretary may assign points to this criterion pursuant to § 700.30(d).) The Secretary determines the extent of the applicant's commitment to the project, its capacity to continue the project, and the likelihood that it will build upon the project when Federal assistance ends.

(20 U.S.C. 1221e)

(Approved by the Office of Management and Budget under control number 1850-0672)

§ 700.32 What procedures may the Secretary use to select a field-initiated studies application for funding?

(a)(1) Notwithstanding the provisions of 34 CFR 75.100, the Secretary may fund a field-initiated studies application, as described in § 700.12(b), in accordance with this section and without publishing a notice in the **Federal Register.**

(2) At any time during a fiscal year, the Secretary may review all field-initiated studies applications submitted and may select applications for funding in accordance with procedures in paragraph (b) of this section.

(3) The Secretary may reserve any applications which were reviewed in accordance with paragraph (a)(2) of this section, but which were not selected for funding, for further consideration during the remainder of that fiscal year.

(b)(1) Notwithstanding the provisions of 34 CFR 75.217(a), the Secretary may assemble a board to review field-initiated studies applications described at § 700.12(b).

(2) The board consists of—

(i) A Department grants officer; and

(ii) Two other Department employees who are qualified to evaluate the application.

(3) The board reviews applications in accordance with 34 CFR 75.217(b).

(20 U.S.C. 1221e)

§ 700.33 What special considerations may the Secretary use in selecting an application for funding?

(a) After evaluating applications according to the criteria contained in § 700.31, the Secretary may determine whether the most highly rated applications are broadly and equitably distributed throughout the Nation for each competition under this program. The Secretary may select other applications for funding it doing so would improve the geographical distribution of project funded under a particular competition or under this program.

(b) The Secretary may select an application for funding to improve the diversity of activities or projects funded under a particular competition.

(c) The Secretary may decline to fund a project that is eligible for funding under a different Department of Education competition or program.

(20 U.S.C. 1221e)

§ 700.34 What restrictions apply to the use of funds awarded under this program?

Of the funds made available through an award under the program, the Secretary may restrict this amount of funds used to purchase equipment.

(20 U.S.C. 1221e)

Part VI

Environmental Protection Agency

40 CFR Part 261

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[FRL-2982-8]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is today amending the regulations for hazardous waste management under the Resource Conservation and Recovery Act by clarifying that the listing for spent pickle liquor from steel finishing operations (EPA Hazardous Waste No. K062) applies only to wastes generated by iron and steel facilities. The Agency is taking this action in response to a rulemaking petition submitted by four porcelain enamel companies and in response to comments received on a notice of proposed rulemaking challenging the Agency's interpretation of the scope of the listing. The effect of this amendment is to grant the rulemaking petition by confirming that the listing applies only to those persons who produce iron and steel. Thus, spent acids from other steel finishing operations would be considered hazardous only if they exhibit one or more of the hazardous waste characteristics.

DATE: Final rule is effective May 28, 1986.

ADDRESS: The public docket for this final rule is located at the U.S. Environmental Protection Agency, RCRA docket (Sub-basement) 401 M Street SW., Washington, DC 20460. The docket is open from 9:30 a.m. to 3:30 p.m.; Monday through Friday, except for Federal holidays. The public must make an appointment to review docket materials. The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost. Additional copies cost $.20/page.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424-9346 or (202) 382-3000. For technical information contact Jacqueline Sales, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-4770.

I. Supplementary Information

A. Background

On February 6, 1986, several porcelain enamel companies—the Hobart Corporation, Maytag Corporation, Magic Chef, Inc., and State Industries—filed a rulemaking petition with EPA requesting that the listing description for "Spent pickle liquor from steel finishing operations" (40 CFR 261.32—EPA Hazardous Waste No. K062) be amended or clarified to indicate that the listing applies only to spent pickle liquor generated by the iron and steel industry. The listing appears in the rules under the heading of "Waste From Specific Sources," and from the "Iron and Steel" industry. In response to this rulemaking petition, the Agency published in the Federal Register a notice which made available to the public both the Agency and industry interpretations of the scope of the existing listing (see Notice of Proposed Rulemaking and Request for Comments and Data, 50 FR 36906, September 10, 1985, for background information and further details). The notice also indicated a variety of actions EPA might take in response to the petition, and requested comments and data relevant to these possible actions. The Agency also requested comments on how the listing is interpreted by the regulated community and data supporting industry claims that lime stabilized waste pickle liquor sludge (LSWPLS)[1] from non-iron and steel industries is non-hazardous.

The Agency received approximately eighty comments to the notice of proposed rulemaking. The majority of the comments were submitted by facilities involved in porcelain enameling and galvanizing. The comments are summarized below.

B. Summary Of Comments On Notice Of Proposed Rulemaking

The majority of the commenters strongly supported the petitioners' claim that the plain language of the listing for spent pickle liquor from steel finishing operations (EPA Hazardous Waste No. K062) indicates that the listing applies only to facilities within the iron and steel industry, and that the background document to the listing supports this interpretation, since it presents data only from the iron and steel industry. The petitioners argued that the background document repeatedly refers to "mills" and "integrated steel plants," while no discussion was included for any other industry.

In the notice, EPA requested commenters to explain why so many non-iron and steel facilities appeared to have acted as if the listing applied to them. The commenters stated that there was no significance that many facilities other than iron and steel initially notified as generating "spent pickle liquor" because these were protective filings. Some commenters indicated that Agency officials advised them to notify EPA if there were any questions regarding the regulatory status of their waste to ensure that they did not lose interim status.[2] (In addition, all of these persons were required to notify in any event since the waste is hazardous by virtue of its corrosivity.)

Several commenters from the hot dip galvanizing industry stated that pickle liquor generated from their process does not meet the listing description because chromium and lead are typically present in these wastes in concentrations well below the maximum permissible leachate concentrations as defined by the EP toxicity test.[3] They believe that spent pickle liquor generated from hot dip galvanizing should be classified as a hazardous waste only because of its corrosivity. In fact, EP toxicity data (for LSWPLS) was submitted by several commenters within the hot dip galvanizing industry (as well as several porcelain enameling companies). One commenter submitted EP toxicity data on sludge resulting from the hydroxide precipitation of spent pickle liquor. All data demonstrated that hexavalent chromium and lead, as well as the remaining EP toxic metals, were substantially below the maximum permissible leachate concentrations.

Two States likewise commented that they interpreted the listing as applying only to facilities within the iron and steel industry. One State, in particular, commented that if the Agency wished to cover additional wastes, it should specifically list non-iron and steel pickle liquor wastes as hazardous since, in the State's view, the existing listing did not apply. (These additional wastes also could exhibit a characteristic and so be subject to RCRA for that reason.) Another State, however, agreed with the Agency's interpretation that the scope of the K062 listing applies to all industries engaged in steel finishing operations. This State did not base its position on the regulatory language, but rather

[1] The sludge is generated by a well known technique involving lime neutralization, flocculation, clarification, and dewatering of the resultant sludge. These wastes are deemed hazardous waste by virtue of the provisions of the so-called "residue rule" (40 CFR 261.3(c)(2)(i)).

[2] To be eligible for interim status, persons who generated, transported, treated, stored, or disposed of hazardous waste had to notify EPA of that fact by August 8, 1980, and submit a Part A permit application by November 19, 1980 (see 45 FR 33066, May 19, 1980).

[3] Spent pickle liquor generated from the iron and steel industry contains chromium and lead, the constituents for which the waste was originally listed, in concentrations well above the maximum permissible leachate concentrations.

indicated that the toxic and corrosive characteristics of spent pickle liquor are inherent in the waste itself and are not dependent upon the industry category.

Many of the commenters also stated that the reason non-iron and steel facilities did not comment on the Notice of Availability of Data published on January 4, 1984, which reiterated EPA's view of the broader scope of the listing, was because these facilities did not read the notice. They believed the notice addressed spent pickle liquor generated by the iron and steel industry—based on the regulatory language—and so it did not apply to them.

Many of the commenters further stated that EPA itself has not been consistent in its interpretation of the listing. In particular, they state that in promulgating effluent limitation guidelines and standards for the porcelain enameling industry, the Agency concluded that sludges from treatment of wastewaters (from the pickling operation) are expected to be non-hazardous under RCRA. (See EPA Development Document for Effluent Guidelines and Standards for Porcelain Enameling Point Source Categories, EPA 440/1–82/072, November 1982.) The commenters believe the Agency would not have made this statement, if it believed the waste was derived from a listed waste, and so automatically hazardous until delisted (see § 261.3(c)(2)). Moreover, the commenters argued that several EPA Regional Offices also interpreted the listing as covering only the iron and steel industry.

In summary, the great majority of commenters requested that EPA adopt the third option presented in the September 10 notice—that is, grant the relief requested by the petitioners and agree that the listing applies, and has applied, only to spent pickle liquor wastes generated by the iron and steel industry.

II. Agency's Decision to Rulemaking Petition and Response to Comments

The Agency believes that the petitioners (as well as the commenters responding to the notice) have a valid argument that the listing should be read to apply only to those facilities within the iron and steel industry. Upon re-evaluation, we believe that the broad interpretation taken by the Agency (*i.e.*, the scope of the listing applies to spent pickle liquor from all "steel finishing operations") is not supported by the rulemaking record; rather, a more correct reading of the scope of the listing would apply only to spent acids generated by iron and steel facilities. Many of the arguments put forth by the petitioners (as well as the commenters to the notice) provide the basis for EPA's re-interpretation, including:

- the plain language of the listing as well as the fact that the listing was put in 40 CFR 261.32 (Wastes From Specific Sources under the sub-heading "Iron and Steel") suggests that it should apply only to the iron and steel industry;
- the background document to the listing supports the narrower interpretation, since it addresses spent acid and LSWFLS generated from the iron and steel industry;
- notification under section 3010 of RCRA from a diverse group of industry categories is not a valid basis for taking a broader interpretation since most of these were protective filings.

Although the Agency has been consistent in its interpretation with regard to the spent pickle liquor listing in processing delisting petitions, we must go back to the rulemaking record on which the listing is based. When this is done, the scope of the listing should be read to apply only to those facilities within the iron and steel industry.

Therefore, in light of the comments received and arguments made, the Agency has decided to modify its interpretation and narrow the scope of the spent pickle liquor listing to apply only to those facilities within the iron and steel industry. To clarify this point, the Agency has decided to clarify that the listing applies in the narrow manner urged by the petitioners. To eliminate any confusion, we are amending the regulatory language for EPA Hazardous Waste No. K062 to read as follows:

"Spent pickle liquor generated by steel finishing operations of plants that produce iron and steel."

Thus, we are granting the rulemaking petition submitted by the Hobart Corporation, the Maytag Corporation, Magic Chef, Inc., and State Industries.

As a practical matter, this means that any spent pickle liquor generated by non-iron and steel industries would be hazardous only if it exhibits one or more of the characteristics of hazardous waste (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure (EP) toxicity). In addition, this interpretation will be retroactive to the date that the listing was promulgated (*i.e.*, the Agency now believes that the listing's scope was always limited). Based on the comments received, this pickle liquor would probably still be hazardous because it exhibits the characteristics of corrosivity and/or EP toxicity. Thus, the waste spent acid itself remains subject to the applicable RCRA management standards. Likewise, any residue derived from the treatment of this spent pickle liquor (for example, lime stabilized waste pickle liquor sludge) would be hazardous if it exhibits one or more of the hazardous waste characteristics.[4] Consequently, any person who generates these residues would not need to go through the delisting procedures under 40 CFR §§ 260.20 and 260.22, unless these residues are mixed with other listed hazardous wastes or are derived from listed wastes. As a result, the following "generator-specific" delisting petitions submitted to the Agency to exclude this waste will become moot by today's rule.

Petition No.	Name	City	State
0588	Westinghouse Electric Corp.	Winston-Salem	NC
0480	Steel Warehouse Co. Inc.	South Bend	IN
0523	All-State Galvanizing Co	Kansas City	MO
0536	Wheeling-Pittsburgh Steel	Martins Ferry	OH
0585	Valley City Steel Co	Valley City	OH
0609	Talbot Industries, Inc	Nacoma	MD
0610	Galvan Industries, Inc	Harrisburg	NC

III. Effective Date

This rule will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months where the regulated community does not need the six-month period to come into compliance. That is the case here since we are now interpreting our rules in a manner that will reduce the scope of the existing interpretation (*i.e.*, clarifies that under the language of the rule, these people were never covered by the spent pickle liquor listing). Since an effective date of six months after promulgation is not necessary, we believe that these rules should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This final regulation is not a major rule because it will not result in an effect on the economy of $100 million or more, nor will it result in an increase in costs or prices to industry. In fact, this regulation will reduce the overall costs and economic impact of EPA's

[4] Limited data was presented by hot dip galvanizers, agricultural equipment manufacturers, and porcelain enamel industries. These data generally demonstrate that these sludges would leach very low levels of the toxic heavy metals, and so would not exhibit a hazardous waste characteristic.

hazardous waste management regulations. There will be no adverse impact on the ability of U.S.-based enterprises to compete with foreign based enterprises in domestic or export markets. Because this amendment is not a major rule, no Regulatory Impact Analysis is being conducted.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 60 *et seq.*, whenever an Agency is required to publish general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will have no adverse economic impact on small entities since the rule will reduce the hazardous waste requirements to those persons who generate spent acid in non-iron and steel industries. Accordingly, I hereby certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation does not require a regulatory flexibility analysis.

VI. Paperwork Reduction Act

This rule does not contain any information collection requirements subject to OMB review under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 40 CFR Part 261

Hazardous materials, Recycling.

Dated: May 21, 1986.

Lee M. Thomas,

Administrator.

For reasons set out in the preamble, 40 CFR Part 261 is amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Sections 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. §§ 6905, 6912(a), 6921, and 6922].

2. Section 261.32 is amended by revising EPA Hazardous Waste No. K062 to read as follows:

§ 261.32 Hazardous Wastes From Specific Sources.

* * * * *

Industry and EPA hazardous waste No.	Hazardous waste	Hazard code
* * * * *		
K062	Spent pickle liquor generated by steel finishing operations of plants that produce iron or steel.	(C,T)
* * * * *

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium,
Fourth Floor, Federal Building,
915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:
Seattle 206-442-0570
Tacoma 206-383-5230
Portland 503-221-2222

SAN FRANCISCO, CA

WHEN: July 24; at 1:30 pm.

WHERE: Room 2007, Federal Building,
450 Golden Gate Avenue,
San Francisco, CA.

RESERVATIONS: Call the San Francisco Federal Information Center, 415-556-6600

Rules and Regulations

Federal Register
Vol. 51, No. 103
Thursday, May 29, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-NE-53-AD; Amdt. 39-5333]

Airworthiness Directives; British Aerospace Model BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) that requires functional tests, and repair or replacement, as necessary, of the cold air unit overheat protection circuits on British Aerospace Model BAC 1-11 200 and 400 series airplanes. At least three cold air units have failed, resulting in turbine components beging ejected from the units. Since these incidents happened on the ground, there exists the potential for injury to passengers and ground personnel.

EFFECTIVE DATE: July 3, 1986.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request to British Aerospace Inc., Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region 17900 Pacific Highway South, Seattle Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-2009. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which requires functional tests of the cold air overheat protection on British Aerospace Model BAC-1-11 200 and 400 series airplanes was published in the Federal Register on June 28, 1985 (50 FR 26790).

Interested parties have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given the comments received.

One comment was received. The commenter, a member operator of the Air Transport Association (ATA) of America, supported the proposal.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the following rule as proposed.

It is estimated that 60 airplanes will be affected by this AD, that it will take approximately 3 man-hours per airplane to accomplish the required actions, and that the average labor cost will be $40 per man-hour. Based on these figures, the total cost impact of this AD is estimated to be $7,200.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a subetantial number of small entities because of the minimal cost of compliance per airplane ($120). A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation safety, Aircraft..

Adoption of the Amendment

PART 39--[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAC 1-11 200 and 400 series airplanes, certificated in any category. To detect overspeeding of the cold air unit, accomplish the following within the next 120 days after the effective date of the AD, or prior to reaching the threshold indicated in each paragraph below, whichever is the later, unless already accomplished:

A. Prior to the accumulation of 10,000 flight hours or 8 years in service, whichever is the earlier, and thereafter at intervals not to exceed 3,000 flight hours or 14 months, whichever occurs first, perform a functional test of the cold air unit overheat protection circuits in accordance with paragraph 2.1 of the accomplishment instructions of British Aerospace BAC 1-11 Alert Service Bulletin 21-A-PM5863, Revision 2, dated June 12, 1984. If found faulty, the overheat protection circuits must be repaired before further flight.

B. For aircraft not incorporating Graviner 156D overheat detectors, prior to 300 flight hours after the effective date of this AD, perform a workshop calibration and functional test of the overheat detectors; thereafter, repeat this test at intervals not to exceed 3,000 flight hours or 14 months, whichever occurs first.

C. For aircraft incorporating Graviner 156D overheat detectors which have accumulated 7,000 flight hours or 4 years since new or from last calibration, perform a workshop calibration and functional test of the overheat detectors within the next 3,000 flight hours or fourteen (14) months, whichever is the earlier; thereafter, repeat this test at intervals not to exceed 10,000 flight hours or 6 years, whichever occurs first.

D. Overheat detectors that do not pass the tests of paragraphs B. or C., above, must be replaced before further flight.

E. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service document from the manufacturer may obtain copies upon request to British Aerospace, Inc., Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle.

Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective July 3, 1986.

Issued in Seattle, Washington, on May 20, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

[FR Doc. 86-11907 Filed 5-28-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 86-NM-110-AD; Amdt. 39-5322]

Airworthiness Directives: Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD), applicable to all Boeing Model 747 airplanes, which requires a repetitive inspection, and as necessary, replacement of all main and nose landing gear wheel bearing. This action is prompted by reports of wheel bearing premature wear and failure, which has caused tire, wheel, and axle damage, blown wheel fuse plugs, and an incident involving wing damage and spilled fuel.

EFFECTIVE DATE: June 13, 1986.

ADDRESSES: The service information specified in this AD may be obtained upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. It may also be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Gray D. Lium, Systems and Equipment Branch, ANM-130S; telephone (206) 431-2946. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: In July, 1985, the Timken Company began producing a new bearing configuration as part of a replacement program for Boeing Model 747 wheels. Boeing began receiving a large number of reports from operators of overheating and other discrepancies being found on these bearing after one tire change interval (approximately 150 to 200 landings). Boeing also received a total of three reports of wheel bearing failures that resulted in wheel and axle damage occurring within one tire change interval. One of these occurred at 112 landings. All three of these resulted in the fuse plugs releasing tire air pressure. Some operators have reported as many as 20 percent of the bearings inspected as being damaged.

As a result of the reports of overheat damage to the bearing, Boeing sent a Service Letter to all operators on March 12, 1986, alerting them to the condition and requesting that they postpone the replacement program. After the three reports of wheel and axle damage, Boeing sent a second Service Letter to operators on March 27, 1986, strongly recommending that all the suspect wheel bearings be removed from service within 100 flight cycles.

Bearings that had been produced prior to the change in configuration are included in the AD as a replacement for the problem bearings. These bearings are also subject to a requirement for a periodic inspection and removal, as necessary, because of an incident where a bearing failure caused a wheel to fail on takeoff, with a portion of the wheel puncturing the wing fuel tank, and spilling fuel on the runway. The failure was determined to be due to the bearing having excessive case hardening. The Timken Company has recently developed new bearings, P/N's LM229147C and LM229140C, which do not have the associated problems addressed by the AD.

Since this condition is likely to exists or develop on other airplanes of this type design, the FAA has determined that an AD is necessary which requires repetitive inspections and replacment, as necessary, of all inner and other wheel bearings. Installation of bearings, P/N's LM229147C and LM229140C, constitute terminating action for the repetitive inspections required by the AD.

Further, since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to all Model 747 airplanes, certificated in any category. To prevent wheel or tire failure as a result of failure of the wheel bearing, accomplish the following, unless already accomplished:

A. Within 100 flight cycles after the effective date of this AD, remove and inspect both the inner and outer wheel bearings, Timken P/N's LM229146 and LM229139, in accordance with the applicable portions of Sections 32-45-01 through 32-45-08 of the Boeing Model 747 maintenance manual. Any wheel bearing found damaged must be replaced with a new or serviceable bearing prior to further flight.

Note: Serviceable bearings are those Timken bearings, P/N's LM229146 and LM229139, which have been inspected with a close visual inspection and found to have no visible damage (i.e., galling, gouging, spauling, overheat, etc.).

B. After accomplishment of the inspection required by paragraph A., above, reinspect both the inner and outer wheel bearings in accordance with the schedule below. Any wheel bearing found damaged as a result of the required inspections must be replaced with a new or serviceable bearing before further flight.

1. Bearings P/N LM229146 and LM229139, date stamped LS and subsequent, except those identified in subparagraph B.2., below, must be reinspected at intervals not to exceed 100 flight cycles.

2. Bearings date stamped LS and subsequent, which are installed on Boeing Model 747SR airplanes which have not incorporated Boeing Service Bulletin 747-32-2272 (which relates to gross weight increase), must be reinspected at intervals not to exceed 200 flight cycles.

3. Bearings date stamped prior to LS must be reinspected at intervals not to exceed 250 flight cycles.

C. Installation of inner and outer Timken wheel bearings, P/N's LM228147C and LM229140C, constitutes terminating action for the repetitive inspections required by paragraph B., above.

D. An alternative means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate an airplane to a base for the accomplishment of inspections and/or modifications required by this AD.

The service information specified in this AD may be obtained upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. It may also be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective June 13, 1986.

Issued in Seattle, Washington, on May 20, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

[FR Doc. 86-11836 Filed 5-28-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 86-AEA-1]

Alteration of Control Zone, Lancaster, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the current hours of the Lancaster, PA, Control Zone from 0630 Local to 0600 Local. This action is taken to provide all users of Lancaster Airport those services associated with the Control Zone and to more correctly align the effective hours of the Control Zone with the operating hours of the Air Traffic Control Tower.

EFFECTIVE DATE: May 29, 1986

Comments must be received on or before June 25, 1986.

ADDRESSES: Send comments on the rule in triplicate to: Howard R. McGlauflin, Manager, Airspace and Procedures Branch, AEA-530, Federal Aviation Administration, Docket 86-AEA-1, Fitzgerald Federal Building (formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430.

The official docket may be examined in the Office of Regional Counsel, Federal Aviation Administration, Fitzgerald Federal Building (formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours in the Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Fitzgerald Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Telephone: (718) 917-1228.

FOR FURTHER INFORMATION CONTACT: Howard R. McGlauflin, Manager, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Fitzgerald Federal Building, J.F.K. International Airport, Jamaica, New York 11430; Telephone: (718) 917-1228.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves extension of the hours of the Lancaster, PA, Control Zone operation to be effective from 0600 to 2300, local time, and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the Federal Aviation Administration (FAA) will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this rule must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AEA-1" The postcard will be date/time stamped and returned to the commenter. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to increase the hours of the Lancaster, PA, Control Zone from 0630 to 2300, local time, to be effective from 0600 to 2300, local time. The FAA has identified a discrepancy in the operating hours of the Air Traffic Control Tower and the published effective hours of the Control Zone; therefore, in order to provide all users of the Lancaster Airport those services associated with a control zone and to be consistent with the agency's safety mandate, the Lancaster, PA, Control Zone hours of operation will be increased by one half hour. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7480.6B dated January 2, 1986.

Under the circumstances presented, the FAA concludes that there is an immediate need for a regulation to extend the hours of the Lancaster, PA, Control Zone to be effective from 0600 to 2300, local time. Therefore, I find that notice and public procedure under 5 U.S.C. 533(b) are impracticable and that good cause exists for making this amendment effective upon publication in the Federal Register.

The FAA has determined that this amendment only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zone.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69

§ 71.171 [Amended]

2. 71.171 is amended as follows:

Lancaster, PA [Amended]

. . . . "This Control Zone is effective from 0600 to 2300 hours, local time, daily."

Issued in Jamaica, New York, on May 16, 1986.

Edmund Spring,

Manager, Air Traffic Division.

[FR Doc. 86-11936 Filed 5-28-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 73

[Airspace Docket No. 86-AWA-23]

Alteration of R-5201 Fort Drum, NY, Restricted Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment changes the boundaries of Restricted Area R-5201 Fort Drum, NY, expanding the area by about 1 mile on the northwest, northeast, southeast and southwest sides, and moving the southwest corner about 2 miles to the east. This alteration is needed because the Department of the Army has determined that several existing artillery and tank firing ranges lie a few hundred feet outside the present restricted area boundaries. Further, a planned runway extension at Wheeler-Sack Army Airfield (AAF) requires that the southwest corner be modified to accommodate aircraft departures from Runway 03. This amendment will insure that the existing ranges are fully contained within the R-5201 boundaries, provide for proper safety buffer zones and enhance safety for nonparticipating aircraft.

DATES: Effective date—0901 UTC, August 28, 1986.

Comments must be received on or before July 14, 1986.

ADDRESSES: Send comments on the rule in triplicate to: Director, FAA, Eastern Region, Attention: Manager, Air Traffic Division, Docket No. 86-AWA-23, Federal Aviation Administration, JFK International Airport, The Fitzgerald Federal Building, Jamaica, NY 11430.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace and Aeronautical Information Requirements Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 426-3128.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves modification of the boundaries of Restricted Area R-5201 Fort Drum, NY, and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic and energy aspects of the rule that might suggest the need to modify the rule. Send comments on environmental and land use aspects to: Commander, Headquarters 10th Mountain Division, Fort Drum, NY 13602-5000.

The Rule

The purpose of this amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is to enhance aviation safety by modifying the boundaries of Restricted Area R-5201 Fort Drum, NY, so as to include within the restricted area several existing artillery and tank firing ranges which the Department of the Army has determined to be several hundred feet outside the present boundaries of R-5201. Further, a planned extension of Runway 03-21 at Wheeler-Sack AAF necessitates moving the southwest corner of the restricted area to the east to provide airspace to accommodate aircraft departures from Runway 03. The Department of the Army has certified that these changes are in compliance with National Environmental Policy Act (NEPA). Section 73.52 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

Under the circumstances presented, the FAA concludes that there is an immediate need for a regulation to modify the boundaries of R-5201 to include all existing firing ranges within the restricted area in the interest of aviation safety. Therefore, I find that notice of public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

Adoption of the Amendment

PART 73—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 73 of the Federal Aviation Regulations (14 CFR Part 73) is amended, as follows:

1. The authority citation for Part 73 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 73.52 is amended as follows:

R-5201 Fort Drum, NY [Amended]

Remove the present boundaries and substitute the following:

Boundaries. Beginning at lat. 44°01'05"N., long. 75°37'15"W; to lat. 44°03'20"N., long. 75°40'50"W.; to lat. 44°06'55"N., long. 75°42'10"W.; to lat. 44°10'50"N., long. 75°39'00"W.; to lat. 44°16'07"N., long. 75°32'42"W.; to lat. 44°11'24"N., long 75°23'00"W.; to lat. 44°07'10"N., long 75°26'50"W.; thence to point of beginning.

Issued in Washington, DC, on May 21, 1986.

Harold H. Downey,

Acting Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 225 and 277

[Docket Nos. RM80-8-001 through RM80-8-005]

National Gas Policy Act; Bona Fide Offers; Right of First Refusal; Order Granting in Part and Denying in Part Applications for Rehearing, Reconsideration and Clarification of Order No. 95; Record Retention Approval

Issued: May 21, 1986.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; notice of OMB approval of change in record retention requirements.

SUMMARY: The Federal Energy Regulatory Commission granted in part and denied in part applications for rehearing, reconsideration, and clarification of its final rule implementing section 315(b) of the Natural Gas Policy Act of 1978. That section provides that upon expiration of contracts for the sale of certain categories of natural gas removed from the Commission's Natural Gas Act (NGA) jurisdiction, the seller must make a bona fide offer to the purchaser and give the purchaser an opportunity to match a third party offer before selling the gas to a third party. The Commission granted rehearing in order to: (1) Eliminate the Commission's interpretation that § 154.93 of its NGA regulations governs the price escalation clauses which may be included in a bona fide offer, (2) remove the original purchaser's right to alter the delivery terms of a third party offer, (3) eliminate the prohibition on waivers of section 315(b) rights more than one year before contract expiration, (4) provide that the requirement that bona fide offers not be made more than eighteen months before contract expiration does not apply to implied contracts, and (5) limit the record retention requirements to three years.

EFFECTIVE DATE: The final rulemaking published on March 7, 1986, in Order 95-A (51 FR 7923) is effective May 21, 1986.

FOR FURTHER INFORMATION CONTACT: Richard Howe, Jr. Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8505.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act, 44 U.S.C. 3501-3520 (1982) and the Office of Management and Budget (OMB) regulations, 5 CFR Part 1320 (1985), require that OMB approve certain information collection requirements imposed by agency rule. On April 25, 1985, OMB approved the record retention requirements, as amended, in 18 CFR 225.3 and 277.210 and issued Control Number 1902-0098 for these sections. This control number already appears in the list of OMB control numbers in 18 CFR 389.101. Therefore the Order on Rehearing in Docket Nos. RM80-8-001 through RM80-8-005 will become effective May 21, 1986.

Authority: Paperwork Reduction Act of 1980, 44 U.S.C. 3501-3520 (1982).

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

18 CFR Part 282

[Docket No. RM 79-14]

Natural Gas Policy Act; Order of the Director, OPPR of Publication of Incremental Pricing Acquisition Cost Thresholds Under Title II of the NGPA

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Prescribing Incremental Pricing Thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: June 1, 1986.

FOR FURTHER INFORMATION CONTACT: Raymond A. Beirne, Federal Energy Regulatory Commission, 825 N. Capitol Street, N.E. Washington, D.C. 20426, (202) 357-8500.

Order of Director, OPPR

Publication of prescribed incremental pricing acquisition cost threshold of the NGPA of 1978

Issued May 23, 1986.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to §375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of June 1986 are issued by the publication of a price table for the month. The incremental pricing acquisition cost threshold prices for months prior to those reflected on the table are found in § 282.304.

The incremental pricing thresholds for June, 1986 reflect a two-month lag adjustment described in the notice of the March 1, 1986 thresholds.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegation of Authority and Organization; Commissioner of Food and Drugs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations for delegations of authority by adding new authority [relating to cardiac pacemaker device or lead registration and testing) delegated by the Acting Assistant Secretary for Health to the Commissioner of Food and Drugs.

EFFECTIVE DATE: February 10, 1986.

FOR FURTHER INFORMATION CONTACT: Melissa M. Mencavage, Office of Management and Operations (HFA-340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4978.

SUPPLEMENTARY INFORMATION: On February 10, 1986, the Acting Assistant Secretary for Health issued a memorandum delegating to the Commissioner of Food and Drugs the authorities vested in the Secretary of Health and Human Services under section 1862(h)(1), (2)(A), and (3) of the Social Security Act (42 U.S.C. 1395y (h)(1), (2)(A), and (3)), as amended, relating to registration and testing of cardiac pacemaker devices or pacemaker leads. The authorities may be redelegated. FDA is amending § 5.10 (21 CFR 5.10) by adding new paragraph (a)(28) to incorporate this delegation.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies), Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 5 is amended as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

Subpart A—Delegations of Authority to the Commissioner of Food and Drugs

1. The authority citation for 21 CFR Part 5 is revised to read as follows and the authority citations following all the sections are removed:

Authority: 5 U.S.C. 504, 552; 7 U.S.C. 2217; 15 U.S.C. 638, 1451 et seq.; 21 U.S.C. 41 et seq., 61-63, 141 et seq., 301-392, 467f(b), 679(b), 801 et seq., 823(f), 1031 et seq.; 35 U.S.C. 156; 42 U.S.C. 216, 241, 242(a), 242a, 242l, 242n, 243, 262, 263, 263b through 263m, 264, 265, 300e et seq., 1395y and 1395y note, 3246b(b)(3), 4651(a), 10007, and 10008; Federal Caustic Poison Act (44 Stat. 1406); Comprehensive Drug Abuse Prevention and Control Act of 1970 (84 Stat. 1241); Federal Advisory Committee Act (Pub. L. 92-463); E.O. 11490, 11921.

2. Subpart A is amended in § 5.10 by adding new paragraph (a)(28) to read as follows:

§ 5.10 Delegations from the Secretary, the Assistant Secretary for Health, and Public Health Service Officials.

(a) * * *

(28) Functions vested in the Secretary under section 1862(h) (1), (2)(A), and (3) of the Social Security Act [42 U.S.C. 1395y (h)(1), (2)(A), and (3)), as amended, which provides for a registry of all cardiac pacemaker devices and pacemaker leads for which payment was made under this title. The approval and issuance of regulations under that section are reserved to the Secretary, as provided in 21 CFR 5.11.

* * * * *

Dated May 21, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject To Certification: Butamisole Hydrochloride

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Mobay Corp., Animal Health Division, providing for use of butamisole hydrochloride for treatment of whipworms and hookworms in dogs.

EFFECTIVE DATE: May 29, 1986.

FOR FURTHER INFORMATION CONTACT: Marcia Larkins, Center for Veterinary Medicine (HFV-112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: Mobay Corp., Animal Health Division, P.O. Box 390, Shawnee Mission, KS 66201, is sponsor of NADA 132-533 for Styquin® (butamisole hydrochloride). The drug is an injectable anthelmintic for treating whipworms and hookworms in dogs. The application is approved and the regulations are amended to reflect the approval. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency had determined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively

have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 522

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 522 is amended as follows:

PART 522—IMPLANTATION OF INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR 522 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

§ 522.234 [Amended]

2. Section 522.234 *Butamisole hydrochloride* is amended in paragraph (b) by removing "No." and inserting "Nos. 000859 and."

Dated: May 22, 1986.

BILLING CODE 1505-01

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 1

[CGD 85-091A]

Individual Participation in Marine Safety Reporting Program (MSRP); Enforcement Policy.

AGENCY: Coast Guard, DOT.

ACTION: Termination of program and final rule.

SUMMARY: On June 1, 1985, the Office of the Secretary, Department of Transportation initiated a one-year, voluntary Marine Safety Reporting Program (MSRP). As part of this program, the Coast Guard agreed not to impose a civil penalty for certain offenses if a report was filed with MSRP. Title 33, § 1.07 sets forth Coast Guard enforcement policy for participation in the Marine Safety Reporting Program (MSRP). This notice announces the termination of the one-year test and removes references to the Marine Safety Reporting Program from 33 CFR 1.07.

EFFECTIVE DATE: June 15, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Larry D. Glass, Office of Merchant Marine Safety, (202) 426-6251, 7:30AM to 4:00PM Monday through Friday.

SUPPLEMENTARY INFORMATION: The Department of Transportation initiated the one-year test which began on June 1, 1985. The Marine Safety Reporting Program was meant to supplement existing mandatory reporting requirements by providing the commercial marine industry with a means to report anonymously safety-related incidents and near mishaps involving difficulties encountered with the navigation and control of a commercial vessel. The Marine Safety Reporting Program expires on May 31, 1986. The effective date of this amendment is June 15, 1986 to allow a period of grace for processing of forms submitted late in the program. The Coast Guard will not honor the MSRP enforcement policy for forms received by the Transportation Systems Center subsequent to June 15, 1986. An evaluation of the program will be conducted and is expected to be available in a few months.

This amendment is published as a final rule because the provisions thereof concern matters relating to agency procedures and practices which are excepted under 5 U.S.C. 553 from the requirements for notice and comment. This amendment is being made effective on June 15, 1986. The document originally promulgating these sections stated that the test program would terminate on June 1, 1986. Since the test is concluded and the purpose of this final rule is only to remove those sections pertaining to the test, it has been determined that good cause exists for making this rule effective in less than 30 days.

List of Subjects in 33 CFR Part 1

Administrative practice and procedure, Authority delegations (Government agencies), Coast Guard, Freedom of Information, Penalties.

PART 1—[AMENDED]

In consideration of the foregoing, Part 1 of Title 33 Code of Federal Regulations is amended as follows:

1. The authority citation for Subpart 1.07 is revised to read as follows:

Authority: 5 U.S.C. 552; 14 U.S.C. 633; 49 CFR 1.46.

§ 1.07-17 [Removed]

2. Part 1 is amended by removing § 1.07-17.

§ 1.07.25 [Amended]

3. Section 1.07.25 is amended by removing paragraph (e).

§ 1.07.65 [Amended]

4. Section 1.07.65 is amended by removing paragraph (c).

Dated: May 23, 1986.

John W. Kime,

Rear Admiral (Lower Half), U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

VETERANS ADMINISTRATION

38 CFR Part 17

Medical Care for Veterans Receiving Vocational Training

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans Administration is adding two new regulatory provisions which are necessary to implement provisions of the Veterans' Benefits Improvement Act of 1984 (Pub. L. 98-543). The first regulation establishes that certain new pension recipients participating in a temporary program of vocational training authorized by 38 U.S.C. chapter 15 are eligible for hospital care, nursing home care, and medical services during the period in which they are participating in the vocational training program. The second

regulation provides that any veteran whose pension is terminated during the "program period" by reason of increased income from work or training performed or undertaken shall retain, for three years, eligibility for health care benefits as if the pension had not been terminated. The term "program period" means the period from February 1, 1985 through January 31, 1989.

EFFECTIVE DATE: These regulations are effective May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Karen O. Walters, Chief, Policies and Procedures Division, Medical Administration Service, Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-2143.

SUPPLEMENTARY INFORMATION: On pages 992 and 993 of the Federal Register of January 9, 1986, the proposed regulation was published for notice and comment. Interested persons were given 30 days to submit comments, suggestions or recommendations. No comments were received. The proposed regulations, without change, are hereby being set forth as final.

These regulations implement the provisions of section 201 of Pub. L. 98-543. That section first authorized creation of a temporary program of vocational training for certain new VA pension recipients. Veterans who participate in the temporary vocational training program would be eligible, during their training program, to receive health care benefits similar to those now provided to veterans receiving vocational training under chapter 31 of title 38. They could receive hospital care, nursing home care and outpatient medical services, including free basis medical or dental care if the VA is incapable of providing the required medical care economically because of geographical inaccessibility or because of the unavailability of the required services at VA facilities.

Section 201 also provides that, in certain cases, a veteran whose pension is terminated solely by reason of income from work or training shall retain, for 3 years, eligibility for hospital care, nursing home care and medical services for which the veteran would otherwise have been eligible if the pension had not been terminated. In the case of pension recipients who pursue vocational training under the chapter 15 program, the 3 year retention of health care eligibility may be granted at any time the veteran loses pension due to excessive income from work or training performed or undertaken by the veteran. If, however, the veteran did not pursue training under the temporary program, the 3 year retention of health care eligibility may be granted only if the pension was so terminated during the period February 1, 1985 through January 31, 1989. This 3 year extension may only be invoked one time. The term "terminated by reason of income from work or training" means terminated as a result of the veteran's receipt of earnings from activity performed by the veteran for remuneration or gain, but only if the veteran's annual income from sources other than such earnings would, taken alone, not result in the termination of the veteran's pension.

These regulations are considered nonmajor under the criteria of Executive Order 12291, Federal Regulations. They will not have an annual effect on the economy of $100 million or more; will not result in major increases in costs for consumers, individual industries, Federal, State or local government agencies, or geographic regions, nor will they have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator hereby certifies that these final regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612. These proposed regulations concern the provisions of medical care to veterans who are undergoing a program of vocational training, 38 U.S.C. chapter 15.

Any economic impact on small entities would be small because of the minimal part of their overall operation and income which this activity represents.

PART 17—[AMENDED]

38 CFR Part 17, Medical, is amended by adding a new center heading and new §§ 17.56 and 17.56a to read as follows:

VOCATIONAL TRAINING AND HEALTH-CARE ELIGIBILITY PROTECTION FOR PENSION RECIPIENTS

§ 17.56 Medical care for veterans receiving vocational training under 38 U.S.C. chapter 15.

Hospital care, nursing home care and medical services may be provided to any veteran who is participating in a vocational training program under 38 U.S.C. chapter 15.

(a) For purposes of determining eligibility for this medical benefit, the term "participating in a vocational training program under 38 U.S.C. chapter 15" means the same as the term "participating in a rehabilitation program under 38 U.S.C. chapter 31" as defined in § 17.48(g). Eligibility for such medical care will continue only while the veteran is participating in the vocational training program.

(b) The term "hospital care and medical services" means class V dental care, priority III medical services, nursing home care and non-VA hospital care and/or fee medical/dental care if the VA is unable to provide the required medical care economically at VA or other government facilities because of geographic inaccessibility or because of the unavailability of the required services at VA facilities.

(38 U.S.C. 524, 525, 1818; Pub. L. 98-543)

§ 17.56a Protection of health-care eligibility.

Any veteran whose entitlement to VA pension is terminated by reason of income from work or training shall, subject to paragraphs (a) and (b) of this section, retain for 3 years after the termination, the eligibility for hospital care, nursing home care and medical services (not including dental) which the veteran otherwise would have had if the pension had not been terminated as a result of the veteran's receipt of earnings from activity performed for remuneration or gain by the veteran but only if the veteran's annual income from sources other than such earnings would, taken alone, not result in the termination of the veteran's pension.

(a) A veteran who participates in a vocational training program under 38 U.S.C. chapter 15 is eligible for the one-time 3 year retention of hospital care, nursing home care and medical services

benefits at any time that the veteran's pension is terminated by reason of income from the veteran's employment.

(b) A veteran who does not participate in a vocational training program under 38 U.S.C. chapter 15 is eligible for the one-time 3 year retention of hospital care and medical services benefits only if the veteran's pension is terminated by reason of income from the veteran's employment during the period February 1, 1965 through January 31, 1968.

(38 U.S.C. 524, 525, 1518; Pub. L. 98-543)

BILLING CODE 8320-01-M

---

38 CFR Part 21

Veterans Education; Nonmatriculated Students

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The law forbids payment of G.I Bill benefits to veterans who are not in a program of education. For several years the VA (Veterans Administration) has had rules for determining whether or not veterans are in a program of education if they are planning on taking courses at two colleges or universities sequentially, but have not matriculated at either one. The VA has found that these rules are too restrictive, and has adopted a new, more liberal rule.

EFFECTIVE DATE: May 8, 1986.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW, Washington, DC 20420 (202) 389-3082.

SUPPLEMENTARY INFORMATION: On pages 784 and 785 of the Federal Register of January 8, 1986, there was published a notice of intent to amend Part 21 to liberalize the VA's rules concerning nonmatriculated students. Interested people were given 30 days to submit comments, suggestions or objections.

The VA received two letters concerning the proposal. One was from an educational organization. One was from a service organization. Both writers approved of the proposal.

The service organization stated that it believed that one of the results of the amended regulation would be to permit students to take certain courses which, while not necessarily degree-oriented, enhance their career and employment. The VA wishes to make clear that this is not the intent of the amended regulation.

Veterans and eligible persons may receive educational assistance only when they are pursuing an approved program of education. A program of education is defined by law as any curriculum or any combination of unit courses or subjects pursued at an educational institution which is generally accepted as necessary to fulfill requirements for the attachment of a predetermined and identified educational, professional, or vocational objective. This amended regulation will not override this provision of law. In fact, the purpose of the regulation is to insure that someone who has not matriculated is pursuing a bona fide educational objective, and is not taking a random selection of courses. Accordingly, the VA has decided to make the proposal final.

The VA has determined that this regulation is not a major rule as that term is defined by E.O. 12291, entitled, Federal Regulation. The regulation will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign enterprises in domestic or export markets.

The Administrator of Veterans Affairs certifies that promulgation of this regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. Pursuant to section 605(b), this regulation, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because this change will affect only payments made to individual benefit recipients. The regulation will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

In the proposal published on January 8, 1986, the VA stated that the information collection contained in the proposal had been referred to OMB (Office of Management and Budget) for review. After reviewing the proposal OMB has determined that the regulation is not subject to the Paperwork Reduction Act of 1980. Accordingly, OMB has not assigned a control number to this regulation.

The Catalog of Federal Domestic Assistance number for the program affected by this regulation is 64.111.

List of Subjects in 38 CFR Part 21

Approved: May 8, 1986.

Thomas K. Turnage,

Administrator.

PART 21—[AMENDED]

38 CFR, Part 21, Vocational Rehabilitation and Education, is amended by revising § 21.4252, paragraphs (l)(2) and (l)(3) to read as follows:

§ 21.4252 Courses precluded.

* * * * *

(l) * * *

(2) The first portion of the courses leading to a single degree may be offered at one college or university. The remaining courses are not offered at the college or university, but are offered at a second college or university which grants the degree based upon the combined credits earned by the student. If the student is not required to matriculate during the portion of the program offered at the first college or university, the VA may approve an enrollment in a course or subject that is part of that portion of the program only when the certifications described in either paragraph (l)(2) (i) or (ii) of this section are made.

(i) The college or university granting the degree certifies concurrently with the student's enrollment in the first portion of the program, that

(A) Full credit will be granted for the subjects taken in the portion of the curriculum offered at the first college or university;

(B) In the last 5 years at least three students who have completed the first part of the program have been accepted into the second part of the program;

(C) At least 80 percent of those who have applied for admission to the second part of the program, after successfully completing the first part, have been admitted;

(D) The student will be required to matriculate during the first two terms, quarters or semesters following his or her admission to the second part of the program.

(ii) The college or university offering the first part of the program:

(A) Certifies to the appropriate State approving agency that as a result of an agreement between that college or university and the college or university offering the second part of the program, all of the courses taken by the veteran or eligible person in the first part of the program, will be accepted by the college or university offering the second part of the program without any loss of credit in partial fulfillment of the requirements for an associate or higher degree. This certification may be made once for each program for which an agreement exists.

(B) Certifies to the VA that the veteran or eligible person has stated to an appropriate official of the college or university offering the first part of the program that he or she is pursuing the program.

(3) The first portion of the subjects or courses in a baccalaureate program beyond those necessary for an associate degree may be given at a 2-year college, while the remainder may be offered at a 4-year college or university. When the college or university does not require the student to matriculate while pursuing the additional study at the 2-year college, the VA may approve an enrollment in a course offered in the program at the 2-year college only if the certifications described in either paragraph (l)(3) (i) or (ii) of this section are made.

(i) The college or university granting the baccalaureate degree certifies that:

(A) Full credit is granted for the course upon the student's transfer to the college or university granting the baccalaureate degree,

(B) The courses taken at the 2-year college will be acceptable in partial fulfillment for the baccalaureate degree, and

(C) The student will be required to matriculate during the first two terms, quarters or semesters following his or her admission to the college or university granting the baccalaureate degree.

(ii) Either the 2-year college or the college or university granting the baccalaureate degree:

(A) Certifies to the appropriate State approving agency that as a result of agreement between the 2-year college and the college or university offering the baccalaureate degree all of the courses pursued beyond the associate degree will be accepted without any loss of credit in partial fulfillment of the requirements for a baccalaureate degree. This certification may be made once for each program for which an agreement exists.

(B) Certifies to the VA that the veteran or eligible person is enrolled in courses covered by the agreement.

(38 U.S.C. 1652)

38 CFR Part 21

Temporary Program for Trial Work Periods and Vocational Rehabilitation for Certain Veterans With Disability Ratings

AGENCY: Veterans Administration.

ACTION: Final rule.

SUMMARY: Title I, section 111 of the Veterans' Benefits Improvement Act of 1984 (Pub. L. 98-543) establishes a 4-year pilot program under chapter 11, section 363 of title 38, United States Code to require vocational rehabilitation for certain veterans with total disability ratings due to individual unemployability and to allow these participants to have a trial work period without reduction of the individual unemployability rating. The pilot program is in effect from February 1, 1985, through January 31, 1989.

EFFECTIVE DATE: These regulations are retroactively effective on the same date as the operative date of the provision of law which they implement, February 1, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Karen Boies, (202) 389-2686.

SUPPLEMENTARY INFORMATION: This pilot program is intended to assist qualified service-disabled veterans with VA total disability ratings because of individual unemployability to become employed, either through a program of vocational rehabilitation authorized under 38 U.S.C. chapter 31 or, if the individual is ineligible for that program, through counseling, placement and post-placement services. Veterans for whom vocational rehabilitation is found feasible who already have individual unemployability ratings on February 1, 1985, may participate voluntarily, but those who acquire such ratings during the trial period are required to participate, subject to certain sanctions if they fail to do so. The major features of 38 U.S.C. 363 are:

(1) No total disability rating based on individual unemployability may be reduced during the four-year program period for the reason that the veteran has achieved employability, unless the veteran completes twelve consecutive months of substantially gainful employment; and

(2) All veterans entitled to total disability compensation based on individual unemployability ratings made *on and after February 1, 1985*, are required to undergo an evaluation if evaluation of rehabilitation potential or achievement of a vocational goal is reasonably feasible. If evaluation of rehabilitation potential is reasonably feasible and such a veteran fails to undergo the required evaluation, his or her individual unemployability rating will be reduced to the disability rating otherwise applicable. If vocational rehabilitation is reasonably feasible and other conditions of eligibility for and entitlement to vocational rehabilitation under 38 U.S.C. chapter 31 are met, a vocational rehabilitation program is developed. Failure to pursue that vocational rehabilitation program may result in a reevaluation of the veteran's continued entitlement to a total disability compensation rating by virtue of his or her individual unemployability. If employment is found to be feasible, but the individual is not eligible or entitled to vocational rehabilitation under chapter 31, he or she will nonetheless be provided employment assistance under 38 U.S.C. 1504(a)(5), counseling as provided in 38 U.S.C. 1504(a)(2), and assistance in securing rehabilitation services under other programs.

(3) Veterans determined to be totally disabled based on individual unemployability ratings made *prior to February 1, 1985*, may elect to receive both the evaluation and the counseling and employment assistance, but are not subject to rating reductions for failure to do so.

A report on the results of the program must be submitted to Congress by April 15, 1988.

The proposed regulations were published in the Federal Register of October 22, 1985 at pages 42727 through 42729. The Veterans Administration received two comments on the proposed regulations during the comment period. Our action on these comments is described in the following paragraphs.

One comment from an organization lauded the proposed regulations, stating that they "would go a long way in removing the disincentive to returning to work that has long existed in some individuals rated totally disabled by reason of individual unemployability." The commenter then suggested that the provisions barring a reduction in the veteran's disability rating unless he or she engaged in substantially gainful employment for at least 12 consecutive months, be extended to other severely disabled veterans seeking to return to

employment, including those with disability ratings of less than 100 percent.

The regulations implement provisions of Pub. L. 99-543 which provide eligible veterans with vocational rehabilitation and employment services. Such veterans' total disability ratings are protected during the trial work period. This protection also applies to any service disabled veteran receiving total disability compensation based on individual unemployability who engages in a substantially gainful occupation during the four year period beginning on February 1, 1985, whether or not the veteran is receiving vocational rehabilitation or employment services under this temporary program. On December 26, 1985 (50 FR 52774 & 52775) a final amendment to § 3.343(c) was published in the Federal Register to implement that provision.

For other severely disabled veterans, i.e., those whose disability ratings are not based on unemployability, the fact of employment is generally not a central issue in determining the proper schedular evaluation to be assigned. While social and industrial adaptability are key factors in the evaluation of mental disorders, other conditions are evaluated on the basis of examination findings and the average loss of earning capacity that may be expected to result from those findings without regard to actual employment.

When examination findings show improved symptomatology warranting a reduction in evaluation, the fact that a veteran has been gainfully employed for a reasonable period of time may be viewed as evidence that the noted improvement represents sustained improvement. However, in other than mental disorders, the fact of employment is not sufficient, in and of itself, to warrant reduction in a schedular evaluation.

This is clearly an area for the exercise of sound rating judgment and the provisions of 38 CFR 3.343 and 3.344 are more than adequate safeguards against inappropriate reductions. Such judgment should not be preempted by institution of specific trial work periods unless mandated by legislation.

The second comment was received from an individual concerned with the wording of the phrase "receives an IU rating" in § 21.6509(c). The writer believes that the wording of this paragraph should more clearly identify the date the VA determines that the veteran is entitled to a disability rating of 100 percent based upon individual unemployability as the date the veteran is considered to have received the rating. We agree and have modified the wording in this paragraph accordingly.

In addition to the specific change made in response to comments, a minor editorial change was made in § 21.6517. Neither of the changes made is of such a nature as to significantly amend the substance of the original proposals and republication of the final regulations for comment is not necessary. Therefore, the regulations are hereby adopted as final.

These regulations do not meet the criteria for major rules as contained in Executive Order 12291, Federal Regulation. The proposal will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices, and will not have any other significant adverse effects on the economy.

The VA has made these regulations retroactively effective February 1, 1985, because they either are interpretive rules, which construe the meaning of 38 U.S.C. 363, or are general statements of policy. Moreover, the VA finds that good cause exists for making these regulations, in conformance with the provisions of law they implement, retroactively effective on February 1, 1985. To achieve the maximum benefit of this legislation for the affected individuals it is necessary to implement these provisions of law as soon as possible. A delayed effective date would be contrary to statutory design; would complicate administration of these provisions of law; and might result in denial of a benefit to a veteran who is entitled by law to it.

The Administrator certifies that these final rules will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these rules are therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that these regulation changes concern the rights and responsibilities of individual VA beneficiaries and essentially restate 38 U.S.C. 363. Thus, no regulatory burdens are imposed on small entities by these regulations.

The Catalog of Federal Domestic Assistance Number is 64.116.

Civil rights, Claims, Education, Grant programs, Loan programs, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: May 6, 1986.

Thomas K. Turnage,

Administrator.

38 CFR Part 21, *Vocational Rehabilitation and Education,* is amended by adding new Subparts H and I. Subpart H is reserved at this time. Sections 21.6501 to 21.6525 (Subpart I) are set forth below:

PART 21—[AMENDED]

Subpart I—Temporary Program of Vocational Training and Rehabilitation

Sec.

21.6501 Overview.
21.6503 Definitions.
21.6505 Participation in the temporary program.
21.6507 Special benefits for qualified veterans under test program.
21.6509 Notice to qualified veterans.
21.6511 Scheduling an evaluation for a qualified veteran.
21.6513 Qualified veteran fails to participate in an evaluation or reevaluation.
21.6515 Formulation of rehabilitation plan.
21.6517 Failure to pursue rehabilitation plan.
21.6519 Eligibility of qualified veterans for employment and counseling services.
21.6521 Employment of qualified veterans.
21.6523 Entry and reentry into a program of counseling and employment services under 38 U.S.C. 1504(a) (2) and (5).
21.6525 Election of benefits by qualified veteran who receives an IU rating during the program period.

Authority: Pub. L. 99-543, sec. 111; 38 U.S.C. 363.

Subpart I—Temporary Program of Vocational Training and Rehabilitation

§ 21.6501 Overview.

(a) *Purpose.* The temporary program for trial work periods and vocational rehabilitation is intended to test the extent to which a veteran, who has been awarded a VA compensation rating of total disability by reason of inability to secure or follow a substantially gainful occupation as a result of service-connected disability, may benefit from vocational rehabilitation services which may be authorized under 33 U.S.C. ch. 31, and 38 U.S.C. 363. See §§ 3.340 and 3.341 of this title. (38 U.S.C. 363)

(b) *Chapter 31 evaluations required.* All veterans participating in this temporary program are to be evaluated to determine whether:

(1) They are eligible for and entitled to receive assistance under ch. 31; and

(2) Achievement of a vocational goal is reasonably feasible.

(38 U.S.C. 363)

(c) *Applicability of ch. 31 provisions.* The provisions of §§ 21.1 through 21.420, generally applicable to veterans eligible for benefits under ch. 31, apply except

as added to or modified by the provisions of the following sections. Participants not found eligible for ch. 31 benefits may nevertheless receive counseling services under 38 U.S.C. 1504(a)(2) and placement and postplacement services under 38 U.S.C. 1504(a)(5). (38 U.S.C. 363)

§ 21.6503 Definitions.

(a) *Program period.* The term "program period" means the period beginning on February 1, 1985, and ending January 31, 1988. (38 U.S.C. 363(a)(2)(B))

(b) *Qualified veteran.* The term "qualified veteran" means a veteran who has a service-connected disability, or service-connected disabilities, not rated as total, but who has been awarded a rating of total disability by reason of inability to secure or follow a substantially gainful occupation as a result of such disability or disabilities. Such a rating is referred to as an IU (individual unemployability) rating. See §§ 3.340, 3.341, and 4.16 of this title. (38 U.S.C. 363(a)(2)(A))

(c) *Receives an IU rating.* The phrase "receives an IU rating" refers to the date of the rating decision authorizing total disability compensation based upon individual unemployability (38 U.S.C. 363(a)(2)(A))

§ 21.6505 Participation in the temporary program.

(a) *General.* Participation in this temporary program of trial work periods and vocational rehabilitation is limited to qualified veterans. (38 U.S.C. 363(a)(2)(A))

(b) *Qualified veterans for whom an evaluation and pursuit of a vocational rehabilitation program is required.*

(1) Each qualified veteran who receives an IU rating during the program period, shall be provided an evaluation of rehabilitation potential to determine whether achievement of a vocational goal under ch. 31 is reasonably feasible.

(i) The VR&C (Vocational Rehabilitation and Counseling) Division will schedule the veteran for an evaluation, unless it is determined that his or her participation in an evaluation is not reasonably feasible;

(ii) A veteran for whom an evaluation is scheduled must appear for and cooperate in the evaluation unless unable to do so for reasons beyond his or her control.

(2) If, following the evaluation, achievement of a vocational goal is found to be reasonably feasible and the veteran is eligible for ch. 31 benefits, the veteran is required to pursue a vocational rehabilitation program. If the veteran fails to pursue or continue to pursue a vocational rehabilitation program, he or she is subject to the provisions of § 21.6517. (38 U.S.C. 363(c))

(c) *Qualified veterans for whom evaluation and pursuit of a vocational rehabilitation program is optional.* A qualified veteran who had an IU rating as of January 31, 1985, may, whether or not already participating in the ch. 31 program, elect to participate in this test program, if otherwise eligible, but is not required to do so. (38 U.S.C. 363 note)

(d) *IU rating awarded while a ch. 31 participant.* A veteran already participating in a ch. 31 program who receives an IU rating during the program period shall be subject to all provisions for required participation in this program, as provided in paragraph (b) of this section. (38 U.S.C. 363 note)

§ 21.6507 Special benefits for qualified veterans under test program.

(a) *Protection of IU rating under 38 CFR 3.343(c)(2).* The total disability rating of any qualified veteran who begins to engage in a substantially gainful occupation during the program period is protected from reduction by the VA on the basis of the veteran's having secured and followed a substantially gainful occupation under the provisions of § 3.343(c)(2) of this title. (38 U.S.C. 363(a))

(b) *Counseling and employment services for qualified veterans.* During the program period, the VA will make the counseling services described in 38 U.S.C. 1504(a)(2), and the placement and postplacement services described in 38 U.S.C. 1504(a)(5), available to each qualified veteran for whom achievement of a vocational goal is reasonably feasible. These services will be made available regardless of the veteran's entitlement to or desire to participate in a vocational rehabilitation program under ch. 31. See § 21.6519. (38 U.S.C. 363(b))

§ 21.6509 Notice to qualified veterans.

(a) *Notice to qualified veterans awarded an IU rating during the program period.* At the time notice is provided to a qualified veteran of an award of an IU rating, the VA shall provide the veteran with an additional statement. A similarly worded statement shall also be sent to veterans awarded an IU rating during the program period who are already participating in a program under ch. 31. These statements shall contain the following information:

(1) Notice of the provisions of 38 U.S.C. 363;

(2) Information explaining the purposes and availability of, as well as eligibility requirements and procedures for pursuing, a vocational rehabilitation program under ch. 31; and

(3) A summary description of the scope of services and assistance available under that chapter. (38 U.S.C. 363(c)(1)(A))

(b) *Notice sent to qualified veterans awarded an IU rating on or before January 31, 1985.* By April 1, 1985, the VA shall provide the information contained in 38 U.S.C. 363(b), and described in paragraphs (a) (2) and (3) of this section to veterans awarded an IU rating on or before January 31, 1985. However, such notice need not be provided to a veteran who has an IU rating which is protected under § 3.952 of this title. (38 U.S.C. 363 note)

§ 21.6511 Scheduling an evaluation for a qualified veteran.

(a) *Evaluation.* The term "evaluation" hereinafter shall be understood to mean the same evaluation accorded in an "initial evaluation" and an "extended evaluation" as those terms are described in § 21.50 and § 21.57. (38 U.S.C. 363(c))

(b) *Timely scheduling and notice of evaluation.* (1) An evaluation will be arranged as promptly as practicable for each qualified veteran required to participate and for any other qualified veteran who elects to participate; and

(2) The veteran shall be provided reasonable notice of the date and time for which the evaluation is initially scheduled. (38 U.S.C. 363(c))

(c) *Evaluations for ch. 31 participants.* A veteran who is a ch. 31 participant at the time he or she becomes a participant in the test program shall be provided a reevaluation limited to:

(1) Affirming the continuing suitability of his or her ch. 31 rehabilitation program; and

(2) Identifying the assistance which may be furnished under § 21.6507. (38 U.S.C. 363 (b), (c))

(d) *Responsible staff member.* The evaluation or reevaluation will be provided by a counseling psychologist in the VR&C (Vocational Rehabilitation and Counseling) Divison. (38 U.S.C. 363(c)(1)(B))

§ 21.6513 Qualified veteran fails to participate in an evaluation or reevaluation.

(a) *Qualified veterans affected by this section.* The provisions of this section are only applicable to qualified veterans who receive an IU rating during the program period. Each of these veterans is required to participate in an evaluation (or reevaluation, if already in a ch. 31 program) and must cooperate to the extent necessary for the counseling

psychologist to accomplish the evaluation, unless the veteran is unable to do so for reasons beyond his or her control. The veteran's responsibility for satisfactory conduct and cooperation in the evaluation shall be considered in the same manner as for ch. 31 applicants. See § 21.50(e) and § 21.382. (38 U.S.C. 363(c)(2))

(b) *Special considerations.* The counseling psychologist shall make every reasonable effort to avoid or minimize nonparticipation or noncooperation in the evaluation. (38 U.S.C. 363(c), (2) and (3))

(c) *Nonparticipation and noncooperation.* (1) If a qualified veteran who is required to participate in this test program fails to participate or cooperate in the evaluation, the VA shall initially take the actions specified for ch. 31 participants under § 21.184, § 21.188, and § 21.364, including discontinuance of the veteran's case, if necessary. (38 U.S.C. 363(a)(2))

(2) The VR&C Division shall inform the Adjudication Division of the discontinuance of the evaluation for a veteran required to participate, if the failure of the qualified veteran to participate or cooperate in carrying out the evaluation is for reasons within his or her control. Upon receipt of such information, the Adjudication Division will take the action required under § 3.341(c) of this title to reduce the IU award. (38 U.S.C. 363(c)(2))

(d) *Followup for veterans unable to participate in an initial evaluation or vocational rehabilitation program.* For each qualified veteran described in paragraph (a) of this section, who does not participate in an evaluation or pursue the vocational rehabilitation program for reasons beyond his or her control, the case shall be reviewed for followup action by the VR&C staff as provided in §§ 21.197(c)(4) and 21.198(d). (38 U.S.C. 363(c)(2))

§ 21.6515 Formulation of rehabilitation plan.

(a) *Formulation of plan.* Following an evaluation, the counseling psychologist will formulate an IWRP (individualized written rehabilitation plan) or an IEAP (individualized employment assistance plan) for each participating qualified veteran for whom achievement of a vocational goal is reasonably feasible. These plans shall be prepared in accordance with § 21.84 (IWRP) or § 21.88 (IEAP). (38 U.S.C. 363(c)).

(b) *Existing plan.* If the veteran already has undertaken a rehabilitation program under ch. 31, a new plan shall not be required unless circumstances indicate that the existing plan should be modified or replaced. (38 U.S.C. 363(c))

§ 21.6517 Failure to pursue rehabilitation plan.

(a) *Failure to pursue required program.* If the case manager determines that a qualified veteran required to participate has failed, for reasons other than those beyond the veteran's control, to pursue or continue to pursue the plan developed under § 21.6515, the VA shall provide the veteran with a notice of the consequences of his or her action. The notice shall inform the veteran, that if he or she fails to initiate or resume pursuit within 60 days (or a period of up to 120 days if circumstances warrant) after the VA provides the notice, the results of the evaluation will be considered by the VA in reviewing the veterans' continued eligibility for a rating of total disability based on inability to secure or follow a substantially gainful occupation. (38 U.S.C. 363(c)(3)(B))

(b) *Referral to Adjudication Division—pursuit required.* If the veteran fails to initiate or resume pursuit of the planned rehabilitation program within the time period specified by the notice described in paragraph (a) of this section, the VR&C Division will forward copies of the notice and the results of the evaluation of the Adjudication Division for appropriate rating consideration. (38 U.S.C. 363(c)(3)(B))

(c) *Pursuit not required.* If the qualified veteran is not required to participate in the test program, failure to pursue or continue to pursue the plan shall result only in action by the VA under ch. 31 procedures provided for such situations. See §§ 21.190, 21.194, 21.362, 21.364, (38 U.S.C. 363(b)(3))

§ 21.6519 Eligibility of qualified veterans for employment and counseling services.

(a) *General.* A qualified veteran for whom vocational rehabilitation and achievement of a vocational goal are reasonably feasible may be provided the employment and counseling services to which he or she may be entitled under ch. 31. If the qualified veteran is not eligible for such assistance under ch. 31, he or she may be provided, nevertheless, the counseling, placement and postplacement services provided under 38 U.S.C. 1504(a)(2) and (5). The specific services which may be authorized are discussed in §§ 21.100, 21.252 and 21.254(a). (38 U.S.C. 363(b))

(b) *Services under other VA and non-VA programs.* Veterans being provided counseling, placement and postplacement services under §§ 21.100, 21.252, and 21.254(a) will also be aided in identifying services of other VA and non-VA programs which may be of assistance in securing employment. All elements of a program of these services shall be incorporated in the IEAP. (38 U.S.C. 363(b))

(c) *Veteran elects counseling, placement and postplacement services.* If a qualified veteran elects not to undertake the IWRP, whether or not required to do so, and is otherwise eligible for counseling, placement and postplacement services under 38 U.S.C. 1504(a)(2) and (5), he or she may be provided those services as a part of the test program even though action has been taken under either paragraph (b) of (c) § 21.6517. (38 U.S.C. 363(b))

(d) *Duration of services under 38 U.S.C. 1504(a) (2) and (5).* The services provided under 38 U.S.C. 1504(a)(2) and (5), are limited to an 18-month period of employment assistance as described in § 21.73. (38 U.S.C. 363(b))

§ 21.6521 Employment of qualified veterans.

(a) *Provisions of the IEAP (Individualized Employment Assistance Plan).* Each IEAP of a qualified veteran shall require that the:

(1) Case manager maintain close contact with qualified veterans who become employed to help assure adjustment to employment;

(2) Veteran discuss any plan to leave employment during the trial work period with the case manager. (38 U.S.C. 363(c))

(b) *Coordination with the Adjudication Division.* The VR&C Division will inform the Adjudication Division in writing upon employment of the participating qualified veteran during a program of either vocational rehabilitation services or counseling and employment services and when such employment has continued for 12 consecutive months. See § 3.343(c)(2) of this title. (38 U.S.C. 363(a))

§ 21.6523 Entry and reentry into a program of counseling and employment services under 38 U.S.C. 1504(a) (2) and (5).

(a) *Dates of entry.* A qualified veteran, not eligible to receive ch. 31 benefits, may not enter or pursue a program of counseling and employment services under 38 U.S.C. 1504(a) (2) and (5), before February 1, 1985, or later than January 31, 1989. (38 U.S.C. 363)

(b) *Reentry.* The provisions of paragraph (a) of this section are also applicable to veterans being provided additional counseling and employment services following a redetermination of eligibility and entitlement to such services. (38 U.S.C. 363)

BEST COPY AVAILABLE

§ 21.6525 Election of benefits by a qualified veteran who receives an RU rating during the program period.

(a) *General.* A qualified veteran required to participate in the test program must participate in a rehabilitation program under ch. 31, if eligible, regardless of eligibility and entitlement to education benefits under other VA programs, or risk adverse consequences under §§ 21.6513(c) and 21.6517 (a) and (b). (38 U.S.C. 363(c))

(b) *Chapter 34 eligibility.* A qualified veteran required to participate, who is also eligible for assistance under ch. 34, may elect, as part of his or her ch. 31 vocational rehabilitation program, to receive subsistence payments at the ch. 34 rate under § 21.264. The counseling psychologist and the veteran will review the assistance and services available under these options so the veteran can make an informed decision. (38 U.S.C. 363(c))

(c) *Other VA programs.* The counseling psychologist shall inform a qualified veteran required to participate in the test program of any adverse consequences which may result under §§ 21.6513(c) and 21.6517 (a) and (b), if he or she instead elects benefits under another VA program. (38 U.S.C. 363(c))

BILLING CODE 8320-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6715]

National Flood Insurance Administration; Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the Federal Register.

EFFECTIVE DATES: The third date ("Susp.") listed in the third column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et. seq.). Accordingly, the communities are suspended on the effective date in the third column, as of that date, flood insurance is no longer available in the community. However , those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable floodplain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the Federal Register.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in Section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance of the Federal standards required for community participation.

In each entry, a complete chronology of effective dates appears for each listed community.

List of Subjects in 44 CFR Part 64

Flood insurance, floodpains.

PART 64—[AMENDED]

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et. seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 2 and 4

[CGD 85-015]

Vessel Reporting Requirements

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending the shipping regulations by adding requirements to give the Coast Guard prior notification of vessel inspections and to give immediate notification to the Coast Guard if there is reason to believe a vessel is in distress. These regulations apply to individuals in charge of a vessel including vessel owners, charterers, operators, agents and

masters. These regulations implement the reporting requirements of the Maritime Safety Act of 1984. Their purpose is to enhance maritime safety by insuring vessels will be reinspected for certification and also by increasing the likelihood that timely assistance will be provided to vessels in distress.

EFFECTIVE DATE: These rules become effective on May 29, 1986.

ADDRESSES: The Final Evaluation and materials referenced in these final rules are available for examination and copying between 8 a.m. and 4 p.m., Monday through Friday, except holidays, at the Marine Safety Council, Commandant (G—CMC), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, D.C. 20593 (202–426–1477).

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Jeffrey G. Lantz, Project Officer, (202) 426–4434.

SUPPLEMENTARY INFORMATION: On October 19, 1984, Congress enacted the Maritime Safety Act of 1984 (Pub. L. 98–498, Title II, Subtitle A). The purpose of the Act is to promote maritime safety through various means, one of which is by establishing certain vessel reporting requirements. These requirements are embodied in sections 211(a) and 212 of the Act and entered into force on April 17, 1985. Section 211(a) requires prior notification of vessel inspections to be given to the Coast Guard and section 212 requires notification to be given to the Coast Guard if there is reason to believe a vessel in is distress. These two sections do not specify the official or office within the Coast Guard to receive the notification. These regulations specify how and where to provide notification.

Notice of Proposed Rulemaking

Since these regulations merely clarify new statutory reporting requirements by delineating the proper recipient of the required notifications, notice and opportunity for comment has been determined to be impracticable and unnecessary. Therefore, under the provisions of 5 U.S.C. 553 these amendments are being issued as a final rule without publication of a notice of proposed rulemaking. Since the statute was effective April 17, 1985, good cause exists for making these rules effective upon publication.

Drafting Information

The principal drafters of this document are LCDR Jeffrey G. Lantz, Office of Merchant Marine Safety and LCDR Ronald C. Zabel, Office of Chief Counsel.

Discussion of Changes

1. Section 211(a) of the Maritime Safety Act of 1984 amends 46 U.S.C. 3309 by adding a new paragraph, 3309(c). Under this paragraph, the owner, charterer, managing operator, agent, master, or individual in charge of a vessel, certificated by the Coast Guard, is required to submit a notice to the Coast Guard, stating if the vessel will be required to be reinspected for certification or if the vessel will be operated so as not to require a Certificate of Inspection (COI). This notice need not contain the specifics necessary to schedule the inspection. However, it must be in writing and submitted at least 30 days but not more than 60 days prior to the expiration of the vessel's current COI. The purpose for this requirement is to insure that the ship owner and the Coast Guard are both aware that a vessel is due for inspection and also increase communication between the vessel owner and the Coast Guard to aid both parties in working out the logistics for the inspection. Advance communication with the Coast Guard is especially useful for vessels which primarily operate overseas and as such, have to make arrangements to have their inspections done in a foreign port. This requirement will reduce the occurrences of COI's lapsing because arrangements were not made for the inspection to be done in time.

The purpose of this requirement is best served if the notice is sent to the Coast Guard Marine Safety or Marine Inspection Office that will be doing the inspection. This, however, may not always be possible. Certain types of vessels are operated such that a determination cannot be made where it will be inspected 30 to 60 days prior to the expiration of the COI. In these instances, the best office to receive the notice is the Marine Safety or Marine Inspection Office that last certificated the vessel. This office will have the records of the last inspection for certification and can communicate any information concerning the vessel's upcoming inspection through the Marine Safety Information System. The regulations offer this choice to Coast Guard inspection offices to the submitter of the report.

Regulations presently require an Application for Inspection to be submitted to the Coast Guard prior to a vessel being reinspected for certification. Under section 211(a) of the Act, the Application for Inspection meets the notification requirement for a vessel requiring reinspection for certification. Therefore, an owner who knows where the vessel will be inspected 30 days prior to the inspection will be able to utilize the Application for Inspection as this required notice.

Section 211(a), and consequently 46 U.S.C. 3309(c), is general and applies to all vessels certificated by the Coast Guard under the authority of 46 U.S.C. 3309. Accordingly, 46 CFR Part 2 is being amended to incorporate this reporting requirement rather than including it separately in the vessel specific subchapters of 46 CFR Chapter I.

2. Section 212 of the Maritime Safety Act of 1984 adds three complementary vessel reporting requirements to the law and places them in a new section, 46 U.S.C. 2306. First, under 2306(b), a master of a vessel, that is required to report to the United States Flag Merchant Vessel Location Filing System (USMER) under authority of 46 App. U.S.C. 1122a, is required to report to the vessel's owner, charterer, managing operator or agent at least once every 48 hours. Second, under 46 U.S.C. 2306(a)(2) the owner, charterer, managing operator or agent of a vessel required to report to USMER, is required to immediately notify the Coast Guard if 48 hours has passed since last receiving communication from the vessel. Third, under 2306(a)(1) the same notification requirements apply to the owner, charterer, managing operator, or agent of a vessel of the United States who has reason to believe the vessel may be lost or imperiled. Such reasons include, but are not limited to, lack of communication with or nonappearance of the vessel. 46 U.S.C. 2306 (a)(3) further requires that the notification required by 46 U.S.C. 2306(a)(1) and (a)(2) must include the name and identification number of the vessel, names of the individuals on board and other information the Coast Guard may request. Examples of information that may be requested by the Coast Guard include such items as the last known locationof the vessel, intended operations or destination of the vessel, information on the vessel's communication capability and any other information that may be helpful should a search have to be mounted. In addition, the statute requires written confirmation of the notification to be submitted to the Coast Guard within 24 hours.

These reporting requirements are intended to increase the likelihood of timely assistance being available to vessels in distress, especially those that cannot communicate their distress to the vessel's owner or others in a position to help. For vessels under 46 U.S.C. 2306(a)(2) this is best accomplished if the notification is received by the Coast

Guard rescue coordination center (RCC) having jurisdiction over the area the vessel is operating in. Because these vessels are engaged in foreign commerce, an RCC is best equipped to determine if the vessel is in need of assistance and, if so, to make arrangements for assistance to be provided. Additionally, these vessels are generally operated by large companies that have the wherewithal to know which district RCC is appropriate to send the report to.

The notification required by 46 U.S.C. 2306(a)(1) applies more broadly and encompasses all vessels that are documented or numbered under the laws of the United States. This includes all commercial vessels, small and large, as well as practically all pleasure vessels. To require that this notification be sent to an RCC may be burdensome to the owner and operators of small vessels because they may not know where the location of the RCC with jurisdiction. An example is where the vessel involved is a type that operates in one locale, such as a small passenger vessel. In this case it would be more appropriate to contact the local Coast Guard search and rescue authority instead of the RCC, which could be located hundreds of miles away. Therefore, for those vessels reporting under 46 U.S.C. 2306(a)(1), an option is provided. The notification may be given to either the cognizant Coast Guard RCC or the nearest Coast Guard search and rescue authority.

The reporting arrangement in 46 U.S.C. 2306 apply very broadly. The vessels required to report under 46 U.S.C. 2306(a)(2) would almost certainly be commercial vessels regulated under Title 46 Code of Federal Regulations. 46 U.S.C. 2306(a)(1), however, applies to all vessels regulated under Title 46 CFR and 33 CFR Subchapter S. The purpose of these regulations is to clarify the point within the Coast Guard where the notification required by 46 U.S.C. 2306 is to be submitted. Since these regulations apply to individuals not on board the vessel reported on, the Coast Guard has decided that they have much greater applicability to commercial operations than vessels being operated for pleasure where the owner is typically on board. Therefore, the Coast Guard has decided to place the clarifying regulations in 46 CFR Part 4. The heading of part 4 and the section describing the scope of the part is being modified to more accurately reflect the contents of the part.

Final Evaluation

These final rules are considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures. A final regulatory evaluation has been prepared and placed in the rulemaking docket.

The evaluation includes an estimate of $152,250/year as the annual cost to the public of these regulations. Of this amount, the requirement to give the prior notification to the Coast Guard of the expiration of a vessel's Certificate of Inspection is estimated to cost $32,500/year. However, this burden can be decreased if more vessels are able to combine this report with the submission of the Application for Inspection. The remainder of the economic burden is attributable to the requirement to give the Coast Guard notification of vessel distress. This requirement is very specific in the law with no means available to mitigate its impact by combining it with a currently required report. The Coast Guard feels that reports of vessel distress have always been and will continue to be made, and while it has not been a regulatory requirement until now, it will not place an undue burden on the public.

The Final Evaluation may be inspected or copied at the location referred to in ADDRESSES. Copies may also be obtained by contacting LCDR Jeffrey G. Lantz at (202) 426–4431.

Environmental Assessment

An environmental assessment has not been prepared since these regulations are considered administrative and procedural. As specified by DOT Order 5610.1C and Commandant Instruction M16714.1A, regulations of this type are excluded from the requirement to prepare an environmental assessment.

Regulatory Flexibility Act Certification

The Coast Guard certifies that this final rule will not have a significant economic impact on a substantial number of small entities. For the reports required under section 211(a) virtually all small entities will be able to utilize an existing required report for compliance. The reports required under section 212 are in effect requests for search and rescue service that would be made voluntarily anyway. For these reasons the impact is expected to be minimal.

Paperwork Reduction Act

This final rule contains information collection requirements as defined in the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et. seq.). The requirement for prior notification of vessel inspections in § 2.01–3 is a modification to the information collection requirements incident to inspections approved by the Office of Management and Budget (OMB) under control number 2115–0007 and is included under that approval. The requirements for reporting lack of communication with a vessel or possible distress cases in §§ 4.04–1 to 4.04–5, required by section 212 of the Maritime Safety Act of 1984, have been submitted to OMB for review and have been assigned control number 2115–0551.

List of Subjects

46 CFR Part 2

Coast Guard, Law enforcement, Penalties, Fire protection, Marine safety.

46 CFR Part 4

Administrative practice and procedure, Coast Guard, Investigations, accidents, Marine safety, National Transportation Safety Board, Reporting requirements.

In consideration of the foregoing, 46 CFR Parts 2 and 4 are amended as follows:

PART 2—[AMENDED]

1. The authority citation for Part 2 is revised to read as follows and all other authority citations within the part are removed.

Authority: 14 U.S.C. 623; 33 U.S.C. 1903; 43 U.S.C. 1333(e); 46 U.S.C. 3306, 3703, 4104, 6105; 46 App. U.S.C. 86, 88a, 1295f and g; 50 U.S.C. E.O. 12234; 45 FR 58801, September 5, 1980; 49 CFR 1.46(b), (n), (z), (hh).

2. By adding a new § 2.01–3 to read as follows:

§ 2.01–3 Notification of inspection.

(a) At least 30 days, but less than 60 days, prior to the expiration of the Certification of Inspection, a vessel's owner, charterer, managing operator, agent, master or individual in charge shall notify the Coast Guard if the vessel will be required to be reinspected for certification or will be operated in such a manner as to not require a Certificate of Inspection.

(b) the notification required by paragraph (a) shall be in writing and shall be submitted to the Officer in Charge, Marine Inspection for the Marine Inspection or Marine Safety Office of the port that:

(1) Will be reinspecting and Certificating the Vessel;

(2) Issued the vessel's current Certificate of Inspection if the vessel's schedule is such that it is not known where the next reinspection will take place; or

(3) Issued the vessel's current Certificate of Inspection if the vessel will not be requiring reinspection for the issuance of a Certificate of Inspection.

PART 4—[AMENDED]

3. The heading of Part 4 is revised to read as follows:

PART 4—MARINE CASUALTIES AND INVESTIGATIONS

4. The authority citation for Part 4 is revised to read as follows and all other authority citations in the part are removed.

Authority: 49 U.S.C. 1333, 46 U.S.C. 2306, 6101, 6301, 6305; 50 U.S.C. 198; 49 CFR 1.46(b) and (z), except subpart 4.40 for which the authority is: 49 U.S.C. 1903 (a)(1)(E); 49 CFR 1.46(n)(10)(i).

5. By revising § 4.01–1 to read as follows:

§ 4.01–1 Scope of regulation.

The regulations in this part govern the reporting of marine casualties, the investigation of marine casualties and the submittal of reports designed to increase the likelihood of timely assistance to vessels in distress.

6. By adding a new subpart 4.04 to read as follows:

Subpart 4.04—Notice of Potential Vessel Casualty

§ 4.04–1 Reports of potential vessel casualty.

A vessel owner, charterer, managing operator or agent shall immediately notify either of the following Coast Guard officers if there is reason to believe a vessel is lost or imperiled.

(a) The Coast Guard district rescue coordination center (RCC) cognizant over the area the vessel was last operating in; or

(b) The Coast Guard search and rescue authority nearest to where the vessel was last operating.

Reasons for belief that a vessel is in distress include, but are not limited to, lack of communication with or nonappearance of the vessel.

§ 4.04–2 Reports of lack of vessel communication.

The owner, charterer, managing operator or agent of a vessel that is required to report to the United States flag Merchant Vessel Location Filing System under the authority of section 212(A) of the Merchant Marine Act, 1936 (46 App. U.S.C. 1122a), shall immediately notify the Coast Guard if more than 48 hours have passed since receiving communication from the vessel. This notification shall be given to the Coast Guard district RCC cognizant over the area the vessel was last operating in.

(Information collection requirements approved by the Office of Management and Budget under control number 2115-0551)

§ 4.04–3 Substance of reports.

The owner, charterer, managing operator or agent, notifying the Coast Guard under § 4.04–1 or § 4.04–2, shall:

(a) Provided the name and identification number of the vessel, the names of the individuals on board, and other information that may be requested by the Coast Guard (when providing the names of the individuals on board for a passenger vessel, the list of passengers need only meet the requirements of 46 U.S.C. 3502); and

(b) Submit written confirmation of that notice to the Coast Guard facility that the notice was given to within 24 hours.

(Information collection requirements approved by the Office of Management and Budget under Control number 2115-0551)

Dated: May 23, 1988.

J. W. Kime,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

46 CFR Part 5

[CGD 85-031]

Individual Participation in Marine Safety Reporting Program (MSRP); Enforcement Policy on Suspension and Revocation Proceedings

AGENCY: Coast Guard, DOT.

ACTION: Termination of program and final rule.

SUMMARY: On June 1, 1985, the Office of the Secretary, Department of Transportation initiated a one-year, voluntary Marine Safety Reporting Program (MSRP). As part of this program, the Coast Guard agreed not to impose an order under suspension and revocation proceedings which adversely affects a merchant mariner's license, certificate or document for certain offenses if a report was filed with MSRP. Title 46, Code of Federal Regulations, Part 5, § 5.64 sets forth Coast Guard enforcement policy for participation in MSRP with regard to the suspension and revocation of licenses, certificates and documents. This notice announces the termination of the one-year test and removes references to the Marine Safety Reporting Program from 46 CFR, Part 5.

EFFECTIVE DATE: June 15, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Larry D. Glass, Office of Merchant Marine Safety, (202) 426-4281, 7:30 AM to 4:00 PM Monday through Friday.

SUPPLEMENTARY INFORMATION: The Department of Transportation initiated the one-year test which began on June 1, 1985. The Marine Safety Reporting Program was meant to supplement existing mandatory reporting requirements by providing the commercial marine industry with a means to report anonymously safety-related incidents and near mishaps involving difficulties encountered with the navigation and control of a commercial vessel. The Marine Safety Reporting Program expires on May 31, 1988. The effective date of this amendment is June 15, 1988 to allow a period of grace for processing of forms submitted late in the program. The Coast Guard will not honor the MSRP enforcement policy for forms received by the Transportation Systems Center subsequent to June 15, 1988. An evaluation of the program will be conducted and is expected to be available in a few months.

This amendment is published as a final rule because the provisions thereof concern matters relating to agency procedures and practices which are excepted under 5 U.S.C. 553 from the requirements for notice and comment. This amendment is being made effective on June 15, 1988. The document originally promulgating these sections stated that the test program would terminate on June 1, 1988. Since the test is concluded and the purpose of this final rule is only to remove those sections pertaining to the test, it has been determined that good cause exists for making this rule effective in less than 30 days.

List of Subjects in 46 CFR Part 5

Administrative practices and procedures, Investigations, Administrative law judge, Investigating officer, Seaman, License, Certificate, Document, Administrative hearings, Suspension, Revocation.

PART 5—[AMENDED]

In consideration of the foregoing, Part 5 of Title 46 Code of Federal Regulations is amended as follows:

1. The authority citation for Part 5 continues to read as follows:

Authority: 46 U.S.C. 7101, 7301, 7701; 50 U.S.C. 198; 49 CFR 1.46(b).

§ 5.64 [Removed]

2. Part 5 is amended by removing § 5.64.

Dated: May 22, 1986.
John W. Kime,
Rear Admiral (Lower Half), U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

46 CFR Part 160

[CGD 84-069b]

Lifesaving Equipment; Thermal Protective Aids

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is adopting specifications for approving thermal protective aids. A thermal protective aid is a bag or suit made of waterproof material with low thermal conductivity. It is required by the Second Set of Amendments to the International Convention for Safety of Life at Sea (SOLAS 74/83) to be carried in a liferaft, lifeboat, or rescue boat to provide protection against hypothermia (body heat loss during prolonged periods of exposure). These specifications are necessary so that the Coast Guard may approve thermal protective aids to be carried aboard U.S. vessels on an international voyage. The effect of the regulations will be to provide guidance to potential manufacturers of the devices so that they can design a product to fulfill the requirements of SOLAS 74/83, and to provide a vehicle for approval of the devices as required by SOLAS 74/83.

EFFECTIVE DATE: June 30, 1986. The Director of the Office of the Federal Register has approved the material incorporated by reference as of June 30, 1986.

ADDRESSES: The comments, final evaluation, and materials referenced in this final rule will be available for examination and copying between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays, at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593.

FOR FURTHER INFORMATION CONTACT: LCDR William M. Riley (202) 426-1444.

Drafting Information: The principal author of this final rulemaking is LCDR William M. Riley, Office of Merchant Marine Safety, assisted by the Office of the Chief Counsel.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published on October 1, 1985 (50 FR 40036), and invited comments for 90 days ending December 30, 1985. Numerous comments were received from four sources including one Great Lakes shipping company and three prospective manufacturers. The following summarizes the comments, suggestions, and actions taken.

Need for Thermal Protective Aids

One commenter suggested that, since exposure suits are far superior in protection, thermal protective aids should not be required on vessels carrying exposure suits. Another commenter stated that thermal protective aids, where carried, should be provided for 100% of the persons on board. Neither of these comments is pertinent to the subject of this rulemaking. Thermal protective aids will be required by the International Convention for Safety of Life at Sea (SOLAS 74/83) in certain survival craft after July 1, 1986. The requirements for vessels to carry thermal protective aids, including the substitution of exposure suits for thermal protective aids where practical, are included in a separate rulemaking.

Cost of Independent Laboratory Testing

Two prospective manufacturers expressed concern over the cost of testing by an independent laboratory. One of these commenters was extremely concerned that only Underwriters Laboratories will be adopted by the Coast Guard for such testing. The other commenter simply felt that the frequency of production inspection could be reduced.

The level of inspection proposed, i.e. prototype testing followed by visual examination of only one out of every 100 thermal protective aids produced, is considered the minimum worthwhile level of quality control and is quite reasonable. Independent laboratory inspection has been determined to be the most advantageous means of quality control for Coast Guard approved lifesaving equipment. The cost figures cited in the Draft Evaluation and Notice of Proposed Rulemaking were the Coast Guard's best estimate. No independent laboratory commented on the proposal and no commenter submitted any information on which to base a more accurate cost estimate. The Coast Guard has no preference for Underwriters Laboratories as an independent laboratory to test thermal protective aids, and will entertain applications from any organization interested in qualifying under 46 CFR Part 159. Underwriters Laboratories, Inc., if interested, will be required to apply for acceptance as an independent laboratory to test this particular product.

Watertightness

One of the prospective manufacturers questioned whether the thermal protective aids as a whole should be watertight. The other prospective manufacturer was adamant that the devices should have watertight zippers and be subjected to a water penetration test comparable to that used for exposure suits.

Thermal protective aids are intended to be used to reduce hypothermia in a survival craft, not in the water. The watertightness of the material is intended only to reduce evaporative heat loss and wind chill. Therefore no requirements for watertight closures have been incorporated.

Flame Resistance

One commenter suggested that the thermal protective aids should be flame resistant, in case the wearer was involved in firefighting or had to pass through a burning area before abandoning ship.

The thermal protective aids are intended to be stowed in a survival craft, to be donned after abandonment by persons who arrive at the embarkation station, or are recovered from the water, without an exposure suit. It is unlikely that the thermal protective aids will be exposed to flame under these conditions. SOLAS 74/83 specifically calls for flame resistance for lifejackets and immersion suits, but flame resistance is conspicuous by its absence in the requirements for thermal protective aids. Therefore no flame resistance test has been included in the final rule.

Material

One commenter suggested that the requirement for the thermal protective aids to be constructed of a "durable insulating or heat reflecting material" was too strict. This comment is without merit. We can envision no material which would be suitable for use in thermal protective aids which would not be encompassed by such broad language.

Feet

One commenter suggested that the thermal protective aids be required to have legs and feet with ankle straps and non-skid soles. SOLAS 74/83 describes a thermal protective aid as a "bag or suit," implying that something resembling a sleeping bag could be used. The Coast Guard feels that arms and hands of sufficient dexterity to enable the wearer to feed himself would be of value during extended periods in a survival craft, but we see no need to

require that the device have legs. It is sufficient that the device is required to cover the wearer's entire body with the exception of the face. It will generally be worn while in a seated position in a survival craft.

Sizes

One commenter suggested that thermal protective aids be made in as many as five sizes ranging from infant to oversize adult. Since only a few thermal protective aids will be required in each survival craft, to be used as a last resort by persons who abandon ship without benefit of exposure suits or other warm clothing, and since the mix of sizes of such victims cannot be predicted, a single size to fit all adults is the only practical approach.

Lifejacket

One commenter suggested that the option be allowed to design the thermal protective aids to be worn either over or under a lifejacket. SOLAS 74/83 requires that a thermal protective aid be capable of being worn over the lifejacket. It is not desirable for a survivor to remove his or her lifejacket even long enough to don the thermal protective aid. The potential need to remove the thermal protective aid in the water in order to swim also makes wearing the lifejacket outside the thermal protective aid impractical.

Buoyancy

One commenter suggested that, if thermal protective aids are buoyant, they be allowed to replace required lifejackets. The thermal protective aids must be compact devices for stowage in survival craft, including inflatable liferafts. Thermal protective aids as envisioned by these regulations would not be buoyant.

Storage Case

One commenter suggested that the description of the storage case is too restrictive, prohibiting the use of many "equally good or better" materials. This comment is without merit. The regulation establishes a minimum standard and any equally good or better material would be approved.

Date of Manufacture

One commenter suggested that the thermal protective aids be marked with the date of manufacture. This point is well taken and has been adopted.

Thermal Conductivity

One commenter pointed out that the units of measurement of thermal conductivity called for are not the same units used in the test methods incorporated by reference. The same commenter also suggested that another test method be used which is more appropriate for textiles.

The units of thermal conductivity used in the proposed rules are those called for by SOLAS 74/83. Reporting of the test results in these internationally accepted units is desirable and the conversion should be within the ability of any independent laboratory competent to perform the test.

Since the nature of the material which will ultimately be used to manufacture thermal protective aids is still unknown, and since American Society for Testing and Materials Method D 1518 is a convenient method for determining the thermal conductivity of textiles, this test method is incorporated in the final rule as an alternative.

Retroreflective Material

One commenter suggested that retroreflective material be required on thermal protective aids. This point is well taken and has been adopted.

Miscellaneous

One commenter submitted information concerning an existing product, in the nature of advertising. The information submitted, although it was addressed to the Commandant (G-CMC/21) and was in response to the notice of proposed rulemaking, did not contain any substantive comments on the proposed rules.

Discussions within the Office of Merchant Marine Safety have led to the conclusion that it will be easier to identify equipment approvals unique to SOLAS 74/83 if a subpart number in the series "160.100" is cited. Therefore, in the final rule, the new subpart has been redesignated 160.174 vice 160.074.

Economic Analysis and Certification

This final rule is considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979). A final evaluation has been prepared and placed in the rulemaking docket. It may be inspected or copied at the address listed above under **ADDRESSES**. Copies may also be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

This final rule will improve safety and meet the treaty obligations of the United States. The Coast Guard cannot predict, with any reasonable degree of certainty, the number of lives which might be saved by this final rule. Nevertheless, if even a single life is saved, the benefits will far exceed the costs. The cost of this final rule to the government will be the cost of a government engineer to review the independent laboratory report of the prototype testing, and the clerical cost to issue a certificate of approval for each design. This cost is estimated at $150 per approval for a total of $1,500, assuming some 10 manufacturers enter the market. The manufacturer's cost for testing of each prototype is estimated at $2,250, for a total cost of $22,500 for 10 manufacturers to perform prototype testing. Production testing is expected to cost 50¢ per unit if total production is on the order of 10,000 units. Based upon the estimated cost involved, the Coast Guard certifies that this final rule would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule making contains information collection requirements in §§ 160.174-15 and 160.174-23. These requirements have been previously submitted to the Office of Management and Budget for review under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) and have been approved by OMB under control number 2115-0141.

List of Subjects in 46 CFR Part 160

Marine safety, Incorporation by reference.

In consideration of the foregoing, Title 46 of the Code of Federal Regulations is amended as follows:

PART 160—LIFESAVING EQUIPMENT

1. By adding a new Subpart 160.174 to Part 160 to read as follows:

Subpart 160.174—Thermal Protective Aids

Sec.

160.174-1	Scope.
160.174-3	Incorporations by reference.
160.174-5	Independent laboratory.
160.174-7	Approval procedures.
160.174-9	Construction.
160.174-11	Performance.
160.174-13	Storage case.
160.174-15	Instructions.
160.174-17	Approval testing.
160.174-23	Marking.
160.174-25	Productive testing.

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

Subpart 160.174—Thermal Protective Aids

§ 160.174-4 Scope.

This subpart contains construction and performance requirements, and approval tests for thermal protective aids that are designed to minimize the occurrence of or aid in the recovery from hypothermia (lowered body temperature) during long periods in a survival craft.

§ 160.173–3 Incorporations by reference.

(a) Certain materials are incorporated by reference into this subchapter with the approval of the Director of the Federal Register. The Office of the Federal Register publishes a table, "Material Approved for Incorporation by Reference," which appears in the Finding Aids section of this volume. In that table is found citations to the particular sections of this part where the material is incorporated and the date of the approval by the Director of the Federal Register. To enforce any edition other than the one listed in paragraph (b) of the section, notice of change must be published in the Federal Register and the material made available. All approved material is on file at the Office of the Federal Register, Washington, DC 20408, and at the U.S. Coast Guard, Survival Systems Branch (G–MVI–3), Washington, DC 20593.

(b) The materials approved for incorporation by reference in this subpart are:

American Society for Testing and Materials

1916 Race Street, Philadelphia, PA 19103

ASTM C 177–76, Standard Test Method for Steady-State Thermal Transmission Properties by Means of the Guarded Hot Plate.

ASTM C 518–76, Standard Test Method for Steady-State Thermal Transmission Properties by Means of the Heat Flow Meter.

ASTM D 1518–77, Thermal Transmittance of Textile Materials Between Guarded Hot-Plate and Cool Atmosphere.

ASTM D 1004–66, Tear Resistance of Plastic Film and Sheeting.

ASTM D 975–81, Standard Specification for Diesel Fuel Oils.

General Services Administration

Specification Unit (WFSIA), Regional Office Building, Room 6039, 7th and D Streets SW., Washington, DC 20407

Federal Standard No. 751a—Stitches, Seams, and Stitchings.

National Bureau of Standards Special Publication 440—Color, Universal Language and Dictionary of Names.

§ 160.174–5 Independent laboratory.

(a) The approval and production tests and inspections in this subpart must be conducted by an independent laboratory accepted by the Coast Guard under Subpart 159.010 of this chapter.

§ 160.174–7 Approval procedures.

(a) *General.* A thermal protective aid is approved by the Coast Guard under the procedures in Subpart 159.005 of this chapter.

(b) *Approval testing.* Each approval test must be conducted in accordance with 160.174–17.

§ 160.174–9 Construction.

(a) *General.* Each thermal protective aid must be constructed primarily of a durable insulating or heat reflecting material that meets the thermal insulation requirements in § 160.174–11(a). Each aid must be designed to cover the wearer's entire body, except for the area of the mouth, nose, and eyes.

(b) *Seams.* Stitching, if used in structural seams of a thermal protective aid, must be lock type stitching that meets the requirements in Federal Standard No. 751 for one of the following:

(1) Class 300 lockstitch.

(2) Class 700 single thread lock stitch.

(c) *Seam strength.* Each seam must have a strength of at least 225 Newtons (50 lb.).

(d) *Hardware.* All hardware of a thermal protective aid must be of a size and design that allows ease of operation by the wearer. The hardware must be attached to the aid in a manner that allows the wearer to operate it easily and that prevents it from attaining a position in which it can be operated improperly.

(e) *Metal parts.* Each metal part of a thermal protective aid must be—

(1) 410 stainless steel or have salt water and salt air corrosion characteristics equal to or superior to 410 stainless steel; and

(2) Galvanically compatible with each other metal part in contact with it.

(f) *Thermal protective aid exterior.* The primary color of the exterior surface of each thermal protective aid must be vivid reddish orange (color number 24 of National Bureau of Standards Publication 440). The exterior surface of the aid must resist tearing when tested as prescribed in § 160.174–17(i).

(g) *Hand and arm construction.* The hand of each thermal protective aid must be a glove that allows sufficient dexterity for the wearer to close and open the zipper or other hardware of the aid and to open and eat survival rations, unless the glove is removable. The glove may not be removable unless it is attached to the arm and unless it can be secured to the arm or stowed in a pocket on the arm when not in use.

(h) *Retroreflective material.* Each thermal protective aid must be fitted with at least 200 cm^2 (31 sq. in.) of Type I retroreflective material that meets Subpart 164.018 of this chapter.

(i) *Size.* Each thermal protective aid must fit persons ranging in weight from 50 kg. (110 lbs.) to 150 kg. (330 lbs.) and in height from 1.5 m. (59 in.) to 1.9 m. (75 in.).

(j) *Lifejacket.* Each thermal protective aid must be designed so that any Type I Personal Flotation Device meeting the requirements of this Chapter can be worn inside the aid and, when worn, will not damage the aid and will not adversely affect its performance.

§ 160.174–11 Performance.

(a) *Thermal protection.* The thermal protective aid must be designed to protect against loss of body heat as follows:

(1) The thermal conductivity of the material from which the thermal protective aid is constructed must be not more than 0.25 W/(m − °K).

(2) The thermal protective aid must prevent evaporative heat loss.

(3) The aid must function properly at an air temperature of −30° C (−22° F) to +20° C (68° F).

(b) *Donning Time.* Each thermal protective aid must be designed to enable a person to don the aid correctly within one minute after reading the donning and use instructions described in § 160.174–15(a).

(c) *Storage Temperature.* A thermal protective aid must not be damaged by storage in its storage case at any temperature between −30° C (−22° F) and +65 C (149° F).

(d) *In water performance.* The thermal protective aid must be designed to permit the wearer to remove it in the water within two minutes, if it impairs ability to swim.

(e) *Water penetration.* The fabric from which the thermal protective aid is constructed must maintain its watertight integrity when supporting a column of water 2 meters high.

(f) *Oil resistance.* Each thermal protective aid must be designed to be useable after 24 hours exposure to diesel oil.

§ 160.174–13 Storage case.

Each thermal protective aid must be provided with a ziplock bag or equivalent storage case.

§ 160.174–15 Instructions.

(a) Each thermal protective aid must have instructions for its donning and use in an emergency. The instructions must be in English and must not exceed 50 words. Illustrations must be used in addition to the words. The instructions must include advice as to whether to swim in the aid or discard it if the wearer is thrown into the water.

(b) The instructions required by paragraph (a) of this section must be on the exterior of the storage case, printed

on a waterproof card attached to the storage case, or printed on the thermal protective aid and visible through a transparent storage case. The instructions must also be available in 8½ x 11 inch loose-leaf format for inclusion in the vessel's training manual.

§ 160.174–17 Approval testing.

(a) *General.* A thermal protective aid must be tested as prescribed in this section.

(b) *Mobility and swimming tests.* The mobility and swimming capabilities of each thermal protective aid must be tested under the following conditions and procedures:

(1) *Test subjects.* Seven males and three females must be used in the tests described in this paragraph. The subjects must represent each of the three physical types (ectomorphic, endomorphic, and mesomorphic). Each subject must be in good health. The heaviest male subject must weigh at least 25 kg (55 lb) more than the lightest male subject. The heaviest female subject must weigh at least 25 kg (55 lb) more than the lightest female subject. The heaviest subject must weigh 150±5 Kg (330±11 lbs.) and the lightest subject must weigh 50±5 Kg (110±11 lbs.). Each subject must be unfamiliar with the specific thermal protective aid under test. Each subject must wear a standard range of clothing consisting of:

(i) Underwear (short sleeved, short legged);

(ii) shirt (long sleeved);

(iii) Trousers (not woolen);

(iv) Woolen socks;

(v) Rubber soled shoes; and

(vi) A life preserver.

(2) *Donning test.* Each subject is removed from the view of the other subjects and allowed one minute to examine the thermal protective aid and the manufacturer's instructions for donning and use of the aid in an emergency. At the end of this period, the subject attempts to don the thermal protective aid as rapidly as possible. If the subject does not don the thermal protective aid completely, including gloves and any other accessories, within 60 seconds, the subject removes the aid and is given a demonstration of correct donning, and again attempts to don the aid. At least nine out of ten subjects must be able to don the thermal protective aid completely in 60 seconds on at least one of the two attempts.

(3) *Discarding test.* If the thermal protective aid impairs the ability of the wearer to swim, it must be demonstrated that it can be discarded by the test subjects, when immersed in water in not more than two minutes.

Caution: During each of the in water tests prescribed in this section, a person ready to render assistance when needed should be near each subject in the water.

(i) Unless the manufacturer specifies in the instructions that the thermal protective aid does impair ability to swim and should always be discarded in the water, each subject, wearing a life preserver, enters the water and swims 25 meters. The subject, after sufficient rest to avoid fatigue, repeats this test wearing a thermal protective aid in addition to the life preserver. At least nine out of ten subjects must be able to swim this distance wearing the thermal protective aid in not more than 125% of the time taken to swim the distance wearing only a life preserver, or the aid will be determined to impair the ability to swim.

(ii) If the thermal protective aid is determined by the above test or specified by the manufacturer to impair the ability to swim, each subject, after entering the water from a height of one meter (three feet), attempts to remove the aid and discard it. At least nine out of ten subjects must be able to discard the device within two minutes.

(d) *Storage temperature.* Two samples of the thermal protective aids, in their storage cases, are alternately subjected to surrounding temperatures of −30° C to +65° C. These alternating cycles need not follow immediately after each other and the following procedure, repeated for a total of ten cycles, is acceptable:

(1) 8 hours conditioning at 65° C to be completed in one day;

(2) The specimens removed from the warm chamber that same day and left exposed under ordinary room conditions until the next day;

(3) 8 hours conditioning at −30° C to be completed the next day; and

(4) The specimens removed from the cold chamber that same day and left exposed under ordinary room conditions until the next day. At the conclusion of step (3) of the final cycle of cold storage, two test subjects who successfully completed the donning test previously enter the cold chamber, unpack and don the thermal protective aids. The aids must not show any damage, such as shrinking, cracking, swelling, dissolution or change of mechanical qualities.

(e) *Water penetration.* A sample of the fabric from which the thermal protective aid is constructed is installed as a membrane at one end of a tube of at least 2.5 cm (one inch) diameter and 2 meters long. The tube is fixed in a vertical position with the membrane at the bottom, and filled with water. After one hour the membrane must continue to support the column of water with no leakage.

(f) *Insulation.* The material from which the thermal protective aid is constructed is tested in accordance with the procedures in ASTM C 177, ASTM C 518, or ASTM D 1518. The material must have a thermal conductivity of not more than 0.25 W/(m−°K).

(g) *Test for oil resistance.* After all its apertures have been sealed, a thermal protective aid is immersed under a 100 mm head of diesel oil, grade no. 2–D as defined in ASTM D–975, for 24 hours. The surface oil is then wiped off and a sample of the material from the aid is again tested in accordance with the procedures in ASTM C 177 or ASTM C 518. The material must still have a thermal conductivity of not more than 0.25 W/(m−°K).

(h) *Seam strength.* The strength of each different type of seam used in a thermal protective aid must be tested under the following conditions and procedures.

(1) *Test equipment.* The following equipment must be used in this test:

(i) A chamber in which air temperature can be kept at 25° C (73.4° F) ±2° C (1.8° F) and in which relative humidity can be kept at 50% ±5%.

(ii) A device to apply tension to the seam by means of a pair of top jaws and a pair of bottom jaws. Each set of jaws must grip the material on both sides so that it does not slip when the load is applied. Each front jaw must be 25 mm (1 inch) wide by 25 mm (1 inch) long. The distance between the jaws before the load is applied must be 75mm (3 inches).

(2) *Test samples.* Each test sample consists of two pieces of the material from which the thermal protective aid is constructed, each of which is 100 mm (4 inches) square. The two pieces are joined by a seam as shown in figure 160.071–17(m)(3). For each type of seam, 5 samples are required. Each sample may be cut from a thermal protective aid or may be prepared specifically for this test. One type of seam is distinguished from another by the type and size of stitch or other joining method used (including orientation of warp and fill, if any) and by the type and thickness of the materials joined at the seam.

(3) *Test procedure.* Each sample is conditioned for at least 40 hours at 23° C±2° C and 50% ±5% relative humidity. Immediately after conditioning, each sample is mounted individually in the tension device as shown in figure 160.071–17(m)(3). The jaws are separated at a rate of 5 mm/second (12 in/minute). The maximum force to

achieve rupture is recorded. The average force at rupture must be at least 225 Newtons (50 lb).

(i) *Tear resistance.* The tear resistance of the material from which a thermal protective aid is constructed must be determined by the method described in ASTM D 1004. If more than one material is used, each material must be tested. If varying thicknesses of a material are used in the aid, samples representing the thinnest portion of the material must be tested. If multiple layers of a material are used in the aid, samples representing the layer on the exterior of the aid must be tested. Any material that is a composite formed of two or more materials bonded together is considered to be a single material. The average tearing strength of each material must be at least 45 Newtons (10 lb).

§ 160.174-23 Marking.

(a) Each thermal protective aid must be marked with the words "Thermal Protective Aid," the name of the manufacturer, the model, the date of manufacture or a lot number from which the date of manufacture may be determined, and the Coast Guard approval number.

(b) Each storage case must be marked with the words "Thermal Protective Aid" or the thermal protective aid must have a similar marking which is visible through a transparent storage case.

§ 160.174-25 Production testing.

(a) Thermal protective aid production testing is conducted under the procedures in this section and Subpart 159.007 of this chapter.

(b) One out of every 100 thermal protective aids produced must be given a complete visual examination. The sample must be selected at random from a production lot of 100 thermal protective aids and examined by or under the supervision of the independent laboratory. The sample fails if the visual examination shows that the aid does not conform to the approved design.

(c) If a defect in the thermal protective aid is detected upon visual examination, 10 additional samples from the same lot must be selected at random and examined for the defect.

(d) If one or more of the 10 samples fails the examination, each thermal protective aid in the lot must be examined for the defect for which the lot was rejected. Only thermal protective aids that are free of defects may be sold as Coast Guard approved.

Dated: May 23, 1986.

J.W. Kime,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1 and 73

FCC 86-241

Practice and Procedure; Amendment of the Rules To Allow Publication of Summaries of Orders Designating Applications for Hearing

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends § 1.221(b) of the Commission's Rules to authorize it to publish in the Federal Register summaries of hearing designation orders. The Commission is also amending the Rules with clarifying language specifically authorizing Federal Register publication of the full hearing designation orders or summaries thereof. This action is taken as part of the Commission's effort to minimize publishing costs.

EFFECTIVE DATE: May 29, 1986.

FOR FURTHER INFORMATION CONTACT: William J. Tricarico, Secretary, Federal Communications Commission, Washington, DC 20554, (202) 632-6410.

SUPPLEMENTARY INFORMATION:

Order

Adopted: May 7, 1986.
Released: May 20, 1986.

By the Commission:

1. By this *Order* the Commission decides that, commencing immediately, it will amend its rules to allow it to publish summaries of orders designating applications for hearing in the Federal Register. Current Commission rules generally contemplate Federal Register publication of the full text of hearing designation orders.[1] However, due to budgetary constraints and the rising cost of Federal Register publication, the Commission has concluded that the publication of summaries of hearing designation orders will be a reasonable and cost-efficient method of apprising potential intervenors of issues that might be of concern to them. The summaries will consist of a summary of the explanatory text of the hearing designation order and the full text of the issues designated for hearing on an application. For mass media services, the summaries will be an abstract of the hearing designation order, and include the names of the parties and list the hearing issues. The list of hearing issues will be keyed to the definitions set forth in the Appendix to this *Order*. The published summaries will additionally advise how copies of the complete hearing designation order may be obtained.[2]

2. Section 309(e) of the Communications Act provides:

> When the Commission has so designated an application for hearing, the parties in interest, if any, who are not notified by the Commission of such action may acquire the status of a party to the proceeding thereon by filing a petition for intervention showing the basis for their interest not more than thirty days after publication of the hearing issues or any substantial amendment thereto in the Federal Register.

47 U.S.C. 309(e). Specifically, the legislative history of section 309(e) indicates that Congress sought to balance the intervenor's right to protect his interests and participate in the hearing against the Commission's interest in expediting formal hearings. To effect this balance, Congress decided that the intervenor's filing period would run from the date of publication of the hearing issues, rather than the day set for commencement of the hearing. *See* H.R. Rep. No. 1351, 88th Cong., 2nd Sess. 5 (1964). Federal Register publication was designed to afford a potential intervenor sufficient notice "to protect his . . . interest." *Id.* 2; *see also id.* at 5 (FCC report on H.R. 5327).

3. In view of this, the Commission has determined that publication of summaries of hearing designation orders with either the full text of the hearing issues or, for the mass media services, a list of the hearing issues keyed to a definitional Appendix, will give notice of the issues designated on an application and satisfy the statutory purposes of section 309(e). Therefore, the Commission is amending § 1.221(b) of the rules, 47 CFR 1.221(b), which calls

[1] We note, however, that since 1983 the FM Branch, Audio Services Division, Mass Media Bureau, has published hearing designation order abstracts and not their full texts.

[2] The full text of hearing designation orders are available on the date of release from the Office of Congressional and Public Affairs. Thereafter, the full texts will be available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 239), 1919 M Street, NW., Washington, DC, or as otherwise specified in the summary published in the Federal Register. The complete texts may also be purchased from the Commission's duplicating contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

for Federal Register publication of full hearing designation orders, to authorize it also to publish a summary of the hearing designation order. The Commission is also amending §§ 1.223(b), 1.223(c), and 1.229(b) of the rules, 47 CFR 1.223(b), 1.223(c), and 1.229(b), with clarifying language explicitly authorizing Federal Register publication of the complete hearing designation order or a summary thereof. For mass media services, a hearing designation order summary will include a list of hearing issues which will be keyed to the definitions set forth in the Appendix to this *Order*. Both this *Order* and the Appendix will be published together in the Federal Register.

4. Prior notice and public comment procedures are not required because this action is interpretive and procedural in nature. *See* 5 U.S.C. 553(b)(3)(B), 47 CFR 1.412(b)(3) and (5).

5. Accordingly, it is ordered, pursuant to authority provided by sections 4(i), 4(j), and 303(r) of the Communications Act, 47 U.S.C. 154(i), 154(j), and 303(r), that the Commission's Rules ARE AMENDED as shown at the end of this document.

6. It is further ordered that this *Order* is effective upon publication in the Federal Register. *See* 5 U.S.C. 553(d)(2), 47 CFR 1.427(b).

* * * * *

List of Subjects in 47 CFR Part 1

Administrative practice and procedure.

PART 1—[AMENDED]

Part 1 of Title 47 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 1 continues to read:

Authority: 47 U.S.C. 154, 303.

2. In § 1.221, paragraph (b) is revised to read as follows.

§ 1.221 Notice of hearing; appearances.

* * * * *

(b) The order designating an application for hearing is mailed to the applicant by the Secretary of the Commission and this order or a summary thereof is published in the Federal Register. Reasonable notice of hearing will be given to the parties in all proceedings; and, whenever possible, the Commission will give at least 60 days notice of comparative hearings.

* * * * *

3. In § 1.223, paragraphs (b) and (c) are revised to read as follows:

§ 1.223 Petitions to intervene.

* * * * *

(b) Any other person desiring to participate as a party in any hearing may file a petition for leave to intervene not later than 30 days after the publication in the Federal Register of the full text or a summary of the order designating an application for hearing or any substantial amendment thereto. The petition must set forth the interest of petitioner in the proceedings, must show how such petitioner's participation will assist the Commission in the determination of the issues in question, must set forth any proposed issues in addition to those already designated for hearing, and must be accompanied by the affidavit of a person with knowledge as to the facts set forth in the petition. The presiding officer, in his discretion, may grant or deny such petition or may permit intervention by such persons limited to a particular stage of the proceeding.

(c) Any person desiring to file a petition for leave to intervene later than 30 days after the publication in the Federal Register of the full text or a summary of the order designating an application for hearing or any substantial amendment thereto shall set forth the interest of petitioner in the proceeding, show how such petitioner's participation will assist the Commission in the determination of the issues in question, must set forth any proposed issues in addition to those already designated for hearing, and must set forth reasons why it was not possible to file a petition within the time prescribed by paragraphs (a) and (b) of this section. Such petition shall be accompanied by the affidavit of a person with knowledge of the facts set forth in the petition, and where petitioner claims that a grant of the application would cause objectionable interference under applicable provisions of this chapter, the petition to intervene must be accompanied by the affidavit of a qualified radio engineer showing the extent of such alleged interference according to the methods prescribed in paragraph (a) of this section. If, in the opinion of the presiding officer, good cause is shown for the delay in filing, he may in his discretion grant such petition or may permit intervention limited to particular issues or to a particular stage of the proceeding.

* * * * *

4. In § 1.229, paragraph (b) is revised to read as follows:

§ 1.229 Motions to enlarge, change, or delete issues.

* * * * *

(b) Such motions must be filed within 15 days after the full text or a summary of the order designating an application for hearing has been published in the Federal Register. In comparative broadcast proceedings (including comparative renewal proceedings), however, such motions shall be filed within 30 days after the full text or a summary of the designation order has been published in the Federal Register. Any person desiring to file a motion to modify the issues after expiration of the above specified periods shall set forth the reason why it was not possible to file the motion within the prescribed period. Except as provided in paragraph (c) of this section, the motion will be granted only if good cause is shown for the delay in filing. Motions for modification of issues which are based on new facts or newly discovered facts shall be filed within 15 days after such facts are discovered by the moving party.

* * * * *

5. In § 73.3522, paragraph (b)(2) is revised to read as follows:

§ 73.3522 Amendment of applications.

* * * * *

(b) *Postdesignation amendment.*

* * * * *

(2) In comparative broadcast cases (including comparative renewal proceedings), amendments relating to issues first raised in the designation order may be filed as a matter of right within 30 days after that Order or a summary thereof is published in the Federal Register, or by a date certain to be specified in the Order.

6. In § 73.3594, paragraphs (d)(4) and (f)(4) are revised to read as follows:

§ 73.3594 Local public notice of designation for hearing.

* * * * *

(d) * * *

(4) The issues in the hearing as listed in the FCC's order or summary of designation for hearing.

(e) * * *

(f) * * *

(4) The issues in the hearing as listed in the FCC's order or summary of designation for hearing.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Issues

City Coverage—AM—To determine whether the proposal of the applicant(s) would provide coverage of the city sought to be served, as required by §73.24(j) of the Commission's Rules, and, if not, whether circumstances exist which warrant waiver of that Section.

City Coverage—FM—To determine whether the proposal of the applicant(s) would provide coverage of the city sought to be served, as required by §73.315(a) of the Commission's Rules, and, if not, whether circumstances exist which warrant waiver of that Section.

City Coverage—TV—To determine whether the proposal of the applicant(s) would provide coverage of the city sought to be served, as required by §73.685(a) of the Commission's Rules, and, if not, whether circumstances exist which warrant waiver of that Section.

Rule 73.685—To determine, with respect to the applicant(s), whether circumstances exist to warrant a waiver of § 73.685( ) of the Commission's Rules.

Minimum Separations—To determine, with respect to the applicant(s), whether circumstances exist to warrant a waiver of § 73.610 of the Commission's Rules.

Air Hazard—To determine, with respect to the applicant(s), whether there is a reasonable possibility that the tower height and location proposed would constitute a hazard to air navigation.

Main Studio—To determine, pursuant to § 73.1125, whether good cause exists for the proposed location of the main studio outside the community of license by the applicant(s).

Site Availability—To determine whether the applicant(s) has reasonable assurance that the transmitter site specified will be available to it.

Environmental Impact—If a final environmental impact statement is issued with respect to the applicant(s), in which it is concluded that the proposed facilities are likely to have an adverse effect on the quality of the environment, to determine whether the proposal is consistent with the National Environmental Policy Act, as implemented by §§ 1.1301–1319 of the Commission's Rules.

Multiple Ownership—To determine, with respect to the applicant(s), whether the common ownership, operation and control of [station/newspaper] and the proposed station is consistent with § 73.3555 of the Commission's Rules and, if not, whether a grant of the application would be in the public interest.

Cross-interest—To determine, with respect to the applicant(s), whether the involvement of [named individual] with [station/newspaper] is consistent with the Commission's cross-interest policy and, if not, whether a grant of the application would be in the public interest.

Satellite—To determine, with respect to the applicant(s), whether circumstances exist which would make the proposed television operation as a "satellite" or "primarily a satellite" necessary for the community.

Alien Control—To determine whether the applicant/licensee is controlled by aliens or their representatives in violation of section 310(b) of the Communications Act of 1934, as amended.

Misrepresentation—To determine whether the applicant/licensee made misrepresentations to the Commission, was lacking in candor in its dealings with the Commission or attempted to deceive or mislead the Commission.

Qualifications—To determine, in light of the evidence adduced pursuant to the issues specified, whether the applicant(s) is qualified to construct and operate the requested facilities as proposed.

Financial Qualifications—To determine with respect to the following applicant(s) whether, in light of the evidence adduced concerning the deficiency set forth above in this Order, the applicant(s) is financially qualified.

307(b)—To determine: (a) The areas and populations which would receive primary aural service from the proposals and the availability of other primary service to such areas and populations; and (b) in light thereof and pursuant to section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio services.

307(b)—Modification—To determine: (a) The areas and populations which would receive primary aural service from the proposal(s) of the applicant(s) for new facilities and the availability of other primary service to such areas and populations; (b) the areas and populations which would gain or lose primary aural service from the proposal(s) of the applicant(s) for modifications of existing facilities and the availability of other primary service to such areas and populations; and (c) in light thereof and pursuant to section 307(b) of the Communications Act of 1934, as amended, which of the proposals (or combination of proposals) would best provide a fair, efficient and equitable distribution of radio service.

307(b)—Noncommercial Educational—To determine: (a) The number of other reserved channel noncommerical educational FM services available in the proposed service area of each applicant, and the area and population served thereby; (b) whether a share-time arrangement between the applicants would result in the most effective use of the channel and thus better serve the public interest and, if so, the terms and conditions thereof; and (c) in light of section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

Comparative—To determine which of the proposals would, on a comparative basis, [better/best] serve the public interest.

Comparative—Noncommercial Educational TV—To determine: (a) The extent to which each applicant's proposed operation will be integrated into the overall cultural and educational objectives of the respective applicants; (b) the manner in which each applicant's proposed operation meets the needs of the community to be served; and (c) whether the factors in the record demonstrate that one applicant will provide a superior noncommercial educational broadcast service.

Comparative—Noncommercial Educational FM—To determine: (a) Whether a share-time arrangement between the applicants would result in the most effective use of the channel and thus better serve the public interest, and, if so, the terms and conditions thereof; (b) the extent to which each of the proposed operations will be integrated into the overall educational operation and objectives of the respective applicants; and (c) whether other factors in the record demonstrate that one applicant will provide a superior FM educational broadcast service.

Contingent Comparative—To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

Contingent Comparative—Noncommercial Educational FM—To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to section 307(b), the extent to which each of the proposed operations will be integrated into the overall educational operation and the objectives of the respective applicants; and whether other factors in the record demonstrate that one applicant will provide a superior FM educational broadcast service.

Ultimate—To determine, in the light of the evidence adduced pursuant to the specified issues, which of the applications should be granted, if any.

VETERANS ADMINISTRATION

48 CFR Part 808

Acquisition Regulations; Ordering From Federal Supply Schedules

AGENCY: Veterans Administration.

ACTION: Final rule.

SUMMARY: This revision amends the Veterans Administration Acquisition Regulation (VAAR) to conform with the Federal Acquisition Regulation (FAR) which permits an ordering agency to purchase identical items at a lower price than on Federal Supply Schedule (FSS) Groups 65 and 89 without obtaining approval prior to the actual purchase of the item and to indicate where waivers from FSS Groups 65 and 89 may be sent.

EFFECTIVE DATE: This rule is effective June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas A. Hamilton, Policy and Interagency Service, Office of Procurement and Supply, 810 Vermont Avenue, NW., Washington, DC 20420, Telephone (202) 389-2334.

SUPPLEMENTARY INFORMATION:

I. Executive Order 12291

Pursuant to the memorandum from the Director, Office of Management and Budget, to the Administrator, Office of Federal Procurement Policy, and the Administrator, Office of Information and

Regulatory Affairs, dated December 13, 1984, this rule is exempt from sections 3 and 4 of the Executive Order 12291.

E. Regulatory Flexibility Act (RFA)

Because this rule does not come within the term "rule" as defined in the RFA (5 U.S.C. 601(2)), it is not subject to the requirements of that Act. In any case, this change, in itself, will not have a significant economic impact on a substantial number of small entities because the VAAR subpart will primarily implement the regulations set forth in FAR Subpart 8.4.

III. Paperwork Reduction Act

This rule requires no additional information collection or recordkeeping requirements upon the public.

Government procurement.

Approved: May 16, 1986.

Thomas K. Turnage,

Administrator.

Part 808 of Title 48 of the Code of Federal Regulations is amended to read as follows:

PART 808—REQUIRED SOURCES OF SUPPLIES AND SERVICES

1. The authority citation for Part 808 continues to read as follows:

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

2. Section 808.404–1 is amended by adding the paragraph designation "(a)" at the beginning of the first paragraph and by adding paragraph (b) to read as follows:

808.404–1 Mandatory use.

(a) * * *

(b) *Lower prices for identical items.*

(1) When an ordering agency finds an item which is identical to one listed on FSS Group 65 or 80, but available at a lower delivered price from a lower priority source, the ordering office may purchase the item subject to the requirements set forth in FAR 8.404–1(e). A copy of the purchase order shall be sent to the Director, VA Marketing Center at the time the order is issued.

(2) An identical item is defined as: (i) nondrug item—same manufacturer and model number, or (ii) drug item—have the same National Drug Code (NDC) number.

3. Section 808.404–3 is revised to read as follows:

808.404–3 Requests for waivers.

When an ordering office determines that an item available from FSS Group 65 or 80 will not meet its specific needs, it should submit a request for waiver to the Director, VA Marketing Center. The request shall contain the information set forth in FAR 8.404–3(a)(1) through (4).

BILLING CODE 8320-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

[Docket No. 60477–6077]

Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of rescission of closure.

SUMMARY: The Secretary of Commerce (Secretary) announces the rescission in the fishery conservation zone (FCZ) of the season closure of the non-Indian commercial salmon fishery in the fishery conservation zone (FCZ) for all species except coho from the U.S.-Canada border to Cape Falcon, Oregon. The fishery was closed at midnight, May 19, 1986, when it was projected that the harvest quota had been reached. Subsequent evaluation of landings indicate that approximately 6,900 fish remain to be harvested in the troll quota. This reopening is calculated to maximize ocean harvest of chinook salmon without exceeding the established quota.

DATES: Reopening of the FCZ from the U.S.-Canada border to Cape Falcon, Oregon, to non-Indian commercial salmon fishing is effective at 0001 hours Pacific Daylight Time (PDT) May 24, 1986, until 2400 hours PDT May 27, 1986. Comments on this notice will be received until June 13, 1986.

ADDRESS: Comments may be mailed to the Northwest Regional Office, NMFS, BIN C15700, 7600 Sand Point Way, NE., Seattle, WA 98115–0070. Information relevant to this notice has been compiled in aggregate form and is available for public review during business hours at the same address.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten (Regional Director), 206–526–6150.

SUPPLEMENTARY INFORMATION: Regulations governing the ocean salmon fisheries at 50 CFR Part 661 specify at § 661.21(a)(2) that "If a fishery is closed under a quota before the end of a scheduled season based on an overestimate of actual catch, the Secretary may reopen that fishery for all or part of the remaining original season by publishing a notice in the **Federal Register** under § 661.23, in order to allow the quota to be met so long as the additional period is no less than 24 hours."

The commercial fishery from the U.S.-Canada border to Cape Falcon, Oregon, was closed at midnight, May 19, 1986, (51 FR 18795, May 22, 1986) when it was projected that the harvest quota of 33,700 chinook salmon had been caught. A subsequent evaluation of landings indicated that the original projection was based on an overestimate of actual catch. Commercial landings of chinook salmon in the area totaled 26,800 fish.

Since fishermen landed an average of about 1,600 chinook per day during the last four days of fishing, the 6,900 fish remaining in the quota could be harvested in four days. The Secretary therefore issues this notice to reopen the non-Indian commercial fishery in the FCZ from the U.S.-Canada border to Cape Falcon, Oregon, for four days, from 0001 hours PDT May 24, 1986 to 2400 hours PDT on May 27, 1986.

The Regional Director consulted with the Directors of the Washington Department of Fisheries (WDF) and the Oregon Department of Fish and Wildlife (ODFW) regarding this reopening. The Directors of WDF and ODFW confirmed that Washington and Oregon will reopen the commercial fishery in State waters adjacent to this area of the FCZ during the same time period.

Other Matters

This action is taken under §§ 661.21 and 661.23 and is in compliance with Executive Order 12291.

BILLING CODE 3510-22-M

50 CFR Part 661

Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California; Corrections

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final 1986 fishery management measures and request for comments; corrections.

SUMMARY: This document adds an additional footnote and makes corrections to Table 1 in the final 1986

fishery management measures for the ocean salmon fisheries off the coasts of Washington, Oregon, and California, published May 5, 1986, 51 FR 16520.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206–526–6150; E. Charles Fullerton, 213–514–6195; or the Pacific Fishery Management Council, 503–221–6352.

In FR Doc. 86–10023, on page 16523 in the issue of May 5, 1986, the following corrections are made to Table 1:

1. The footnote symbol "o/" is added to the heading of column 4, to read, "Minimum size limit (inches)°/".

2. The phrase "All except coho" is inserted in column 2 in the line referring to United States-Canada Border to Cape Falcon, "May 14 through earlier of May 31 or chinook quota" in column 1.

3. An additional footnote symbol "d/" is added to the first entry in column 4 under the "Coho" subheading under the "Quotas" heading, which is corrected to read "3/4 30,000".

4. The phrase that begins "June 30" under Cape Blanco to Point Delgada in column 1 is corrected by changing "earlier" to "earliest" and inserting a comma after "Aug. 31", to read ". . . earliest of Aug. 31, coho quota, or chinook quota.".

5. The phrase "All except coho" is inserted in column 2 in the line referring to Cape Blanco to Port Delgada, "Coho quota through earlier of Aug. 31 or chinook quota" in column 1.

6. The word "Lastest" is corrected to "Latest" in column 1 immediately under "Sisters Rocks to Mack Arch:" and "28" is inserted in this line under column 5.

7. Footnote "f/" is corrected by deleting "(Lighthouse Buoy)" and inserting in its place "(Columbia River Buoy)".

8. Footnote "g/" is corrected by adding a period after "463,000 coho" and inserting the word "hooking" before "mortality" in the second sentence.

9. The following footnote is added at the end of the footnotes relating to Table 1 on page 16524:

• Applicable minimum lengths, in inches, for dressed, head-off salmon are as follows:

Chinook		Coho	
Total fish	Headoff (inches)	Total fish	Headoff (inches)
28 26	21.5 19.5	16 22	12.0 16.5

(16 U.S.C. 1801 *et seq.*)

Dated: May 23, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

[FR Doc. 86–12065 Filed 5–28–86; 8:45 am]

BILLING CODE 3510-22-M

---

50 CFR Part 672

[Docket No. 61100–5160]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the share of the sablefish optimum yield (OY) allocated to hook-and-line gear in the Central Regulatory Area of the Gulf of Alaska will be achieved on May 26, 1986. A closure of the fishery for sablefish by hook-and-line gear is necessary to limit the harvest of sablefish by hook-and-line gear to the 55 percent of the OY that is permissible by Federal law in this district. This closure is a management measure intended to allocate the sablefish resource between hook-and-line, trawl, and pot gear in the Central Regulatory Area as required by the Fishery Management Plan for Groundfish Fishery of the Gulf of Alaska (FMP).

DATES: This notice is effective at noon, Alaska Daylight Time (ADT), May 26, 1986, until midnight, AST, December 31, 1986. Public comments are invited on this closure until June 10, 1986.

ADDRESS: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m., Monday through Friday) at the Alaska Regional Office, NMFS, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Management Biologist, NMFS), 586–7230.

SUPPLEMENTARY INFORMATION: The FMP, which governs the groundfish fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act) provides for inseason adjustments of fishing seasons and areas. Regulations at § 672.22(a) specify that these adjustments will be made by the Secretary of Commerce under procedures set out in that section.

Section 672.2 defines three regulatory areas in the Gulf of Alaska. One of these is the Central Regulatory Area. The OY for sablefish in this area is 6,150 metric tons (mt). Section 672.24(b)(2) of the regulations restricts the take of sablefish in this area by hook-and-line gear to 55 percent of the OY, or 3,383 mt.

As many as 100 hook-and-line vessels have conducted a directed fishery for sablefish during the fishing season, which began on April 1, 1986. Landings through May 20, 1986, total 2,864 mt, leaving a balance of the OY allocated to hook-and-line vessels of 519 mt. The fleet will harvest this remainder with hook-and-line gear by May 26, 1986, and further directed sablefish fishing with hook-and-line gear after ADT noon on that date is prohibited. Sablefish landings by hook-and-line vessels west of the Central Regulatory Area i.e., west of 159° West longitude, are expected to increase rapidly as part of the fleet moves west following notice of this closure.

Section 672.24(b) requires the NMFS Regional Director to close fishing for groundfish with a gear type in an area when the sablefish share allocated to that gear type in that area has been taken. At its January 15–17, 1986, meeting, however, the Council recommended that NOAA amend this regulation to allow the Regional Director to prohibit retention of sablefish by a gear type that had taken its share of the sablefish OY in that area but still allow directed fisheries for other groundfish species to continue. Sablefish must be treated as a prohibited species by that gear type, providing that overfishing of sablefish would not result. The Alaska Region has submitted an emergency rule that would amend this regulation to implement the Council's recommendation.

The requirement of § 672.20(b) that all groundfish fishing by a gear type in an area be closed when its sablefish allocation for that area has been taken conflicts with the FMP as interpreted by the Council and NMFS. The Regional Director is therefore, not obliged even before promulgation of the new rule to impose such a closure, provided that continued fishing by that gear type will not cause overfishing of sablefish. The Regional Director has reviewed the bycatches of sablefish that might be taken in other directed groundfish hook-and-line fisheries in the Central Regulatory Area and finds that continued fishing for other groundfish species will not cause overfishing of sablefish.

VOL 51 ISS 103 MY 29 1986 UMI

This closure will be effective when this notice is filed for public inspection with the Federal Register and after it has been publicized for 48 hours through procedures of the Alaska Department of Fish and Game. Public comments on this notice of closure may be submitted to the Regional Director at the address above for 15 days following its effective date. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the Federal Register, either confirming this notice's continued effect, modifying it, or rescinding it.

Other Matters

Allocation of the sablefish resource between hook-and-line, trawl, and pot gear in the Central Regulatory Area as required by the FMP and the continued health of that resource will be jeopardized unless this closure takes effect promptly. NOAA therefore finds for good cause that prior opportunity for public comment on this notice is contrary to the public interest and that its effective date should not delayed.

This action is taken under §§ 672.22 and 672.24 and is taken in compliance with Executive Order 12291.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 51, No. 103
Thursday, May 29, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1065

Notice of Proposed Temporary Revision of Diversion Limitation Percentages; Milk in the Nebraska-Western Iowa Marketing Area

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed temporary revision of rule.

SUMMARY: This notice invites written comments on a proposal to relax temporarily certain provisions of the Nebraska-Western Iowa Federal milk order. The proposed action would relax for the months of May through August 1986 the limits on how much milk not needed for fluid (bottling) use may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The action was requested by a cooperative association representing a substantial number of producers supplying the market in order to prevent uneconomic movements of milk.

DATE: Comments are due no later than June 5, 1986.

ADDRESS: Comments (two copies) should be sent to: Dairy Division, AMS, Room 2968, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, Dairy Division, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-7311.

SUPPLEMENTARY INFORMATION: The Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the provisions of § 1065.13(d)(4) of the order, the temporary revision of certain provisions of the order regulating the handling of milk in the Nebraska-Western Iowa marketing area is being considered for the months of May through August 1986.

All persons who desire to submit written data, views or arguments about the proposed revision should send two copies of their views to the Dairy Division, AMS, Room 2968, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, by the 7th day after publication of this notice in the Federal Register. The period for filing comments is limited to seven days because a longer period would not provide the time needed to complete the required procedures and include May 1986 in the temporary revision period.

All written submissions made pursuant to this notice will be made available for public inspection in the Dairy Division during regular business hours (7 CFR 1.27(b)).

Statement of Consideration

The provisions proposed to be revised are the diversion limitation percentages set forth in § 1065.13(d). The revisions would be applicable for the months of May through August 1986. The specific revisions would increase the diversion limitation percentages for the months of May through August 1986 by 10 percentage points from the present 50 percent to 60 percent.

Section 1065.13(d) of the Nebraska-Western Iowa milk order allows the Director of the Dairy Division to increase the diversion limitation percentages by up to 20 percentage points during any month to prevent uneconomic shipments merely for the purpose of assuring that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

Associated Milk Producers, Inc. (AMPI), a cooperative association which represents producers supplying the Nebraska-Western Iowa market, requested that for the months of May through August 1986, the percentage of allowable diversions be increased 10 percentage points.

The cooperative states that Class I needs for January through April 1986 increased less than one percent over the same period in 1985, while producer milk has increased more than 13 percent. According to the association, the milk surplus to the fluid needs of the market must go to manufacturing facilities. For the purposes of preserving milk quality by requiring less pumping and allowing milk to be moved in the most efficient manner possible, the cooperative states that the most desirable way of handling the additional milk is to ship it directly to nonpool plants. AMPI believes that the proposed temporary increase in diversion limits will have no affect on the ability of distributing plants to obtain needed supplies of milk for Class I use, and will prevent uneconomic shipments merely for the purpose of assuring that dairy farmers historically associated with the market will continue to have their milk priced under the order.

Therefore, it may be appropriate to relax the aforementioned provisions of § 1065.13(d) for the months of May through August 1986 to prevent uneconomic shipments of milk.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 740, 741, and 745

Federally-Insured Credit Unions; National Credit Union Administration

AGENCY: National Credit Union Administration (NCUA).

ACTION: Extension of Comment Period.

SUMMARY: This document extends the comment period on proposed amendments to NCUA's rules on Advertising, Requirements for Insurance and Voluntary Termination on Conversion of Insurance, and Clarification and Definition of Account Insurance Coverage. On April 25, 1986, the NCUA Board proposed to amend these regulations relating to the insurance provided by the National Credit Union Share Insurance Fund (51 FR 15710). Comments were to be received on or before May 30, 1986. However, in light of the importance of the proposed changes and the complexity of the insurance regulations in general, the NCUA Board has extended the public comment period to July 8, 1986.

DATE: Comments due on or before July 8, 1986.

ADDRESS: Written comments should be mailed or hand delivered to Rosemary Brady, Secretary, National Credit Union Administration Board, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: D. Michael Riley, Director, Office of Examination and Insurance, or James J. Engel, Deputy General Counsel, at the above address, or telephone: (202) 357-1085 (Mr. Riley) or (202) 357-1030 (Mr. Engel).

By the National Credit Union Administration Board on May 15, 1986.

Rosemary Brady,

Secretary of Board.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 21

[Docket No. 913CE, Notice No. 23-ACE-12]

Special Conditions; Fairchild Models SA227-AT and SA227-TT Airplanes Incorporating Bendix EFS-10 Electronic Flight Instrument Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Special Conditions.

SUMMARY: This notice proposes special conditions for the Fairchild Aircraft Corporation Models SA227-AT and SA227-TT airplanes incorporating a Bendix EFS-10 Electronic Flight Instrument System (EFIS). These airplanes will have novel and unusual design features when compared to the state of technology envisaged in the airworthiness standards of Part 3 of the Civil Air Regulations (CAR) and Part 23 of the Federal Aviation Regulations (FAR). These novel and unusual design features include the use of an electronic flight instrument system for which the applicable regulations do not contain adequate or appropriate airworthiness standards. This notice contains the additional airworthiness standards which the Administrator considers necessary to establish a level of safety equivalent to that provided by the airworthiness standards applicable to the Fairchild Aircraft Corporation Models SA227-AT and SA227-TT airplanes.

DATE: Comments must be received on or before June 30, 1986.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, ACE-7, Attention: Rules Docket Clerk, Docket No. 913CE, Room No. 1558, Federal Office Building, 601 East 12th Street, Kansas City, Missouri 64106. All comments must be marked: Docket No. 913CE. Comments may be inspected in the Rules Docket between 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: David Warner, Aerospace Engineer, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Central Region, Federal Aviation Administration, Room 1656, 601 East 12th Street, Federal Office Building, Kansas City, Missouri 64106; telephone (816) 374-5688.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the promulgation of these special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking further rulemaking action on this proposal. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a pre-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 913CE." The postcard will be date stamped and returned to the commenter. The proposals contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Type Certification Basis

The type certification basis for the Fairchild Aircraft Corporation Model SA227-AT airplane is as follows: Part 3 of the Civil Air Regulations, effective May 15, 1956, as amended by Amendments 3-1 through 3-6; § 23.511 as amended by Amendment 23-7, effective September 14, 1962; § 23.175(d) as amended by Amendment 23-14, effective December 20, 1973; Special Conditions outlined in FAA letters November 18, 1965, August 22, 1967, February 5, 1968, and April 4, 1968; Amendment B of SFAR No. 41, including paragraph 4(c) and the compartment interior requirements of § 25.853(a), (b), (b-1), (b-2), and (b-3) effective September 26, 1978; Part 36, Appendix F, effective December 1, 1969, as amended by Amendments 36-1 through 36-6; and the special conditions that may result from this proposal.

The type certification basis for the Fairchild Aircraft Corporation Model SA227-TT airplane is as follows: Part 3 of the Civil Air Regulations, effective May 15, 1956, as amended by Amendment 23-17 effective February 1, 1977; Special Conditions outlined in FAA letters November 19, 1965, August 22, 1967, February 5, 1968, and April 4, 1968; SFAR No. 23.27; Amendment B of SFAR 41, including paragraph 4(c) and the compartment interior requirements of § 25.853(a), (b), (b-1), (b-2), and (b-3) effective September 26, 1978; Part 36, Appendix F effective December 1, 1969, as amended by Amendments 36-1 through 36-6; and the special conditions that may result from this proposal.

Background

On March 24, 1986, King Radio Corporation, 400 N. Rogers Road, Olathe, Kansas 66062, made application to the FAA for approval of installation of a Bendix EFS-10 Electronic Flight Instrument System (EFIS) on the Fairchild Aircraft Corporation Model SA227-AT and SA227-TT airplanes. This installation incorporates an electronic attitude direction indicator (ADI) and an electronic horizontal situation indicator (HSI) in lieu of the traditional mechanical or electro-mechanical displays providing similar information to the flight crew.

Special conditions may be issued and amended, as necessary, as part of the

type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101 do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane or installation. Special conditions, as appropriate, are issued in accordance with § 11.49, after public notice as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis, as provided by § 21.101(b)(2).

The proposed type design of the EFS–10 EFIS installation in the Fairchild Aircraft Corporation Models SA227–AT and SA227–TT airplanes contains a number of novel or unusual design features not envisaged by the applicable airworthiness standards of Part 3 of the CAR. Special conditions are considered necessary because the airworthiness standards of Part 3 of the CAR and Part 23 do not contain adequate or appropriate safety standards for the novel or unusual design features of the EFS–10 EFIS installation in the Fairchild Aircraft Corporation Model SA227–AT and SA227–TT airplanes.

King Radio Corporation has proposed cathode ray tube (CRT) electronic display units for primary attitude, heading and navigation cockpit displays. The cockpit instrument panel configuration would feature five EFIS displays, an EADI and EHSI on the left and right instrument panels and a multi-function display in the center panel. All other displays; i.e. airspeed, altitude, vertical speed, etc., will be conventional instruments. An optional configuration instruments on the copilot's side, and a multi-function display in the center panel.

Emissive color on a CRT display will inevitably appear different than reflective colors on conventional electro-mechanical displays. Different intensities and color temperatures of ambient illumination will also effect the perceived colors. Therefore, display legibility must be adequate for all cockpit lighting conditions including direct sunlight.

Features of this system are novel and unusual relative to the applicable airworthiness requirements. Current small airplane airworthiness requirements are based on "single fault" or "fail safe" concepts and, when promulgated, the FAA did not envision use of complex, safety-critical systems in small airplanes. The current small airplane requirements envisioned instruments that were single function; i.e., a failure would cause loss of only one instrument function, although several instrument functions may have been housed in a common case. Flight instruments for the pilot are required to be grouped in front of the pilot so deviation from looking forward along the airplane flight path is minimized when the pilot shifts from viewing the flight path to viewing the flight instruments.

For instrument flight, the airplane must be equipped with the minimum flight instruments listed in the operating rules. This minimum listing of instruments includes all instruments that have long been accepted as the minimum for continued safe flight after the failure of any *one* of the required instruments; i.e., airspeed, altitude, attitude, and turn and slip (needle and ball). Backup instruments for these instruments are not required by the small airplane airworthiness requirements because the FAA has long accepted that the small airplanes could be safely flown following a single instrument failure. The basic airman certification program for an IFR rating has long included the required demonstration of ability to fly the airplane safely following failure of any one of the previously cited instruments, and has not required as a basic IFR rating requirement that all IFR airmen must demonstrate abilities using other backup instruments.

A special condition is proposed which would allow installation of electronic displays that feature design characteristics where a single malfunction or failure could affect more than one primary instrument, display or system. The proposed special condition would also provide requirements to assure the reliability of system design functions that are determined to be essential for continued safe flight and landing of the airplane.

In installations where electronic displays take the place of traditional instruments, the reliability must not be less than that of the traditional instruments. This is in regard to the collective reliability of the traditional instruments rather than the reliability of a single traditional instrument. For this reason, the proposed special condition includes requirements for identifying complex, safety critical systems, and defines requirements needed for their certification.

The proposed special condition requires a detailed examination of each item of equipment/component of the electronic display system and the system installation to determine if the airplane is dependent upon its function for continued safe flight and landing, or if its failure would significantly reduce the capability of the airplane or the ability of the crew to cope with these adverse operating conditions. Each component of the installation identified by such an examination as being critical to the safe operation of the airplane would be required to meet the proposed special condition.

The proposed special condition also requires that components of system(s) whose function is required and that requires a power supply, be considered an "essential load" on the power supply. The power source(s) and its distribution system must be able to supply power to the electronic display system(s) as stated in the proposed special condition since the operational reliability of the electronic display system(s) is dependent on the airplane electrical source.

The present § 23.1309 has been used as a means of evaluating systems since being incorporated into Part 23 by Amendment 23–14, effective December 20, 1973. The "single fault" or "fail safe" concept of § 23.1309, along with experience based on service-proven designs and good engineering judgment have been used to successfully evaluate most airplane systems and equipment. However the FAA is finding it difficult to apply the "single fault" concept as a means of determining the effect or likelihood of certain failure conditions to complex systems like those proposed for the EFS–10 EFIS installation Therefore, the FAA considers it necessary to include the proposed system analysis requirements in the certification basis in lieu of including present § 23.1309. this will allow the use of the latest available "rational method" of safety analysis of the systems to assure a level of safety intended in the applicable requirements.

The development of rational methods for safety assessment of systems is based on the premise that an inverse relationship exists between the probablity of a failure condition and its effect on the airplane. That is, the more serious the effect, the lower the probability must be that the related failure condition will occur.

Use of these rational methods for safety assessment of systems do not mandate use of numerical analysis. An applicant may use numerical analysis to assist in showing compliance, but, in many cases, adequate data is not available for preparing a stand-alone numerical analysis for showing compliance. Therefore, in small airplane certification, a rational analysis based on identification of failure modes and their consequences is frequently better substantiation of compliance with the various required levels of system reliability than a numerical analysis alone.

BEST COPY AVAILABLE

The availability of this "rational method" of safety analysis of systems, along with the difficulty in applying the existing "no single fault" or "fail safe" concept, has prompted the FAA to propose this special condition, because the Fairchild Aircraft Corporation Models SA227–AT and SA227–TT airplanes incorporating the EFS–10 EFIS installation are proposed to have electronic displays where use of the single fault criterion is an unnecessary burden. The proposed special condition would require that a safety evaluation of the systems be made and specifies a level of safety in qualitative terms.

If it is determined that the airplane includes systems that perform more critical functions, it will be necessary to show that those systems meet more stringent requirements. Systems that perform a function that is needed for continued safety of flight and landing of the airplane, whose failure would be catastrophic, would be required to meet requirements that establish either that there will be no failures of that system, or that a failure is extremely improbable.

The special condition also requires that the occurrence of systems failures which would significantly reduce the airplane's capability, or the ability of the crew to cope with adverse operating conditions, and thereby be potentially catastrophic, be improbable. It is recognized that any system(s) failure will reduce the airplane's or crew's capability by some degree, but that reduction may not be of the degree as to lead to potentially catastrophic results.

The proposed condition provides reliability requirements which are based on the criticality of the system's function and will provide the standards needed for certification of complex safety-critical systems being proposed for installation in the Fairchild Aircraft Corporation Models SA227–AT and SA227–TT airplanes.

The Fairchild Aircraft Corporation Models SA227–AT and SA227–TT airplanes incorporating the EFS–10 EFIS installation may have both digital and analog instrumentation cues for the pilot. While a digital indication does show exact numbers, it may not provide adequate sensory cues to the pilot as to whether the numbers are increasing or decreasing, or a sense of how fast they are changing. A digital indication may not show the normal operating range or operational limits. Human factor authorities agree that such digital indications are not equivalent to an analog instrumentation which inherently provides usable sensory cues. Therefore, the proposed special condition includes requirements for sensory cues.

The FAA has considered the features proposed by King Radio Corporation for the EFS–10 installation in the Fairchild Aircraft Corporation Models SA227–AT and SA227–TT airplanes and has concluded that, notwithstanding the existing requirements applicable to these airplanes which did not envision the use of such complex or critical systems, special conditions should be promulgated for the affected systems, in addition to the applicable requirements, that will provide the necessary level of safety. Accordingly, a special condition is proposed.

List of Subjects in 14 CFR Part 21

Aviation safety, Aircraft, Air transportation, and Safety.

The authority citation for these special conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 21.16 and 21.101; and 14 CFR 11.28 and 11.49.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration proposes the following special conditions as a part of the type certification basis for the Fairchild Aircraft Corporation Models SA227–AT and SA227–TT when equipped with the Bendix EFS–10 Electronic Flight Instrument System:

1. In addition to the applicable requirements of Part 3 of the Civil Air Regulations, and requirements to the contrary, for instruments, systems, and installations whose design incorporates: Electronic displays that feature design characteristics where a single malfunction or failure could affect more than one primary instrument display or system; and/or system design functions that are determined to be essential for continued safe flight and landing of the airplane. The following special condition applies:

(a) Systems and associated components must be examined separately and in relation to other airplane systems to determine if the airplane is dependent upon its function for continued safe flight and landing, and if its failure would significantly reduce the capability of the airplane or the ability of the crew to cope with adverse operating conditions. Each item of equipment, each system, and each installation identified by this examination, upon which the airplane is dependent for continued safe flight and landing, or whose failure would significantly reduce the capability of the airplane or the ability of the crew to cope with adverse operating conditions, must be designed and examined to comply with the following additional requirements:

(1) There must be no single failure or probable combination of failures under any anticipated condition which would prevent the continued safe flight and landing of the airplane or which would significantly reduce the capability of the airplane or the crew to cope with adverse operating conditions.

(2) Warning information must be provided to alert the crew to unsafe system operating conditions, and to enable them to take appropriate corrective action. This warning information must not tend to initiate crew action which would ceate additional hazards.

(3) Compliance with the requirements of this special condition must be shown by analysis and, where necessary, by appropriate ground, flight, or simulator tests. The analysis must consider:

(i) Modes of failure, including malfunctions and damage from foreseeable sources;

(ii) Consequence of a single failure or probable combination of failures (latent or undetected);

(iii) Appropriate levels of reliability as determined by the severity of consequence;

(iv) The resulting effects on the airplane and occupants, considering the stage of flight and operating conditions; and

(v) The crew warning cues, corrective action required, and the capability of detecting faults.

(4) If numerical analysis is used to support the engineering examination:

(i) The occurrence of any failure condition which would prevent the continued safe flight and landing of the airplane must be shown to be extremely improbable; and

(ii) The occurrence of any other failure condition which would significantly reduce the capability of the airplane or the ability of the crew to cope with adverse operating conditions must be shown to be improbable.

(b) Each item of equipment of each system, and each installation whose functioning is essential for safe operation and that requires a power supply is an "essential load" on the power supply. The power sources and its distribution system must be able to supply the following power loads in probable operating combinations and for probable durations:

(1) Loads connected to the power distribution system with the system functioning normally.

(2) Essential equipment of each system (loads) after failure of:

BEST COPY AVAILABLE

(i) Any one engine on the airplane, or

(ii) Any power converter, or energy storage device, or

(iii) Essential loads for which an alternate source of power is required by this special condition, after any failure or malfunction in any one power supply system, distribution system, or other utilization system.

(c) In determining compliance with paragraph (b)(2) of this special condition, the power loads may be assumed to be reduced or shed under a monitoring procedure consistent with safety.

(d) In showing compliance with this section with regard to the electrical power system and to equipment design and installation, critical environmental and atmospheric conditions must be considered. For electrical generation, distribution, and utilization equipment required by or used in complying with this special condition, the ability to provide continuous, safe service under foreseeable environmental and atmospheric conditions may be shown by tests, design analysis, or reference to previous comparable service experience on other airplanes.

(e) Electronic display units, including those incorporating more than one function, may be installed in lieu of mechanical or electro-mechanical instruments if:

(1) The display units:

(i) Are easily legible under all lighting conditions encountered in the cockpit, including direct sunlight,

(ii) In any normal mode of operation do not inhibit the primary display of attitude,

(iii) Incorporate sensory cues for the pilot that are equivalent to those in the instrument being replaced by the electronic display units, and

(iv) Incorporate visual displays of instrument markings, required by §§ 3.756 through 3.757 or visual displays that alert the pilot to abnormal operational values, or approaches to unsafe values, of any parameter required to be displayed by Part 3/SFAR 41 requirements,

(2) The display units, including their systems and installations, must be designed so that one display of information essential to continued safe flight and landing will remain available to the pilot, without need for immediate action by any crew member for continued safe operation, after any single failure or probable combination of failures.

Issued in Kansas City, Missouri, on May 15, 1986.

Jerold M. Chavkin,

Acting Director.

14 CFR Part 39

[Docket No. 86-NM-105-AD]

Airworthiness Directives; Boeing Model 737-300 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) which requires replacement of air ducts installed in certain Model 737-300 airplanes air conditioning system. This action is necessary because it has been discovered that the ducts have unsatisfactory flammability characteristics and do not comply with the flammability requirements of FAR 25.853. The ducts presently installed could contribute to the propagation of a fire occurring on the airplane.

DATES: Comments must be received on or before July 18, 1986.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86-NM-105-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. The information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Gardlin, Airframe Branch, ANM-120S; telephone (206) 431-2932. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86-NM-105-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: This notice proposes a new airworthiness directive (AD) which would require replacement of air conditioning ducts on Boeing Model 737-300 airplanes with ducts meeting the flammability requirements of FAR 25.853.

The duct material was successfully tested for compliance with FAR 25.853 for original type certification. However, subsequent sampling tests yielded unsatisfactory test results and the material was changed in production. Because the duct material in service may have inadequate flammability characteristics, Boeing has issued Service Bulletin 737-21-1065, dated February 14, 1986, which provides instructions to replace the ducts. The FAA is proposing an AD to require replacement of ducts on all affected airplanes since, in the event of a fire, the ducts could pose a hazard by contributing to the fire propagation.

Approximately 120 airplanes of U.S. registry would be affected by the proposed amendment. It is estimated that 4 manhours would be required to modify each airplane, at an average labor cost of $40 per manhour. Based on these figures, the total cost impact of this AD on U.S. operators would be $19,200.

For the reasons discussed above, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26,

1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 737-300 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised) Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Boeing Model 737-300 airplanes specified in Boeing Service Bulletin 737-21-1085, dated February 14, 1986, certificated in any category. Compliance required within 180 days after the effective date of this amendment, unless already accomplished.

To ensure air ducts have adequate flammability characteristics, accomplish the following:

A. Replace air ducts in accordance with Boeing Service Bulletin 737-21-1085, dated February 14, 1986, or later FAA-approved revisions.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this proposal who have not already received the applicable service bulletin from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124-2207. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on May 20, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 86-AWP-9]

Revision of the Salinas, California, Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed rulemaking.

SUMMARY: This notice proposes to extend the Salinas, California, control zone to the southeast of the Salinas Municipal Airport. This amendment is necessary to provide controlled airspace for aircraft executing the Instrument Landing System (ILS) approach to the Salinas Airport.

DATE: Comments must be received on or before July 3, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace Branch, AWP-520, Docket No. 86-AWP-9, Air Traffic Division, P.O. Box 90027 WWPC, Los Angeles, California 90009.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, Room 6W14, 15000 Aviation Boulevard, Lawndale, California.

An informal docket may also be examined during normal business hours at the Office of the Manager, Airspace Branch, Air Traffic Division, at the above address.

FOR FURTHER INFORMATION CONTACT: Frank T. Torikai, Airspace Specialist, Airspace Branch, AWP-520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90260; telephone (213) 297-1649.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AWP-9." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments submitted will be available for examination in the Airspace Branch, Air Traffic Division, 15000 Aviation Boulevard, Lawndale, California 90260, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace Branch, Air Traffic Division, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to extend the Salinas, California, control zone to the southeast of the Salinas Municipal Airport. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory

evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a); 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. § 71.171 is amended as follows:

Salinas, CA—[Revised]

Within a 5-mile radius of the Salinas Municipal Airport (lat. 36°39'40" N., long. 121°36'20" W.); within 2 miles northeast and 3 miles southwest of the Salinas VORTAC 315° radial, extending from the 5-mile radius zone to 6 miles northwest of the VORTAC, excluding the portion within the Fort Ord, CA, control zone; within 2 miles each side of the Salinas localizer extending from the 5-mile radius zone to 11.5 miles southeast of the Salinas VORTAC, excluding the portion within the Monterey, CA, control zone.

Issued in Los Angeles, California, on May 19, 1986.

Wayne C. Newcomb,

Manager, Air Traffic Division.

[Airspace Docket No. 86-AWA-28]

Proposed Alteration of VOR Federal Airways—MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to realign Federal Airways V-12 and V-504 in conjunction with the relocation of the Tiger, MO, very high frequency omni-directional radio range and distance measuring equipment (VOR/DME) to the Columbia Regional Airport, MO. Additionally, Tiger, MO, is proposed to be added as a domestic low altitude reporting point.

DATE: Comments must be received on or before July 14, 1986.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Central Region, Attention: Manager, Air Traffic Division, Docket No. 86-AWA-28, Federal Aviation Administration, 601 East 12th Street, Federal Building, Kansas City, MO 64106.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Mr. Brent A. Fernald, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8626.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AWA-28." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign VOR Federal Airways V-12 and V-504 in conjunction with the relocation of the Tiger MO, VOR/DME (CBI) to the Columbia Regional Airport, MO, (lat. 38°48'23"N., long. 92°13'06"W.), due to expiration and nonrenewal of lease. The description of V-12 will not change, but the charted depiction will. Additionally, the Tiger, MO, VOR/DME is proposed to be added as a low altitude reporting point, as a safety enhancement aid of air traffic control. Sections 71.123 and 71.203 of Part 71 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Airspace Docket No. 86-AWA-17]

Proposed Alteration of Jet Routes and Establishment of VOR Federal Airways—Expanded East Coast Plan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposals would alter the descriptions of seven Jet Routes and establish one new Federal Airway located in the States of Virginia, North Carolina, South Carolina and Georgia. These routes are part of an overall plan designed to alleviate congestion and compression of traffic in the airspace between New England and Florida. This proposal is a portion of the Expanded East Coast Plan (EECP) to make optimum use of the limited airspace along the east coast corridor. This action would reduce enroute and terminal delays in the Boston, MA, New York, NY, Miami, FL, Chicago, IL, and Atlanta, GA, areas, save fuel and reduce controller workload. The EECP is being implemented in coordinate segments until completed.

DATE: Comments must be received on or before July 14, 1986.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Eastern Region, Attention: Manager, Air Traffic Division, Docket No. 86-AWA-17, Federal Aviation Administration, JFK International Airport, The Fitzgerald Federal Building, Jamaica, NY 11430.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8526.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AWA-17." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposals

The FAA considering amendments to Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to alter the descriptions of jet Routes J-24, J-48, J-51, J-52, J-55, J-61, J-191 and establish new VOR Federal Airway V-577 and alter V-39 located in the states of Virginia, North Carolina, South Carolina and Georgia. Currently, east coast traffic flows are saturated and compressed in the New York metropolitan area to the point that substantial delays are experienced daily. To alleviate this congestion, the proposed EECP would provide optimum use of airspace along the heavily traveled coastal corridors between New York and Florida and reduce departure/arrival delays in the Boston, MA, Chicago, IL, Atlanta, GA, and New York areas. Sections 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Parts 71 and 75

Aviation safety, VOR federal airways and jet routes.

The proposed amendments

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 nd 75) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. § 71.123 is amended as follows:

V-39 [Amended]

By removing the words "Linden, VA; Shawnee, VA;" and substituting the words "INT Gordonsville 331°T(337°M) and Shawnee, VA, 212°T(220°M) radials; Shawnee;"

V-577 [New]

From Cedar Lake, NJ; INT Cedar Lake 091°T(101°M) and Sea Isle, NJ, 050°T(060°M) radials.

PART 75—[AMENDED]

3. The authority citation for Part 75 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

4. § 75.100 is amended as follows:

J-24 [Amended]

By removing the words "Charleston, WV; to Richmond, VA." and substituting the words "Charleston, WV, INT Charleston 101°T(104°M) and Richmond, VA, 286°T(295°M) radials; to Richmond."

J-48 [Amended]

By removing the words "From Pulaski, VA, via Westminster, MD;" and substituting the words "From Toccoa, GA; via Montebello, VA; Casanova, VA; Westminster, MD;"

J-51 [Revised]

From Jacksonville, FL, via Savannah, GA; Columbia, SC; INT Columbia 040°T(042°M) and Flat Rock, VA, 213°T(219°M) radials; to Flat Rock.

J-52 [Amended]

By removing the words "Columbia, SC; Raleigh-Durham, NC;" and substituting the words "Columbia, SC; INT Columbia 040°T(042°M) and Raleigh-Durham, NC, 228°T(232°M) radials; Raleigh-Durham;

J-55 [Amended]

By removing the words "INT of the Florence 007° and the Raleigh, NC, and the Raleigh-Durham, 224° radials;" and substituting whe words "INT Florence 003°T(006°M) and Raleigh-Durham, NC, 228°T(232°M) radials;"

J-61 [Revised]

From INT Wilmington, NC, 028°T(035°M) and Nottingham, MD, 174°T(184°M) radials; Nottingham; Westminster, MD; Philipsburg, PA; to Buffalo, NY.

J-101 [Amended]

By removing the words "Tar River, NC;"

Issued in Washington, D.C., on May 21, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

FR Doc. 86-11992 Filed 5-28-86; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 4

[Notice No. 594]

Winemaking Terminology

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend regulations defining various winemaking terms used on labels of wine. It arises from the decision in *Wawszkiewicz v. Department of the Treasury*, 480 F. Supp. 739 (D.D.C. 1979), *aff'd in part, rev'd in part*, 670 F. 2d 296 (D.C. Cir. 1981). The Court of Appeals remanded the case to the lower court with instructions that these regulations (among others) be remanded to ATF for reconsideration and review. ATF has reconsidered these regulations and concludes that they should be amended to specifically define terms used on wine labels to denote winemaking operations performed by the persons identified by name and address on the label. The uses of geographic terms on wine labels, another issue involved in the litigation, are the subjects of other rulemaking projects.

DATE: Written comments must be received by September 26, 1986.

ADDRESSES: Send written comments to:

Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385.

Copies of written comments received in response to this notice will be available during normal business hours at:

ATF Reading Room, Disclosure Branch, Room 4406, Ariel Rios Federal Building, 12th and Pennsylvania Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: John A. Linthicum, FAA, Wine and Beer Branch, (202) 566-7626.

SUPPLEMENTARY INFORMATION: On August 23, 1978, ATF issued a final rule, Treasury Decision ATF-53 (43 FR 37672, 54624), which extensively revised various regulations governing the labeling of wine. In T.D. ATF-53, ATF also decided not to amend regulations on winemaking terms which denote processes performed by the persons identified by name and address on the label. The plaintiffs in *Wawszkiewicz* challenged regulations governing the use of winemaking terms on wine labels, among other regulations. They argued that the lack of regulatory definitions of these terms sanctioned misleading labeling.

District Court

The District Court held that the challenged regulations were inconsistent with 27 U.S.C. 205(e). For example, in the court's view, the use of a grape variety name implied that 100 percent of the wine was derived from grapes known by that name. The court held that "[b]y assigning inaccurate and undisclosed meanings to words which are otherwise clear and unequivocal, the challenged regulation sanctions the transmittal of false and misleading information." 480 F. Supp. at 744. The district court decision dwelt primarily on the varietal labeling rule but held that similar shortcomings applied to the other contested rules. *Id.* at 745. The court concluded that wine labels should carry concise explanations of any terminology used where the identity of the producer or maker is represented to the consumer. *Id.* at 745. The District Court ordered that the regulations be remanded to ATF for revision consistent with the conclusion described above.

Court of Appeals

The Court of Appeals disagreed with the District Court's rationale in that a court reviewing agency action is not empowered to substitute its judgment for that of the agency. The Court of Appeals held that an agency's decision should be upheld where there is a rational basis for the decision in the facts of the record. 670 F. 2d at 301. Pursuant to this test, the court upheld

the regulations governing varietal labeling but found that the regulations concerning winemaking terminology had not been adequately explained, "either by reference to the records or by a reasoned statement." *Id.* at 304. The Court of Appeals remanded the case to the District Court with instructions that the regulations governing winemaking terminology be remanded to ATF for review and reconsideration in light of the appelate court's decision. The court thus afforded ATF an opportunity either to show that the regulations "meaningfully control misleading labeling and advertising," or to rewrite the regulations" in such fashion that the agency can demonstrate compliance with the statutory mandates." *Id.* at 304. No specific instructions were provided by either court nor were any dates set in connection with the review or reconsideration.

New Rulemaking Projects

Definitions of various winemaking terms which are indicative of specific processes used in the production of wine are proposed in this notice.

ATF has previously issued a general statement of policy, Notice No. 576 (50 FR 51849), explaining its decision on appellation of origin percentages and geographic corporate and trade names, by reference to the records and by reasoned statement.

In previously published notices of proposed rulemaking, ATF has proposed revisions of the geographic brand names regulation, Notice Nos. 522, 534, and 542 (49 FR 18380, 28417, and 34847, respectively).

Current Rules and Winemaking Terminology

Under 27 CFR 4.35, the name and address of the bottler of wine is required to be shown on the label. The word "produced" is defined, and the undefined words "blended," "rectified," "prepared," and "made" are given as examples of words which may appear in conjunction with the required name and address of the bottler. In addition, the undefined word "manufactured" may appear on the label of imitation wine only, in conjunction with the required name and address of the bottler.

In ATF Ruling 79–2, A.T.F.Q.B. 1979–1, 21, ATF defined these and other words contemplated for use in the same context. This ruling defined "made," "prepared," "blended," "rectified," and "cellared" for use in conjunction with the words "bottled by" preceding the required name and address of the bottler.

In *Wawszkiewicz*, the court focused on the definitions of "produced" and "made," finding that "[i]t is by no means intuitively clear why it is not misleading for a winery to represent that it produced a wine when another was heavily involved in its production, or that it made a wine that it in fact purchased." 670 F.2d at 304.

Therefore, ATF is issuing this notice proposing to eliminate the disparity between the definitions of "produced" and "made," and to define other words currently being used on wine labels to denote specific winemaking operations performed by the persons identified by name and address on the label. These definitions are derived, in part, from the ATF Ruling 79–2, and they reflect longstanding ATF policy and industry usage.

Proposed Rules On Winemaking Terminology

This notice proposes that the following words, when used in conjunction with the required name and address legend on a wine label, shall have the meanings described, denoting specific winemaking operations performed by the bottler.

(1) "Produced" or "Made" means that the named winery (a) fermented 75% of the wine at the stated address, or (b) changed the class or type of the wine by addition of alcohol, brandy, flavors, colors, artificial carbonation at the stated address, or (c) produced sparkling wine by secondary fermentation at the stated address.

(2) "Vinified" means that the named winery (a) fermented 75% of the wine at the stated address, or (b) produced sparkling wine by secondary fermentation at the stated address.

(3) "Blended" means that the named winery mixed the wine with other wines of the same class and type at the stated address.

(4) "Cellared", "Vinted", or "Prepared" means that the named winery, at the stated address, subjected the wine to cellar treatment which did not result in changing the class or type, in accordance with § 4.22(c).

This list includes the words "Vinted" and "Vinified" as defined in their ordinary usage on wine labels. These words have not been previously defined in any public document.

The word "rectified", as defined in ATF Ruling 79–2, refers to the production of a wine product at a distilled spirits plant, an activity which was subsequently prohibited by the passage of the Distilled Spirits Tax Revision Act of 1979, Pub. L. 96–39. Therefore, this word will not be included in the defined terms.

The word "manufactured", given as an example of a word which may appear on the label of imitation wine only, will be eliminated. ATF believes that this word has not been used in many years. In addition, the word "artificial" or "imitation" on labels of imitation wines adequately informs the consumer of the presence of synthetic ingredients, and the word "manufactured" serves no purpose in this context.

Conforming changes are proposed relating to words used on imported wines to denote winemaking operations. The words used, or their English-language equivalents, must meet the requirements of the country of origin for wines sold within the country of origin. In addition, the mandatory name and address statements on imported wine are rewritten for clarity.

The requirement to obtain a certificate of label approval will preclude the introduction of new, undefined words denoting winemaking operations. ATF has not determined if there is a need for a procedure to approve the use of new words coined in the future.

ATF Ruling 79–2, A.T.F.Q.B. 1979–1, 21, will be superseded when the final rule is issued.

Public Participants—Written Comments

ATF requests comments from all interested persons concerning the proposed definitions of winemaking terms used on wine labels in conjunction with the name and address legend. This notice proposes one definition for each term, and attempts to define all terms which are currently being used in conjunction with the name and address legend.

AFT requests comments on the following specific questions:

a. Are the proposed definitions correct? If not, which term is incorrectly defined, and what is the correct definition?

b. Are other terms (used in conjunction with the name and address legend) currently in use which are not defined in this notice? If so, what other term is currently in use, and what is that term's correct definition?

c. Should ATF establish a procedure to control the introduction of new terms in the future? What kinds of controls are necessary to regulate the coining of new words?

d. What is an appropriate time period for implementation of the regulation?

Comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action.

ATF will not recognize any material in comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments. The name of the person submitting a comment is not exempt from disclosure.

Any interested person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her requests, in writing, to the Director within the 120-day comment period. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291, ATF has determined that this proposal is not a "major rule" since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; or

(c) Significant adverse affect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The requirements to collect information proposed in this notice have been submitted to the Office of Management and Budget for review under sec. 3504(h) of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35. Comments relating to ATF's compliance with 5 CFR Part 1320—Controlling paperwork Burdens on the Public, should be submitted to: Office of Information and Regulatory Affairs, Attention: ATF Desk Officer, Office of Management and Budget, Washington, DC 20503.

List of Subjects in 27 CFR Part 4

Advertising, Consumer protection, Customs duties and inspection, Imports, Labeling, Packaging and containers, Wine

Drafting Information

The principal author of this document is John A. Linthicum, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Issuance

PART 4—[AMENDED]

Based on the above discussion, the Director proposes to amend 27 CFR Part 4—Labeling and Advertising of Wine as follows:

1. The authority citation for Part 4 continues to read as follows:

Authority: 27 U.S.C. 205

2. Paragraphs (a) and (b) of § 4.35 are revised to read as follows:

§ 4.35 Name and address.

(a) *American wine.* (1) *Mandatory statement.* Each label of each container of American wine shall state either "bottled by" or "packed by" followed by the name of the bottler or packer and address (in accordance with paragraph (c)) of the place where the wine was bottled or packed. In accordance with paragraph (a)(2), other words may also be stated in addition to the required words "bottled by" or "packed by" and the required name and address.

(2) *Optional statements.* (i) In addition to the statement required by paragraph (a)(1), the label may also state the name and address of any other person for whom the wine was bottled or packed, immediately proceded by the words "bottled for" or "packed for" or "distributed by".

(ii) The words defined in paragraphs (a)(2)(iii)–(a)(2)(vi) may be used, in accordance with the definitions given, in addition to the name and address statement required by paragraph (a)(1). Use of these words may be conjoined, using the word "and", with the words "bottled by" or "packed by" only if the same person performed the defined operation at the same address. More than one name and address statement is necessary if a person other than the bottler or packer did not perform the defined operation at the same address.

(iii) "Produced" or "Made" means that the named winery (*A*) fermented 75% of the wine at the stated address, or (*B*) changed the class or type of the wine by addition of alcohol, brandy, flavors, colors, artificial carbonation at the stated address, or (*C*) produced sparkling wine by secondary fermentation at the stated address.

(iv) "Vinified" means that the named winery (*A*) fermented 75% of the wine at the stated address, or (*B*) produced sparkling wine by secondary fermentation at the stated address.

(v) "Blended" means that the named winery mixed the wine with other wines of the same class and type at the stated address.

(vi) "Cellared", "Vinted", or "Prepared" means that the named winery, at the stated address, subjected the wine to cellar treatment which did not result in changing the class or type, in accordance with § 4.22(c).

(b) *Imported wine.* (1) *Mandatory statements.* (i) Each label of each container of imported wine shall state "imported by" or a similar appropriate phrase, followed immediately by the name of the importer, agent, sole distributor, or other person responsible for the importation, followed immediately by the address of the principal place of business in the United States of the named person.

(ii) If the wine was bottled or packed in the United States, the label shall also contain the statement required by either paragraph (b)(1)(ii)(*A*), (b)(1)(ii)(*B*), or (b)(1)(ii)(*C*), as follows:

(*A*) The label shall state the words "bottled by" or "packed by" followed by the name of the bottler or packer and the address (in accordance with paragraph (c)) of the place where the wine was bottled or packed;

(*B*) If the wine was bottled or packed for the person responsible for the importation, the label may state the words "imported by and bottled (packed) in the United States for" (or a similar appropriate phrase) followed by the name and address of the principal place of business in the United States of the person responsible for the importation; or

(*C*) If the wine was bottled or packed by the person responsible for the importation, the label may state the words "imported and bottled (packed) by" followed by the name and address of the principal place of business in the United States of the person responsible for the importation.

(iii) If the wine was blended, bottled or packed in a foreign country other than the country of origin, and the label identifies the country of origin, the label shall state "blended by," "bottled by," or "packed by," or other appropriate statement, followed by the name of the blender, bottler or packer and the place where the wine was blended, bottled or packed.

(2) *Optional statements.* In addition to the statements required by paragraph (b)(1), the label may also state the name and address of the principal place of business of the foreign producer. Other words, or their English-language equivalents, denoting winemaking operations may be used in accordance with the requirements of the country of origin, for wines sold within the country of origin.

BILLING CODE 4810-31-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 181 and 183

[CGD 85-002]

Boating Safety; Certification and Safe Powering Standards

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes amendments to the Certification regulations in Subpart B of Part 181 and the Safe Powering Standard in Subpart D of Part 183 of Title 33, Code of Federal Regulations. The intended effect of the proposal is to give those boats, which can clearly operate safety with more horsepower than they currently rate under the Coast Guard Safe Powering Standard, more reasonable maximum horsepower capacities. In order to allow greater flexibility in the manner in which the maximum horsepower capacity of these boats is determined, the proposal would establish an optional performance test method as an alternative to the existing calculation method. An additional editorial change to Subpart A of Part 181 would reflect changes in the applicability of the part.

DATE: Comments must be received on or before July 29, 1986.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/21), (CGD 85-002), U.S. Coast Guard, Washington, DC 20593. Comments will be available for examination at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593, between 8 a.m. and 4 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Alston Colihan, Office of Boating, Public, and Consumer Affairs (G-BBS/43), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593 (202) 426-1065, between 8 a.m. and 4 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: Interested persons are invited to submit written views, data or arguments. Comments should include the name and address of the person making them and identify this notice [CGD 85-002]. Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed.

The proposal may be changed in view of the comments received. All comments received will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons at the Marine Safety Council address noted above. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Discussion of Comments: The Coast Guard published an advance notice of proposed rulemaking in the **Federal Register** on March 21, 1985 [50 FR 11383]. An extension of the comment period for the notice was published in the **Federal Register** on May 23, 1985 [50 FR 21311]. Comments were received from three people.

One comment was in favor of the proposal to base the maximum horsepower capacity upon the ability of small outboard runabouts to pass the American Boat and Yacht Council (ABYC) Quick Turn Test.

Another comment was in basic agreement with the proposal to establish a new test procedure for certain boats; however, the comment stated that consideration should be given to the 12-foot maximum length, since law enforcement authorities prohibit boats less than 12 feet from operating on some lakes. The comment does not pertain to the purpose of this proposal, which is to give certain small outboard powered runabouts more reasonable maximum horsepower capacities. This proposal does not affect the manner in which some States regulate the operation of small outboard powered runabouts.

Two comments questioned the need for a minimum 20 inch transom height, since, according to one of the comments, several boats which would otherwise be considered eligible for the optional method for determining a maximum horsepower capacity have a transom lower than 20 inches and continue to perform safely. These comments are accepted. Under the proposal, a 15 inch transom height would be permitted if a bulkhead or motorwell at least 19 inches in height is provided to keep water from entering the boat over the transom.

Another comment objected to the 12-foot length limit. The basis for this new class is the demonstrated ability of boats 12 feet in length to safely complete the Safe Maneuvering Speed and Quick Turn Tests. The comment states that boats more than 12 feet in length could demonstrate the same safe handling characteristics as boats less than 12 feet in length. This comment is partially adopted. The proposal has been changed to include boats 13 feet in length or less. A review of recent Coast Guard reports covering testing for compliance with the Safe Powering Standard indicates that boats larger than 13 feet in length currently rate reasonable maximum horsepower capacities. The intent of the proposal is to give more reasonable maximum horsepower capacities to boats to which the curent application of the standard is unreasonable.

The Coast Guard has removed the proposed "sport boat" classification because the term has been found to cover a wide range of various types of recreational vessels.

Discussion of the Proposed Amendment

The National Boating Safety Advisory Council was consulted and its opinions and advice have been considered in the formulation of these amendments. The Council concurred with the approach suggested by the Coast Guard. The transcripts of the proceedings of the National Boating Safety Advisory Council at which this rule was discussed are available for examination in Room 4304, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC. The minutes of the meetings are available from the Executive Director, National Boating Safety Advisory Council, c/o Commandant (G-BBS), U.S. Coast Guard, Washington, DC 20593.

Since the Federal Boat Safety Act of 1971 has been recodified as Chapter 43

of Subtitle II of Title 46 of the United States Code (U.S.C.), sections 181.1 and 181.5 would be revised to show that Part 181 prescribes requirements for boats and associated equipment to which 46 U.S.C. Chapter 43 applies. The authority citation for Part 181 is being revised to reflect the recodification.

Section 181.15 would be amended to include additional wording on the certification label stating that a boat eligible for the optional method for determining a maximum horsepower capacity is intended for racing and other high performance activities. The label would also state that the level of skill required to operate such a boat might exceed the abilities of some operators. The additional wording on the label would make it clear that the boat is a special vessel intended for a special type of recreational use.

Section 183.3 would be revised to include new definitions for "transom height," "motorwell," and "motorwell height." These definitions are needed to identify boats which qualify for the optional method of determining a maximum horsepower capacity. Section 183.2 would also be amended to include a new figure that illustrates these definitions.

Section 183.53 would be amended to include an optional method for determining the maximum horsepower capacity calculation method in § 183. 53, the maximum horsepower capacity of certain small outboard runabouts could be determined based upon successful completion of a series of maneuvers through a test course and a 180° turn of the steering wheel at top speed. The 180° turn of the wheel simulates the maximum rotation of the wheel and the sharpest turn into which an operator might accidentally throw the boat. The test course and quick turn test are based upon American Boat and Yacht Council (ABYC) Standard H–28 which establishes a method for determining the safe maneuvering speed of a boat. Section 183.53 would also be amended to include a new figure that illustrates the test course to be used.

Regulatory Evaluation

The proposed regulations are considered to be non-major under Executive Order No. 12291 and non-significant under the DOT Regulatory Policies and Procedures (44 FR 11034; Feb. 26, 1979). The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. The proposal to establish a new method for determining the maximum horsepower capacity of certain small outboard runabouts is a relief from the application of the current standard. There is no increased cost per boat. Since the impact of this proposal is expected to be minimal, the agency certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Parts 181 and 183

Marine safety.

In consideration of the foregoing, the Coast Guard proposes to amend Parts 181 and 183 of Title 33, Code of Federal Regulations to read as follows:

PART 181—MANUFACTURER REQUIREMENTS

1. The authority citation for Part 181 is revised to read as follows and all other authority citations in Part 181 are removed:

Authority: 46 U.S.C. 4302; 49 CFR 1.46.

2. By revising § 181.1 to read as follows:

§ 181.1 Purpose and applicability.

This Part prescribes requirements for the certification of boats and associated equipment and identification of boats to which 46 U.S.C. Chapter 43 applies.

3. By revising § 181.5 to read as follows:

§ 181.5 Purpose and applicability.

This subpart prescribes requirements for the certification of boats and associated equipment to which 46 U.S.C. Chapter 43 applies and to which a safety standard prescribed in Part 183 of this chapter applies.

4. In § 181.15, by adding a new paragraph (f) to read as follows:

§ 181.15 Contents of labels.

* * * * *

(f) Each boat which displays a maximum horsepower capacity determined in accordance with § 183.53(c) must, in addition to the information required by paragraphs (a), (b) and (d) of this section, display on the certification label, the following statement in letters no less than one-quarter of an inch in height: "THIS BOAT IS INTENDED FOR RACING AND OTHER HIGH PERFORMANCE ACTIVITIES. THE SKILL REQUIRED MAY EXCEED THE ABILITIES OF SOME OPERATORS."

PART 183—BOATS AND ASSOCIATED EQUIPMENT

5. The authority citation for Part 183 is revised to read as follows and all other authority citations in Part 183 are removed:

Authority: 46 U.S.C. 4302; 49 CFR 1.46(n)(1).

6. By revising § 183.1 to read as follows:

§ 183.1 Purpose and applicability.

This subpart prescribes requirements for the certification of boats and associated equipment to which 46 U.S.C. Chapter 43 applies and to which certification requirements in Part 181 of this subchapter apply.

7. In § 183.3, by adding three new paragraphs (l), (m) and (n) to read as follows:

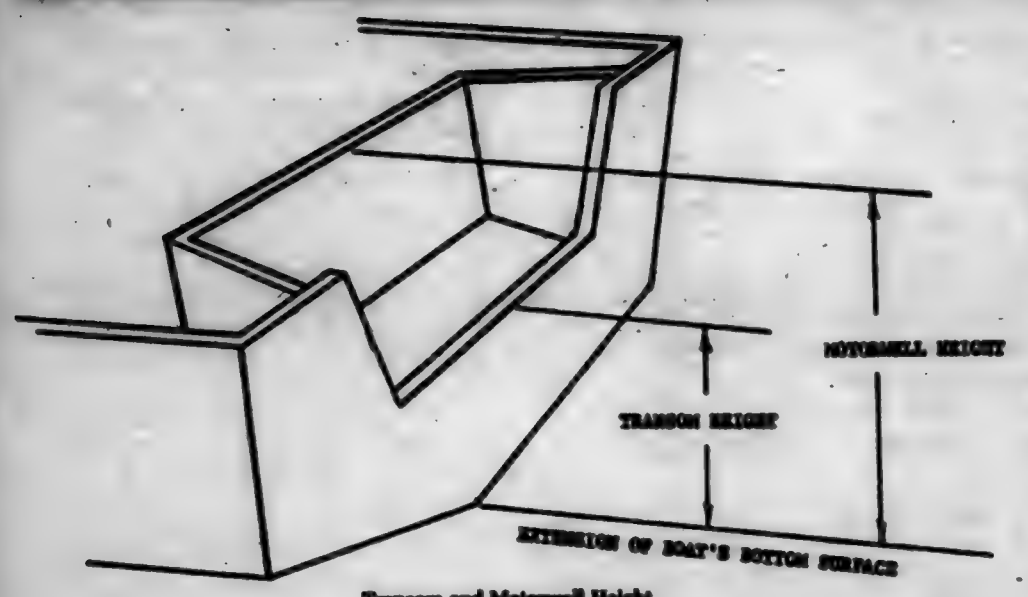
§ 183.3 Definitions.

* * * * *

(l) "Transom height" means the vertical distance from the lowest point of water ingress along the top of the transom to a line representing a longitudinal extension of the centerline of the boat's bottom surface, excluding keels. This distance is measured as a projection on the centerline plane of the boat. See Figure 183.3.

(m) "Motorwell" means any arrangement of bulkheads or structures that prevents water from entering the passenger carrying area of the boat through any cutout area in the transom for mounting an outboard motor.

(n) "Motorwell height" means the vertical distance from the lowest point of water ingress along the top of the motorwell to a line representing a longitudinal extension of the centerline of the boat's bottom surface, excluding keels. This distance is measured as a projection on the centerline plane of the boat. See Figure 183.3



Transom and Motorwell Height

8. By revising § 183.53 to read as follows:

§ 183.53 Horsepower capacity.

The maximum horsepower capacity marked on a boat must not exceed the horsepower capacity determined by the computation method discussed in paragraph (a) of this section, or for certain qualifying boats, the performance test method discussed in paragraph (b) of this section.

(a) The maximum horsepower capacity must be computed as follows:

(1) Compute a factor by multiplying the boat length in feet by the maximum transom width in feet excluding handles and other similar fittings, attachments, and extensions. If the boat does not have a full transom, the transom width is the broadest beam in the aftermost quarter length of the boat.

(2) Locate horsepower capacity corresponding to the factor in Table 183.53.

(3) For a boat with a factor over 52.5, if the horsepower capacity calculated in Table 183.53 is not an exact multiple of 5, it may be raised to the next exact multiple of 5.

(4) For flat bottom hard chine boats with a factor of 52 or less, the horsepower capacity must be reduced by one horsepower capacity increment in Table 183.53.

TABLE 183.53—OUTBOARD BOAT HORSEPOWER CAPACITY

Compute: Factor—Boat Length X Transom Width

If factor (nearest integer) is	0-35	36-39	40-42	43-46	48-52
Horsepower Capacity is	3	5	7.5	10	15

Note: For flat bottom hard chine boats, with factor of 52 or less, reduce one capacity limit (e.g. 5 to 3)

If factor is over 52.5 and the boat has	Remote steering and at least 20" transom height	No remote steering, or less than 20" transom height	
		For flat bottom hard chine boats	For other boats
Horsepower capacity is (raise to nearest multiple of 5).	(2 X Factor) – 90	(0.5 X Factor) – 15	(0.8 X Factor) – 25

(b) For boats qualifying under this paragraph, the performance test method described in this paragraph may be used to determine the horsepower capacity.

(1) *Qualifying criteria.*

(i) Thirteen feet or less in length;

(ii) Remote wheel steering;

(iii) Transom Height.

(A) Minimum 19 inch transom height; or,

(B) For boats with at least a 19 inch motorwell height, a minimum 15 inch transom height;

(iv) Maximum Persons Capacity not over two persons;

(2) *Boat preparation.*

(i) The boat must be rigged with equipment recommended or provided by the boat and motor manufacturer and tested with the highest horsepower production powerplant for which the boat is to be rated, not to exceed 40 horsepower.

(ii) Standard equipment must be installed in accordance with manufacturers' instructions.

(iii) The lowest ratio (quickest) steering system offered on the boat model being tested must be installed.

(iv) The outboard motor must be fitted with the manufacturer's recommended propeller providing maximum speed.

(v) Standard permanently installed fuel tanks must be no more than one-half full. Boats without permanent tanks must be tested with one full portable tank.

(vi) Portable tanks must be in their designated location or placed as far aft as possible.

(vii) The outboard motor must be placed in the lowest vertical position on the transom or, if mounting instructions are provided with the boat, at the height recommeded.

(viii) Boat bottom, motor and propeller must be in new or almost new condition.

Note: The use of the following special equipment should be considered because of the potential for exceeding the capabilities of the boat while performing the test:

Racing Type Personal Flotation Device
Helmet.

(3) *Test conditions.* Testing must be conducted on smooth, calm water with the wind speed below 10 knots. The test must be conducted with no load other than driver who must weight no more than 200 pounds. The motor trim angle must be adjusted to provide maximum full throttle speed short of excessive porpoising or propeller ventilation of "cavitation", so that there is no loss of directional control.

(4) *Quick turn test procedure.* Set throttle at a low mansuvering speed and steer the boat straight ahead. Turn the steering wheel 180° in the direction of least resistance in 1/2 second or less and hold it at that position without changing the throttle or trim settings during or after the wheel change. The boat completes the maneuver successfully if it is capable of completing a 90° turn without the driver losing control of the boat or reducing the throttle setting. Gradually increase the boat's turn entry speed incrementally until the boat does not complete the Quick Turn Test successfully or successfully completes it at maximum speed.

Note: It is recognized that operator skill and familiarity with a particular boat and motor combination will affect the test results. It is permissible to make a number of practice runs through the quick turn test at any throttle setting.

(5) *Test course method.* Set throttle for 30 miles per hour boat speed and run the test course set up in accordance with Figure 183.53, passing outside the designated avoidance marker for 35 to 37.5 miles per hour without contacting any of the course markers. If the boat successfully completes this run of the test course, increase the throttle setting

to 35 to 37.5 miles per hour boat speed and run the course passing outside the designated avoidance marker for that speed without contacting any of the course markers. If the boat successfully completes this run of the test course and the motor was not at full throttle, increase the throttle setting to 37.5 to 42.5 miles per hour boat speed and run the course passing outside the designated avoidance marker for that speed without contracting any of the course markers. If the boat successfully completes this run of the test course and the motor was not at full throttle, increase the throttle setting to 42.5 miles per hour or more and run the course passing outside the designated avoidance marker for that speed without contracting any of the course markers. If the boat successfully completes this run of the test course and the motor was not at full throttle, continue to increase the throttle setting and run the test course passing outside the designated avoidance marker for 42.5 miles per hour or more until the boat fails to complete the test successfully or the boat completes the test course maneuvers successfully at full throttle. The boat successfully completes the test course if the driver is able to maneuver it between the designated avoidance markers without striking the markers and without losing control of the boat or reducing the throttle setting. There must be no change in position of any equipment on board and there must be no change of position of personnel in order to influence the test results. There must be no instability evidenced by oscillating motion in the roll and yaw axes exhibited while negotiating the course.

Note: It is recognized that operator skill and familiarity with a particular boat and motor combination will affect the test results. It is therefore considered permissible to make a number of practice runs through the test course at any throttle setting.

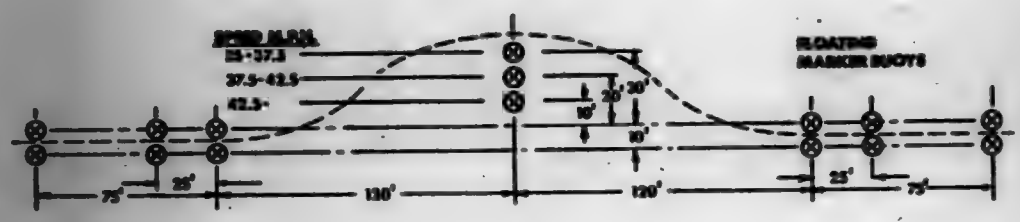
(6) *Maximum horsepower capacity.*

(i) For boats capable of less than 35 miles per hour, the maximum horsepower capacity must be the maximum horsepower with which the boat was able to successfully complete the Quick Turn Test Procedure in § 183.53(b)(4) at full throttle or the maximum horsepower determined under the calculations in § 183.53(a) of this section.

(ii) For boats capable of 35 miles per hour or more, the maximum horsepower capacity must be the maximum horsepower with which the boat was able to successfully complete with the Quick Turn Procedure in § 183.53(b)(4) and the Test Course Method in § 183.53(b)(5) at full throttle or the calculations in § 183.53(a) of this section.

(c) The maximum horsepower capacity determined in accordance with § 183.53(b) must not exceed 40 horsepower.

Figure 183.53



Boat Horsepower Capacity Test Course
35 mph or more

Dated: May 12, 1986.

T.T. Matteson,

Rear Admiral (Lower Half), U.S. Coast Guard, Chief, Office of Boating, Public and Consumer Affairs.

[FR Doc. 86-12060 Filed 5-28-86; 8:45 am]

BILLING CODE 7910-14-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 1780

Advisory Committees; Appointment and Reappointment to District Advisory Councils, etc.

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The proposed rulemaking would amend Subpart 1784 of this title to redefine the conditions under which members may be reappointed to district advisory councils; remove the section on the California Desert Conservation Area Advisory Committee, which terminated and whose functions were assumed by the California Desert District Advisory Council in 1981; delete the requirement for biennial calls for nominations for appointments to district advisory councils, which no longer applies; and remove 2 obsolete references to the grazing advisory boards that terminated on December 31, 1985.

DATES: Comments should be submitted by July 28, 1986. Comments received or postmarked after this date may not be considered in the decisionmaking process on a final rulemaking.

ADDRESSES: Comments should be sent to: Director (140), Bureau of Land Management, Room 5555, Main Interior Bldg., 1800 C Street NW., Washington, D.C. 20240.

Comments will be available for public review in Room 5555 of the above address during regular working hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: David S. Johnson, (202) 343-2064.

SUPPLEMENTARY INFORMATION: This proposed rulemaking would amend § 1784.3(b) of Title 43 of the Code of Federal Regulations to remove the 6-year limit on additional terms for members of the district advisory councils of the Bureau of Land Management (BLM) and substitute a provision for 2 consecutive 3-year terms with the opportunity for appointment to additional 3-year terms following a 3-year non-membership period. There would also be provision, however, for the Secretary to appoint council members to 1-year terms, without the lapse of 3 years following completion of 2 consecutive 3-year terms, if the Secretary determines that it would be in the public interest and critical to the effective functioning of the council, and provided that the district manager has certified that the need exists.

The final sentence of the existing § 1784.3(b), which concerns the appointment of members to district advisory councils, reads as follows: "At the discretion of the Secretary, members may be reappointed to additional terms, not to exceed a total of six years." The Department of the Interior has interpreted this provision to impose a lifetime limit on service, allowing additional terms, but not to exceed a total of six years beyond the initial term. Under the present regulation, therefore, members can serve a total of no more than 9 years (an initial 3-year

appointment plus six additional years). This presents two distinct problems: (1) A lifetime limit could rapidly deplete the number of local qualified, experienced candidates; and (2) nine years of continuous service might not provide adequate member turnover. BLM district managers need some control over continuity of membership so that they can plan ahead for long-range council activities and be assured that experienced members will not be arbitrarily terminated in the middle of critical reviews of BLM issues or problems. On the other hand, a uniform mechanism is needed for the regular turnover of membership, after a reasonable period of service, to ensure the introduction of new experience, ideas, and approaches and to discourage a handful of persons from monopolizing the membership.

In many BLM districts, it is often difficult to find qualified candidates who are willing to serve on the councils, and who possess the required skills, knowledge, and experience for a particular position on a council. The past experience of those who have served on a council increases their value to the district manager. They constitute a "bank of experience" from which he must draw when fresh sources of talent are depleted. Recurring service must therefore be an available option. Occasionally, a member may become essential to the effective functioning of a council due to unusual circumstances, such as a lack of qualified candidates for the position, or a need to conclude assigned studies or resolve issues. In these situations, it may be necessary to reappoint a member for a brief, additional period so that a replacement can be found or critical council business can be concluded.

The proposed rulemaking would continue the present practice for filling a vacancy, which is to make an appointment for the balance of the unexpired term. Section 1784.3(b)(4) of the rulemaking would provide, however, that such an appointee would be eligible to be reappointed to 2 successive 3-year terms if 3 years had passed since he or she last served a full 3-year term on the council before being appointed to that vacancy.

The proposed rulemaking would remove §§ 1784.0–3(b)(2) and 1784.6–3 which relate to the California Desert Conservation Area Advisory Committee. This committee terminated on December 31, 1981, and its functions were taken over by the California Desert District Advisory Council. The California Desert Conservation Area is wholly included in the California Desert District. The proposed rulemaking would also amend § 1784.6–4(b) to make it consistent with § 1784.3(b) by removing the provision for biennial concurrent appointments. Further, it would amend § 1784.3(b) to state clearly the length of the term of a person appointed to a district advisory council as an elected official of general purpose government as required under § 1784.6–4(b), and remove §§ 1784.0–3(b)(3) and 1784.6–5(f), which are obsolete because they relate to the grazing advisory boards that terminated on December 31, 1985, because the provisions of the Federal Land Policy and Management Act of 1976 that authorized them expired on that date.

The principal author of this proposed rulemaking is David S. Johnson of the Office of Congressional Affairs, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determinated that this document is not a major rulemaking under Executive Order 12291 and certifies that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The proposed rulemaking would not affect the economy to the extent of $100,000,000 per year, and would impose no new restrictions on commercial operations of any size.

This proposed rulemaking does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

It is hereby determined that this proposed rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

List of Subject in 43 CFR Part 1780

Administrative practice and procedure, Advisory committees, Land Management Bureau, Public lands.

Under the provisions of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1701 *et seq.*), and 5 U.S.C. Appendix I, it is proposed to amend Part 1780, Group 1700, Subchapter A, Chapter II, Title 43 of the Code of Federal Regulations by amending Subpart 1784 as set forth below:

GROUP 1700—Program Management

PART 1780—Cooperative Relations

Subpart 1784—Advisory Committees

1. The authority for Subpart 1784 continues to read as follows:

Authority: 5 U.S.C. Appendix I, 43 U.S.C. 1701 *et seq.*)

§ 1784.0–3 [Amended]

2. Section 1784.0–3, paragraph (b) is revised to read as follows:

* * * * *

(b) The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), as amended by the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901 *et seq.*), requires establishment of advisory councils representative of major citizen interests concerned with resource management planning or the management of public lands.

§ 1784.3 [Amended]

* * * * *

(b) Appointment to district advisory councils shall be for 3-year terms, on the established staggered-term basis, with as near as possible to one-third of each council subject to appointment each year. Terms and appointment are governed by the following:

(1) The term of the member of a council who is an elected official of general purpose government shall end upon that person's departure from such elective office if such departure occurs before his or her term of appointment or reappointment to the council would otherwise expire. The position shall then be filled in accordance with paragraph (b)(2) of this section;

(2) A vacancy occurring by reason of removal, resignation, death, or loss of elected office shall be filled for the balance of the vacating member's term using the same method by which the original appointment was made;

(3) A person who has served a full 3-year term on a council may be reappointed to a second consecutive 3-year term;

(4) A person who has served an appointed term of less than 3 years on a council to fill a vacancy, if 3 years had elapsed since the completion of that person's last 3-year term before being appointed to the vacancy, may be reappointed to 2 consecutive 3-year terms;

(5) A person who has served 2 consecutive 3-year terms on a council may be reappointed no earlier than 3

years after his or her last date of membership on that council. However, the Secretary may waive this 3-year waiting period and reappoint that person to a 1-year term, upon determining that the member's continued or renewed service on the council is in the public interest and critical to the effective functioning of the council, and the responsible district manager has certified that these conditions have been met.

§ 1784.6–3 [Removed]

4. Section 1784.6–3 is removed and reserved.

§ 1784.6–4 [Amended]

5. In § 1784.6–4, the first sentence of paragraph (b) is revised to read as follows:

* * * * *

(b) The Secretary or his designee shall appoint not less than 10 nor more than 15 members to serve on each council in accordance with the provisions of § 1784.3(b) of this title. * * *

§ 1784.6–5 [Amended]

6. § 1784.6–5(f) is removed.

J. Steven Griles,

Assistant Secretary of the Interior.

May 12, 1986.

BILLING CODE 4310–84–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 43

[CC Docket 86–192, FCC 86–247]

Common Carrier Services; Elimination of Reporting Requirement for Maritime Radio Carriers

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amend §43.21 of its Rules with respect to the filing of annual reports by maritime radio carriers. If adopted the carriers will no longer have to file an annual report Form M. This proposal is part of the Commission's overall effort to eliminate unnecessary and burdensome reporting requirements.

DATES: Comments must be submitted on or before June 13 and reply comments on or before June 30, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Katie Rangos at (202) 632–0745.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's notice of proposed rulemaking, CC Docket 86–192, adopted May 9, 1986 and released May 15, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M St., Northwest, Suite 140, Washington, DC 20037.

Summary Notice of Proposed Rulemaking

1. Section 43.21 of this Commission's Rules, 47 CFR 43.21, requires maritime radio carriers to submit annual reports. In this Notice of Proposed Rulemaking (Notice) we propose to eliminate from this section a reporting requirement that is unnecessary and burdensome. Specifically, we propose to eliminate the requirement that maritime radio carriers file annual reports.

2. Communication carriers in the maritime radio service having annual revenues in excess of $50,000 file three copies of the annual report Form M with this Commission. Since 1977, Central Radio Telegraph Company has been the only maritime carrier filing an annual report Form M. The Form M is a 93 page report that contains detailed information on stock and stockholders; officers and directors; and financial and operating data of the companies.

3. The maritime carrier Form M reports have only been used on an infrequent and limited basis. There is only one schedule in the Form M which applies to maritime carrier operations. The other Form M schedules pertain to telephone carrier operations. We do not publish any information from the maritime reports comparable to the statistical tabulations of the telephone carrier reports.

4. Eliminating the maritime carrier requirement does not preclude this Commission from directing those carriers to file detailed information should the need arise. We think that our needs for data can be adequately served in a more efficient manner. When necessary, special data requests can be tailored to special needs. Since there is no recurring use of this data, special studies will eliminate the need for maritime carriers to submit annually. This will not only reduce the costs to the carriers, it will also reduce this Commission's costs.

5. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose a modified information collection requirement on the public. However, modification of the information collection requirement will not generate a burden change.

6. In compliance with the provisions of section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), we certify that the elimination of the reporting of maritime radio carriers on annual report Form M will not have a significant economic impact and will ease the recordkeeping and reporting requirement of these carriers. The rationale for the proposed elimination is outlined in the above discussions.

7. This is a non-restricted notice and comment rule making proceeding. See § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible ex parte contacts.

8. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information is placed in the public file, and providing that the fact of the Commission's reliance on such information is noted in the Report and Order.

Ordering Clauses

9. Accordingly, it is ordered, That pursuant to the provisions of sections 219 and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 219 and 403 there is hereby instituted a notice of proposed rulemaking into the foregoing matter.

10. It is further ordered, That all interested persons may file comments on the specific proposals discussed in the Notice on or before June 13, 1986. Reply comments shall be filed on or before June 30, 1986. In accordance with the provisions of § 1.419 of the Commission's Rules and Regulation, 47 CFR § 1.419, an original and five (5) copies of all comments shall be furnished to the Commission. Copies of the documents will be available for public inspection in the Commission's Docket reference room; 1919 M Street, NW, Washington, DC.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Environmental Statement; Middle Tennessee Electric Membership Corporation

AGENCY: Rural Electrification Administration, USDA.

ACTION: Finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations (40 CFR Part 1500–1508) and REA's Environmental Policies and Procedures (7 CFR Part 1794), has made a Finding of No Significant Impact with respect to a proposed project by Middle Tennessee Electric Membership Corporation (MTEMC). The project consists of the construction of new office facilities on approximately 5 hectares (12.5 acres) of land near the City of Franklin in Williamson County, Tennessee.

FOR FURTHER INFORMATION CONTACT: REA's Finding of No Significant Impact and Environmental Assessment (EA) and MTEMC's Borrower's Environmental Report (BER) may be reviewed in the office of the Chief, Distribution and Transmission Engineering Branch, Southeast Area—Electric, Room 0270, South Agriculture Building, REA, Washington, DC 20250, telephone (202) 382–8436, or at MTEMC's office (Mr. James O. Baker, Manager), P.O. Box 608, Murfreesboro, Tennessee 37130, telephone (615) 890–9762.

SUPPLEMENTARY INFORMATION: REA has reviewed MTEMC's BER and has determined that it represents an accurate description of the environmental impacts of the proposed project. The BER has been incorporated as an appendix to the EA. The proposed project will consist of a 1,255 square meter (sq. mtr.) (13,505 square foot [sq. ft.]) office building, a 304 square meter (3,271 sq. ft.) warehouse, a 203 square meter (2,184 sq. ft.) maintenance building, a pole storage area, a transformer storage area, two parking lots with spaces for 80 employee and visitor vehicles, parking spaces for 14 small trucks, gasoline storage and pumping facilities, and a microwave tower approximately 30 meters (100 feet) in height.

The proposed site is located in Williamson County, Tennessee, just outside the city limits of Franklin between Curd Lane and Interstate 65 approximately 805 meters (one-half mile) north of the interchange at Interstate 65 and Murfreesboro Road.

REA determined that the proposed project is not likely to affect flora or fauna on the Federal list of threatened or endangered species of critical habitat, property listed or eligible for listing in the National Register of Historic Places, wetlands, the 100-year floodplain, important farmland, or water quality. No other matters of potential environmental concern have been discovered.

REA considered the alternatives of taking no action, evaluating alternative sites, and approving the proposed project as submitted by MTEMC. REA has determined that the project as proposed by MTEMC is the best alternative to meet MTEMC's needs with negligible impact to the quality of the human environment.

Based upon METMC's BER and supporting documents, REA prepared an EA concerning the proposed project and its impacts. In accordance with REA's Environmental Policies and Procedures, 7 CFR Part 1794, MTEMC advertised that a BER for the project was available for review concerning the environmental aspects of the proposed project. No request for the BER were received.

REA concluded that approval to construct the proposed project would not constitute a major Federal action significantly affecting the quality of the human environment. An environmental impact statement is not necessary. This program is listed in the Catalog of Federal Domestic Assistance as 10.850–Rural Electrification Loans and Loan Guarantees. For the reasons set forth in the final rule related Notice to 7 CFR 3015, Subpart V in 50 FR 47034, November 14, 1985, this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with state and local officials.

Dated: May 21, 1986.

Harold V. Hunter,
Administrator.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–583–505]

Oil Country Tubular Goods from Taiwan; Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have determined that oil country tubular goods (OCTG) from Taiwan are being, or are likely to be, sold in the United States at less than fair value and that critical circumstances do not exist, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to continue to suspend the liquidation of all entries of OCTG from Taiwan that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the notice of the preliminary determination, and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: May 29, 1986.

FOR FURTHER INFORMATION CONTACT: John J. Kenkel or Charles Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone: (202) 377–5404 or (202) 377–5288.

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that OCTG from Taiwan is being, or is likely to be, sold in the United States at less than fair value, as provided in section 731 of the

Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act). The estimated margin was based on all the respondent's sales of the class or kind of merchandise to the United States during the period of investigation. Comparisons were based on the U.S. purchase price and the constructed value, since there were no sales in the home market or to third countries. We also found that critical circumstances do not exist. The margin found for the company investigated is listed in the "Suspension of Liquidation" section of this notice.

Case History

On July 22, 1985, we received a petition, filed in proper form from Lone Star Steel Company and CF&I Steel Corporation on behalf of the U.S. industry producing OCTG. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act (19 U.S.C. 1673), and that these imports are materially injuring, or threatening material injury to, a U.S. industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping investigation. We initiated the investigation on August 9, 1985 (50 FR 33368), and notified the ITC of our action.

On August 21, 1985, a questionnaire was presented to counsel for the respondent.

On September 5, 1985, the ITC found that there is a reasonable indication that imports of OCTG from Taiwan are threatening material injury to a U.S. industry (U.S. ITC Pub. No. 1747, September 1985).

On October 10, 1985, the respondent filed a response to our questionnaire. We investigated Far East Machinery Company (FEMCO), the manufacturer who accounts for all Taiwanese exports of the merchandise to the United States. We examined 100 percent of the sales made by this company.

On December 23, 1985, we made our preliminary determination, which was based on the information contained in the response.

On February 24 through 27, 1986, we conducted a verification at FEMCO's offices.

On February 22, 1986, we postponed the final determination at the request of FEMCO pursuant to 19 U.S.C. 1673d(a)(2) until not later than May 21, 1986 (51 FR 7308).

We held a public hearing on April 28, 1986.

Scope of the Investigation

The products under investigation are "oil country tubular goods," which are hollow steel products of circular cross section intended for use in drilling for oil or gas. These products include oil well casing, tubing, and drill pipe of carbon or alloy steel, whether welded or seamless, manufactured to either American Petroleum Institute (API) or non API specifications (such as proprietary) as currently provided for in the *Tariff Schedules of the United States, Annotated* (TSUSA) items, 610.3216, 610.3219, 610.3233, 610.3234, 610.3242, 610.3243, 610.3249, 610.3252, 610.3254, 610.3256, 610.3258, 610.3262, 610.3264, 610.3721, 610.3722, 610.3751, 610.3925, 610.3935, 610.4025, 610.4035, 610.4210, 610.4220, 610.4225, 610.4230, 610.4235, 610.4240, 610.4310, 610.4320, 610.4325, 610.4335, 610.4942, 610.4944, 610.4948, 610.4954, 610.4956, 610.4958, 610.4957, 610.4966, 610.4967, 610.4968, 610.4969, 610.4970, 610.5221, 610.5222, 610.5226, 610.5234, 610.5240, 610.5242, 610.5243, and 610.5244. This investigation includes OCTG that are in both finished and unfinished condition.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of the subject merchandise to represent the United States price because the merchandise was sold prior to the date of importation to unrelated purchasers in the United States. We calculated the purchase price based on the C and F packed price. We made deductions for foreign inland freight, ocean freight, handling and brokerage charges.

Foreign Market Value

In accordance with section 773(a)(2) of the Act, we used "constructed value" to determine the foreign market value, because Far East Machinery Co., Ltd. has not sold a product "such or similar" to that sold in the United States in either its home market or in a third country. To determine constructed value we examined production costs, including materials, labor, research and development, other manufacturing costs, selling, other general expenses and profit.

Our final determination was based on verified cost information relating to production during 1985 rather than 1984 as submitted by respondent. We used unit costs based on the actual costs incurred for production. We revised the costs as presented by the respondent in its submission of October 16 and December 2, 1985, related to the following:

- Rebate credits claimed by the respondent for raw materials were only allocated to 4.5 inch pipe produced during the period of investigation.
- The theoretical weight adjustment was corrected for 2.375 inch pipe and excluded from 4.5 inch pipe cost calculations.
- The annual bonus was allocated throughout the year to labor costs per hour.
- Direct labor costs were corrected to reflect the weighted average monthly cost of regular and overtime hours.
- Factory overhead expenses were adjusted for supplies, indirect labor and other costs.
- Factory overhead was allocated on production volume.
- Fixed overhead was allocated on an average monthly basis.
- Labor and material costs for packing expenses were corrected.

We used the actual selling, general and administrative (SG&A) expenses which exceeded the statutory 10 percent of the material and conversion costs. We revised the SG&A costs as presented by the respondent related to the following:

- Selling, general and administrative expenses were adjusted to include direct and indirect selling, financial and interest expenses.

We calculated profit based on the eight percent minimum, as prescribed in section 773(e)(1)(B)(ii) of the Act.

Negative Determination of Critical Circumstances

The petitioners alleged that imports of OCTG from Taiwan present "critical circumstances." Under section 735(a)(3) of the Act, critical circumstances exist if we find that (1) there is a history of dumping in the United States or elsewhere of the class or kind of the merchandise which is the subject of the investigation; or the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and (2) there have been massive imports of the class or kind of merchandise that is the subject of the investigation over a relatively short period.

We generally consider the following concerning massive imports: (1) The

volume and value of the imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports.

In considering this question, we analyzed recent trade statistics on import levels and import penetration ratios for oil country tubular goods from Taiwan for equal periods immediately preceding and following the filing of the petition. Based on this analysis, we find that imports of the subject merchandise from Taiwan during the period subsequent to receipt of the petition have not been massive when compared to recent import levels and import penetration ratios.

We therefore, did not need to consider whether there is a history of dumping or whether importers knew or should have known that the exporters were dumping the merchandise.

For reasons described above, we determine that "critical circumstances" do not exist with respect to oil country tubular goods from Taiwan.

Verification

In accordance with section 776(a) of the Act, we verified all the information used in making this determination. We were granted access to the books and records of the company involved. We used standard verification procedures, including examination of relevant sales and financial records of the company.

Petitioners' Comments

Comment 1

Due to an absence of verified information, the petitioners contend that the Department should disallow all rebates claimed by the respondent for coil purchases and use, as best information, a weighted average of prices paid by respondent for shipments of coil during 1984 and 1985.

DOC Position

We disagree. Because we could not verify whether 1984 or 1985 coil purchases were used to produce the 2.375 inch pipe under investigation, we used the 1985 purchases, the most recent cost of coil purchased prior to the sales under investigation. The 1984 coil purchases appear to be used for pipe other than OCTG which was produced in 1984. Because we could not verify that the rebate claimed by the respondent was related to these 1985 coil purchases, the rebate was not allowed for 2.375 inch pipe. However, we verified that a rebate credit was received on coil used in the production of 4.5 inch pipes and, therefore, have allocated the rebate to the cost of coil used.

Comment 2

The petitioners assert that the Department should not allow any credits claimed by respondent for waste. The credits are based on theoretical yield rates, not verified data.

DOC Position

We disagree. We computed the credit for waste recovery based on the second quality pipe and the scrap sales values as verified and the yield rates supplied by the respondent. The Department reviewed all the facts pertaining to the yield rates and, based on these facts and because the yield rates were within industry experience, the Department used the company's yield rates for calculating the credit.

Comment 3

The petitioners believe that the variance adjustment for the tolerance standards should be disallowed by the Department. The adjustment in the submission was incorrectly applied to pipe which was not affected by the variance.

DOC Position

We partially agree. For the 4.5 inch pipe we disallowed the theoretical weight adjustment because the thickness of the coil used by the respondent was the same as the thickness of the coil upon which the theoretical weight was measured. Therefore, there would not be a tolerance weight-saving adjustment.

However, for the 2.375 inch pipe we adjusted the theoretical weight adjustment to reflect the verified actual weight savings.

Comment 4

The petitioners contend that annual bonuses paid by the respondent should be allocated throughout the year since they are a recurring annual labor expense.

DOC Position

We agree. Annual bonuses have been allocated throughout the year.

Comment 5

The petitioners assert that the Department should derive an overtime premium to be added to respondent's labor cost for the product under investigation, since the records of the overtime worked were not properly maintained.

DOC Position

We agree. Since the direct labor costs submitted did not adequately reflect overtime, they were adjusted to reflect the weighted average of the monthly cost of the regular and the overtime hours.

Comment 6

The petitioners believe that certain factory overhead charges such as supplies, repair costs, intermediate material costs, and employee welfare expenses should be included in the respondent's factory overhead costs.

DOC Position

We agree. These costs have been included in factory overhead since they were incurred as indirect production costs for the product under investigation.

Comment 7

The petitioners contend that the Department should treat as current expenses, capitalized organizational and the initial testing expenses which are being amortized over five years by the company.

DOC Position

We have accepted the respondent's normal accounting method for amortizing the cost over five years. However, we have included a portion of the amortization expenses which the respondent had excluded in the period of investigation, since these costs relate to the start-up expenses of the operations.

Comment 8

The petitioners assert that the Department should include the transit interest charge on the letters of credit, direct selling expenses such as the Joint Export Promotion Council levy, the expenses attributable to the financial division and the cost of the president's office in selling, general and administrative (SG&A) costs.

DOC Position

We agree. The Department included all of the direct selling expenses for the U.S. sales, including the transit interest charge on letters of credit, because there were no sales of OCTG in the home or third country market. The administrative cost of the financial division and the cost of all corporate administrative expenses, including the cost of the president's office, have been included in general and administrative expenses.

Comment 9

The petitioners contend that the Department should use their information as best information for packing costs since submitted packing costs could not be verified.

DOC Position

We disagree. During verification we obtained sufficient data for packing costs which we used in our calculations.

Comment 10

The petitioners contend that the Department should only allow the amount of those brokerage handling charges on U.S. sales which were verified.

DOC Position

We agree. We have only deducted the verified brokerage and port charges.

Respondent's Comments

Comment 1

The respondent states that the Department should use 1984 raw material costs for 2.375 inch OCTG cost of production and if that is not acceptable, a weighted average of 1984 and 1985 costs.

DOC Position

See response to petitioner's *Comment 1.*

Comment 2

The respondent contends that the Department should apply the entire amount of the discount rebate to the 2.375 inch raw materials purchased in 1984.

DOC Position

See response to petitioner's *Comment 1.*

Comment 3

The respondent asserts that the Department should use the prices of scrap and seconds sold which were verified and not amounts contained in the submission.

DOC Position

The actual verified sales prices of scrap and seconds which were sold were used for the final determination.

Comment 4

The respondent believes that the Department should include in the cost of production an offset for raw materials sold as scrap which was verified.

DOC Position

We agree. The Department included an offset to the cost for raw materials which were sold.

Comment 5

The respondent contends that annual bonuses paid by it should be allocated throughout this year.

DOC Position

See response to petitioners' *Comment 4.*

Comment 6

The respondent alleges that although production records did not provide a basis that any overtime was utilized in OCTG production, submitted unit labor costs accurately reflect overtime hours. No further adjustment should be made to labor costs.

DOC Position

We disagree. While submitted labor costs did purport to account for overtime, these labor costs could not be reconciled with the actual labor information. See response to petitioners' *Comment 1.*

Comment 7

The respondent asserts that factory overhead should be allocated to OCTG production based on labor hours rather than on production quantity.

DOC Position

We disagree. Under the facts in this case, we believe that production volume (measured by weight) is the most appropriate allocation basis for overhead costs. This was the method employed by the respondent in its original submission. The Department concludes that labor hours would not appropriately allocate the costs to the products being manufactured, since this basis did not reflect the actual production time of each product.

Comment 8

The respondent believes that fixed overhead costs should be averaged throughout the year to avoid fluctuations caused by the payments for such expenses not occurring evenly throughout the year.

DOC Position

We agree. We use a method of allocation which averaged fixed overhead costs throughout the year.

Comment 9

The respondent contends that the Department should allocate intermediate supply costs which are not included in the submission by using a basis of labor hours.

DOC Position

We disagree. We believe the cost of the intermediate supplies not included in the submission should be allocated to OCTG under investigation based on production volume since these were incurred as indirect production costs and were included in the factory overhead.

Comment 10

The respondent asserts that the organizational and the initial testing expenses treated as deferred expenses by it were related to OCTG products not under investigation.

DOC Position

Since such costs were related to the production of OCTG as a product line, a proportional amount was included for the product under investigation.

Comment 11

The respondent believes that the research and development and interest expenses it incurred were not related to OCTG products under investigation and, therefore, should not be included.

DOC Position

We disagree. Since we could not verify the nature of the R&D costs, such costs were allocated over all products sold. Interest costs, considered by the Department to be a general corporate expense, likewise were allocated over all products sold.

Comment 12

The respondent contends that the Department should not include any selling costs from the Chia Yi office in SG&A expenses because it handles only domestic sales of which there were none of OCTG.

DOC Position

We agree. Because the product under investigation was not sold in the home market or third country markets, we have used the direct and indirect selling costs for the U.S. market. The costs of the Chia Yi office were not included.

Comment 13

The respondent alleges that packing costs reported in the submission are the best estimate of those costs and should be used by the Department.

DOC Position

See response to petitioner's *Comment 8.*

Comment 14

The respondent requests that the Department extend the period of investigation by one day in order to include one additional sale to the United States so as to have a more representative universe.

DOC Position

We agree and have done so.

Comment 15

The respondent contends that certain charges relating to U.S. sales, such as bank commissions, transit interest charged by banks, contribution to a government reserve for the promotion of trade, etc., should not be deducted from the U.S. sales price because these charges are not additional costs incident to bringing the merchandise to the place of delivery in the United States.

DOC Position

We agree. However, we have added them to the foreign market value because they are part of the SG&A expenses.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to continue to suspend liquidation of all entries of OCTG from Taiwan that are entered, or withdrawn from warehouse, for consumption on or after the date which is on or after the date of publication of the final determination notice in the Federal Register. The U.S. Customs Service shall continue to require a cash deposit or the posting of a bond equal to the estimated weighted average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Article VI.5 of the General Agreement on Tariffs and Trade provides that "[n]o product . . . shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act, which prohibits assessing dumping duties on the portion of the margin attributable to export subsidies. However, we made a negative determination in the final countervailing duty determination on OCTG from Taiwan, because we found that the subsidies were *de minimis*. Therefore, the bonding rate will not be reduced since there were no export subsidies.

Manufacturer/Producer/Exporter	Weighted-average margin percentage
Far East Machinery Company, Ltd.	28.32%
All others	28.32%

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. If the ITC determines that material injury or threat of material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If the ITC determines that such injury does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on OCTG from Taiwan entered, or withdrawn from warehouse, for consumption equal to the amount by which the foreign market value exceeds the United States price. This determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d))

Paul Freedenberg,

Assistant Secretary for Trade Administration.

Toy Balloons (Including Punchballs) and Playballs From Mexico; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of Final Results of Countervailing Duty Administrative Review.

SUMMARY: On March 11, 1986, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty orders on toy balloons (including punchballs) and playballs from Mexico. The review covers the period April 1, 1983 through December 31, 1983 and seven programs.

We gave interested parties an opportunity to comment on the preliminary results. We received no comments. Based on our analysis, the final results of the review are the same as the preliminary results.

EFFECTIVE DATE: May 29, 1986.

FOR FURTHER INFORMATION CONTACT: Paul Marsellan or Stephen Nyschot, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On November 14, 1984, the Department of Commerce ("the Department") published in the Federal Register (49 FR 45039) the final results of its last administrative review of the countervailing duty orders on toy balloons (including punchballs) and playballs from Mexico (47 FR 57532, December 27, 1982). We began this review of the orders under our old regulations on March 2, 1984 and sent a questionnaire to the Mexican government on that day. After the promulgation of our new regulations, the Mexican government, on November 15, 1985, requested that we complete the administrative review, in accordance with § 355.10(a) of the Commerce Regulations. We published the new initiation on November 27, 1985 (50 FR 48825) and the preliminary results of administrative review on March 11, 1986 (51 FR 8347). We have now completed the administrative review, in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of Mexican toy balloons (including punchballs) and playballs. Such merchandise is currently classifiable under items 735.0990 and 737.9536 of the Tariff Schedules of the United States Annotated.

The review covers the period April 1, 1983 through December 31, 1983 and seven programs: (1) FOMEX; (2) CEPROFI; (3) CEDI; (4) FONEI; (5) FOGAIN; (6) import duty reductions and exemptions; and (7) state tax incentives.

Final Results of Review

We gave interested parties an opportunity to comment on the preliminary results. We received no comments. Based on our analysis, we determine the total bounty or grant to be 4.54 percent *ad valorem* for toy balloons (including punchballs) and 3.45 percent *ad valorem* for playballs for the period of review.

The Department will instruct the Customs Service to assess countervailing duties of 4.54 percent of the f.o.b. invoice price on any shipments of toy balloons (including punchballs) and 3.45 percent of the f.o.b. invoice price on any shipments of playballs exported on or after April 1, 1983 and on or before December 31, 1983.

Further, because of the change noted in our preliminary results, the

BEST COPY AVAILABLE

Department will instruct the Customs Service to collect cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, of 2.92 percent of the f.o.b. invoice price of toy balloons (including punchballs) and 1.98 percent of the f.o.b. invoice price of playballs on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.10 of the Commerce Regulations (19 CFR 355.10; 50 FR 32556, August 13, 1985).

Dated: May 22, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

Certain Welded Carbon Steel Pipe and Tube Products From Yugoslavia; Intention To Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Countervailing Duty Orders

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of Intention to Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination To Revoke Countervailing Duty Orders.

SUMMARY: The Department of Commerce has received information which shows changed circumstances sufficient to warrant an administrative review, under section 751(b)(1) of the Tariff Act, of the countervailing duty orders on certain welded carbon steel pipe and tube products from Yugoslavia. The review covers the period from October 16, 1985. The petitioners have notified the Department that they are no longer interested in the countervailing duty orders. This affirmative statement of no interest from domestic interested parties provides a reasonable basis for the Department to revoke the orders. Therefore, we tentatively determine to revoke the orders. In accordance with the petitioners' notification, the revocation will apply to all welded carbon steel pipe and tube products from Yugoslavia entered, or withdrawn from warehouse, for consumption on or after October 16, 1985.

Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: October 16, 1985.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or John Miller, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On December 31, 1985, the Department of Commerce ("the Department") published in the Federal Register, (50 FR 41548) countervailing duty orders on certain welded carbon steel pipe and tube products from Yugoslavia.

The petitioners, the Standard and the Line Pipe Subcommittees of the Committee on Pipe and Tube Imports and Individual producer members of these subcommittees, informed the Department that they are no longer interested in the orders and stated their support of revocation of the orders. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke a countervailing duty order that is no longer of interest to domestic interested parties.

Scope of Review

Imports covered by the review are shipments of Yugoslavian welded carbon steel pipe and tube products of the following description: (1) Welded carbon steel pipe and tube with an outside diameter of 0.375 inch or more but not over 16 inches, of any wall thickness, currently classifiable under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258, and 610.4925 of the Tariff Schedules of the United States Annotated (TSUSA), commonly referred to in the industry as standard pipe or structural tubing, produced to various ASTM specifications, most notably A-120, A-53 or A-135; and (2) welded carbon steel line pipe with an outside diameter of 0.375 inch or more but not over 16 inches, and with a wall thickness of not less than 0.065 inch, currently classifiable under items 610.4306 and 610.3209 of the TSUSA, produced to various API specifications for line pipe, most notably API-5L or API-5LX. The review covers the period from October 16, 1985.

Preliminary Results of Review and Tentative Determination

As a result of our review, we preliminarily determine that the petitioners' affirmative statement of no interest in the continuation of the countervailing duty orders on certain welded carbon steel pipe and tube products from Yugoslavia provides a reasonable basis for revocation of the orders. In light of the October 16, 1985 effective date for revocation requested by the domestic parties, there is good cause (as required by section 751(b)(2) of the Tariff Act) to conduct this review at this time.

Therefore, we tentatively determine to revoke the orders on certain welded carbon steel pipe and tube products from Yugoslavia effective October 16, 1985. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after October 16, 1985, without regard to countervailing duties, and to refund any estimated countervailing duties collected with respect to those entries. The current requirement for a cash deposit of estimated countervailing duties will continue until publication of the final results of this review.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke within 30 days of the date of publication of this notice, and may request a hearing within five days of the date of publication. Any hearing, if requested, will be held 55 days from the date of publication, or the last workday preceding. The Department will publish the final results of the review and its decision on revocation, including its analysis of issues raised in any such written comments or at a hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b), (c)) and §§ 355.41 and 355.42 of the Commerce Regulations (19 CFR 355.41, 355.42).

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

The Electronic Instrumentation Technical Advisory Committee; Partially Closed Meeting

The Electronic Instrumentation Technical Advisory Committee was initially established on October 23, 1973.

BEST COPY AVAILABLE

and rechartered on January 10, 1986, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

Time and place: June 16, 1986 at 9:30 a.m., Herbert C. Hoover Building, Room 3708, 14th Street and Constitution Avenue, NW., Washington, D.C. The meeting will continue to its conclusion on June 17, 1986, in Room 1092, the Herbert C. Hoover Building.

Agenda:

1. Introduction of members and guests.
2. Opening remarks by the Chairman.
3. Public comments invited on revisions to:

CCL-1529—Electronic Test Equipment
CCL-1531—Frequency Synthesizers
CCL-1522—Lasers and Laser Systems
CCL-1533—Radio Spectrum Analysers
CCL-1521—Solid State Broadband Amplifiers
CCL-1541—Cathode Ray Tubes
CCL-1572—Recording and Reproduce Equipment.

Comments should consider the need for revision (strengthening, relaxation, or decontrol) of the current regulations based on technological trends, foreign availability, and national security. The committee is interested in proposals for revision to PRC guidelines and G-COM regulations for the above commodities as well.

Executive Session:

4. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classifed under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof are available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202/377-4217. For further information or copies of the minutes telephone: 202/377-4217.

Dated: May 23, 1986.

Margaret A. Cornejo,

Director, Technical Support Staff, Office of Technology and Policy Analysis.

BILLING CODE 3510-DT-M

National Oceanic and Atmospheric Administration

Marine Sanctuaries; Scoping Meeting on the Proposed Flower Gardens National Marine Sanctuary, TX

AGENCY: Office of Ocean and Coastal Resources Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) is considering the East and West Flower Garden Banks in the Gulf of Mexico for designation as a national marine sanctuary. NOAA will hold a public meeting to gather information to determine the range and significance of issues related to sanctuary designation and management. This meeting will be held on June 24, 1986, from 7:00 to 10:00 PM in the auditorium of the Classroom/Laboratory Building, Texas A&M Mitchell Campus, Pelican Island, Galveston, Texas. All interested persons are invited to attend.

FOR FURTHER INFORMATION CONTACT: Dr. Nancy Foster, (202) 673-5122.

ADDRESS: Division of Marine and Estuarine Management, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue NW., Washington, DC 20235.

SUPPLEMENTARY INFORMATION: Title III of the Marine Protection, Research and Sanctuaries Act of 1972 as amended, 16 U.S.C. 1431 *et. seq.* (the Act), authorizes the Secretary of Commerce to designate ocean waters, over which the United States exercises jurisdiction consistent with international law, as national marine sanctuaries. The purpose of designating national marine sanctuaries is to protect and manage distinctive areas of the marine environment for their conservation, recreational, ecological, historical, research, educational or aesthetic values which give these areas special national significance. The Act is administered by the National Oceanic and Atmospheric Administration (NOAA) through the Office of Ocean and Coastal Resource Management (OCRM), Division of Marine and Estuarine Management (DMEM).

Natural Resources

The East and West Flower Garden Banks are some 115 miles (185 km) southeast of Galveston, Texas, at the edge of the continental shelf. The Banks, approximately 16 miles (25 km) apart, are salt domes from which coral reefs rise from a depth of 148 feet (45 m) to a crest of about 50 feet (15 m) below the water surface. The living reefs, consisting of massive, closely-packed heads produced by at least 18 species of tropical corals, are the northernmost tropical Atlantic coral reefs on the continental shelf.

The Flower Garden Banks support the most ecologically complex and biologically productive reef communities of the Texas-Louisiana outer continental shelf. These Banks harbor at least 80 species of algae, 196 known macro-invertebrate species, and more than 175 fish species. One of the most scientifically interesting components of the Bank ecosystem lies well below the coral reefs. At a depth of 233 feet (71 m) on the margin of East Flower Garden Bank, a community of organisms exists in the area of a brine seep, where the high salinity, high sulfide, anoxic brine would be toxic to most marine biota.

Higher on the Banks, the reef-building corals and coralline algae are the most important organisms because they maintain the substratum for the benthic reef communities. These reefs are characterized by a diverse assemblage of epibenthos. The Banks are believed to be a significant nursery area for brown shrimp, a species of commercial importance. Several species of lobster have been observed on the reefs. The pelagic fish found at the Banks include several commercially important species of snappers and groupers. Loggerhead turtles and spotted dolphins are casual visitors to the Flower Gardens.

Human Uses

Oil and gas production operations occur outside of a no-activity zone, established by the Minerals Management Service, encompassing the 100 meter isobath surrounding each Bank. The Banks are close to a shipping safety fairway, and the area is transited by commercial cargo vessels. Commercial fishermen harvest red and vermilion snapper and groupers in Bank

waters. Recreational use consists of sport fishing and diving.

The Designation Process

The preliminary consultation on the Flower Garden Banks as a potential site for a national marine sanctuary was initiated with a notice published in the Federal Register on May 4, 1984, 49 FR 19094. A summary of comments received in the preliminary consultation was published August 2, 1984, in an announcement that the Flower Garden Banks had been selected as an active candidate for sanctuary designation and the NOAA intended to prepare a draft environmental impact statement and management plan for the proposed sanctuary, 49 FR 30988.

The announcement marked the second time that the Flower Garden Banks had become an active candidate. In 1979 the site was placed on the list of active candidates, but was removed in 1982 when it appeared that the Flower Gardens would be adequately protected by a Coral Fishery Management Plan (FMP). The FMP, however, does not regulate anchoring on the Banks by large cargo vessels. Such anchoring has been identified as the major cause of damage to the Flower Garden coral reefs. A more detailed discussion of the history of the Flower Gardens as an active candidate and the reasons for its reselection can be found in the selection announcement, 49 FR 30988.

The management plan to be prepared for the proposed sanctuary will specify the goals and objectives of sanctuary designation and describe programs for resource protection, research and interpretation. Implementation of the management plan is analyzed in the environmental impact statement.

Opportunites for public participation in NOAA's development of an environmental impact statement and management plan will be provided through the June scoping meeting, solicitation of comments on the draft environmental impact statement, and formal public hearings.

The June scoping meeting will attempt to identify issues in establishing a Flower Gardens national marine sanctuary and generate suggestions for resolving them. Topics for discussion will include the following: (1) Boundary alternatives, (2) Management alternatives, (3) Resource protection, (4) Research opportunities and (5) Interpretive opportunities.

Federal Domestic Assistance Catalog No. 11.429 Marine Sanctuary Program

Dated: May 22, 1986.

Peter L. Tweedt,

Director, Office of Ocean and Coastal Resource Management.

BILLING CODE 3510-08-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amending Visa Requirement for Cotton, Wool and Man-Made Fiber Apparel Exported from the Republic of Maldives

May 22, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 28, 1986. For further information contact Claudia Wolfe, International Economist, Office of Textiles and Apparel, U.S. Department of Commerce, (202)377-4212.

Background

A CITA directive dated August 18, 1982, (47 FR 36879, Aug. 24, 1982) established a new export visa requirement for cotton, wool, and man-made fiber apparel products in categories 330-359, and 630-659, produced or manufactured in the Maldives and exported to the United States.

The purpose of this notice is to inform the public of the new visa stamp.

The new stamp is published as an enclosure to the letter to the Commissioner of Customs which follows this notice.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

May 22, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of August 18, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements which established an export visa requirement for cotton, wool and man-made fiber apparel products from the Republic of Maldives.

Effective on May 28, 1986, the directive of August 18, 1982 if further amended to discontinue use of the current visa stamp. Such goods, exported on and after May 28, 1986, shall be visaed using a circular stamp in blue ink on the front of the invoice (Special Customs Invoice Form 5515, successor document, or commercial invoice when such form is used) and will be signed by an authorized official of the Government of the Republic of Maldives. A facsimile of the visa stamp is enclosed.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Commissioner for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Enclosure

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATON

Federal Acquisition Regulation (FAR), Agency Information Collection Activities Under OMB Review.

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office

of Management and Budget (OMB) a request to review and approve a new information collection.

ADDRESS: Send comments to Franklin S. Reeder, FAR Desk Officer, Room 2215, NEOB, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781 or Mr. Owen Greene, Defense Acquisition Regulatory Council, (703) 697–7268.

SUPPLEMENTARY INFORMATION:

a. Purpose

This request covers the collection of information to implement the requirements of Title II, Section 201, Pub. L. 99–234, Federal Civilian Employee and Contractor Travel Expense Act of 1985. implementation of the statute required creation of a justification document to support higher actual cost reimbursements for lodging, meals, and incidental expenses than permitted by normally prescribed per diem rates. The creation of this document is required only in extraordinary and temporary situations when application of normal per diem rates is inappropriate. The justification is needed to (1) assure that use of the higher actual cost method is controlled and not abused, and (2) provide a basis for audit verfication of contractor actions.

b. Annual reporting burden

This is estimated as follows: Respondents, 16,000; reponses 160,000; and reporting and recordkeeping hours, 40,000.

Obtaining copies of proposals: Requesters may obtain copies from the FAR Secretariat (VRS), Room 4041, GS Building, Washington, DC 20405, telephone (202) 523–4755.

Dated: May 23, 1986.

Margaret A. Willis,

FAR Secretariat.

BILLING CODE 6820–61–M

DEPARTMENT OF EDUCATION

Proposed Information Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resource Management Service invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before June 30, 1986.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 4074, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426–7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with an agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests prior to the submisson of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, exisiting or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: May 23, 1986.

George P. Sotos,

Director, Information Resources Management Service.

DATE: June 13, 1986, 9 a.m.–5 p.m.

ADDRESS: U.S. Department of Education, FOB–6, Conference Room 3000, 400 Maryland Avenue, SW., Third Floor, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Mary Grace Lucier, Acting Executive Director, National Council on Educational Research, 2000 L St., NW., Suite 617 B, Washington, DC 20036, (202) 254–7490.

SUPPLEMENTARY INFORMATION: The National Council on Educational Research is established under section 405 of the General Education Provisions Act (20 U.S.C. 1221e); Department of Education organization plan

implemented pursuant to section 413 of Pub. L. 96–88 and notice to Congress dated July 2, 1985. The Council is established to advise the Secretary of Education on policies and priorities for the Office of Educational Research and Improvement (OERI), and to review the conduct of OERI and to advise the Secretary of Education and the Assistant Secretary of OERI on development of programs to be carried out by OERI.

The meeting of the Council is open to the public. The agenda includes: reports from committee chairmen, from OERI officials, and from Dr. Patrick Groff, Professor of Education at San Diego State University, on reading instruction research.

Records are kept of all Council proceedings, and are available for public inspection at the office of the National Council on Educational Research, 2000 L St., NW., Suite 617 B, Washington, DC, 20036, from the hours of 9 a.m. to 5 p.m. Monday through Friday.

Dated: May 23, 1986.

Mary Grace Lucier,

Acting Executive Director.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement".

The subsequent arrangement involves the loan of 6,780 kilograms of depleted uranium for use as a calorimeter at the Centre European De Reches Nucleaires (CERN), Geneva, Switzerland. Contract Number WC–SD–24 has been assigned for this transaction.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: May 23, 1986.

George J. Bradley, Jr.,

Acting Assistant Secretary for International Affairs and Energy Emergencies.

[FR Doc. 86–12040 Filed 5–28–86; 8:45 am]

BILLING CODE 6450–01–M

National Petroleum Council Economic and Environmental Impacts Task Group; Meeting

Notice is hereby given that the Economic and Environmental Impacts Task Group will meet in June 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Economic and Environmental Impacts Task Group will evaluate the impact of the 1970's energy crises on the U.S. economics—economic growth, employment, inflation, oil and gas industry cash flow, capital investment, international trade, the financial markets (U.S. and international), real interest rates, etc. This Task Group will also analyze the potential future economic impact of the factors on issues identified by the other Task Groups.

The Economic and Environmental Impacts Task Group will hold its second meeting on Monday, June 2, 1986, starting at 10:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, DC.

The tentative agenda for the Economic and Environmental Impacts Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review and rank factors affecting supply and demand.
3. Discuss Group assignments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Economic and Environmental Impacts Task Group is empowered to conduct the meeting in a fashion that will, in his judgement, facilitate the orderly conduct of business. Any member of public who wishes to file a written statment with the Economic and Environmental Impacts Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353–2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 21, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

Economic Regulatory Administration

Energy Stripper Well Exemption Litigation; Execution of Agreement

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Execution of Settlement Agreement in the *Department of Energy Stripper Well Exemption Litigation.*

SUMMARY: The Economic Regulatory Administration of the United States Department of Energy (DOE) hereby gives notice that on May 21, 1986, the Under Secretary of Energy, Joseph F. Salgado, signed a Settlement Agreement in the *Department of Energy Stripper Well Exemption Litigation,* M.D.L. 378 (D. Kan.). The Agreement will not become effective until approved by the United States District Court for the District of Kansas. If approved, the Agreement will resolve the distribution of funds held in escrow by the court as well as provide for the disposition of funds resulting from other pending crude oil overcharge cases where refunds cannot be made to identifiable injured parties. It will also resolve a number of cases concerning the Entitlements Program, 10 CFR 211.66, 211.67, including *Texaco, Inc. et al.* v. *Department of Energy, et al.,* Nos. 3–44 through 3–49, (Temp. Em. Ct. App.). The Agreement has been submitted to the district court for its approval and a June 13, 1986, hearing on the agreement that has been sought.

FOR FURTHER INFORMATION CONTACT: Carl A. Corallo, Solicitor, Economic Regulatory Administration, U.S. Department of Energy, RG–40, 1000 Independence Avenue SW., Washington, DC 20585, 202–253–4167.

A copy of the Agreement is available for inspection or copying at the DOE Freedom of Information Reading Room. The Reading Room is located in Room 1E–190 of the Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, and can be reached at 202–252–6020.

Issued in Washington, DC, on May 22, 1986.

Marshall A. Staunton,

Acting Administrator, Economic Regulatory Administration.

Economic Regulatory Administration

[Docket No. ERA-CAE-86-349; OFP Case No. 65036-9314-30-24]

Order Granting to O.L.S. Energy-Camarillo Exemption From the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Order Granting to O.L.S. Energy-Camarillo Exemption from the Prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978, 42, U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to O.L.S. Energy-Camarillo (OLS), Camarillo, California. The permanent cogeneration exemption permits the use of natural gas as the primary energy source for a 27.5 MW (net, approximate) combined cycle cogeneration facility designed to produce electricity and process steam at the Camarillo State Hospital (CSH), Camarillo, California. The final exemption order and detailed information on the proceeding are provided in the **SUPPLEMENTARY INFORMATION** section, below.

DATES: The order shall take effect on July 28, 1986. The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

George G. Blackmore, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA–093, Washington, DC 20585, Telephone (202) 253–1774

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building, Room 6A–113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252–6947

SUPPLEMENTARY INFORMATION: On February 24, 1986, OLS petitioned ERA under section 212(c) of FUA and 10 CFR 503.37 for a permanent cogeneration exemption to permit the use of natural gas in a 27.5 MW (net, approximate) combined cycle cogeneration facility consisting of a gas turbine generator, a waste heat recovery boiler, a steam extraction turbine generator and ancillary equipment. As all of the net annual generation of electric power from the unit will be sold to Southern California Edison Company, the unit is, by definition, an electric powerplant under 10 CFR 500.2. The facility will produce approximately 10,650 lbs. of low pressure steam per hour which will supply CSH's heating and process steam needs. OLS will operate the facility.

Basis for Permanent Exemption Order: The permanent exemption order is based upon evidence in the record including OLS's certification to ERA, in accordance with 10 CFR 503.37(a)(1), that:

1. The oil or natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of such cogeneration facility, in accordance with 10 CFR 503.37(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility will not be technically feasible, in accordance with 10 CFR 503.37(a)(1)(ii).

Procedural Requirements: In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 501.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the Federal Register on March 26, 1986 (51 FR 10423), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on May 12, 1986; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that OLS has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to OLS to permit the use of natural gas as the primary energy source for its cogeneration facility at CHS in Camarillo, California.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the **Federal Register**.

Issued in Washington, DC, on May 20, 1986.

Berton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

Natural Gas Pipeline Co. of America; Order Approving Amendments to an Authorization To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Department of Energy.
ACTION: Notice of Order Approving Amendments To Import Natural Gas From Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order approving amendments to import natural gas from Canada to Natural Gas Pipeline Company of America (Natural). The order issued in ERA No. 85-24-NG authorizes Natural to continue to import up to 75,000 Mcf per day through October 31, 1987, from ProGas Limited (ProGas) under a modified two-part demand-commodity pricing structure that eliminates take-or-pay requirements and provides for periodic price Adjustment based on changes in fixed facility costs and competing alternate fuels.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, 20585. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, May 16, 1986.

Double "C" CoGen, Inc.; Acceptance of Petition For Exemption and Availability of Certification

AGENCY: Economic Regulatory Administration, Department of Energy.
ACTION: Notice of Acceptance of Petition for Exemption and Availability of Certification by Double "C" Co-Gen, Inc.

SUMMARY: On May 7, 1986, Double "C" CoGen, Inc. (Double "C" CoGen) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption for a cogeneration facility to be located in Kern County, California, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Double "C" CoGen is petitioning for an exemption based on the lack of alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rules setting forth criteria and procedures for petitioning for this type of exemption from the prohibition of Title II of FUA are found in 10 CFR 503.32.

The proposed facility for which the petition was filed will consist of two

natural gas-fired combustion turbine generators, and two unfired heat recovery steam generators which will produce approximately 48.8 megawatts (net) of electricity. The gas turbine exhaust gases will be ducted to the heat recovery steam generators. The steam generators will utilize the heat in the hot exhaust gases to produce approximately 106,400 pounds per hour of steam to be used for enhanced oil recovery by Carrec Oil Associates and by Cities Service Oil and Gas Corporation. The electricity produced will be sold to the Pacific Gas & Electric Company.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the SUPPLEMENTARY INFORMATION section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501–31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E–190, Washington, DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless REA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the Federal Register.

DATE: Written comments are due on or before July 14, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESS: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case control Unit, Office of Fuels Programs, Room GA–093, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585.

Docket No. ERA–C&E–86–41 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Myra Couch, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–093, 1000 Independence Avenue, SW, Washington, DC 20585, Telephone (202) 252–6769

Steven E. Ferguson, Esq., Office in General Counsel, Department of Energy, Forrestal Building, Room 6A–113, 1000 Independence Avenue, SW, Washington, DC 29585, Telepone (202) 252–2947

SUPPLEMENTARY INFORMATION: Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. To qualify the petitioner must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exist, as required under § 503.9 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternative sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.32(b) (and in addition to the certification discussed above), Double "C" CoGen has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.;* and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 26, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the Federal Register as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that Double "C" CoGen is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the pulbic comment period provided for in this notice.

Issued in Washington, DC, on May 19, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

Avant Petroleum, Inc.; Final Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Final action on proposed consent order.

SUMMARY: The Economic Regulatory Administration (ERA) has determined that a proposed Consent Order between the Department of Energy (DOE) and Avant Petroleum, Inc. (Avant) shall be made final as proposed. The Consent Order resolves the issues of Avant's compliance for the period August 1978 through December 1980 with DOE's regulations regarding resales of crude oil. Avant will pay to the DOE $1,700,000 for distribution pursuant to 10 CFR Part 205, Subpart V. Persons claiming to have been harmed by Avant's alleged overcharges will be able to present their claims for refunds in an administrative claims proceeding before the Office of Hearings and Appeals (OHA). The decision to make the Avant Consent Order final was made after a full review of written comments from the public.

FOR FURTHER INFORMATION CONTACT: Ben Lemos, Director, Office of Field Operations, Economic Regulatory Administration, U.S. Department of Energy, 1403 Slocum, Second Floor, Dallas, Texas 75207, Tel: (214) 767–4646.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Comments Received
III. Analysis of Comments
IV. Decision

I. Introduction

On April 1, 1986, ERA published a Notice announcing a proposed Consent Order between DOE and Avant which would resolve matters pertaining to Avant's compliance with the regulations regarding resales of crude oil (51 FR 11086). The proposed Consent Order required Avant to pay $1,700,000.

The April 1, Notice sets forth ERA's view that the settlement is favorable to the government and in the public interest. The Notice solicited written comments from the public relating to the adequacy of the terms and conditions of the settlement, and whether the settlement should be made final.

II. Comments Received

ERA received two timely written comments. The comments addressed only the ultimate disposition or distribution of the Avant settlelement funds. The adequacy of the settlement amount or the terms and conditions of the proposed Consent Order was not addressed.

III. Analysis of Comments

The April 1 Notice solicited written comments to enable the ERA to receive information from the public relevant to the decision as to whether the proposed Consent Order should be finalized as proposed, modified or rejected.

The comments received voiced no objection to the basis or adequacy of the settlement.

ERA has determined that the distribution of the settlement funds should be the subject of a separate Subpart V proceeding conducted by OHA, to be initiated shortly after publication of this Notice. This is consistent with ERA's general policy that the special refund procedures of Subpart V are best suited for cases, such as this, in which ERA cannot readily identify the injured parties or their relative amount of economic harm.

Comments on the actual disbursement of money, accordingly, will not be addressed here, but will be referred to OHA for consideration in the Avant Consent Order claims proceeding.

The review and analysis of the comments did not provide any information that would support the modification or rejection of the proposed Consent Order with Avant. Accordingly, ERA concludes that the Consent Order is in the public interest and should be made final.

IV. Decision

By this Notice, and pursuant to 10 CFR 205.199J, the proposed Consent Order between Avant and DOE executed on February 6, 1986, is made a final Order of the Department of Energy, effective on the date of publication of this Notice in the Federal Register.

Issued in Dallas, Texas, on the 5th day of May, 1986.

Ben Lemos,

Director, Office of Field Operations, Economic Regulatory Administration.

Petro-Canada Hydrocarbons Inc.; Application To Import Natural Gas From Canada

AGENCY: Department of Energy; Economic Regulatory Administration, DOE.

ACTION: Notice of application for authorization to import natural gas from Canada for direct sale to an industrial end user.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on February 18, 1986, of an application filed by Petro-Canada Hydrocarbons Inc. (PCH) for authorization to import up to 20,500 Mcf per day of Canadian natural gas, not to exceed a total of 150 Bcf over a 20-year period beginning on or about July 1, 1986. The gas would be imported form PCH's parent company, Petro-Canada Inc. (PCI), and sold directly to the United States Borax & Chemical Corporation (Borax) for use in Borax's manufacturing operations. The price of the gas to PCH would be determined by adjusting on initial base price of $4.10 per MMBtu each month based on changes in the price at which PCH resells the gas to Borax which, in turn, would reflect changes in the acquisition costs for natural gas in California and the world average crude oil price.

The application is filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m., e.d.t., on June 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9482

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6667.

SUPPLEMENTARY INFORMATION: On February 18, 1986, PCH filed an application with the ERA to import up to 20,500 Mcf per day of Canadian natural gas, not to exceed a total of 150 Bcf over a 20-year term beginning on or about July 1, 1986. PCH proposes to import the gas from its parent company, PCI, whose parent company, in turn, is Petro-Canada, a company wholly-owned by the Canadian government. PCH states that the gas would be imported via the import point near Sumas, Washington, and sold directly to Borax for use in Borax's manufacturing operations. Transportation of the gas from the Canadian border to the California border would be either through pipelines owned by Northwest Pipeline Corporation or Pacific Gas Transmission Company, or both, or by the El Paso Natural Gas Company. Transportation from the California border to Borax's facilities in Boron, California, would be via pipelines owned by the Pacific Gas and Electric Company. Only existing facilities would be used under PCH's import proposal.

The natural gas sale and purchase agreement dated January 1, 1986, between PCH and PCI provides that the selling price of the gas to PCH will be determined by adjusting an initial base price of $4.10 per MMBtu each month based on changes in the price at which PCH resells the gas to Borax, which, in turn, would be determined monthly in response to changes in the average acquisition costs for natural gas in California and the average world crude oil price. The seling price to PCH, however, may not be lower than the Canadian natural gas export floor price for exports from British Columbia. PCH is required by the gas sale and purchase agreement to take or pay for a quantity of natural gas equal to seventy percent of the annual contract quantity. The take-or-pay obligation in the PCH/PCI purchase agreement is automatically adjusted in accordance with adjustments in the take-or-pay obligations made under the PCH/Borax gas supply agreement. Take-or-pay gas may be made up in subsequent years of the contract. Although there is no market-out provision, take-or-pay obligations may be reduced under certain circumstances specified in a force majeure clause contained in the PCH/PCI contract.

I support of its import proposal, PCH asserts that the primary source of the gas to be imported will be from gas wells owned by PCI in British Columbia. PCH points out that Canadian gas has long been a secure and dependable source of natural gas supply. Since the gas is not for pipeline supply or local distribution resale, PCH also asserts that marketability and need for the gas is established by the fact that the arrangement was negotiated at arm's length with the ultimate industrial consumer of the gas.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-9478. They must be filed no later than 4:30 p.m. June 30, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of PCH's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, (202) 252-9478, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on May 20, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 82-08-NG]

Natural Gas Imports; Texas Gas Transmission Corp.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of the receipt on March 27, 1986, of an amendment to the application of Texas Gas Transmission Corporation (Texas Gas) filed on July 16, 1982. The amendment reduces the quantity, price and term of the proposed arrangement.

The application was filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than June 30, 1986.

FOR FURTHER INFORMATION CONTACT:

Robert M. Stronach, Natural Gas Divisoin, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Ave., SW., Washington, DC 20585, (202) 252-9622

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6667.

SUPPLEMENTARY INFORMATION: The Texas Gas application, filed on July 16, 1982, and noticed in the Federal Register on September 9, 1982 (47 FR 39716), has been held in abeyance since April 16, 1984, at the request of Texas Gas, to enable it to amend its application to conform with the new DOE policy guidelines as directed by the ERA's order of February 16, 1984.

The original gas sales arrangement between Texas Gas and ProGas, dated October 28, 1981, was amended by subsequent agreements dated March 26, 1982 and June 11, 1982, (47 FR 39716). An August 29, 1985, agreement, reducing the volume from 180,200 Mcf per day to 135,000 Mcf per day, was superseded by a January 23, 1986, agreement both of which were submitted to the ERA as a part of the present filing. The latter and most recent agreement contains quantity, price, renegotiation, and cancellation provisions which modify the 1981 amended agreement.

With respect to the daily contract quantity, the volumes imported prior to November 1, 1987, will be on a best-efforts basis. Commencing November 1, 1987, Texas Gas requests authorization to import a reduced volume of up to 80,000 Mcf per day; commencing November 1, 1988, a volume of up to 100,000 Mcf per day; and, commencing November 1, 1989, and thereafter, a volume of up to 135,000 Mcf per day.

The price of the gas would be determined by a two-part rate. The initial monthly demand charge would be $15.21 (U.S.) per Mcf of daily contract quantity in effect during the month and the initial commodity charge would be $2.00 (U.S.) per MMBtu, both to be adjusted semi-annually at the request of either party and subject to arbitration if either party cannot agree upon a new price. The monthly demand charge would be obtained by multiplying the daily contract quantity for a particular month by the demand charge per Mcf for that month, and the commodity charge would be determined by multiplying the MMBtu's of imported gas by the commodity charge for that month. Texas Gas and ProGas recognize that there may be situations where special term and price arrangements are necessary in order to assure a market for some portion of the available gas. Under these circumstances, ProGas may offer certain volumes of gas as special purchase gas at a price determined by multiplying the MMBtu's of such gas by a special commodity charge as agreed to by the parties.

If, as result of the uncertainty of the Federal Energy Regulatory Commission's Order No. 436, particularly if Part D (block billing) is adopted, it is not possible to determine that the initial demand and commodity prices are competitive, the parties propose to meet to determine demand and commodity price levels that are low enough to be competitive in the Texas Gas marketplace. However, if the parties cannot agree, either party may cancel the January 23, 1986, agreement by giving the other party 30-days written notice.

For the contract years commencing November 1, 1987, and thereafter, the monthly demand charge is proposed to be the product of the daily contract quantity and the sum of a TransCanada Toll, a NOVA Toll, a Producer Toll, and a ProGas Toll, all per Mcf. The TransCanada Toll is the transportation cost of firm gas on TransCanada PipeLines Limited's system to the point of delivery; the NOVA Toll is the average monthly demand toll billed by NOVA, an Alberta corporation, to ProGas in the preceding contract year; the Producer Toll is the average monthly fixed cost for gas purchased by ProGas from producers in the Province of Alberta in the preceding contract year; and the ProGas Toll is the average monthly toll billed by ProGas to Texas Gas for monthly services in the preceding contract year. The tolls would be determined in Canadian dollars and converted to U.S. dollars, and the monthly demand charge based upon the tolls would be adjusted up or down as appropriate. The commodity charge would be adjusted by an equivalent amount in the opposite direction so that the unit charge remains the same at 100 percent load factor.

Texas Gas under the purchase agreement, in order to avoid extreme variations between summer and winter deliveries, proposes to purchase volumes in the contract year commencing November 1, 1987, and each contract year thereafter, which are no less than ratable with its purchases from domestic producers during the seven month period from April 1 to October 31. Under the same agreement, ProGas proposes, on a best-efforts basis within authorized limitations, to provide volumes exceeding the daily contract quantity upon request by Texas Gas. Texas Gas has not requested the ERA to authorize any contract quantities exceeding the volumes previously stated.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

Unless specifically requested to do so, the ERA has decided not to give further consideration to the comments or requests for further procedures from intervenors in response to the notice of application in this docket published in the Federal Register on September 9, 1982 (47 FR 39716). Those responses have been overtaken by events, including amendments to the 1981 sales agreement in 1985 and 1986 and subsequent changes in both U.S. and Canadian energy policy, regulation, and natural gas markets. However, those intervenors are parties to this application and their comments on this amendment are solicited herein.

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076-A, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-9478. They must be filed no later than 4:30 p.m. e.d.t., June 30, 1986.

The Administrator intends to develop a decisional record on the application through responses to the notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional witten comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is

material and relevent to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based upon the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.
